

Documentation

Developer documentation for Firebase

Docs

- [Documentation](https://firebase.google.com/docs.md.txt): Developer documentation for Firebase
- [SchemaShared interface](https://firebase.google.com/docs/reference/js/ai.schemashared.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SpeechConfig interface](https://firebase.google.com/docs/reference/js/ai.speechconfig.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [StartChatParams interface](https://firebase.google.com/docs/reference/js/ai.startchatparams.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ThinkingConfig interface](https://firebase.google.com/docs/reference/js/ai.thinkingconfig.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ToolConfig interface](https://firebase.google.com/docs/reference/js/ai.toolconfig.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Transcription interface](https://firebase.google.com/docs/reference/js/ai.transcription.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VertexAIBackend class](https://firebase.google.com/docs/reference/js/ai.vertexaibackend.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VertexAIOptions interface](https://firebase.google.com/docs/reference/js/ai.vertexaioptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [WebAttribution interface](https://firebase.google.com/docs/reference/js/ai.webattribution.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Analytics interface](https://firebase.google.com/docs/reference/js/analytics.analytics.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AnalyticsCallOptions interface](https://firebase.google.com/docs/reference/js/analytics.analyticscalloptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ConsentSettings interface](https://firebase.google.com/docs/reference/js/analytics.consentsettings.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ControlParams interface](https://firebase.google.com/docs/reference/js/analytics.controlparams.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [CustomParams interface](https://firebase.google.com/docs/reference/js/analytics.customparams.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GtagConfigParams interface](https://firebase.google.com/docs/reference/js/analytics.gtagconfigparams.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AppCheckTokenResult interface](https://firebase.google.com/docs/reference/js/app-check.appchecktokenresult.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [CustomProviderOptions interface](https://firebase.google.com/docs/reference/js/app-check.customprovideroptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirebaseOptions interface](https://firebase.google.com/docs/reference/js/app.firebaseoptions.md.txt): The Firebase

JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [FirebaseServerAppSettings interface]
(<https://firebase.google.com/docs/reference/js/app.firebaseserverappsettings.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [auth package](<https://firebase.google.com/docs/reference/js/auth.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ActionCodeInfo interface]
(<https://firebase.google.com/docs/reference/js/auth.actioncodeinfo.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ActionCodeURL class]
(<https://firebase.google.com/docs/reference/js/auth.actioncodeurl.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AdditionalUserInfo interface]
(<https://firebase.google.com/docs/reference/js/auth.additionaluserinfo.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Auth interface](<https://firebase.google.com/docs/reference/js/auth.auth.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AuthCredential class]
(<https://firebase.google.com/docs/reference/js/auth.authcredential.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Config interface](<https://firebase.google.com/docs/reference/js/auth.config.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ConfirmationResult interface]
(<https://firebase.google.com/docs/reference/js/auth.confirmationresult.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [EmailAuthCredential class]
(<https://firebase.google.com/docs/reference/js/auth.emailauthcredential.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GithubAuthProvider class]
(<https://firebase.google.com/docs/reference/js/auth.githubauthprovider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [MultiFactorAssertion interface]
(<https://firebase.google.com/docs/reference/js/auth.multifactorassertion.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [MultiFactorInfo interface]
(<https://firebase.google.com/docs/reference/js/auth.multifactorinfo.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [MultiFactorSession interface]
(<https://firebase.google.com/docs/reference/js/auth.multifactorsession.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ParsedToken interface]
(<https://firebase.google.com/docs/reference/js/auth.parsedtoken.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PasswordPolicy interface]
(<https://firebase.google.com/docs/reference/js/auth.passwordpolicy.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PasswordValidationStatus interface]
(<https://firebase.google.com/docs/reference/js/auth.passwordvalidationstatus.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Persistence interface]
(<https://firebase.google.com/docs/reference/js/auth.persistence.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PhoneAuthProvider class]
(<https://firebase.google.com/docs/reference/js/auth.phoneauthprovider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PhoneMultiFactorAssertion interface]
(<https://firebase.google.com/docs/reference/js/auth.phonemultifactorassertion.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [PhoneMultiFactorEnrollInfoOptions interface]
(<https://firebase.google.com/docs/reference/js/auth.phonemultifactorenrollinfooptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PhoneMultiFactorGenerator class]
(<https://firebase.google.com/docs/reference/js/auth.phonemultifactorgenerator.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PhoneMultiFactorInfo interface]
(<https://firebase.google.com/docs/reference/js/auth.phonemultifactorinfo.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PopupRedirectResolver interface]
(<https://firebase.google.com/docs/reference/js/auth.popupredirectresolver.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ReactNativeAsyncStorage interface]
(<https://firebase.google.com/docs/reference/js/auth.reactnativeasyncstorage.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [RecaptchaParameters interface]
(<https://firebase.google.com/docs/reference/js/auth.recaptchaparameters.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SAMLAuthProvider class]
(<https://firebase.google.com/docs/reference/js/auth.samlauthprovider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TotpMultiFactorAssertion interface]
(<https://firebase.google.com/docs/reference/js/auth.totpmultifactorassertion.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TotpMultiFactorGenerator class]
(<https://firebase.google.com/docs/reference/js/auth.totpmultifactorgenerator.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TotpMultiFactorInfo interface]
(<https://firebase.google.com/docs/reference/js/auth.totpmultifactorinfo.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TotpSecret class](<https://firebase.google.com/docs/reference/js/auth.totpsecret.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TwitterAuthProvider class]
(<https://firebase.google.com/docs/reference/js/auth.twitterauthprovider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [UserInfo interface](<https://firebase.google.com/docs/reference/js/auth.userinfo.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [UserMetadata interface]
(<https://firebase.google.com/docs/reference/js/auth.usermetadata.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Database class](<https://firebase.google.com/docs/reference/js/database.database.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DataSnapshot class]
(<https://firebase.google.com/docs/reference/js/database.datasnapshot.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [IteratedDataSnapshot interface]
(<https://firebase.google.com/docs/reference/js/database.iterateddatasnapshot.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TransactionResult class]
(<https://firebase.google.com/docs/reference/js/database.transactionresult.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [@firebase/firestore](https://firebase.google.com/docs/reference/js/firestore_.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase

services.

- [AggregateQuerySnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_.aggregatequerysnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AggregateSpec interface]
(https://firebase.google.com/docs/reference/js/firestore_.aggregatespec.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Bytes class](https://firebase.google.com/docs/reference/js/firestore_.bytes.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [CollectionReference class]
(https://firebase.google.com/docs/reference/js/firestore_.collectionreference.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentChange interface]
(https://firebase.google.com/docs/reference/js/firestore_.documentchange.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentData interface]
(https://firebase.google.com/docs/reference/js/firestore_.documentdata.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FieldPath class](https://firebase.google.com/docs/reference/js/firestore_.fieldpath.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FieldValue class]
(https://firebase.google.com/docs/reference/js/firestore_.fieldvalue.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirestoreDataConverter interface]
(https://firebase.google.com/docs/reference/js/firestore_.firestoredataconverter.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirestoreError class]
(https://firebase.google.com/docs/reference/js/firestore_.firestoreerror.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirestoreSettings interface]
(https://firebase.google.com/docs/reference/js/firestore_.firestoresettings.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GeoPoint class](https://firebase.google.com/docs/reference/js/firestore_.geopoint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [IndexConfiguration interface]
(https://firebase.google.com/docs/reference/js/firestore_.indexconfiguration.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [IndexField interface]
(https://firebase.google.com/docs/reference/js/firestore_.indexfield.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [LoadBundleTask class]
(https://firebase.google.com/docs/reference/js/firestore_.loadbundletask.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [MemoryCacheSettings interface]
(https://firebase.google.com/docs/reference/js/firestore_.memorycachesettings.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [MemoryEagerGarbageCollector interface]
(https://firebase.google.com/docs/reference/js/firestore_.memoryeagergarbagecollector.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [MemoryLocalCache interface]
(https://firebase.google.com/docs/reference/js/firestore_.memorylocalcache.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [MemoryLruGarbageCollector interface]
(https://firebase.google.com/docs/reference/js/firestore_.memorylrugarbagecollector.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PersistenceSettings interface]
(https://firebase.google.com/docs/reference/js/firestore_.persistencesettings.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PersistentCacheSettings interface]
(https://firebase.google.com/docs/reference/js/firestore_.persistentcachesettings.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PersistentLocalCache interface]
(https://firebase.google.com/docs/reference/js/firestore_.persistentlocalcache.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PersistentMultipleTabManager interface]
(https://firebase.google.com/docs/reference/js/firestore_.persistentmultipletabmanager.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PersistentSingleTabManager interface]
(https://firebase.google.com/docs/reference/js/firestore_.persistentsingletabmanager.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PersistentSingleTabManagerSettings interface]
(https://firebase.google.com/docs/reference/js/firestore_.persistentsingletabmanagersettings.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryConstraint class]
(https://firebase.google.com/docs/reference/js/firestore_.queryconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryEndAtConstraint class]
(https://firebase.google.com/docs/reference/js/firestore_.queryendatconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryLimitConstraint class]
(https://firebase.google.com/docs/reference/js/firestore_.querylimitconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QuerySnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_.querysnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryStartAtConstraint class]
(https://firebase.google.com/docs/reference/js/firestore_.querystartatconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SnapshotMetadata class]
(https://firebase.google.com/docs/reference/js/firestore_.snapshotmetadata.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SnapshotOptions interface]
(https://firebase.google.com/docs/reference/js/firestore_.snapshotoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VectorValue class]
(https://firebase.google.com/docs/reference/js/firestore_.vectorvalue.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [@firebase/firestore/lite]
(https://firebase.google.com/docs/reference/js/firestore_lite.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AggregateField class]
(https://firebase.google.com/docs/reference/js/firestore_lite.aggregatefield.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [Bytes class](https://firebase.google.com/docs/reference/js/firestore_lite.bytes.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [CollectionReference class]
(https://firebase.google.com/docs/reference/js/firestore_lite.collectionreference.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentData interface]
(https://firebase.google.com/docs/reference/js/firestore_lite.documentdata.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FieldPath class]
(https://firebase.google.com/docs/reference/js/firestore_lite.fieldpath.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryCompositeFilterConstraint class]
(https://firebase.google.com/docs/reference/js/firestore_lite.querycompositefilterconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryDocumentSnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_lite.querydocumentsnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryFieldFilterConstraint class]
(https://firebase.google.com/docs/reference/js/firestore_lite.queryfieldfilterconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryLimitConstraint class]
(https://firebase.google.com/docs/reference/js/firestore_lite.querylimitconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Settings interface]
(https://firebase.google.com/docs/reference/js/firestore_lite.settings.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Timestamp class]
(https://firebase.google.com/docs/reference/js/firestore_lite.timestamp.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [@firebase/firestore/lite/pipelines]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AggregateFunction class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.aggregatefunction.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AliasedAggregate class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.aliasedaggregate.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AliasedExpression class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.aliasedexpression.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Bytes class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.bytes.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentData interface]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.documentdata.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentSnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.documentsnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [Firestore class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.firestore.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FunctionExpression class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.functionexpression.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Ordering class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.ordering.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Pipeline class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.pipeline.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PipelineSnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.pipelinesnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PipelineSource class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.pipelinesource.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Query class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.query.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryDocumentSnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.querydocumentsnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [StageOptions interface]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.stageoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AliasedAggregate class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.aliasedaggregate.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Bytes class](https://firebase.google.com/docs/reference/js/firestore_pipelines.bytes.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentData interface]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.documentdata.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentReference class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.documentreference.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Expression class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.expression.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FieldPath class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.fieldpath.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FieldValue class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.fieldvalue.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase

services.

- [PipelineExecuteOptions interface]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.pipelineexecuteoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PipelineSnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.pipelinesnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PipelineSource class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.pipelinesource.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Query class](https://firebase.google.com/docs/reference/js/firestore_pipelines.query.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryDocumentSnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.querydocumentsnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SnapshotOptions interface]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.snapshotoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [functions package](<https://firebase.google.com/docs/reference/js/functions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Functions interface]
(<https://firebase.google.com/docs/reference/js/functions.functions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FunctionsError class]
(<https://firebase.google.com/docs/reference/js/functions.functionerror.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [HttpsCallableOptions interface]
(<https://firebase.google.com/docs/reference/js/functions.httpscallableoptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [HttpsCallableResult interface]
(<https://firebase.google.com/docs/reference/js/functions.httpscallableresult.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [HttpsCallableStreamOptions interface]
(<https://firebase.google.com/docs/reference/js/functions.httpscallablestreamoptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [installations package](<https://firebase.google.com/docs/reference/js/installations.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Installations interface]
(<https://firebase.google.com/docs/reference/js/installations.installations.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [@firebase/messaging](https://firebase.google.com/docs/reference/js/messaging_.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [MessagePayload interface]
(https://firebase.google.com/docs/reference/js/messaging_.messagepayload.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [MessagePayload interface]
(https://firebase.google.com/docs/reference/js/messaging_sw.messagepayload.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [performance package](<https://firebase.google.com/docs/reference/js/performance.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase

services.

- [FirebasePerformance interface]
(<https://firebase.google.com/docs/reference/js/performance.firebaseperformance.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PerformanceSettings interface]
(<https://firebase.google.com/docs/reference/js/performance.performancesettings.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PerformanceTrace interface]
(<https://firebase.google.com/docs/reference/js/performance.performancetrace.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ConfigUpdateObserver interface](<https://firebase.google.com/docs/reference/js/remote-config.configupdateobserver.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirebaseExperimentDescription interface]
(<https://firebase.google.com/docs/reference/js/remote-config.firebaseexperimentdescription.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirebaseRemoteConfigObject interface](<https://firebase.google.com/docs/reference/js/remote-config.firebaseremoteconfigobject.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [RemoteConfig interface](<https://firebase.google.com/docs/reference/js/remote-config.remoteconfig.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [RemoteConfigOptions interface](<https://firebase.google.com/docs/reference/js/remote-config.remoteconfigoptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [RemoteConfigSettings interface](<https://firebase.google.com/docs/reference/js/remote-config.remoteconfigsettings.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [storage package](<https://firebase.google.com/docs/reference/js/storage.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirebaseStorage interface]
(<https://firebase.google.com/docs/reference/js/storage.firebasestorage.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FullMetadata interface]
(<https://firebase.google.com/docs/reference/js/storage.fullmetadata.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [StorageObserver interface]
(<https://firebase.google.com/docs/reference/js/storage.storageobserver.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [UploadMetadata interface]
(<https://firebase.google.com/docs/reference/js/storage.uploadmetadata.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [JavaScript SDK](<https://firebase.google.com/docs/reference/js/v8.md.txt>): Reference for JavaScript SDK

(<https://firebase.google.com/docs/reference/js/vertexai.imagenimageformat.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ImagenInlineImage interface]
(<https://firebase.google.com/docs/reference/js/vertexai.imageninlineimage.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ImagenSafetySettings interface]
(<https://firebase.google.com/docs/reference/js/vertexai.imagensafetysettings.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [InlineDataPart interface]
(<https://firebase.google.com/docs/reference/js/vertexai.inlinedatapart.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [IntegerSchema class]
(<https://firebase.google.com/docs/reference/js/vertexai.integerschema.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ModalityTokenCount interface]
(<https://firebase.google.com/docs/reference/js/vertexai.modalitytokencount.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ModelParams interface]
(<https://firebase.google.com/docs/reference/js/vertexai.modelparams.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [NumberSchema class]
(<https://firebase.google.com/docs/reference/js/vertexai.numberschema.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [RetrievedContextAttribution interface]
(<https://firebase.google.com/docs/reference/js/vertexai.retrievedcontextattribution.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SafetySetting interface]
(<https://firebase.google.com/docs/reference/js/vertexai.safetysetting.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Schema class](<https://firebase.google.com/docs/reference/js/vertexai.schema.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SchemaRequest interface]
(<https://firebase.google.com/docs/reference/js/vertexai.schemarequest.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SchemaShared interface]
(<https://firebase.google.com/docs/reference/js/vertexai.schemashared.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [StartChatParams interface]
(<https://firebase.google.com/docs/reference/js/vertexai.startchatparams.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [StringSchema class]
(<https://firebase.google.com/docs/reference/js/vertexai.stringschema.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [ToolConfig interface]
(<https://firebase.google.com/docs/reference/js/vertexai.toolconfig.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VertexAI interface](<https://firebase.google.com/docs/reference/js/vertexai.vertexai.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VertexAIModel class]
(<https://firebase.google.com/docs/reference/js/vertexai.vertexaimodel.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [WebAttribution interface]
(<https://firebase.google.com/docs/reference/js/vertexai.webattribution.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirebaseApp]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/FirebaseApp.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseOptions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/FirebaseOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseTooManyRequestsException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/FirebaseTooManyRequestsException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Timestamp]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/Timestamp.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerativeModel]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/LiveGenerativeModel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TemplateImagenModel]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/TemplateImagenModel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Generable]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/annotations/Generable.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Guide]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/annotations/Guide.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.ai.annotations]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/annotations/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerativeModelFutures]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/java/GenerativeModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenModelFutures]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/java/ImagenModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveModelFutures]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/java/LiveModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TemplateGenerativeModelFutures]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/java/TemplateGenerativeModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TemplateImagenModelFutures]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/java/TemplateImagenModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.ai.java]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/java/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [APINotConfiguredException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/APINotConfiguredException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AudioRecordInitializationFailedException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/AudioRecordInitia>

lizationFailedException.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [CodeExecutionResultPart]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/CodeExecutionResultPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ContentBlockedException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ContentBlockedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Dimensions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Dimensions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FileDataPart]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/FileDataPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FinishReason]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/FinishReason.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionCallPart]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/FunctionCallPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionDeclaration]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/FunctionDeclaration.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerationConfig.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/GenerationConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GoogleSearch]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/GoogleSearch.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GroundingAttribution]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/GroundingAttribution.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GroundingChunk]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/GroundingChunk.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GroundingMetadata]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/GroundingMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmBlockMethod]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/HarmBlockMethod.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmBlockThreshold]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/HarmBlockThreshold.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenControlReference]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenControlReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenForegroundMask]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenForegroundMask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenGenerationConfig]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenGenerationConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenGenerationConfig.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenGenerationConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenGenerationResponse]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenGenerationResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenPersonFilterLevel]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenPersonFilterLevel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [ImagenRawImage]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenRawImage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenReferenceImage]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenReferenceImage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSubjectReference]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenSubjectReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InvalidAPIKeyException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/InvalidAPIKeyException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InvalidStateException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/InvalidStateException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [JsonSchema]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/JsonSchema.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveAudioConversationConfig.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/LiveAudioConversationConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerContent]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/LiveServerContent.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerGoAway]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/LiveServerGoAway.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerMessage]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/LiveServerMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MediaData]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/MediaData.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ModalityTokenCount]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ModalityTokenCount.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Part]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Part.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PermissionMissingException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/PermissionMissingException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PromptBlockedException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/PromptBlockedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PromptFeedback]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/PromptFeedback.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PublicPreviewAPI]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/PublicPreviewAPI.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RequestTimeoutException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/RequestTimeoutException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SafetyRating]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/SafetyRating.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SafetySetting]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/SafetySetting.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Schema]

(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Schema.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [SearchEntryPoint]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/SearchEntryPoint.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServiceConnectionHandshakeFailedException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ServiceConnectionHandshakeFailedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SessionAlreadyReceivingException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/SessionAlreadyReceivingException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SpeechConfig]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/SpeechConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StringFormat]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/StringFormat.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StringFormat.Custom]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/StringFormat.Custom.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TextPart]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/TextPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThinkingConfig]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ThinkingConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Tool]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Tool.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ToolConfig]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ToolConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UnsupportedUserLocationException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/UnsupportedUserLocationException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UrlContextMetadata]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/UrlContextMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UrlRetrievalStatus]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/UrlRetrievalStatus.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UsageMetadata]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/UsageMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Voice]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Voice.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [WebGroundingChunk]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/WebGroundingChunk.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.ai.type]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAnalytics.ConsentType]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/FirebaseAnalytics.ConsentType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAnalytics.Param]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/FirebaseAnalytics.Param.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [FirebaseAnalytics.UserProperty]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/FirebaseAnalytics.UserProperty.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ParametersBuilder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/ParametersBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ParametersBuilder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/ktx/ParametersBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.analytics.ktx]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.analytics]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AppCheckProvider]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/AppCheckProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AppCheckProviderFactory]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/AppCheckProviderFactory.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DebugAppCheckProviderFactory]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/debug/DebugAppCheckProviderFactory.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DebugAppCheckTestHelper]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/debug/testing/DebugAppCheckTestHelper.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appcheck.debug.testing]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/debug/testing/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appcheck.ktx]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appcheck]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appcheck.playintegrity]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/playintegrity/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BinaryType]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/BinaryType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppDistribution]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/FirebaseAppDistribution.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppDistributionException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/FirebaseAppDistributionException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OnProgressListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/OnProgressListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UpdateProgress]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/UpdateProgress.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UpdateStatus]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/UpdateStatus.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appdistribution]

(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [ActionCodeEmailInfo] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/ActionCodeEmailInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeInfo] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/ActionCodeInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeResult] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/ActionCodeResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeResult.ActionDataKey] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/ActionCodeResult.ActionDataKey.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeUrl] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/ActionCodeUrl.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AuthResult] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/AuthResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FacebookAuthProvider] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FacebookAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuth.AuthStateListener] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuth.AuthStateListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthEmailException] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthEmailException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthInvalidCredentialsException] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthInvalidCredentialsException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthInvalidUserException] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthInvalidUserException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthMultiFactorException] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthMultiFactorException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthProvider] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthSettings] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthUserCollisionException] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthUserCollisionException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthWebException] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthWebException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GoogleAuthProvider] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/GoogleAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MultiFactorAssertion] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/MultiFactorAssertion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MultiFactorInfo] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/MultiFactorInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MultiFactorResolver] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/MultiFactorResolver.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [MultiFactorSession]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/MultiFactorSession.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OAuthProvider]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/OAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneAuthOptions.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/PhoneAuthOptions.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneAuthProvider]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/PhoneAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneAuthProvider.ForceResendingToken]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/PhoneAuthProvider.ForceResendingToken.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneAuthProvider.OnVerificationStateChangedCallbacks]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/PhoneAuthProvider.OnVerificationStateChangedCallbacks.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneMultiFactorGenerator]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/PhoneMultiFactorGenerator.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneMultiFactorInfo]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/PhoneMultiFactorInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PlayGamesAuthCredential]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/PlayGamesAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PlayGamesAuthProvider]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/PlayGamesAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TotpMultiFactorAssertion]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/TotpMultiFactorAssertion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TotpMultiFactorGenerator]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/TotpMultiFactorGenerator.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TotpMultiFactorInfo]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/TotpMultiFactorInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.auth.ktx]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CustomKeysAndValues]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/crashlytics/CustomKeysAndValues.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CustomKeysAndValues.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/crashlytics/CustomKeysAndValues.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.crashlytics]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/crashlytics/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ChildEvent.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Changed]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ChildEvent.Changed.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Moved]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ChildEvent.Moved>

.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [DataSnapshot]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/DataSnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DatabaseError]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/DatabaseError.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DatabaseReference.CompletionListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/DatabaseReference.CompletionListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Exclude]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/Exclude.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseDatabase]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/FirebaseDatabase.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenericTypeIndicator]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/GenericTypeIndicator.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Logger]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/Logger.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OnDisconnect]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/OnDisconnect.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PropertyName]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/PropertyName.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Query]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/Query.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServerValue]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ServerValue.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Transaction.Result]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/Transaction.Result.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ktx/ChildEvent.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Changed]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ktx/ChildEvent.Changed.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Moved]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ktx/ChildEvent.Moved.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.database.ktx]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DataConnectOperationException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/DataConnectOperationException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DataConnectOperationFailureResponse]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/DataConnectOperationFailureResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DataConnectPathSegment.ListIndex]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/DataConnectPathSegment.ListIndex.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [EnumValue]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/EnumValue.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [EnumValue.Known]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/EnumValue.Known.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [EnumValue.Unknown]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/EnumValue.Unknown.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseDataConnect.MutationRefOptionsBuilder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/FirebaseDataConnect.MutationRefOptionsBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LocalDate]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/LocalDate.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LogLevel]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/LogLevel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OperationRef]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/OperationRef.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OptionalVariable]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/OptionalVariable.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GeneratedConnector]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/generated/GeneratedConnector.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GeneratedOperation]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/generated/GeneratedOperation.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.dataconnect.generated]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/generated/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AnyValueSerializer]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/serializers/AnyValueSerializer.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [EnumValueSerializer]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/serializers/EnumValueSerializer.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [KotlinxDatetimeLocalDateSerializer]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/serializers/KotlinxDatetimeLocalDateSerializer.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.dataconnect.serializers]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/serializers/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.IosParameters]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.IosParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.ItunesConnectAnalyticsParameters]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.ItunesConnectAnalyticsParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.ItunesConnectAnalyticsParameters.Builder]

(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.ItunesConnectAnalyticsParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [DynamicLink.SocialMetaTagParameters.Builder]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.SocialMetaTagParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ShortDynamicLink]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/ShortDynamicLink.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ShortDynamicLink.Suffix]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/ShortDynamicLink.Suffix.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ShortDynamicLink.Warning]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/ShortDynamicLink.Warning.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateField]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/AggregateField.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateField.SumAggregateField]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/AggregateField.SumAggregateField.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateQuery]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/AggregateQuery.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateSource]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/AggregateSource.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

improve app quality, and grow your business.

- [Method: projects.releases.list](<https://firebase.google.com/docs/reference/rules/rest/v1/projects.releases/list.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.rulesets.delete](<https://firebase.google.com/docs/reference/rules/rest/v1/projects.rulesets/delete.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.rulesets.get](<https://firebase.google.com/docs/reference/rules/rest/v1/projects.rulesets/get.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: Bytes](<https://firebase.google.com/docs/reference/rules/rules.Bytes.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: Duration](<https://firebase.google.com/docs/reference/rules/rules.Duration.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: Integer](<https://firebase.google.com/docs/reference/rules/rules.Integer.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: LatLng](https://firebase.google.com/docs/reference/rules/rules.LatLng_.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: List](<https://firebase.google.com/docs/reference/rules/rules.List.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: Map](<https://firebase.google.com/docs/reference/rules/rules.Map.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: MapDiff](<https://firebase.google.com/docs/reference/rules/rules.MapDiff.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: Number](<https://firebase.google.com/docs/reference/rules/rules.Number.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: Set](<https://firebase.google.com/docs/reference/rules/rules.Set.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Class: TestClass](<https://firebase.google.com/docs/reference/rules/rules.TestClass.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: Timestamp](https://firebase.google.com/docs/reference/rules/rules.Timestamp_.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Namespace: duration](https://firebase.google.com/docs/reference/rules/rules.duration_.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Namespace: firestore](<https://firebase.google.com/docs/reference/rules/rules.firestore.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: Request](<https://firebase.google.com/docs/reference/rules/rules.firestore.Request.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Interface: Resource](<https://firebase.google.com/docs/reference/rules/rules.firestore.Resource.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app

quality, and grow your business.

- [Namespace: hashing](https://firebase.google.com/docs/reference/rules/rules.hashing.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- (<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/grounding-chunk.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.ImagenGenerationConfig Struct Reference]
- (<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/imagen-generation-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.ImagenInlineImage Struct Reference]
- (<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/imagen-inline-image.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.LiveSessionContent Struct Reference]
- (<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/live-session-content.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.LiveSessionToolCall Struct Reference]
- (<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/live-session-tool-call.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.ModalityTokenCount Struct Reference]
- (<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/modality-token-count.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.ModelContent.CodeExecutionResultPart Struct Reference]
- (<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/model-content/code-execution-result-part.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.ModelContent.ExecutableCodePart Struct Reference]
- (<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/model-content/executable-code-part.md.txt>): Firebase gives you the tools and infrastructure you need to build better

mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.ModelContent.TextPart Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/model-content/text-part.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.PromptFeedback Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/prompt-feedback.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.SafetyRating Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/safety-rating.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.SafetySetting Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/safety-setting.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.Schema.StringFormat Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/schema/string-format.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.SearchEntryPoint Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/search-entry-point.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.Segment Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/segment.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.Transcription Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/transcription.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.UrlContextMetadata Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/url-context-metadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.WebGroundingChunk Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/web-grounding-chunk.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AppCheck.AppCheckToken Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/app-check/app-check-token.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Firestore.GeoPoint Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/firestore/geo-point.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Firestore.Timestamp Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/firestore/timestamp.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.RemoteConfig.ConfigSettings Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/remote-config/config-settings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.RemoteConfig.ConfigValue Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/remote-config/config-value.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase Remote Config](<https://firebase.google.com/docs/remote-config.md.txt>): Change the

- behavior and appearance of your web client or server without publishing an app update, at no cost, for unlimited daily active users.
- [Understand real-time Remote Config](https://firebase.google.com/docs/remote-config/android/real-time.md.txt): A guide to understanding and using real-time Firebase Remote Config in Android apps to receive updated parameter values as soon as they are published.
 - [Case studies: Remote Config](https://firebase.google.com/docs/remote-config/case-studies.md.txt): Change the behavior and appearance of your app without publishing an app update, at no cost, for unlimited daily active users.
 - [Use Firebase Remote Config with Analytics](https://firebase.google.com/docs/remote-config/config-analytics.md.txt): A guide that describes how to use Firebase Remote Config with Google Analytics to customize your app for different user segments using audiences and user properties.
 - [Get started with Remote Config on C++](https://firebase.google.com/docs/remote-config/cpp/get-started.md.txt): A guide to getting started with Firebase Remote Config on C++.
 - [Understand real-time Remote Config](https://firebase.google.com/docs/remote-config/cpp/real-time.md.txt): A guide to understanding and using real-time Firebase Remote Config in C++ apps to receive updated parameter values as soon as they are published.
 - [Get started with Firebase Remote Config](https://firebase.google.com/docs/remote-config/get-started.md.txt): A guide to getting started with Firebase Remote Config on iOS, Android, Web, Flutter, Unity, and C++.
 - [Get started with Remote Config on iOS](https://firebase.google.com/docs/remote-config/ios/get-started.md.txt): A guide to getting started with Firebase Remote Config on iOS.
 - [Remote Config personalization](https://firebase.google.com/docs/remote-config/personalization.md.txt): An overview of Firebase Remote Config personalization, a feature that uses machine learning to automatically select the optimal user experience for each user to maximize a specific objective.
 - [About Remote Config personalization](https://firebase.google.com/docs/remote-config/personalization/about.md.txt): An overview of Firebase Remote Config personalization, explaining how it uses machine learning to optimize user experiences and interpret results.
 - [Inspect personalization data with BigQuery](https://firebase.google.com/docs/remote-config/personalization/bigquery.md.txt): A guide that describes how to use BigQuery to inspect and analyze Firebase Remote Config personalization data, including how to enable data export and query personalization events.
 - [Remote Config rollouts](https://firebase.google.com/docs/remote-config/rollouts.md.txt): An overview of Firebase Remote Config rollouts, a feature that lets you safely and gradually release new features to your app while monitoring their impact on stability and key metrics.
 - [Use Remote Config in server environments](https://firebase.google.com/docs/remote-config/server.md.txt): A guide that describes how to use Firebase Remote Config in server environments with the Firebase Admin SDK for Node.js, Python, Go, and Java.
 - [Use Remote Config for server-side rendering in web applications](https://firebase.google.com/docs/remote-config/server-side-rendering-web-apps.md.txt): A guide that describes how to use Firebase Remote Config for server-side rendering in web applications to optimize initial page load performance.
 - [Use server-side Remote Config with Cloud Functions and Vertex AI](https://firebase.google.com/docs/remote-config/solution-server.md.txt): A guide that describes how build a chatbot with server-side Remote Config, Cloud Functions, and Vertex AI.
 - [Dynamically update your Firebase AI Logic app with Firebase Remote Config](https://firebase.google.com/docs/remote-config/solutions/vertexai.md.txt): A guide that describes how to use Remote Config to dynamically update generative AI features with Firebase AI Logic.
 - [Remote Config Templates and Versioning](https://firebase.google.com/docs/remote-config/templates.md.txt): A guide that describes how to use and manage Firebase Remote Config templates, including versioning, rollbacks, and import/export.
 - [Get started with Remote Config on Unity](https://firebase.google.com/docs/remote-config/unity/get-started.md.txt): A guide to getting started with Firebase Remote Config on Unity.
 - [What can you do with Remote Config?](https://firebase.google.com/docs/remote-config/use-cases.md.txt): A collection of use cases for Firebase Remote Config, including examples of how to use it for percentage rollouts, promotional banners, testing, and configuring complex entities.
 - [Get started with Remote Config on Web](https://firebase.google.com/docs/remote-

config/web/get-started.md.txt): A guide to getting started with Firebase Remote Config on Web.

- [Data validation](https://firebase.google.com/docs/rules/data-validation.md.txt): A guide to data validation with Firebase Security Rules, covering how to restrict new data and use existing data to enforce data integrity in your database or storage.
- [Generate test reports](https://firebase.google.com/docs/rules/emulator-reports.md.txt): A guide to generating test reports for Firebase Security Rules with the emulators, including how to access reports and use them for debugging.
- [Set up the Local Emulator Suite](https://firebase.google.com/docs/rules/emulator-setup.md.txt): A guide to setting up the Firebase Local Emulator Suite for testing Security Rules, including installation and test configuration.
- [Get started with Firebase Security Rules](https://firebase.google.com/docs/rules/get-started.md.txt): A guide to getting started with Firebase Security Rules, covering the essential steps from understanding the language to deploying your first set of rules.
- [Avoid insecure rules](https://firebase.google.com/docs/rules/insecure-rules.md.txt): A guide to avoiding common vulnerabilities in Firebase Security Rules, with examples of insecure configurations and how to fix them.
- [Security Rules and Firebase Authentication](https://firebase.google.com/docs/rules/rules-and-auth.md.txt): A guide to using Firebase Authentication with Firebase Security Rules, covering how to identify users, leverage user information, and define custom claims for access control.
- [How Security Rules work](https://firebase.google.com/docs/rules/rules-behavior.md.txt): A guide to understanding the behavior of Firebase Security Rules, explaining how rules are evaluated and applied to incoming requests for Cloud Firestore, Realtime Database, and Cloud Storage.
- [Security Rules language](https://firebase.google.com/docs/rules/rules-language.md.txt): A guide to the Firebase Security Rules language, covering the syntax, structure, and constructs for writing rules for Cloud Firestore, Realtime Database, and Cloud Storage.
- [Quickly validate Firebase Security Rules](https://firebase.google.com/docs/rules/simulator.md.txt): A guide to using the Rules Playground in the Firebase console to quickly validate your Firebase Security Rules with simulated requests.
- [Build unit tests](https://firebase.google.com/docs/rules/unit-tests.md.txt): A guide to building unit tests for Firebase Security Rules with the Firebase Emulator Suite, covering setup, local testing, and SDK methods for both v9 and v8 JavaScript SDKs.
- (https://firebase.google.com/docs/samples.md.txt): Developer documentation for Firebase
- [Cloud Storage for Firebase](https://firebase.google.com/docs/storage.md.txt): Cloud Storage for Firebase is built on fast and secure Google Cloud infrastructure for app developers who need to store and serve user-generated content, such as photos or videos.
- [Delete files with Cloud Storage on Android](https://firebase.google.com/docs/storage/android/delete-files.md.txt): A guide to deleting files from Cloud Storage in your Android app, including how to handle potential errors.
- [Use file metadata with Cloud Storage on Android](https://firebase.google.com/docs/storage/android/file-metadata.md.txt): A guide to getting and updating file metadata in Cloud Storage for your Android app, including how to use custom metadata to store app-specific data.
- [List files with Cloud Storage on Android](https://firebase.google.com/docs/storage/android/list-files.md.txt): A guide to listing files in Cloud Storage from your Android app, including how to list all files in a directory and how to paginate through large result sets.
- [Upload files with Cloud Storage on Android](https://firebase.google.com/docs/storage/android/upload-files.md.txt): A guide to uploading files to Cloud Storage in your Android app, covering how to manage uploads, monitor progress, and handle potential errors.
- [Create a Cloud Storage reference with Cloud Storage for C++](https://firebase.google.com/docs/storage/cpp/create-reference.md.txt): A guide to creating and managing references to files in Cloud Storage for your C++ app, which are necessary for uploading, downloading, and managing your files.
- [Download files with Cloud Storage for C++](https://firebase.google.com/docs/storage/cpp/download-files.md.txt): A guide to downloading files from Cloud Storage in your C++ app, with options to download to a buffer, to a local file, or by generating a download URL.
- [Upload Files with Cloud Storage for C++](https://firebase.google.com/docs/storage/cpp/upload-files.md.txt): A guide to uploading files to Cloud Storage in your C++ app, covering how

to add file metadata, manage uploads, and monitor upload progress.

- [FAQs about changes to Cloud Storage for Firebase pricing and default buckets]
(<https://firebase.google.com/docs/storage/faqs-storage-changes-announced-sept-2024.md.txt>): A list of frequently asked questions about the September 2024 changes to Cloud Storage for Firebase, including changes to provisioning, pricing, default buckets, and APIs.
- [Create a Cloud Storage reference on Flutter]
(<https://firebase.google.com/docs/storage/flutter/create-reference.md.txt>): A guide to creating and managing references to files in Cloud Storage for your Flutter app, which are necessary for uploading, downloading, and managing your files.
- [Use file metadata with Cloud Storage on Flutter]
(<https://firebase.google.com/docs/storage/flutter/file-metadata.md.txt>): A guide to getting and updating file metadata in Cloud Storage for your Flutter app, including how to use custom metadata to store app-specific data.
- [Handle errors for Cloud Storage on Flutter]
(<https://firebase.google.com/docs/storage/flutter/handle-errors.md.txt>): A guide to handling errors in Cloud Storage for your Flutter app, with a comprehensive list of error codes and their meanings to help you diagnose and resolve issues.
- [Upload files with Cloud Storage on Flutter]
(<https://firebase.google.com/docs/storage/flutter/upload-files.md.txt>): A guide to uploading files to Cloud Storage in your Flutter app, covering how to manage uploads, monitor progress, and handle potential errors.
- [Create a Cloud Storage reference on Apple platforms]
(<https://firebase.google.com/docs/storage/ios/create-reference.md.txt>): A guide to creating and managing references to files in Cloud Storage for your Apple platform app, which are necessary for uploading, downloading, and managing your files.
- [Download files with Cloud Storage on Apple platforms]
(<https://firebase.google.com/docs/storage/ios/download-files.md.txt>): A guide to downloading files from Cloud Storage in your Apple platform app, with options to download in memory, to a local file, or by generating a download URL.
- [Use file metadata with Cloud Storage on Apple platforms]
(<https://firebase.google.com/docs/storage/ios/file-metadata.md.txt>): A guide to getting and updating file metadata in Cloud Storage for your Apple platform app, including how to use custom metadata to store app-specific data.
- [List files with Cloud Storage on Apple platforms]
(<https://firebase.google.com/docs/storage/ios/list-files.md.txt>): A guide to listing files in Cloud Storage from your Apple platform app, including how to list all files in a directory and how to paginate through large result sets.
- [Get started with Cloud Storage on Apple platforms]
(<https://firebase.google.com/docs/storage/ios/start.md.txt>): A guide to getting started with Cloud Storage on Apple platforms, including initial setup, SDK integration, and advanced configurations for multiple buckets and custom apps.
- [Learn the core syntax of the Firebase Security Rules for Cloud Storage language]
(<https://firebase.google.com/docs/storage/security/core-syntax.md.txt>): A guide to the core syntax and structure of Firebase Storage Security Rules, covering match statements, wildcards, hierarchical data, and granular operations.
- [Use conditions in Firebase Cloud Storage Security Rules]
(<https://firebase.google.com/docs/storage/security/rules-conditions.md.txt>): A guide to using conditions in Firebase Storage Security Rules to control access to your files based on user authentication, request context, and file metadata.
- [Learn to secure files](<https://firebase.google.com/docs/storage/security/secure-filesBAK.md.txt>): Cloud Storage for Firebase is a powerful, simple, and cost-effective object storage service built for Google scale.
- [Get started with Cloud Storage Security Rules]
(<https://firebase.google.com/docs/storage/security/startBAK.md.txt>): Cloud Storage for Firebase is a powerful, simple, and cost-effective object storage service built for Google scale.
- [Secure user data](<https://firebase.google.com/docs/storage/security/user-securityBAK.md.txt>): Cloud Storage for Firebase is a powerful, simple, and cost-effective object storage service built for Google scale.
- [Create a Cloud Storage reference with Cloud Storage for Unity]
(<https://firebase.google.com/docs/storage/unity/create-reference.md.txt>): A guide to creating and managing references to files in Cloud Storage for your Unity app, which are necessary for uploading, downloading, and managing your files.

- [Delete files with Cloud Storage for Unity]
(<https://firebase.google.com/docs/storage/unity/delete-files.md.txt>): A guide to deleting files from Cloud Storage in your Unity app, including how to handle potential errors.
- [Download files with Cloud Storage for Unity]
(<https://firebase.google.com/docs/storage/unity/download-files.md.txt>): A guide to downloading files from Cloud Storage in your Unity app, with options to download from a URL, to a byte array, with a stream, or to a local file.
- [Upload files with Cloud Storage for Unity]
(<https://firebase.google.com/docs/storage/unity/upload-files.md.txt>): A guide to uploading files to Cloud Storage in your Unity app, covering how to add file metadata and monitor upload progress.
- [Use file metadata with Cloud Storage on Web]
(<https://firebase.google.com/docs/storage/web/file-metadata.md.txt>): A guide to getting and updating file metadata in Cloud Storage for your web app, including how to use custom metadata to store app-specific data.
- [Handle errors for Cloud Storage on Web](<https://firebase.google.com/docs/storage/web/handle-errors.md.txt>): A guide to handling errors in Cloud Storage for your web app, with a comprehensive list of error codes and their meanings to help you diagnose and resolve issues.
- [Get started with Cloud Storage on web]
(<https://firebase.google.com/docs/storage/web/start.md.txt>): A guide to getting started with Cloud Storage on the web, including initial setup, SDK integration, and advanced configurations for multiple buckets and custom apps.
- [Firebase Studio](<https://firebase.google.com/docs/studio.md.txt>): Rapidly prototype, build, and ship full-stack AI-infused apps quickly and efficiently, right from your browser.
- [Connect with us](<https://firebase.google.com/docs/studio/connect.md.txt>): Information on how to connect with the Firebase Studio team for support, feedback, and feature requests, with links to the discussion forum, Firebase Support, and the status dashboard.
- [Debug your app in Firebase Studio](<https://firebase.google.com/docs/studio/debug.md.txt>): A guide to debugging applications in Firebase Studio, covering various methods such as app previews, the integrated web console, Lighthouse reports, the Debug Console, and AI-assisted debugging with Gemini.
- [Publish your app with Firebase Studio](<https://firebase.google.com/docs/studio/deploy-app.md.txt>): A guide to publishing applications from Firebase Studio, with an overview of deployment options including Firebase App Hosting, Firebase Hosting, and Cloud Run.
- [Get started with Firebase Studio](<https://firebase.google.com/docs/studio/get-started.md.txt>): A guide to getting started with Firebase Studio, with an overview of the different ways to begin, such as importing a project, prototyping with AI, or using a template.
- [Get started with an existing project](<https://firebase.google.com/docs/studio/get-started-import.md.txt>): A guide to getting started with an existing project in Firebase Studio, with instructions on how to import projects from source control, a local archive, or Figma.
- [Get started with a Firebase Studio template](<https://firebase.google.com/docs/studio/get-started-template.md.txt>): A guide to getting started with a Firebase Studio template, with a list of available templates and instructions on how to create a new workspace from a template.
- [About Firebase Studio workspaces](<https://firebase.google.com/docs/studio/get-started-workspace.md.txt>): An overview of workspaces in Firebase Studio, including how to create, duplicate, and configure them using a Nix environment configuration file.
- [Monitor and protect web apps](<https://firebase.google.com/docs/studio/monitor.md.txt>): A guide to monitoring and protecting web apps built with Firebase Studio, covering site performance, AI feature monitoring, and app protection with Firebase App Check.
- [Preview your app](<https://firebase.google.com/docs/studio/preview-apps.md.txt>): A guide to previewing applications in Firebase Studio, including how to configure the preview environment, use the web and Android previews, share the web preview, and use the preview backend.
- [Firebase Studio pricing, quotas, and limits]
(<https://firebase.google.com/docs/studio/pricing.md.txt>): An overview of the pricing, quotas, and limits for Firebase Studio, including the benefits of the Google Developer Program and information on billing for paid services.
- [Run tests with Android Studio](<https://firebase.google.com/docs/test-lab/android/android-studio.md.txt>): A guide to using Firebase Test Lab with Android Studio to run instrumented tests, capture screenshots, and create tests with Espresso Test Recorder.
- [Start testing with Android Virtual Devices](<https://firebase.google.com/docs/test-lab/android/avds.md.txt>): A guide to Android Virtual Devices (AVDs) in Firebase Test Lab, including their benefits, limitations, and best practices for testing your app.

- [Start testing with the gcloud CLI](https://firebase.google.com/docs/test-lab/android/command-line.md.txt): A guide to running Android tests in Firebase Test Lab from the command line using the gcloud CLI, including how to configure your environment and automate your tests.
- [Get started with Game Loop tests](https://firebase.google.com/docs/test-lab/android/game-loop.md.txt): A guide to running a Game Loop test for your Android game in Firebase Test Lab, including how to configure, package, and run your test.
- [Get started with instrumentation tests](https://firebase.google.com/docs/test-lab/android/instrumentation-test.md.txt): A guide to preparing and running an instrumentation test in Firebase Test Lab, including how to add the screenshot library and enable features like Orchestrator and sharding.
- [Run a Robo test (Android)](https://firebase.google.com/docs/test-lab/android/robo-ux-test.md.txt): A guide to running Robo tests for Android apps in Firebase Test Lab to automatically explore your app's UI and find issues.
- [Beyond Pre-Launch Reports](https://firebase.google.com/docs/test-lab/android/test-lab-play.md.txt): A guide to using Firebase Test Lab for more comprehensive testing than Google Play's pre-launch reports, including how to run your first Robo test.
- [Test with the Google Cloud CLI](https://firebase.google.com/docs/test-lab/ios/command-line.md.txt): A guide to running iOS tests in Firebase Test Lab from the command line using the gcloud CLI, including how to configure your environment and automate your tests.
- [Get started with Firebase Test Lab from the Firebase console](https://firebase.google.com/docs/test-lab/ios/firebase-console.md.txt): A guide to running iOS tests in Firebase Test Lab from the Firebase console, including how to upload your test and view the results.
- [Run a Robo test (iOS+)](https://firebase.google.com/docs/test-lab/ios/robo-ux-test.md.txt): A guide to running Robo tests for iOS apps in Firebase Test Lab to automatically explore your app's UI and find issues.
- [Run a Robo script (iOS+)](https://firebase.google.com/docs/test-lab/ios/run-robo-scripts.md.txt): A guide to using Robo scripts in Firebase Test Lab to automate manual QA tasks and test common user journeys in your iOS app.
- [Run a test locally](https://firebase.google.com/docs/test-lab/ios/test-locally.md.txt): A guide to running your iOS tests locally to quality check their behavior before running them in Firebase Test Lab.
- [Cloud Testing API](https://firebase.google.com/docs/test-lab/reference/testing/rest.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DeviceMessage](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/DeviceMessage.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [InvalidRequestDetail](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/InvalidRequestDetail.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Reason](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/Reason.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [StreamData](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/StreamData.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.deviceSessions.list](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/projects.deviceSessions/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.testMatrices](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/projects.testMatrices.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.testMatrices.cancel](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/projects.testMatrices/cancel.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.testMatrices.create](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/projects.testMatrices/create.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.testMatrices.get](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/projects.testMatrices/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: testEnvironmentCatalog](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/testEnvironmentCatalog.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: testEnvironmentCatalog.get](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/testEnvironmentCatalog/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Cloud Tool Results API](https://firebase.google.com/docs/test-lab/reference/toolresults/rest.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AssetIssue](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/AssetIssue.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AvailableDeepLinks](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/AvailableDeepLinks.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [BlankScreen](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/BlankScreen.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [CrashDialogError](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/CrashDialogError.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DeviceOutOfMemory](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/DeviceOutOfMemory.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [EncounteredLoginScreen](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/EncounteredLoginScreen.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FatalException](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/FatalException.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [GreyList](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/GreyList.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [InAppPurchasesFound](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/InAppPurchasesFound.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [InsufficientCoverage](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/InsufficientCoverage.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [IosAppCrashed](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/IosAppCrashed.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

business.

- [LauncherActivityNotFound](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/LauncherActivityNotFound.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [NonSdkApi](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/NonSdkApi.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [NonSdkApiUsageViolationReport](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/NonSdkApiUsageViolationReport.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Outcome](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/Outcome.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [OutcomeSummary](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/OutcomeSummary.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [OverlappingUIElements](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/OverlappingUIElements.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PerfMetricType](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/PerfMetricType.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ProjectSettings](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/ProjectSettings.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [RoboScriptExecution](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/RoboScriptExecution.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [StartActivityNotFound](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/StartActivityNotFound.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [State](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/State.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [TestCaseReference](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/TestCaseReference.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UIElementTooDeep](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/UIElementTooDeep.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UsedRoboDirective](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/UsedRoboDirective.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UsedRoboIgnoreDirective](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/UsedRoboIgnoreDirective.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.histories](https://firebase.google.com/docs/test-

lab/reference/toolresults/rest/v1beta3/projects.histories.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.histories.executions.clusters.list](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.clusters/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.histories.executions.environments](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.environments.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.environments.get](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.environments/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.environments.list](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.environments/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.histories.executions.steps.perfSampleSeries](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.perfSampleSeries.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.perfSampleSeries.samples.batchCreate](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.perfSampleSeries.samples/batchCreate.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.perfSampleSeries.create](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.perfSampleSeries/create.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.perfSampleSeries.list](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.perfSampleSeries/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.histories.executions.steps.testCases](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.testCases.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.testCases.get](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.testCases/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.histories.executions.steps.thumbnails](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.thumbnails.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.thumbnails.list](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.thumbnails/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.histories.executions.steps.accessibilityClusters]
(<https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps/accessibilityClusters.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.create](<https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.patch](<https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.publishXunitXmlFiles]
(<https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps/publishXunitXmlFiles.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.create](<https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.get](<https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.list](<https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.create](<https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.list](<https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.getSettings](<https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects/getSettings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.initializeSettings](<https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects/initializeSettings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Using iOS on-device conversion measurement solutions]
(<https://firebase.google.com/docs/tutorials/ads-ios-on-device-measurement.md.txt>): Google's on-device conversion measurement improves the number of observable conversions from your iOS app campaigns while keeping users' personal data private.
- [Tutorial: Measure iOS Ads conversions using event data]
(<https://firebase.google.com/docs/tutorials/ads-ios-on-device-measurement-event-data/step-1.md.txt>): Developer documentation for Firebase
- [Tutorial: Measure iOS Ads conversions using event data]
(<https://firebase.google.com/docs/tutorials/ads-ios-on-device-measurement-event-data/step-3.md.txt>): Developer documentation for Firebase
- [Tutorial: Measure iOS Ads conversions](<https://firebase.google.com/docs/tutorials/ads-ios-on-device-measurement/step-3.md.txt>): Developer documentation for Firebase
- [Optimize AdMob ad frequency using Firebase]
(<https://firebase.google.com/docs/tutorials/optimize-ad-frequency/solution-overview.md.txt>): Developer documentation for Firebase
- [Tutorial: Optimize AdMob ad frequency]([<https://firebase.google.com/docs/llms.txt>](https://firebase.google.com/docs/tutorials/optimize-

</div>
<div data-bbox=)

ad-frequency/step-1.md.txt): Developer documentation for Firebase

- [Tutorial: Optimize AdMob ad frequency](https://firebase.google.com/docs/tutorials/optimize-ad-frequency/step-2.md.txt): Developer documentation for Firebase
- [Tutorial: Optimize AdMob ad frequency](https://firebase.google.com/docs/tutorials/optimize-ad-frequency/step-3.md.txt): Developer documentation for Firebase
- [Tutorial: Optimize AdMob ad frequency](https://firebase.google.com/docs/tutorials/optimize-ad-frequency/step-4.md.txt): Developer documentation for Firebase
- [Tutorial: Optimize hybrid monetization using AdMob, Google Analytics, and Firebase](https://firebase.google.com/docs/tutorials/optimize-hybrid-monetization.md.txt): Create a balanced monetization strategy for all segments of your user base, both purchasers and non-purchasers.
- [Tutorial: Optimize hybrid monetization using AdMob, Google Analytics, and Firebases](https://firebase.google.com/docs/tutorials/optimize-hybrid-monetization/step-3.md.txt): Developer documentation for Firebase
- [Process payments with Firebase](https://firebase.google.com/docs/tutorials/payments-stripe.md.txt): Using Stripe and Firebase, you can process payments in your app without building your own server infrastructure.
- [Tutorial: Test adoption of new AdMob ad formats](https://firebase.google.com/docs/tutorials/test-ad-format-adoption/step-1.md.txt): Developer documentation for Firebase
- [Tutorial: Test adoption of new AdMob ad formats](https://firebase.google.com/docs/tutorials/test-ad-format-adoption/step-2.md.txt): Developer documentation for Firebase
- [Tutorial: Test adoption of new AdMob ad formats](https://firebase.google.com/docs/tutorials/test-ad-format-adoption/step-3.md.txt): Developer documentation for Firebase
- [Debugging the Game Build, Install and Run Process](https://firebase.google.com/docs/unity/build-debug-guide.md.txt): A guide to debugging the compile and build process for Unity games using the Firebase SDK for Unity.
- [Understand Firebase for Unity](https://firebase.google.com/docs/unity/learn-more.md.txt): A guide to understanding Firebase concepts that are unfamiliar or specific to Firebase when developing a Unity project.
- [Troubleshooting & FAQ for Unity and Firebase](https://firebase.google.com/docs/unity/troubleshooting-faq.md.txt): Tips and troubleshooting for Unity-specific issues that you might encounter when using Firebase.
- [Alternative ways to add Firebase to your JavaScript project](https://firebase.google.com/docs/web/alt-setup.md.txt): A guide to alternative ways to add the Firebase JavaScript SDK to your project, including using a CDN or npm for Node.js apps.
- [Supported environments for the Firebase JavaScript SDK](https://firebase.google.com/docs/web/environments-js-sdk.md.txt): A guide to the supported environments for the Firebase JavaScript SDK, including browsers and other environments like React Native and Node.js.
- [Add Firebase to your JavaScript project](https://firebase.google.com/docs/web/setup.md.txt): A guide to adding Firebase to your JavaScript project, including how to create a Firebase project, register your app, and initialize the Firebase SDK.
- [Use Firebase in dynamic web apps with SSR (Server-side Rendering)](https://firebase.google.com/docs/web/ssr-apps.md.txt): A guide to using FirebaseServerApp to use Firebase in dynamic web apps with server-side rendering (SSR), including how to resume authenticated sessions and use App Check in SSR environments.
- [About Firebase A/B tests](https://firebase.google.com/docs/ab-testing/ab-concepts.md.txt): A guide explaining the core concepts of Firebase A/B Testing, including how it works, how to interpret test results, and best practices for running experiments.
- [Create Firebase Remote Config Experiments with A/B Testing](https://firebase.google.com/docs/ab-testing/abtest-config.md.txt): A guide to creating, validating, and managing Firebase A/B Testing experiments with Remote Config.
- [Create In-App Messaging Experiments with A/B Testing](https://firebase.google.com/docs/ab-testing/abtest-inappmessaging.md.txt): A guide to creating, validating, and managing Firebase A/B Testing experiments with In-App Messaging to test different marketing messages.
- [Create Messaging Experiments with A/B Testing](https://firebase.google.com/docs/ab-testing/abtest-with-console.md.txt): A guide to creating, validating, and managing Firebase A/B Testing experiments with Cloud Messaging to test messages for marketing campaigns.
- [Case studies: Firebase A/B Testing](https://firebase.google.com/docs/ab-testing/case-

studies.md.txt): Firebase A/B Testing helps you optimize your app experience by making it easy to run, analyze, and scale product and marketing experiments.

- [Migrate to Go Admin SDK v4](https://firebase.google.com/docs/admin/migrate-go-v4.md.txt): A guide to migrating to version 4 of the Firebase Admin SDK for Go, including information about installation changes, error handling, and API updates.
- [Migrate to Java Admin SDK v7](https://firebase.google.com/docs/admin/migrate-java-v7.md.txt): A guide to migrating to version 7 of the Firebase Admin SDK for Java, including information about error handling changes and API updates.
- [Upgrade to Node.js SDK Admin SDK v10 (modular SDK)](https://firebase.google.com/docs/admin/migrate-node-v10.md.txt): A guide to upgrading to version 10 of the Firebase Admin SDK for Node.js, including information about the new modular API and the discontinuation of Node.js 10 support.
- [Use more features of Google Analytics and Firebase with AdMob apps](https://firebase.google.com/docs/admob/analytics-and-firebase.md.txt): A guide to using Google Analytics and other Firebase features with AdMob to optimize app experience and ad revenue.
- [Get started with AdMob in your C++ project](https://firebase.google.com/docs/admob/cpp/quick-start.md.txt): This page describes how to set up a deprecated SDK; instead
- [Google AdMob Terms of Service](https://firebase.google.com/docs/admob/terms.md.txt): Using Firebase with Google AdMob provides an easy way to generate revenue for your app, plus additional app usage data and analytics capabilities.
- [Google Ads](https://firebase.google.com/docs/ads.md.txt): Reach potential customers with online ads.
- [Develop with AI assistance](https://firebase.google.com/docs/ai-assistance.md.txt): Develop faster and better, with real-time AI assistance
- [Set up Gemini in Firebase](https://firebase.google.com/docs/ai-assistance/gemini-in-firebase/set-up-gemini.md.txt): A guide to setting up Gemini in Firebase (an AI assistant in the Firebase console), including enabling it for a project, managing required permissions, and purchasing Code Assist licenses.
- [Firebase MCP server](https://firebase.google.com/docs/ai-assistance/mcp-server.md.txt): A guide to using the Firebase MCP server to give AI-powered development tools the ability to work with your Firebase projects and your app's codebase.
- [AI prompt catalog for Firebase](https://firebase.google.com/docs/ai-assistance/prompt-catalog.md.txt): An overview page for pre-written prompts optimized for developing and running an app with Firebase.
- [AI Prompt: Deploy to a Firebase hosting service](https://firebase.google.com/docs/ai-assistance/prompt-catalog/deploy-to-hosting.md.txt): Use the `/firebase:deploy` AI prompt to automatically analyze and deploy your web app to either Firebase Hosting or Firebase App Hosting.
- [AI Prompt: Prioritize and fix issues](https://firebase.google.com/docs/ai-assistance/prompt-catalog/prioritize-fix-issues.md.txt): Use the `/crashlytics:connect` AI prompt to start a conversational workflow for prioritizing and fixing crashes reported by Firebase Crashlytics.
- [Gemini API using Firebase AI Logic](https://firebase.google.com/docs/ai-logic.md.txt): Build AI-powered mobile and web apps and features with the Gemini and Imagen models using Firebase AI Logic
- [Analyze video files using the Gemini API](https://firebase.google.com/docs/ai-logic/analyze-video.md.txt): A guide to analyzing video files using the Gemini API via the Firebase AI Logic client SDKs.
- [Remotely change the model name in your app](https://firebase.google.com/docs/ai-logic/change-model-name-remotely.md.txt): A guide to remotely changing the model name in your app by using Firebase Remote Config to dynamically control which model your app uses.
- [Code execution](https://firebase.google.com/docs/ai-logic/code-execution.md.txt): A guide to using the code execution tool to generate and run Python code when using Firebase AI Logic client SDKs.
- [Options to control generation of responses](https://firebase.google.com/docs/ai-logic/control-content-gen.md.txt): An overview of options for controlling the generation of responses from Gemini and Imagen models when using the Firebase AI Logic client SDKs.
- [Count tokens for Gemini models](https://firebase.google.com/docs/ai-logic/count-tokens.md.txt): A guide to counting tokens for Gemini models.
- [Data governance & Responsible AI](https://firebase.google.com/docs/ai-logic/data-governance.md.txt): An overview of data governance and responsible AI when using Firebase AI Logic.
- [Customize images based on a control using Imagen](https://firebase.google.com/docs/ai-

logic/edit-images-imagen-controlled-customization.md.txt): A guide to customizing images based on a control using Imagen via the Firebase AI Logic client SDKs.

- [Insert objects into images using Imagen](https://firebase.google.com/docs/ai-logic/edit-images-imagen-insert-objects.md.txt): A guide to inserting objects into images using Imagen via the Firebase AI Logic client SDKs.
- [Overview of editing images with Imagen](https://firebase.google.com/docs/ai-logic/edit-images-imagen-overview.md.txt): An overview of options for editing images with Imagen (including mask-based editing and customization) via the Firebase AI Logic client SDKs.
- [Replace the background of an image using Imagen](https://firebase.google.com/docs/ai-logic/edit-images-imagen-replace-background.md.txt): A guide to replacing the background of an image using Imagen via the Firebase AI Logic client SDKs.
- [Customize images based on a specified style using Imagen](https://firebase.google.com/docs/ai-logic/edit-images-imagen-style-customization.md.txt): A guide to customizing images based on a specified style using Imagen via the Firebase AI Logic client SDKs.
- [FAQ and troubleshooting](https://firebase.google.com/docs/ai-logic/faq-and-troubleshooting.md.txt): A collection of frequently asked questions and troubleshooting for the Gemini API and Firebase AI Logic.
- [Give feedback about Firebase AI Logic](https://firebase.google.com/docs/ai-logic/feedback.md.txt): An overview of options for providing feedback about Firebase AI Logic.
- [Generate & edit images using Gemini (aka "nano banana")](https://firebase.google.com/docs/ai-logic/generate-images-gemini.md.txt): A guide to generating and editing images using Gemini models via the Firebase AI Logic client SDKs.
- [Generate images using Imagen](https://firebase.google.com/docs/ai-logic/generate-images-imagen.md.txt): A guide to generating images using Imagen models via the Firebase AI Logic client SDKs.
- [Generate structured output (like JSON and enums) using the Gemini API](https://firebase.google.com/docs/ai-logic/generate-structured-output.md.txt): A guide to generating structured output (like JSON and enums) using the Gemini API via the Firebase AI Logic client SDKs.
- [Generate text using the Gemini API](https://firebase.google.com/docs/ai-logic/generate-text.md.txt): A guide to generating text from text-only and multimodal prompts using the Gemini API via the Firebase AI Logic client SDKs.
- [Get started with the Gemini API using the Firebase AI Logic SDKs](https://firebase.google.com/docs/ai-logic/get-started.md.txt): A guide to getting started with the Gemini API using the Firebase AI Logic client SDKs.
- [Grounding with Google Search](https://firebase.google.com/docs/ai-logic/grounding-google-search.md.txt): A guide to grounding Gemini models with Google Search to provide more accurate and up-to-date answers.
- [Build hybrid experiences with on-device and cloud-hosted models](https://firebase.google.com/docs/ai-logic/hybrid-on-device-inference.md.txt): A guide to building hybrid AI experiences in web apps with on-device and cloud-hosted models using Firebase AI Logic.
- [Capabilities of the Live API](https://firebase.google.com/docs/ai-logic/live-api/capabilities.md.txt): A guide to the core capabilities of the Gemini Live API via the Firebase AI Logic client SDKs.
- [Configuration options for the Live API](https://firebase.google.com/docs/ai-logic/live-api/configuration.md.txt): A guide to configuration options for the Gemini Live API via the Firebase AI Logic client SDKs.
- [Specify the location for accessing the model](https://firebase.google.com/docs/ai-logic/locations.md.txt): A guide to specifying the location for accessing a generative AI model.
- [Migrate to the Firebase AI Logic SDKs from the Preview version of Vertex AI in Firebase SDKs](https://firebase.google.com/docs/ai-logic/migrate-from-preview.md.txt): A guide to migrating from the Preview versions of the Vertex AI for Firebase client SDKs to the Firebase AI Logic client SDKs.
- [Learn about supported models](https://firebase.google.com/docs/ai-logic/models.md.txt): A guide to the supported Gemini and Imagen models for Firebase AI Logic.
- [Monitor costs, usage, and other metrics](https://firebase.google.com/docs/ai-logic/monitoring.md.txt): A guide to monitoring costs, usage, and other metrics when using Firebase AI Logic.
- [Understand pricing](https://firebase.google.com/docs/ai-logic/pricing.md.txt): A guide to understanding the pricing for Firebase AI Logic and the Gemini API.

- [Production checklist for using Firebase AI Logic](https://firebase.google.com/docs/ai-logic/production-checklist.md.txt): A production checklist for using Firebase AI Logic.
- [Rate limits and quotas](https://firebase.google.com/docs/ai-logic/quotas.md.txt): A guide to rate limits and quotas for the Gemini API and Firebase AI Logic.
- [Best practices and considerations for templates](https://firebase.google.com/docs/ai-logic/server-prompt-templates/best-practices-and-considerations.md.txt): A guide to best practices and other considerations for Firebase AI Logic server prompt templates, including a list of features that are not yet supported.
- [Template format, syntax, and examples](https://firebase.google.com/docs/ai-logic/server-prompt-templates/syntax-and-examples.md.txt): Build AI-powered mobile and web apps and features with the Gemini API using Firebase AI Logic
- [Version templates using Remote Config](https://firebase.google.com/docs/ai-logic/server-prompt-templates/versioning-with-remote-config.md.txt): A guide to versioning your Firebase AI Logic server prompt templates by using Firebase Remote Config to dynamically control the template ID used in your app.
- [Include large files in multimodal requests and manage files using Cloud Storage for Firebase](https://firebase.google.com/docs/ai-logic/solutions/cloud-storage.md.txt): A guide to using Cloud Storage for Firebase to include large files in multimodal requests when using the Firebase AI Logic client SDKs.
- [Stream generated text responses using the Gemini API](https://firebase.google.com/docs/ai-logic/stream-responses.md.txt): A guide to streaming generated text responses using the Gemini API via the Firebase AI Logic client SDKs.
- [Google Analytics](https://firebase.google.com/docs/analytics.md.txt): Google Analytics is an app measurement solution, available at no charge, that provides insight on app usage and user engagement.
- [Log events](https://firebase.google.com/docs/analytics/cpp/events.md.txt): A guide to logging Google Analytics events in your C++ app to understand user actions, system events, and errors, with or without custom data.
- [Analytics error codes](https://firebase.google.com/docs/analytics/errors.md.txt): A comprehensive list of Firebase Analytics error codes, their causes, and the results of those errors, helping you to debug your Analytics implementation.
- [Extend Google Analytics with Cloud Functions](https://firebase.google.com/docs/analytics/extend-with-functions.md.txt): A guide on how to use Cloud Functions to extend Firebase Analytics by triggering functions based on Analytics conversion events and accessing event attributes.
- [Measure ecommerce](https://firebase.google.com/docs/analytics/measure-ecommerce.md.txt): A guide to measuring ecommerce-based user interactions with products across your users' shopping experiences, including product list views, clicks, and purchases.
- [Measure in-app purchases](https://firebase.google.com/docs/analytics/measure-in-app-purchases.md.txt): A guide to setting up and measuring in-app purchases using the Apple App Store and Google Play Store, with details on automatic and manual tracking.
- [Understand your Analytics reports](https://firebase.google.com/docs/analytics/reports.md.txt): An overview of the Analytics reports available in the Firebase console and Google Analytics, with details on how to view reports, the data available in each, and how to export data to BigQuery.
- [Measure screenviews](https://firebase.google.com/docs/analytics/screenviews.md.txt): A guide to measuring screenviews in Firebase Analytics, covering automatic screen tracking, how to disable it, and how to manually track screens for more granular reporting.
- [Set a user ID](https://firebase.google.com/docs/analytics/userid.md.txt): A guide to setting a user ID in Firebase Analytics to associate analytics data for the same user across multiple apps, devices, or analytics providers.
- [Migrate to using the Kotlin extensions (KTX) APIs in the main modules](https://firebase.google.com/docs/android/kotlin-migration.md.txt): A guide to migrating from the Firebase Kotlin extensions (KTX) APIs to the main modules, including the reasons for the change and step-by-step instructions.
- [Firebase App Check](https://firebase.google.com/docs/app-check.md.txt): App Check helps protect your app from abuse by attesting that incoming traffic is coming from your app and blocking traffic without valid credentials.
- [Get started using App Check with Play Integrity on Android](https://firebase.google.com/docs/app-check/android/play-integrity-provider.md.txt): A guide on how to get started using App Check with the Play Integrity provider on Android.
- [Get started using App Check with a custom provider with C++]

(<https://firebase.google.com/docs/app-check/cpp/custom-provider.md.txt>): A guide on how to get started using App Check with a custom provider in C++ projects.

- [Protect custom backend resources with App Check in C++ projects](<https://firebase.google.com/docs/app-check/cpp/custom-resource.md.txt>): A guide on how to protect custom backend resources with App Check in C++ projects.
- [Get started using App Check in C++ apps](<https://firebase.google.com/docs/app-check/cpp/default-providers.md.txt>): A guide on how to get started with App Check in C++ apps using the default providers.
- [Implement a custom App Check provider](<https://firebase.google.com/docs/app-check/custom-provider.md.txt>): A guide to implementing a custom App Check provider for use cases where the built-in providers are not sufficient.
- [Verify App Check tokens from a custom backend](<https://firebase.google.com/docs/app-check/custom-resource-backend.md.txt>): A guide to verifying App Check tokens from a custom backend to protect your non-Google backend resources.
- [Enable App Check enforcement](<https://firebase.google.com/docs/app-check/enforce-enforcement.md.txt>): A guide to enabling App Check enforcement for your Firebase projects to protect your backend resources.
- [Protect custom backend resources with App Check in Flutter projects](<https://firebase.google.com/docs/app-check/flutter/custom-resource.md.txt>): A guide on how to protect custom backend resources with App Check in Flutter projects.
- [Use App Check with the debug provider with Flutter](<https://firebase.google.com/docs/app-check/flutter/debug-provider.md.txt>): A guide to using App Check with the debug provider in Flutter for development and testing environments.
- [Get started using App Check in Flutter apps](<https://firebase.google.com/docs/app-check/flutter/default-providers.md.txt>): A guide on how to get started with App Check in Flutter apps using the default providers.
- [Get started using App Check with a custom provider on Apple platforms](<https://firebase.google.com/docs/app-check/ios/custom-provider.md.txt>): A guide on how to get started using App Check with a custom provider on Apple platforms.
- [Use App Check with the debug provider on Apple platforms](<https://firebase.google.com/docs/app-check/ios/debug-provider.md.txt>): A guide to using App Check with the debug provider on Apple platforms for development and testing environments.
- [Get started using App Check with DeviceCheck on Apple platforms](<https://firebase.google.com/docs/app-check/ios/devicecheck-provider.md.txt>): A guide on how to get started using App Check with the DeviceCheck provider on Apple platforms.
- [Monitor App Check request metrics](<https://firebase.google.com/docs/app-check/monitor-metrics.md.txt>): A guide to monitoring App Check request metrics to understand how enforcement will affect your users.
- [Get started using App Check with a custom provider in Unity](<https://firebase.google.com/docs/app-check/unity/custom-provider.md.txt>): A guide on how to get started using App Check with a custom provider in Unity.
- [Protect custom backend resources with App Check in Unity projects](<https://firebase.google.com/docs/app-check/unity/custom-resource.md.txt>): A guide on how to protect custom backend resources with App Check in Unity projects.
- [Use App Check with the debug provider in Unity](<https://firebase.google.com/docs/app-check/unity/debug-provider.md.txt>): A guide to using App Check with the debug provider in Unity for development and testing environments.
- [Get started using App Check in Unity apps](<https://firebase.google.com/docs/app-check/unity/default-providers.md.txt>): A guide on how to get started with App Check in Unity apps using the default providers.
- [Get started using App Check with a custom provider on web apps](<https://firebase.google.com/docs/app-check/web/custom-provider.md.txt>): A guide on how to get started using App Check with a custom provider on web apps.
- [Protect custom backend resources with App Check in web apps](<https://firebase.google.com/docs/app-check/web/custom-resource.md.txt>): A guide on how to protect custom backend resources with App Check in web apps.
- [Use App Check with the debug provider in web apps](<https://firebase.google.com/docs/app-check/web/debug-provider.md.txt>): A guide to using App Check with the debug provider in web apps for development and testing environments.
- [Get started using App Check with reCAPTCHA Enterprise in web apps](<https://firebase.google.com/docs/app-check/web/recaptcha-enterprise-provider.md.txt>): A guide on how to get started using App Check with reCAPTCHA Enterprise in web apps.

- [Get started using App Check with reCAPTCHA v3 in web apps](<https://firebase.google.com/docs/app-check/web/recaptcha-provider.md.txt>): A guide on how to get started using App Check with the reCAPTCHA v3 provider in web apps.
- [Add, remove, and search for testers in App Distribution](<https://firebase.google.com/docs/app-distribution/add-remove-search-testers.md.txt>): A guide to adding, removing, and searching for testers in Firebase App Distribution, including how to manage testers at the project and group level.
- [App Testing agent (Android)](<https://firebase.google.com/docs/app-distribution/android/app-testing-agent.md.txt>): A guide to the App Testing agent for Android, which uses Gemini in Firebase to generate, manage, and execute test cases for your app to find crashes and issues.
- [Distribute Android apps to testers using the Firebase console](<https://firebase.google.com/docs/app-distribution/android/distribute-console.md.txt>): A guide to distributing your Android app to testers by uploading your APK or AAB to App Distribution in the Firebase console.
- [Distribute Android apps to testers using Gradle](<https://firebase.google.com/docs/app-distribution/android/distribute-gradle.md.txt>): A guide to distributing your Android app to testers by using the App Distribution Gradle plugin to automate your pre-release workflow.
- [Authenticate with a service account](<https://firebase.google.com/docs/app-distribution/authenticate-service-account.md.txt>): A guide to authenticating with a service account in App Distribution to use service accounts for authentication with the App Distribution API.
- [Collect feedback from testers](<https://firebase.google.com/docs/app-distribution/collect-feedback-from-testers.md.txt>): A guide to collecting in-app feedback from testers using the Firebase App Distribution Android SDK, including how to configure feedback triggers and manage feedback.
- [Create invite links](<https://firebase.google.com/docs/app-distribution/create-invite-links.md.txt>): A guide to creating invite links in Firebase App Distribution to allow users to sign up as testers for your app.
- [Get set up as a tester with App Distribution](<https://firebase.google.com/docs/app-distribution/get-set-up-as-a-tester.md.txt>): A guide for testers on how to get set up with Firebase App Distribution, including how to accept an invitation and install a test app.
- [Distribute iOS apps to testers using the Firebase console](<https://firebase.google.com/docs/app-distribution/ios/distribute-console.md.txt>): A guide to distributing iOS apps to testers using the Firebase console, including how to upload an IPA file, add testers, and manage releases.
- [Firebase App Hosting](<https://firebase.google.com/docs/app-hosting.md.txt>): Firebase App Hosting is a framework that provides serverless hosting for modern, full-stack and AI web apps.
- [Understand App Hosting and how it works](<https://firebase.google.com/docs/app-hosting/about-app-hosting.md.txt>): A guide to understanding Firebase App Hosting, including its architecture, framework integration, repository integration, and how it works with other Google services.
- [The App Hosting build process](<https://firebase.google.com/docs/app-hosting/build.md.txt>): A guide to the Firebase App Hosting build process, including the ingest, build, and handoff stages, and how it uses Cloud Native Buildpacks to containerize your application.
- [Integrate Firebase SDKs with your web app](<https://firebase.google.com/docs/app-hosting/firebase-sdks.md.txt>): A guide to integrating Firebase SDKs with your web app on Firebase App Hosting, including how to automatically initialize the Admin and web SDKs and use `FirebaseServerApp` for SSR.
- [Monitor routes](<https://firebase.google.com/docs/app-hosting/monitor-routes.md.txt>): A guide to using route-based monitoring in Firebase App Hosting to aggregate logs and view metrics for different routes in your web app.
- [Use monorepos with App Hosting](<https://firebase.google.com/docs/app-hosting/monorepos.md.txt>): Deploy Nx-based monorepo apps with App Hosting.
- [Deploy multiple environments from a codebase](<https://firebase.google.com/docs/app-hosting/multiple-environments.md.txt>): Deploy to multiple environments from the same codebase – for example, set your staging and production environments to have different configurations.
- [Cache app content](<https://firebase.google.com/docs/app-hosting/optimize-cache.md.txt>): A guide to optimizing caching for your Firebase App Hosting backend, including information about cacheable content, customizing behavior with cache control directives, and measuring cached and uncached traffic.
- [FAQ and troubleshooting](<https://firebase.google.com/docs/app-hosting/troubleshooting.md.txt>): Frequently asked questions (FAQs) and troubleshooting tips for Firebase App Hosting, including information about framework support, repository integration, and

limitations.

- [Connect Firebase App Hosting to a VPC network](https://firebase.google.com/docs/app-hosting/vpc-network.md.txt): A guide to connecting your Firebase App Hosting backend to a Virtual Private Cloud (VPC) network, including an example of how to connect to Memorystore for Redis.
- [Firebase Authentication](https://firebase.google.com/docs/auth.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Introduction to the Admin Auth API](https://firebase.google.com/docs/auth/admin.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Generating Email Action Links](https://firebase.google.com/docs/auth/admin/email-action-links.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Import Users](https://firebase.google.com/docs/auth/admin/import-users.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Manage Session Cookies](https://firebase.google.com/docs/auth/admin/manage-cookies.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Manage Multi-factor Users](https://firebase.google.com/docs/auth/admin/manage-mfa-users.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Manage User Sessions](https://firebase.google.com/docs/auth/admin/manage-sessions.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Manage Users](https://firebase.google.com/docs/auth/admin/manage-users.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Apple on Android](https://firebase.google.com/docs/auth/android/apple.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase on Android Using a Custom Authentication System](https://firebase.google.com/docs/auth/android/custom-auth.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Facebook Login on Android](https://firebase.google.com/docs/auth/android/facebook-login.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using GitHub on Android](https://firebase.google.com/docs/auth/android/github-auth.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Manage Users in Firebase](https://firebase.google.com/docs/auth/android/manage-users.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using OpenID Connect on Android](https://firebase.google.com/docs/auth/android/openid-connect.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase using Password-Based Accounts on Android](https://firebase.google.com/docs/auth/android/password-auth.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Google Play Games Services on Android](https://firebase.google.com/docs/auth/android/play-games.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Programmatically configure OAuth identity providers for Firebase Authentication](https://firebase.google.com/docs/auth/configure-oauth-rest-api.md.txt): Developer documentation for Firebase

- [Authenticate Using Apple and C++](https://firebase.google.com/docs/auth/cpp/apple.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase Using a Custom Authentication System and C++](https://firebase.google.com/docs/auth/cpp/custom-auth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Facebook Login and C++](https://firebase.google.com/docs/auth/cpp/facebook-login.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Google Sign-In and C++](https://firebase.google.com/docs/auth/cpp/google-signin.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Manage Users in Firebase](https://firebase.google.com/docs/auth/cpp/manage-users.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Microsoft and C++](https://firebase.google.com/docs/auth/cpp/microsoft-oauth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Use a custom domain for Authentication emails](https://firebase.google.com/docs/auth/email-custom-domain.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Extend Firebase Authentication with Cloud Functions](https://firebase.google.com/docs/auth/extend-with-functions.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Link Multiple Auth Providers to an Account](https://firebase.google.com/docs/auth/flutter/account-linking.md.txt): Developer documentation for Firebase
- [Authenticate with Firebase Using a Custom Authentication System](https://firebase.google.com/docs/auth/flutter/custom-auth.md.txt): Developer documentation for Firebase
- [Error Handling](https://firebase.google.com/docs/auth/flutter/errors.md.txt): Developer documentation for Firebase
- [Manage Users in Firebase](https://firebase.google.com/docs/auth/flutter/manage-users.md.txt): Developer documentation for Firebase
- [Add multi-factor authentication to your Flutter app](https://firebase.google.com/docs/auth/flutter/multi-factor.md.txt): Developer documentation for Firebase
- [Link Multiple Auth Providers to an Account on Apple Platforms](https://firebase.google.com/docs/auth/ios/account-linking.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase Anonymously on Apple Platforms](https://firebase.google.com/docs/auth/ios/anonymous-auth.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate with Firebase Using Email Link on Apple Platforms](https://firebase.google.com/docs/auth/ios/email-link-auth.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Migrate email link sign in away from Firebase Dynamic Links (iOS)](https://firebase.google.com/docs/auth/ios/email-link-migration.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Easily add sign-in to your iOS app with FirebaseAuthUI](https://firebase.google.com/docs/auth/ios/firebaseui.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using GitHub on Apple Platforms](https://firebase.google.com/docs/auth/ios/github-auth.md.txt): Firebase Authentication lets you

add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.

- [Authenticate with Firebase on Apple Platforms using a Phone Number]
(<https://firebase.google.com/docs/auth/ios/phone-auth.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Get Started with Firebase Authentication on Apple Platforms]
(<https://firebase.google.com/docs/auth/ios/start.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Firebase Authentication Limits](<https://firebase.google.com/docs/auth/limits.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Link Multiple Auth Providers to an Account in Unity]
(<https://firebase.google.com/docs/auth/unity/account-linking.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase Anonymously using Unity]
(<https://firebase.google.com/docs/auth/unity/anonymous-auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Facebook Login and Unity]
(<https://firebase.google.com/docs/auth/unity/facebook-login.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Google Sign-In and Unity]
(<https://firebase.google.com/docs/auth/unity/google-signin.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Manage Users in Firebase](<https://firebase.google.com/docs/auth/unity/manage-users.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Microsoft and Unity]
(<https://firebase.google.com/docs/auth/unity/microsoft-oauth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Users in Firebase Projects](<https://firebase.google.com/docs/auth/users.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Link Multiple Auth Providers to an Account Using JavaScript]
(<https://firebase.google.com/docs/auth/web/account-linking.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Apple with JavaScript]
(<https://firebase.google.com/docs/auth/web/apple.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate with Firebase in a Chrome extension]
(<https://firebase.google.com/docs/auth/web/chrome-extension.md.txt>): Developer documentation for Firebase
- [Authenticate with Firebase in JavaScript Using a Custom Authentication System]
(<https://firebase.google.com/docs/auth/web/custom-auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Customize your Auth Dependencies](<https://firebase.google.com/docs/auth/web/custom-dependencies.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Facebook Login with JavaScript]
(<https://firebase.google.com/docs/auth/web/facebook-login.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Easily add sign-in to your Web app with FirebaseUI]

(<https://firebase.google.com/docs/auth/web/firebaseui.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Manage Users in Firebase](<https://firebase.google.com/docs/auth/web/manage-users.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Microsoft with JavaScript](<https://firebase.google.com/docs/auth/web/microsoft-oauth.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- (<https://firebase.google.com/docs/auth/web/multi-factor.md.txt>)
- [Authenticate Using OpenID Connect in web apps](<https://firebase.google.com/docs/auth/web/openid-connect.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Passing State in Email Actions](<https://firebase.google.com/docs/auth/web/passing-state-in-email-actions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase using Password-Based Accounts using Javascript](<https://firebase.google.com/docs/auth/web/password-auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase with a Phone Number Using JavaScript](<https://firebase.google.com/docs/auth/web/phone-auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using SAML in web apps](<https://firebase.google.com/docs/auth/web/saml.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Get Started with Firebase Authentication on Websites](<https://firebase.google.com/docs/auth/web/start.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Twitter in JavaScript](<https://firebase.google.com/docs/auth/web/twitter-login.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Firebase CLI reference](<https://firebase.google.com/docs/cli.md.txt>): Developer documentation for Firebase
- [Set and manage Android message priority](<https://firebase.google.com/docs/cloud-messaging/android-message-priority.md.txt>): Set and manage message priority on Android to ensure timely delivery of your messages.
- [Get started with Firebase Cloud Messaging in Android apps](<https://firebase.google.com/docs/cloud-messaging/android/get-started.md.txt>): Learn how to get started with Firebase Cloud Messaging in your Android app.
- [Receive messages in Android apps](<https://firebase.google.com/docs/cloud-messaging/android/receive-messages.md.txt>): Learn how to receive and handle messages from Firebase Cloud Messaging in your Android app.
- [Get started with Firebase Cloud Messaging in C++ apps](<https://firebase.google.com/docs/cloud-messaging/cpp/get-started.md.txt>): Learn how to get started with Firebase Cloud Messaging in your C++ app.
- [Receive messages in C++ apps](<https://firebase.google.com/docs/cloud-messaging/cpp/receive-messages.md.txt>): Learn how to receive and handle messages from Firebase Cloud Messaging in your C++ app.
- [Receive FCM messages in direct boot mode](<https://firebase.google.com/docs/cloud-messaging/customize-messages/android-direct-boot.md.txt>): A guide to enabling direct boot mode in your Android app to allow Firebase Cloud Messaging to deliver notifications even on locked devices.
- [Customize a message across platforms](<https://firebase.google.com/docs/cloud-messaging/customize-messages/cross-platform.md.txt>): A guide to customizing Firebase Cloud Messaging notifications with a common set of fields for all platforms and platform-specific sets of fields.
- [Localize Messages]([<https://firebase.google.com/docs/llms.txt>](https://firebase.google.com/docs/cloud-messaging/customize-

</div>
<div data-bbox=)

messages/localize-messages.md.txt): A guide to localizing your Firebase Cloud Messaging notifications by using localization keys and arguments to display messages in the user's language.

- [Firebase Cloud Messaging message types](https://firebase.google.com/docs/cloud-messaging/customize-messages/set-message-type.md.txt): A guide to the two types of Firebase Cloud Messaging messages, notification messages and data messages, and when to use each type.
- [Set the priority of a message](https://firebase.google.com/docs/cloud-messaging/customize-messages/setting-message-priority.md.txt): A guide to setting the delivery priority of your downstream messages to either normal or high to control how and when they are delivered.
- [Send messages to device groups](https://firebase.google.com/docs/cloud-messaging/device-group.md.txt): Send messages to device groups to reach multiple devices with a single message.
- [Secure Your Message Data with End-to-End Encryption](https://firebase.google.com/docs/cloud-messaging/encryption.md.txt): Secure your message data with end-to-end encryption to add an extra layer of protection for sensitive information.
- [FCM Architectural Overview](https://firebase.google.com/docs/cloud-messaging/fcm-architecture.md.txt): Understand the components and lifecycle of Firebase Cloud Messaging, from message creation to delivery.
- [Analyze FCM BigQuery data using AI](https://firebase.google.com/docs/cloud-messaging/fcm-bigquery-ai.md.txt): A guide to analyzing your Firebase Cloud Messaging data in BigQuery by using the BigQuery MCP Toolbox and an AI agent to query and visualize data.
- [Get started with Firebase Cloud Messaging in Flutter apps](https://firebase.google.com/docs/cloud-messaging/flutter/get-started.md.txt): Learn how to get started with Firebase Cloud Messaging in your Flutter app.
- [Receive messages in Flutter apps](https://firebase.google.com/docs/cloud-messaging/flutter/receive-messages.md.txt): Learn how to receive and handle messages from Firebase Cloud Messaging in your Flutter app.
- [Get started with Firebase Cloud Messaging](https://firebase.google.com/docs/cloud-messaging/get-started.md.txt): Get started with Firebase Cloud Messaging and learn how to send messages to your client apps.
- [Get started with Firebase Cloud Messaging in Apple platform apps](https://firebase.google.com/docs/cloud-messaging/ios/get-started.md.txt): Learn how to get started with Firebase Cloud Messaging in your Apple app.
- [Receive messages in Apple platform apps](https://firebase.google.com/docs/cloud-messaging/ios/receive-messages.md.txt): Learn how to receive and handle messages from Firebase Cloud Messaging in your Apple app.
- [Configure your Network for FCM](https://firebase.google.com/docs/cloud-messaging/network-configuration.md.txt): Configure your network to allow traffic to and from Firebase Cloud Messaging.
- [Best practices when sending FCM messages at scale](https://firebase.google.com/docs/cloud-messaging/scale-fcm.md.txt): Learn best practices for sending FCM messages at scale to avoid traffic spikes and ensure reliable delivery.
- [Send a Message using Firebase Admin SDK](https://firebase.google.com/docs/cloud-messaging/send/admin-sdk.md.txt): This page covers how to send messages to specific devices, multiple devices, and a list of messages using the Firebase Admin SDK.
- [Send Messages using Firebase Console](https://firebase.google.com/docs/cloud-messaging/send/firebase-console.md.txt): This page explains how to send messages using the Firebase console. It also explains how the console fields map to keys in the Message object and how to use the console for testing or targeted marketing.
- [Topic Messaging](https://firebase.google.com/docs/cloud-messaging/topic-messaging.md.txt): Learn about topic messaging in Firebase Cloud Messaging, a way to send messages to multiple devices that have opted in to a particular topic.
- [Understanding message delivery](https://firebase.google.com/docs/cloud-messaging/understand-delivery.md.txt): Understand message delivery in Firebase Cloud Messaging using the console reports, the FCM Data API, and BigQuery data export.
- [Get started with Firebase Cloud Messaging in Unity apps](https://firebase.google.com/docs/cloud-messaging/unity/get-started.md.txt): Learn how to get started with Firebase Cloud Messaging in your Unity app.
- [Receive messages in Unity apps](https://firebase.google.com/docs/cloud-messaging/unity/receive-messages.md.txt): Learn how to receive and handle messages from Firebase Cloud Messaging in your Unity app.
- [Get started with Firebase Cloud Messaging in Web apps](https://firebase.google.com/docs/cloud-messaging/web/get-started.md.txt): Learn how to get

started with Firebase Cloud Messaging in your Web app.

- [Receive messages in Web apps](<https://firebase.google.com/docs/cloud-messaging/web/receive-messages.md.txt>): Learn how to receive and handle messages from Firebase Cloud Messaging in your Web app.
- [Cloud Shell in the Firebase console](<https://firebase.google.com/docs/cloud-shell.md.txt>): Learn how to use Cloud Shell (an interactive shell environment) directly from the Firebase console, including accessing the Firebase CLI, Gemini CLI, and other tools without local installation.
- [Add Firebase to your C++ project](<https://firebase.google.com/docs/cpp/setup.md.txt>): A guide to adding Firebase to your C++ project, including project creation, app registration, and SDK integration for both mobile and desktop platforms.
- [Firebase Crashlytics](<https://firebase.google.com/docs/crashlytics.md.txt>): Get clear, actionable insight into app issues with this powerful crash reporting solution for Apple, Android, Flutter, and Unity.
- [AI assistance options for Crashlytics](<https://firebase.google.com/docs/crashlytics/ai-assistance.md.txt>): An overview of AI assistance options for Firebase Crashlytics, including AI insights in the dashboard and AI-powered debugging via MCP.
- [AI insights in the Crashlytics dashboard](<https://firebase.google.com/docs/crashlytics/ai-assistance-in-dashboard.md.txt>): A guide to using AI-generated insights in the Firebase Crashlytics dashboard to help you understand, debug, and resolve app issues.
- [Customize crash reports for Android](<https://firebase.google.com/docs/crashlytics/android/customize-crash-reports.md.txt>): An Android-specific guide for how to customize Firebase Crashlytics crash reports, including adding custom keys, log messages, and user identifiers, and reporting non-fatal exceptions.
- [Get readable crash reports in the Crashlytics dashboard (Android)](<https://firebase.google.com/docs/crashlytics/android/get-deobfuscated-reports.md.txt>): Troubleshooting for the Firebase Crashlytics implementation in your Android app, specifically about getting readable, deobfuscated crash reports in the Crashlytics dashboard.
- [Build custom dashboards with exported data in BigQuery](<https://firebase.google.com/docs/crashlytics/bigquery-custom-dashboards.md.txt>): A guide that describes options to build custom dashboards using exported Crashlytics data with Google Cloud services, like BigQuery and Looker Studio.
- [Dataset schema for exported data in BigQuery](<https://firebase.google.com/docs/crashlytics/bigquery-dataset-schema.md.txt>): A reference page for the dataset schema of exported Crashlytics and Firebase sessions data in BigQuery.
- [Run SQL queries on exported data in BigQuery](<https://firebase.google.com/docs/crashlytics/bigquery-run-queries.md.txt>): A collection of example queries and the dataset schema for exported Crashlytics data in BigQuery.
- [Set up and send custom alerts to custom notification channels](<https://firebase.google.com/docs/crashlytics/cloud-logging-custom-alerts.md.txt>): A guide that describes options to set up custom alerts using exported Crashlytics data with Cloud Monitoring.
- [Build custom dashboards with exported data in Cloud Logging](<https://firebase.google.com/docs/crashlytics/cloud-logging-custom-dashboards.md.txt>): A guide that describes options to build custom dashboards using exported Crashlytics data with Google Cloud services, like Cloud Logging and Cloud Monitoring.
- [Export Crashlytics data to Cloud Logging](<https://firebase.google.com/docs/crashlytics/cloud-logging-export.md.txt>): A guide to setting up the export of Firebase Crashlytics data to Cloud Logging for advanced analysis and tooling.
- [Debug your Android app based on ANR tags in the Crashlytics dashboard](<https://firebase.google.com/docs/crashlytics/debug-anr-errors.md.txt>): A guide to debugging Application Not Responding (ANR) errors in Android apps using the ANR tags provided in the Firebase Crashlytics dashboard.
- [Customize crash reports for Flutter](<https://firebase.google.com/docs/crashlytics/flutter/customize-crash-reports.md.txt>): A Flutter-specific guide for how to customize Firebase Crashlytics crash reports, including adding custom keys, log messages, and user identifiers, and reporting non-fatal exceptions.
- [Get readable crash reports in the Crashlytics dashboard (Flutter)](<https://firebase.google.com/docs/crashlytics/flutter/get-deobfuscated-reports.md.txt>): Troubleshooting for the Firebase Crashlytics implementation in your Flutter app, specifically about getting readable, deobfuscated crash reports in the Crashlytics dashboard.
- [Get started with Firebase Crashlytics](<https://firebase.google.com/docs/crashlytics/get-started.md.txt>): An overview of options for getting started with Firebase Crashlytics for Apple

platforms (like iOS), Android, Flutter, and Unity.

- [Get readable crash reports in the Crashlytics dashboard (Apple platforms)](<https://firebase.google.com/docs/crashlytics/ios/get-deobfuscated-reports.md.txt>): Troubleshooting for the Firebase Crashlytics implementation in your Apple platforms app, specifically about getting readable, deobfuscated crash reports in the Crashlytics dashboard.
- [Test your Crashlytics implementation (Apple platforms)](<https://firebase.google.com/docs/crashlytics/ios/test-implementation.md.txt>): Troubleshooting for the Firebase Crashlytics implementation in your Apple platforms app, which includes forcing a test crash and enabling debug logging to verify that reports are being sent.
- [Customize crash reports for Unity](<https://firebase.google.com/docs/crashlytics/unity/customize-crash-reports.md.txt>): A Unity-specific guide for how to customize Firebase Crashlytics crash reports, including adding custom keys, log messages, and user identifiers, and reporting non-fatal exceptions.
- [Get started with Crashlytics for Unity](<https://firebase.google.com/docs/crashlytics/unity/get-started.md.txt>): A Unity-specific guide to getting started with Firebase Crashlytics, including how to add the SDK, configure your project, and force a test crash to see your first report.
- [Firebase Data Connect](<https://firebase.google.com/docs/data-connect.md.txt>): Firebase's first relational database solution for developers who want to create secure and scalable apps with Cloud SQL for PostgreSQL and type-safe mobile and web SDKs. Learn more.
- [Use AI assistance for Data Connect](<https://firebase.google.com/docs/data-connect/ai-assistance.md.txt>): A guide to using AI assistance for Firebase Data Connect to generate schemas, queries, and mutations from natural language prompts in various development environments.
- [Secure Data Connect with authorization and attestation](<https://firebase.google.com/docs/data-connect/authorization-and-security.md.txt>): A guide to securing Firebase Data Connect, covering client-side authorization for queries and mutations, app attestation with Firebase App Check, and server-side security.
- [Common Expression Language syntax reference for Data Connect](<https://firebase.google.com/docs/data-connect/cel-reference.md.txt>): A reference guide to Common Expression Language (CEL) syntax for Firebase Data Connect, focusing on expressions used in the @auth and @check directives.
- [Audit logging for Firebase Data Connect](<https://firebase.google.com/docs/data-connect/cloud-audit-logging.md.txt>): An overview of Cloud Audit Logs for Firebase Data Connect, including information on audited resource types, service names, and the permissions and methods that are logged.
- [Use the Data Connect emulator for CI/CD](<https://firebase.google.com/docs/data-connect/data-connect-emulator-suite.md.txt>): A guide to using the Firebase Data Connect emulator for CI/CD, covering its use for end-to-end prototyping with a local database and for automated testing.
- [Extend Data Connect with Cloud Functions](<https://firebase.google.com/docs/data-connect/extend-data-connect-with-functions.md.txt>): A guide to handling Data Connect events with Cloud Functions, explaining how to trigger functions in response to data changes.
- [Use generated Flutter SDKs](<https://firebase.google.com/docs/data-connect/flutter-sdk.md.txt>): A guide to generating a Flutter SDK and using the generated SDK for Firebase Data Connect, covering the client development workflow, implementing queries and mutations, and using the emulator.
- [Use generated admin SDKs](<https://firebase.google.com/docs/data-connect/generate-admin-sdk.md.txt>): A guide to using generated admin SDKs for Firebase Data Connect to call queries and mutations from trusted environments, covering generation and execution of operations.
- [Deploy and manage Data Connect schemas and connectors](<https://firebase.google.com/docs/data-connect/manage-schemas-and-connectors.md.txt>): A guide to deploying and managing Firebase Data Connect services, including schemas and connectors, with details on deployment workflows and best practices.
- [Manage Data Connect services and databases](<https://firebase.google.com/docs/data-connect/manage-services-and-databases.md.txt>): A guide to managing Firebase Data Connect services and their associated Cloud SQL for PostgreSQL databases, including setup and ongoing management.
- [Firebase Data Connect pricing](<https://firebase.google.com/docs/data-connect/pricing.md.txt>): An overview of Firebase Data Connect pricing, including billing for the Data Connect service, Cloud SQL, and Vertex AI, with guidance on monitoring usage and managing costs.
- [Get started with Firebase Data Connect](<https://firebase.google.com/docs/data-connect/quickstart.md.txt>): A quickstart guide to Firebase Data Connect, covering local project

- setup, schema and operation generation, SDK usage, and deployment to production.
- [Get started with Firebase Data Connect using Flutter](https://firebase.google.com/docs/data-connect/quickstart/flutter.md.txt): Firebase's first relational database solution for app developers to build mobile and web applications using a fully managed PostgreSQL database powered by Cloud SQL.
 - [Perform full-text search with Data Connect](https://firebase.google.com/docs/data-connect/solutions-full-text-search.md.txt): A guide to performing full-text search in Firebase Data Connect, covering how to enable and fine-tune searches on your data, and comparing it with other search methods.
 - [Retrieving Data](https://firebase.google.com/docs/database/admin/retrieve-data.md.txt): A guide to retrieving data from the Firebase Realtime Database using the Admin SDK, covering both asynchronous listeners and blocking reads, as well as how to query and order your data.
 - [Introduction to the Admin Database SDK](https://firebase.google.com/docs/database/admin/start.md.txt): A guide to getting started with the Firebase Admin SDK for the Realtime Database, including setup and authentication with both admin and limited privileges.
 - [Connect your App to Firebase](https://firebase.google.com/docs/database/android/start.md.txt): A guide to getting started with the Firebase Realtime Database on Android, including creating a database, adding the SDK, configuring security rules, and performing basic read and write operations.
 - [Structure Your Database](https://firebase.google.com/docs/database/android/structure-data.md.txt): A guide to structuring your data in the Firebase Realtime Database, with best practices for avoiding nested data and flattening your data structures for optimal performance.
 - [Automated Backups](https://firebase.google.com/docs/database/backups.md.txt): A guide to setting up automated daily backups of your Firebase Realtime Database to a Google Cloud Storage bucket and how to restore your data.
 - [Retrieving Data with Firebase Realtime Database for C++](https://firebase.google.com/docs/database/cpp/retrieve-data.md.txt): A guide to retrieving data from the Firebase Realtime Database using the C++ SDK, covering how to read data once, listen for real-time updates, and sort and filter your data.
 - [Structuring Data with Firebase Realtime Database for C++](https://firebase.google.com/docs/database/cpp/structure-data.md.txt): A guide to structuring your data in the Firebase Realtime Database, with best practices for avoiding nested data and flattening your data structures for optimal performance.
 - [Work with Lists of Data](https://firebase.google.com/docs/database/flutter/lists-of-data.md.txt): A guide to working with lists of data in the Firebase Realtime Database for your Flutter app, including how to append, sort, and filter data, and how to listen for changes to the list.
 - [Get Started with Realtime Database](https://firebase.google.com/docs/database/flutter/start.md.txt): A guide to getting started with the Firebase Realtime Database on Flutter, including creating a database, adding the plugin, configuring security rules, and initializing the package in your app.
 - [Offline Capabilities on Apple platforms](https://firebase.google.com/docs/database/ios/offline-capabilities.md.txt): A guide to enabling and using offline capabilities in the Firebase Realtime Database for your Apple platform app, ensuring your app works correctly even without a network connection.
 - [Managing Firebase Realtime Database Security Rules via REST](https://firebase.google.com/docs/database/rest/app-management.md.txt): A guide to managing your Firebase Realtime Database Security Rules using the REST API, allowing you to programmatically update and retrieve your app's access rules.
 - [Authenticate REST Requests](https://firebase.google.com/docs/database/rest/auth.md.txt): A guide to authenticating REST requests to the Firebase Realtime Database, with methods for using both Google OAuth2 access tokens and Firebase ID tokens for secure access.
 - [Retrieving Data](https://firebase.google.com/docs/database/rest/retrieve-data.md.txt): A guide to retrieving data from the Firebase Realtime Database using the REST API, including how to use URI parameters for filtering and formatting, and how to stream data for real-time updates.
 - [Installation & Setup for REST API](https://firebase.google.com/docs/database/rest/start.md.txt): A guide to getting started with the Firebase Realtime Database REST API, including how to create an account, set up a database, and choose a helper library for your preferred language.
 - [Structure Your Database](https://firebase.google.com/docs/database/rest/structure-

data.md.txt): A guide to structuring your data in the Firebase Realtime Database, with best practices for avoiding nested data and flattening your data structures for optimal performance.

- [Learn the core syntax of the Realtime Database Security Rules language](https://firebase.google.com/docs/database/security/core-syntax.md.txt): A guide to the core syntax and structure of Firebase Realtime Database Security Rules, covering basic operations, wildcard variables, and how rules cascade to secure your data.
- [Use conditions in Realtime Database Security Rules](https://firebase.google.com/docs/database/security/rules-conditions.md.txt): A guide to using conditions in Firebase Realtime Database Security Rules to control access and validate data based on user authentication, existing data, and other path values.
- [Save Data](https://firebase.google.com/docs/database/unity/save-data.md.txt): A guide to saving data to the Firebase Realtime Database using the Unity SDK, covering various write operations and how to handle transactional data.
- [Get Started with Firebase Realtime Database for Unity](https://firebase.google.com/docs/database/unity/start.md.txt): A guide to getting started with the Firebase Realtime Database on Unity, including creating a database and setting up public access for your data.
- [Structure Your Database](https://firebase.google.com/docs/database/unity/structure-data.md.txt): A guide to structuring your data in the Firebase Realtime Database, with best practices for avoiding nested data and flattening your data structures for optimal performance.
- [Optimize Database Performance](https://firebase.google.com/docs/database/usage/optimize.md.txt): A guide to optimizing your Firebase Realtime Database performance, with best practices for monitoring, improving data structures, and reducing usage costs.
- [Realtime Database for SQL Developers (video series)](https://firebase.google.com/docs/database/video-series.md.txt): Developer documentation for Firebase
- [Work with Lists of Data on the Web](https://firebase.google.com/docs/database/web/lists-of-data.md.txt): A guide to working with lists of data in the Firebase Realtime Database for your web app, including how to append, sort, and filter data, and how to listen for changes to the list.
- [Firebase Dynamic Links](https://firebase.google.com/docs/dynamic-links.md.txt): Firebase Dynamic Links are links that work the way you want, on multiple platforms, and whether or not your app is already installed.
- [View Dynamic Links Analytics Data](https://firebase.google.com/docs/dynamic-links/analytics.md.txt): A guide on how to view analytics data for your Firebase Dynamic Links and integrate with other analytics tools.
- [Create Dynamic Links on Android](https://firebase.google.com/docs/dynamic-links/android/create.md.txt): A guide on how to create Firebase Dynamic Links in your Android app.
- [Receive Firebase Dynamic Links on Android](https://firebase.google.com/docs/dynamic-links/android/receive.md.txt): A guide on how to receive Firebase Dynamic Links in your Android app.
- [Create Dynamic Links with C++](https://firebase.google.com/docs/dynamic-links/cpp/create.md.txt): A guide on how to create Firebase Dynamic Links in your C++ app.
- [Receive Dynamic Links with C++](https://firebase.google.com/docs/dynamic-links/cpp/receive.md.txt): A guide on how to receive Firebase Dynamic Links in your C++ app.
- [Manually constructing a Dynamic Link URL](https://firebase.google.com/docs/dynamic-links/create-manually.md.txt): A guide on how to manually construct a Firebase Dynamic Link URL by specifying its parameters.
- [Create Dynamic Links in a Flutter app](https://firebase.google.com/docs/dynamic-links/flutter/create.md.txt): A guide to creating Firebase Dynamic Links in your Flutter app by using the Dynamic Links Builder API to create both short and long links.
- [Receive Dynamic Links on iOS](https://firebase.google.com/docs/dynamic-links/ios/receive.md.txt): A guide on how to receive Firebase Dynamic Links in your iOS app.
- [Create Dynamic Links with Unity](https://firebase.google.com/docs/dynamic-links/unity/create.md.txt): A guide on how to create Firebase Dynamic Links in your Unity app.
- [Introduction to Firebase Local Emulator Suite](https://firebase.google.com/docs/emulator-suite.md.txt): The Firebase Local Emulator Suite is a set of advanced tools for developers looking to build and test apps locally using numerous Firebase product emulators. It provides a

- rich user interface to help you get running and prototyping quickly.
- [Connect your app and start prototyping](https://firebase.google.com/docs/emulator-suite/connect_and_prototype.md.txt): A guide to prototyping and testing with the Firebase Emulator Suite, covering the development cycle, interactive prototyping, connecting your app, and automating tests.
 - [Connect your app to the Authentication Emulator](https://firebase.google.com/docs/emulator-suite/connect_auth.md.txt): A guide to the Firebase Auth Emulator, covering connecting your app, prototyping with different authentication methods, and understanding its differences from production.
 - [Connect your app to the Cloud Functions Emulator](https://firebase.google.com/docs/emulator-suite/connect_functions.md.txt): A guide to the Cloud Functions Emulator, covering connecting your app, configuring a local testing environment, and understanding its differences from production.
 - [Connect your app to the Realtime Database Emulator](https://firebase.google.com/docs/emulator-suite/connect_rtdb.md.txt): A guide to the Realtime Database Emulator, covering connecting your app, managing data, testing Security Rules, and understanding its differences from production.
 - [Connect your app to the Cloud Storage for Firebase Emulator](https://firebase.google.com/docs/emulator-suite/connect_storage.md.txt): A guide to the Cloud Storage for Firebase Emulator, covering connecting your app, managing data, and understanding its differences from production.
 - [Use the Extensions Emulator to evaluate extensions](https://firebase.google.com/docs/emulator-suite/use_extensions.md.txt): A guide to the Firebase Extensions Emulator, covering how to install and evaluate extensions in a local environment and understanding its differences from production.
 - [Using the Delete User Data extension](https://firebase.google.com/docs/extensions/official/delete-user-data.md.txt): A guide to using the Delete User Data extension (`delete-user-data`) to delete a user's data from Cloud Firestore, Realtime Database, and Cloud Storage when the user is deleted from your Firebase project.
 - [Using the Firestore Bundle Builder Extension](https://firebase.google.com/docs/extensions/official/firestore-bundle-builder.md.txt): A guide to using the Firestore Bundle Builder extension (`firestore-bundle-builder`) to serve Cloud Firestore data bundles.
 - [API Reference](https://firebase.google.com/docs/extensions/official/firestore-bundle-builder/reference.md.txt): An API reference for the Bundle Builder extension, including specifications for the BundleDocument, ParamDefinition, and QueryDefinition interfaces.
 - [Using the Trigger Email extension](https://firebase.google.com/docs/extensions/official/firestore-send-email.md.txt): A guide to using the Trigger Email extension (`firestore-send-email`) to automatically send emails based on documents in a Cloud Firestore collection.
 - [Manage delivery status with the Trigger Email extension](https://firebase.google.com/docs/extensions/official/firestore-send-email/delivery-status.md.txt): A guide on how to manage email delivery status with the Trigger Email extension, including tracking processing and manual retries.
 - [Use Handlebars templates with the Trigger Email extension](https://firebase.google.com/docs/extensions/official/firestore-send-email/templates.md.txt): A guide on how to use Handlebars templates with the Trigger Email extension to render emails.
 - [Overview](https://firebase.google.com/docs/extensions/overview-use-extensions.md.txt): An overview of Firebase Extensions, including what they are, how they work, and how to use them.
 - [Permissions granted to a Firebase Extension](https://firebase.google.com/docs/extensions/permissions-granted-to-extension.md.txt): An explanation of the permissions granted to a Firebase Extension through its service account and assigned roles.
 - [Extension publisher overview](https://firebase.google.com/docs/extensions/publishers.md.txt): An overview of what Firebase Extensions are, how they are structured, and what they can do, from the perspective of an extension publisher.
 - [Handle your extension's lifecycle events](https://firebase.google.com/docs/extensions/publishers/lifecycle-events.md.txt): A guide for extension publishers on how to handle an extension's lifecycle events, such as installation, updates, and configuration changes.
 - [Set up and use parameters in your extension]

(<https://firebase.google.com/docs/extensions/publishers/parameters.md.txt>): A guide for extension publishers on how to set up and use auto-populated and user-configured parameters in an extension.

- [Samples for Firebase Extensions](<https://firebase.google.com/docs/extensions/samples.md.txt>): A sample app that demonstrates building a fully functional e-commerce app using Firebase Extensions.
- [Back up and restore data](<https://firebase.google.com/docs/firestore/backups.md.txt>): A guide to backing up and restoring Cloud Firestore data.
- [See a Cloud Firestore pricing example](<https://firebase.google.com/docs/firestore/billing-example.md.txt>): A guide to understanding Cloud Firestore costs with a detailed pricing example.
- [SDKs and client libraries](<https://firebase.google.com/docs/firestore/client/libraries.md.txt>): A guide to the Cloud Firestore SDKs and client libraries for web, mobile, and server development.
- [Android samples for Firebase](<https://firebase.google.com/docs/firestore/client/samples-android.md.txt>): A collection of Android code samples for Cloud Firestore.
- [iOS samples for Firebase](<https://firebase.google.com/docs/firestore/client/samples-ios.md.txt>): A collection of iOS code samples for Cloud Firestore.
- [Customer-managed encryption keys (CMEK)](<https://firebase.google.com/docs/firestore/cmek.md.txt>): A guide to using customer-managed encryption keys (CMEK) with Cloud Firestore to control how your data is encrypted at rest.
- [Committed use discounts](<https://firebase.google.com/docs/firestore/cuds.md.txt>): A guide to understanding and using committed use discounts (CUDs) for Firestore to save money on your database usage.
- [Process data in bulk with Dataflow](<https://firebase.google.com/docs/firestore/dataflow-connector.md.txt>): A guide to using the Apache Beam connector for Cloud Firestore to process data in bulk with Dataflow.
- [Editions overview](<https://firebase.google.com/docs/firestore/editions.md.txt>): A guide to the different editions of Cloud Firestore, Standard and Enterprise, and their key features.
- [Monitor databases with Cloud Monitoring](<https://firebase.google.com/docs/firestore/enterprise/audit-logging.md.txt>): A guide to using Cloud Audit Logs with Cloud Firestore to monitor database activity.
- [Back up and restore data](<https://firebase.google.com/docs/firestore/enterprise/backups.md.txt>): A guide to backing up and restoring Cloud Firestore data in the Enterprise edition.
- [Bulk delete data](<https://firebase.google.com/docs/firestore/enterprise/bulk-delete-mongodb.md.txt>): A guide to performing bulk delete operations in Cloud Firestore.
- [Customer-managed encryption keys (CMEK)](<https://firebase.google.com/docs/firestore/enterprise/cmek-mongodb.md.txt>): A guide to using customer-managed encryption keys (CMEK) with Cloud Firestore Enterprise edition.
- [Authenticate and connect to a database](<https://firebase.google.com/docs/firestore/enterprise/connect.md.txt>): A guide to authenticating and connecting to a Cloud Firestore database in the Enterprise edition.
- [Create a database and connect to it](<https://firebase.google.com/docs/firestore/enterprise/create-and-query-database.md.txt>): A quickstart guide to creating a Cloud Firestore database and connecting to it in the Enterprise edition.
- [Create and manage databases](<https://firebase.google.com/docs/firestore/enterprise/create-databases.md.txt>): A guide to creating and managing Cloud Firestore databases in the Enterprise edition.
- [Create and manage databases](<https://firebase.google.com/docs/firestore/enterprise/create-databases-mongodb.md.txt>): A guide to creating and managing Cloud Firestore databases in the Enterprise edition.
- [Delete data from Cloud Firestore](<https://firebase.google.com/docs/firestore/enterprise/delete-data-native.md.txt>): A guide to deleting data from Cloud Firestore, including how to delete documents, fields, and collections.
- [Disaster recovery planning](<https://firebase.google.com/docs/firestore/enterprise/disaster-recovery-mongodb.md.txt>): A guide to disaster recovery planning for Cloud Firestore in the Enterprise edition.
- [Extend Firebase with Cloud Functions (2nd gen)](<https://firebase.google.com/docs/firestore/enterprise/extend-with-functions-2nd-gen.md.txt>): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..

- [Indexes overview](https://firebase.google.com/docs/firestore/enterprise/index-overview.md.txt): An overview of indexing in Cloud Firestore, including single-field and composite indexes.
- [Manage indexes](https://firebase.google.com/docs/firestore/enterprise/indexing.md.txt): A guide to managing indexes in Cloud Firestore, including how to create, delete, and monitor indexes.
- [Get realtime updates using Core operations](https://firebase.google.com/docs/firestore/enterprise/listen-core.md.txt): A guide to getting real-time updates from Cloud Firestore using snapshot listeners.
- [Cloud Firestore locations](https://firebase.google.com/docs/firestore/enterprise/locations.md.txt): A guide to Cloud Firestore locations for the Enterprise edition, including regional and multi-regional options.
- [Migrate to Firestore with MongoDB compatibility](https://firebase.google.com/docs/firestore/enterprise/migrate-to-firestore-with-mongodb.md.txt): A guide to migrating your MongoDB database to Cloud Firestore with MongoDB compatibility.
- [Firestore with MongoDB compatibility overview](https://firebase.google.com/docs/firestore/enterprise/mongodb-compatibility-overview.md.txt): An overview of MongoDB compatibility in Cloud Firestore, enabling you to use your existing MongoDB applications and tools with a serverless, scalable, and highly available document database.
- [Optimize query performance](https://firebase.google.com/docs/firestore/enterprise/optimize-query-performance-mongodb.md.txt): A guide to optimizing query performance in Cloud Firestore, including how to use Query Explain to analyze query plans.
- [Overview of Firestore in Native mode](https://firebase.google.com/docs/firestore/enterprise/pipelines-overview.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Point-in-time recovery (PITR) overview](https://firebase.google.com/docs/firestore/enterprise/pitr.md.txt): A guide to using point-in-time recovery (PITR) in Cloud Firestore for enterprise environments to protect your data from accidental deletion or writes.
- [Point-in-time recovery (PITR) overview](https://firebase.google.com/docs/firestore/enterprise/pitr-mongodb.md.txt): A guide to using point-in-time recovery (PITR) in Cloud Firestore for enterprise environments to protect your data from accidental deletion or writes.
- [Pricing examples](https://firebase.google.com/docs/firestore/enterprise/pricing-examples.md.txt): A guide to understanding Cloud Firestore costs in the Enterprise edition with detailed pricing examples.
- [Query execution reference](https://firebase.google.com/docs/firestore/enterprise/query-explain-reference.md.txt): A reference guide to the output of Query Explain in Cloud Firestore, including details on query plans and execution statistics.
- [Pricing Examples](https://firebase.google.com/docs/firestore/enterprise/query-realtime-pricing-examples.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Get started with Cloud Firestore Enterprise edition](https://firebase.google.com/docs/firestore/enterprise/quickstart.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Get started with Cloud Firestore Enterprise edition using server client libraries](https://firebase.google.com/docs/firestore/enterprise/quickstart-server.md.txt): A guide to getting started with Cloud Firestore using server client libraries, including how to create a database, add data, and read data.
- [MongoDB compatibility: Quotas and Limits](https://firebase.google.com/docs/firestore/enterprise/quotas.md.txt): A guide to Cloud Firestore quotas and limits for the Enterprise edition.
- [Understand real-time listen queries at scale](https://firebase.google.com/docs/firestore/enterprise/real-time-queries-at-scale.md.txt): A guide to understanding how real-time queries work in Cloud Firestore and how to build scalable real-time applications.
- [Resolve latency issues](https://firebase.google.com/docs/firestore/enterprise/resolve-latency-mongodb.md.txt): A guide to resolving latency issues in Cloud Firestore for the

Enterprise edition.

- [Perform an in-place restore](<https://firebase.google.com/docs/firestore/enterprise/restore-in-place-mongodb.md.txt>): A guide to performing an in-place restore of your Cloud Firestore data from a backup in the Enterprise edition..
- [VPC Service Controls](<https://firebase.google.com/docs/firestore/enterprise/securing-with-vpc-sc.md.txt>): A guide to securing Cloud Firestore with VPC Service Controls.
- [VPC Service Controls](<https://firebase.google.com/docs/firestore/enterprise/securing-with-vpc-sc-mongodb.md.txt>): A guide to securing Cloud Firestore with VPC Service Controls.
- [Identity and Access Management (IAM)](<https://firebase.google.com/docs/firestore/enterprise/security/iam-mongodb.md.txt>): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Fix insecure rules](<https://firebase.google.com/docs/firestore/enterprise/security/insecure-rules.md.txt>): A guide to identifying and fixing insecure Cloud Firestore Security Rules.
- [Secure data in Cloud Firestore](<https://firebase.google.com/docs/firestore/enterprise/security/overview.md.txt>): An overview of how to secure your data in Cloud Firestore using Firebase Authentication and Cloud Firestore Security Rules.
- [Security Rules for Pipeline operations](<https://firebase.google.com/docs/firestore/enterprise/security/rules-pipelines.md.txt>): A guide to controlling access to specific fields in your Cloud Firestore documents using security rules.
- [Test your Cloud Firestore Security Rules](<https://firebase.google.com/docs/firestore/enterprise/security/test-rules-emulator.md.txt>): A guide to testing your Cloud Firestore Security Rules using the Firebase Emulator Suite.
- [Server-side encryption](<https://firebase.google.com/docs/firestore/enterprise/server-side-encryption.md.txt>): A guide to server-side encryption in Cloud Firestore.
- [Storage size](<https://firebase.google.com/docs/firestore/enterprise/storage-size-mongodb.md.txt>): A guide to understanding how storage size is calculated in Cloud Firestore for the Enterprise edition.
- [Supported MongoDB data types and drivers](<https://firebase.google.com/docs/firestore/enterprise/supported-data-types-drivers.md.txt>): A reference of supported MongoDB data types and drivers for Cloud Firestore with MongoDB compatibility.
- [Supported features: 3.6](<https://firebase.google.com/docs/firestore/enterprise/supported-features-36.md.txt>): A reference of supported MongoDB 3.6 features for Cloud Firestore with MongoDB compatibility.
- [Supported features: 4.0](<https://firebase.google.com/docs/firestore/enterprise/supported-features-40.md.txt>): A reference of supported MongoDB 4.0 features for Cloud Firestore with MongoDB compatibility.
- [Supported features: 5.0](<https://firebase.google.com/docs/firestore/enterprise/supported-features-50.md.txt>): A reference of supported MongoDB 5.0 features for Cloud Firestore with MongoDB compatibility.
- [Supported features: 6.0](<https://firebase.google.com/docs/firestore/enterprise/supported-features-60.md.txt>): A reference of supported MongoDB 6.0 features for Cloud Firestore with MongoDB compatibility.
- [Supported features: 8.0](<https://firebase.google.com/docs/firestore/enterprise/supported-features-80.md.txt>): A reference of supported MongoDB 8.0 features for Cloud Firestore with MongoDB compatibility.
- [Understand error codes](<https://firebase.google.com/docs/firestore/enterprise/understand-error-codes.md.txt>): A reference of error codes for Cloud Firestore with MongoDB compatibility.
- [Understand error codes](<https://firebase.google.com/docs/firestore/enterprise/understand-error-codes-mongodb.md.txt>): A reference of error codes for Cloud Firestore with MongoDB compatibility.
- [Understand reads and writes at scale](<https://firebase.google.com/docs/firestore/enterprise/understand-reads-writes-scale-mongodb.md.txt>): A guide to understanding how reads and writes work at scale in Cloud Firestore, and how to design your database for performance.
- [Use customer-managed encryption keys (CMEK)](<https://firebase.google.com/docs/firestore/enterprise/use-cmek-mongodb.md.txt>): A guide to using customer-managed encryption keys (CMEK) with Cloud Firestore in the Enterprise edition.
- [Monitor databases metrics](<https://firebase.google.com/docs/firestore/enterprise/use-monitoring-dashboard.md.txt>): A guide to monitoring your Cloud Firestore databases using the

monitoring dashboard, including how to view key metrics and set up alerts.

- [Monitor databases metrics](https://firebase.google.com/docs/firestore/enterprise/use-monitoring-dashboard-mongodb.md.txt): A guide to monitoring your Cloud Firestore databases using the monitoring dashboard, including how to view key metrics and set up alerts.
- [Extend Cloud Firestore with Cloud Functions (1st gen)](https://firebase.google.com/docs/firestore/extend-with-functions.md.txt): A guide to extending Cloud Firestore with Cloud Functions (1st gen) to add server-side functionality to your app.
- [Extend Cloud Firestore with Cloud Functions (2nd gen)](https://firebase.google.com/docs/firestore/extend-with-functions-2nd-gen.md.txt): A guide to extending Cloud Firestore with Cloud Functions (2nd gen) to add server-side functionality to your app.
- [Use Cloud Firestore with Firebase Realtime Database](https://firebase.google.com/docs/firestore/firestore-for-rtdb.md.txt): A guide to using Cloud Firestore with Realtime Database, including how to migrate data and use both databases in your app.
- [Exploring heatmaps](https://firebase.google.com/docs/firestore/key-visualizer/keyvis-exploring-heatmaps.md.txt): A guide to using Key Visualizer
- [Heatmap patterns for document keys](https://firebase.google.com/docs/firestore/key-visualizer/keyvis-patterns.md.txt): A guide to using Key Visualizer
- [Heatmap patterns for index keys](https://firebase.google.com/docs/firestore/key-visualizer/keyvis-patterns-index.md.txt): A guide to using Key Visualizer
- [Cloud Firestore Library and framework integrations](https://firebase.google.com/docs/firestore/library-integrations.md.txt): A guide to integrating Cloud Firestore with popular libraries and frameworks to streamline app development.
- [Cloud Firestore locations](https://firebase.google.com/docs/firestore/locations.md.txt): A guide to Cloud Firestore locations, including regional and multi-regional options, and how to choose the right one for your app.
- [Add data to Cloud Firestore](https://firebase.google.com/docs/firestore/manage-data/add-data.md.txt): A guide to adding data to Cloud Firestore, including how to set, add, and update documents.
- [Bulk delete data](https://firebase.google.com/docs/firestore/manage-data/bulk-delete.md.txt): A guide to performing bulk delete operations in Cloud Firestore.
- [Delete data from Cloud Firestore](https://firebase.google.com/docs/firestore/manage-data/delete-data.md.txt): A guide to deleting data from Cloud Firestore, including how to delete documents, fields, and collections.
- [Export and import data](https://firebase.google.com/docs/firestore/manage-data/export-import.md.txt): A guide to exporting and importing data in Cloud Firestore.
- [Choose a data structure](https://firebase.google.com/docs/firestore/manage-data/structure-data.md.txt): A guide to choosing a data structure for Cloud Firestore, with examples of how to model different types of data.
- [Manage databases](https://firebase.google.com/docs/firestore/manage-databases.md.txt): A guide to managing your Cloud Firestore databases, including creating, deleting, and viewing database details.
- [Monitor Cloud Firestore activity](https://firebase.google.com/docs/firestore/monitor-usage.md.txt): A guide to monitoring your Cloud Firestore usage, including how to view metrics in the Firebase console and Google Cloud console.
- [Optimize query performance](https://firebase.google.com/docs/firestore/pipelines/enterprise-optimize-query-performance.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [All functions](https://firebase.google.com/docs/firestore/pipelines/functions/all_functions.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Arithmetic functions](https://firebase.google.com/docs/firestore/pipelines/functions/arithmetic-functions.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Comparison functions](https://firebase.google.com/docs/firestore/pipelines/functions/comparison-functions.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Generic functions](https://firebase.google.com/docs/firestore/pipelines/functions/generic-

functions.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..

- [Logical functions](https://firebase.google.com/docs/firestore/pipelines/functions/logical-functions.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [String functions](https://firebase.google.com/docs/firestore/pipelines/functions/string-functions.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Timestamp functions](https://firebase.google.com/docs/firestore/pipelines/functions/timestamp-functions.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Vector functions](https://firebase.google.com/docs/firestore/pipelines/functions/vector-functions.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Get started with Cloud Firestore](https://firebase.google.com/docs/firestore/pipelines/quickstart.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Collection](https://firebase.google.com/docs/firestore/pipelines/stages/input/collection.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Collection group](https://firebase.google.com/docs/firestore/pipelines/stages/input/collection-group.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Database](https://firebase.google.com/docs/firestore/pipelines/stages/input/database.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Add fields](https://firebase.google.com/docs/firestore/pipelines/stages/transformation/add-fields.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Offset](https://firebase.google.com/docs/firestore/pipelines/stages/transformation/offset.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Remove fields](https://firebase.google.com/docs/firestore/pipelines/stages/transformation/remove-fields.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Sort](https://firebase.google.com/docs/firestore/pipelines/stages/transformation/sort.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Native mode support in Firestore Standard and Enterprise editions](https://firebase.google.com/docs/firestore/pipelines/understanding-core-pipelines.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Summarize data with aggregation queries](https://firebase.google.com/docs/firestore/query-data/aggregation-queries.md.txt): A guide to using aggregation queries in Cloud Firestore to summarize data.
- [Index types in Cloud Firestore](https://firebase.google.com/docs/firestore/query-data/index-overview.md.txt): An overview of index types in Cloud Firestore, including single-field and composite indexes.
- [Manage indexes in Cloud Firestore](https://firebase.google.com/docs/firestore/query-data/indexing.md.txt): A guide to managing indexes in Cloud Firestore, including how to create, delete, and monitor indexes.
- [Query with range and inequality filters on multiple fields overview](https://firebase.google.com/docs/firestore/query-data/multiple-range-fields.md.txt): An overview of querying with multiple range fields in Cloud Firestore.
- [Optimize queries with range and inequality filters on multiple fields]

(<https://firebase.google.com/docs/firestore/query-data/multiple-range-optimize-indexes.md.txt>): A guide to optimizing queries with multiple range fields in Cloud Firestore.

- [Get started with Firestore Standard edition](<https://firebase.google.com/docs/firestore/quickstart.md.txt>): A guide to getting started with Cloud Firestore, including how to create a database, add data, and read data.
- [Understand real-time queries at scale](https://firebase.google.com/docs/firestore/real-time_queries_at_scale.md.txt): A guide to understanding how real-time queries work in Cloud Firestore and how to build scalable real-time applications.
- [ApiScope](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/ApiScope.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ArrayConfig](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/ArrayConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ArrayValue](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/ArrayValue.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [BulkDeleteDocumentsResponse](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/BulkDeleteDocumentsResponse.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [CreateDatabaseMetadata](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/CreateDatabaseMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ExportDocumentsMetadata](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/ExportDocumentsMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ExportDocumentsResponse](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/ExportDocumentsResponse.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FieldOperationMetadata](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/FieldOperationMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [LatLng](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/LatLng.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Operation](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/Operation.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [OperationType](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/OperationType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Order](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/Order.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Progress](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/Progress.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [QueryScope](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/QueryScope.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

improve app quality, and grow your business.

- [RestoreDatabaseMetadata]
(<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/RestoreDatabaseMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [State](<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/State.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [WaitOperationRequest]
(<https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/WaitOperationRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Cursor](<https://firebase.google.com/docs/firestore/reference/rest/v1/Cursor.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [EncryptionConfig]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/EncryptionConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ExplainMetrics]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/ExplainMetrics.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ExplainOptions]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/ExplainOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Precondition]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/Precondition.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Value](<https://firebase.google.com/docs/firestore/reference/rest/v1/Value.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.databases]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.databases.backupSchedules]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.backupSchedules.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.backupSchedules.delete]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.backupSchedules/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.backupSchedules.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.backupSchedules/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.databases.collectionGroups.fields]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.collectionGroups.fields.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.fields.get]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.collectionGroups.fields/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.fields.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.collectionGroups.fields/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [REST Resource: projects.databases.collectionGroups.indexes]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.collectionGroups.indexes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.indexes.create]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.collectionGroups.indexes/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.indexes.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.collectionGroups.indexes/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.databases.documents]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.batchGet]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/batchGet.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.createDocument]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/createDocument.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.delete]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.executePipeline]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/executePipeline.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.patch]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.runAggregationQuery]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/runAggregationQuery.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.operations.get]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.operations/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.databases.userCreds]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.userCreds.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.userCreds.create]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.userCreds/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.userCreds.delete]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.userCreds/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.userCreds.disable]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.userCreds/disable.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

le.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.databases.userCreds.enable]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.userCreds/enable.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.userCreds.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.userCreds/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.clone]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases/clone.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.create]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.importDocuments]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases/importDocuments.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.patch]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.restore]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases/restore.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backups.get]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.locations.backups/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backups.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.locations.backups/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.get]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.locations/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.locations/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DocumentMask]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/DocumentMask.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ExportDocumentsResponse]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/ExportDocumentsResponse.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FieldReference]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/FieldReference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [ImportDocumentsMetadata]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/ImportDocumentsMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ListDocumentsResponse]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/ListDocumentsResponse.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [OperationType]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/OperationType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Precondition]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/Precondition.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Progress](<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/Progress.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [StructuredQuery]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/StructuredQuery.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [TransactionOptions]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/TransactionOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [WriteResult]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/WriteResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.databases]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.beginTransaction]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/beginTransaction.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.delete]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.patch]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.runAggregationQuery]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/runAggregationQuery.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.databases.indexes]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.indexes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.indexes.create]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.indexes/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile

and web apps, improve app quality, and grow your business.

- [Method: projects.databases.exportDocuments]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases/exportDocuments.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.importDocuments]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases/importDocuments.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.databases]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.databases.collectionGroups.fields]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases.collectionGroups.fields.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.fields.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases.collectionGroups.fields/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.fields.patch]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases.collectionGroups.fields/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.databases.collectionGroups.indexes]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases.collectionGroups.indexes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.indexes.delete]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases.collectionGroups.indexes/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.exportDocuments]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases/exportDocuments.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Cloud Firestore API](<https://firebase.google.com/docs/firestore/reference/rpc.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Package google.cloud.location]
(<https://firebase.google.com/docs/firestore/reference/rpc/google.cloud.location.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Package google.firestore.admin.v1beta1]
(<https://firebase.google.com/docs/firestore/reference/rpc/google.firestore.admin.v1beta1.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Package google.firestore.v1]
(<https://firebase.google.com/docs/firestore/reference/rpc/google.firestore.v1.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Package google.firestore.v1beta1]
(<https://firebase.google.com/docs/firestore/reference/rpc/google.firestore.v1beta1.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Package google.longrunning]
(<https://firebase.google.com/docs/firestore/reference/rpc/google.longrunning.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Package google.type]
(<https://firebase.google.com/docs/firestore/reference/rpc/google.type.md.txt>): Firebase gives

you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Perform an in-place restore](https://firebase.google.com/docs/firestore/restore-in-place.md.txt): A guide to performing an in-place restore of your Cloud Firestore data from a backup.
- [Choose a database: Cloud Firestore or Realtime Database](https://firebase.google.com/docs/firestore/rtdb-vs-firestore.md.txt): A guide to help you choose between Cloud Firestore and Realtime Database, with a comparison of their features and capabilities.
- [Secure data in Cloud Firestore](https://firebase.google.com/docs/firestore/security/overview.md.txt): An overview of how to secure your data in Cloud Firestore using Firebase Authentication and Cloud Firestore Security Rules.
- [Writing conditions for Cloud Firestore Security Rules](https://firebase.google.com/docs/firestore/security/rules-conditions.md.txt): A guide to writing conditions for Cloud Firestore Security Rules.
- [Control access to specific fields](https://firebase.google.com/docs/firestore/security/rules-fields.md.txt): A guide to controlling access to specific fields in your Cloud Firestore documents using security rules.
- [Securely query data](https://firebase.google.com/docs/firestore/security/rules-query.md.txt): A guide to securely querying data in Cloud Firestore using security rules.
- [Structuring Cloud Firestore Security Rules](https://firebase.google.com/docs/firestore/security/rules-structure.md.txt): A guide to structuring Cloud Firestore Security Rules.
- [Overview: Cloud Firestore Solutions](https://firebase.google.com/docs/firestore/solutions.md.txt): An overview of solutions for common Cloud Firestore use cases.
- [Delete data with a Callable Cloud Function](https://firebase.google.com/docs/firestore/solutions/delete-collections.md.txt): A guide to deleting collections from Cloud Firestore using a Callable Cloud Function.
- [Enrich value of media](https://firebase.google.com/docs/firestore/solutions/enriched-media.md.txt): A guide to enriching media content in Cloud Firestore using Firebase Extensions.
- [Cloud Firestore Lite Web SDK](https://firebase.google.com/docs/firestore/solutions/firestore-lite.md.txt): A guide to using the Firestore Lite Web SDK for smaller, faster web apps.
- [Geo queries](https://firebase.google.com/docs/firestore/solutions/geoqueries.md.txt): A guide to querying Geohashes in Cloud Firestore.
- [Secure data access for users and groups](https://firebase.google.com/docs/firestore/solutions/role-based-access.md.txt): A guide to implementing role-based access control in Cloud Firestore.
- [Sharded timestamps](https://firebase.google.com/docs/firestore/solutions/shard-timestamp.md.txt): A guide to using sharded timestamps in Cloud Firestore to avoid hotspots.
- [Firestore Core operations overview](https://firebase.google.com/docs/firestore/standard-edition.md.txt): An introduction to the standard edition of Cloud Firestore, a comprehensive document database with real-time and offline support.
- [Storage size calculations](https://firebase.google.com/docs/firestore/storage-size.md.txt): A guide to understanding how storage size is calculated in Firestore.
- [Transaction serializability and isolation](https://firebase.google.com/docs/firestore/transaction-data-contention.md.txt): A guide to understanding transaction serializability and isolation in Cloud Firestore, and how to handle data contention.
- [Manage data retention with TTL policies](https://firebase.google.com/docs/firestore/ttl.md.txt): A guide to managing data retention in Cloud Firestore with time to live (TTL) policies.
- [Use customer-managed encryption keys (CMEK)](https://firebase.google.com/docs/firestore/use-cmek.md.txt): A guide to using customer-managed encryption keys (CMEK) with Cloud Firestore to control how your data is encrypted at rest.
- [Use the Cloud Firestore REST API](https://firebase.google.com/docs/firestore/use-rest-api.md.txt): A guide to using the Cloud Firestore REST API to manage your database, including how to authenticate and make API requests.
- [Search with vector embeddings](https://firebase.google.com/docs/firestore/vector-search.md.txt): A guide to performing vector search in Cloud Firestore to find similar documents based on vector embeddings.

- [Cloud Functions for Firebase](https://firebase.google.com/docs/functions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [Google Analytics triggers](https://firebase.google.com/docs/functions/1st-gen/analytics-events.md.txt): This guide is for 1st gen Cloud Functions only, and describes how to trigger functions in response to Google Analytics conversion events.
- [Auth blocking triggers (1st gen)](https://firebase.google.com/docs/functions/1st-gen/auth-blocking-events-1st.md.txt): This guide is for 1st gen Cloud Functions only, and describes how to execute custom code that modifies the result of a user registering or signing in to your app.
- [Firebase Authentication triggers](https://firebase.google.com/docs/functions/1st-gen/auth-events.md.txt): This guide is for 1st gen Cloud Functions only, and describes how to handle Firebase Authentication events for user creation and deletion.
- [Call functions from your app (1st gen)](https://firebase.google.com/docs/functions/1st-gen/callable-1st.md.txt): This guide is for 1st gen Cloud Functions only, and covers how to write and deploy HTTP Callable functions and add client logic to call them from your app.
- [Call functions via HTTP requests (1st gen)](https://firebase.google.com/docs/functions/1st-gen/http-events-1st.md.txt): This guide is for 1st gen Cloud Functions only, and describes how to trigger a function through an HTTP request using various supported HTTP methods.
- [Manage functions (1st gen)](https://firebase.google.com/docs/functions/1st-gen/manage-functions-1st.md.txt): This guide is for 1st gen Cloud Functions only, and describes how to deploy, delete, and modify functions using Firebase CLI commands or by setting runtime options in your functions source code.
- [Organize multiple functions (1st gen)](https://firebase.google.com/docs/functions/1st-gen/organize-functions-1st.md.txt): This guide is for 1st gen Cloud Functions only, and describes how to organize functions in codebases or multiple files to make them easier to navigate and maintain.
- [Pub/Sub triggers (1st gen)](https://firebase.google.com/docs/functions/1st-gen/pubsub-events-1st.md.txt): This guide is for 1st gen Cloud Functions only, and describes how to create a function that handles Pub/Sub events from a globally distributed message bus.
- [Schedule functions (1st gen)](https://firebase.google.com/docs/functions/1st-gen/schedule-functions-1st.md.txt): This guide is for 1st gen Cloud Functions only, and describes how to schedule functions to run at specified times using a Pub/Sub topic.
- [Upgrade 1st gen Node.js functions to 2nd gen](https://firebase.google.com/docs/functions/2nd-gen-upgrade.md.txt): A guide to upgrading 1st gen Node.js functions to 2nd gen, covering the benefits and migration process.
- [Firebase Alerts triggers](https://firebase.google.com/docs/functions/alert-events.md.txt): A guide to writing functions that handle Firebase alert events, with examples for Crashlytics, Performance Monitoring, and App Distribution.
- [Auth blocking triggers](https://firebase.google.com/docs/functions/auth-blocking-events.md.txt): A guide to using blocking functions to customize authentication flows, with examples for blocking user registration and sign-in.
- [Protocol specification for https.onCall](https://firebase.google.com/docs/functions/callable-reference.md.txt): An outline of the protocol specification for `https.onCall` triggers in Cloud Functions, covering request and response formats, status codes, and serialization.
- [Data Connect triggers for Cloud Functions](https://firebase.google.com/docs/functions/data-connect-events.md.txt): A guide to handling Data Connect events with Cloud Functions, explaining how to trigger functions in response to data changes.
- [Realtime Database triggers](https://firebase.google.com/docs/functions/database-events.md.txt): A guide to handling Realtime Database events with Cloud Functions, explaining how to trigger functions in response to data changes.
- [Cloud Firestore triggers](https://firebase.google.com/docs/functions/firestore-events.md.txt): A guide to handling Cloud Firestore events with Cloud Functions, explaining how to trigger functions in response to document changes.
- [Cloud Run functions and Firebase](https://firebase.google.com/docs/functions/functions-and-firebase.md.txt): An explanation of how Cloud Run functions work with Firebase, detailing the relationship between the two services.
- [Get started: write, test, and deploy your first functions](https://firebase.google.com/docs/functions/get-started.md.txt): A step-by-step guide to getting started with Cloud Functions, covering how to write, test, and deploy your first functions.
- [Handling dependencies](https://firebase.google.com/docs/functions/handle-dependencies.md.txt): A guide to managing dependencies for your functions, covering local, external, and private Node.js modules.

- [Call functions via HTTP requests](https://firebase.google.com/docs/functions/http-events.md.txt): A guide to calling functions via HTTP requests, explaining how to create functions that handle HTTP events, configure CORS, and read request values.
- [Test functions interactively](https://firebase.google.com/docs/functions/local-shell.md.txt): A guide to testing your functions interactively using the Cloud Functions shell, covering how to invoke different function types with test data.
- [Cloud Functions locations](https://firebase.google.com/docs/functions/locations.md.txt): An overview of the supported regions for Cloud Functions and best practices for selecting a location to optimize for latency and availability.
- [Optimizing networking](https://firebase.google.com/docs/functions/networking.md.txt): A guide to optimizing networking for Cloud Functions, providing best practices for maintaining persistent connections and reducing CPU time.
- [Invoke Genkit flows from your App](https://firebase.google.com/docs/functions/oncallgenkit.md.txt): A guide to invoking Genkit flows from your app using Cloud Functions for Firebase by wrapping a Genkit flow in an `onCallGenkit` function.
- [Remote Config triggers](https://firebase.google.com/docs/functions/rc-events.md.txt): A guide to triggering functions in response to Remote Config events, explaining how to handle new config versions and rollbacks.
- [Schedule functions](https://firebase.google.com/docs/functions/schedule-functions.md.txt): A guide to scheduling functions to run at specified times using the `onSchedule` handler and deploying them with Cloud Functions.
- [Tips & tricks](https://firebase.google.com/docs/functions/tips.md.txt): A collection of tips and tricks for working with Cloud Functions, including how to write idempotent functions and handle dependencies.
- [Use TypeScript for Cloud Functions](https://firebase.google.com/docs/functions/typescript.md.txt): A guide to using TypeScript to write functions, covering project initialization, migration from JavaScript, and emulation.
- [What can you do with Cloud Functions?](https://firebase.google.com/docs/functions/use-cases.md.txt): An overview of the various use cases for Cloud Functions, including user notifications, database maintenance, intensive task execution, and third-party service integration.
- [Power up your game development using Firebase](https://firebase.google.com/docs/games/setup.md.txt): An overview of how to use Firebase backend services and analytics to power up mobile games on iOS and Android with the C# and Unity SDKs.
- [Fundamentals](https://firebase.google.com/docs/guides.md.txt): Developer documentation for Firebase
- [Firebase Hosting](https://firebase.google.com/docs/hosting.md.txt): Firebase Hosting provides fast and secure hosting for your web app.
- [Serve dynamic content and host microservices with Cloud Run](https://firebase.google.com/docs/hosting/cloud-run.md.txt): A guide to pairing Firebase Hosting with Cloud Run to serve dynamic content and host microservices, including how to containerize and deploy an application.
- [Integrate other frameworks with Express.js](https://firebase.google.com/docs/hosting/frameworks/express.md.txt): A guide to using experimental CLI functionality for integrating web frameworks with Firebase Hosting; for most users, Firebase App Hosting is recommended.
- [Integrate Flutter Web](https://firebase.google.com/docs/hosting/frameworks/flutter.md.txt): A guide to integrating and deploying Flutter web applications to Firebase Hosting.
- [Integrate web frameworks with Hosting](https://firebase.google.com/docs/hosting/frameworks/frameworks-overview.md.txt): An overview of experimental CLI functionality for integrating with popular modern web frameworks like Angular and Next.js; for most users, Firebase App Hosting is recommended.
- [Integrate Next.js](https://firebase.google.com/docs/hosting/frameworks/nextjs.md.txt): A guide to integrating and deploying Next.js applications to Firebase using experimental CLI functionality; for most Angular users, Firebase App Hosting is recommended.
- [Configure internationalization (i18n) rewrites](https://firebase.google.com/docs/hosting/i18n-rewrites.md.txt): A guide to using internationalization (i18n) rewrites in Firebase Hosting to serve different content based on a user's country or preferred language.
- [Manage cache behavior](https://firebase.google.com/docs/hosting/manage-cache.md.txt): A guide

to managing and configuring cache behavior for both static and dynamic content in Firebase Hosting, including how to use Cache-Control headers.

- [Get started with Firebase Hosting]
(<https://firebase.google.com/docs/hosting/quickstart.md.txt>): A guide to getting started with Firebase Hosting, including how to install the Firebase CLI, initialize a project, and deploy a site.
- [Serve dynamic content and host microservices using Firebase Hosting]
(<https://firebase.google.com/docs/hosting/serverless-overview.md.txt>): An overview of using serverless computing options like Cloud Functions and Cloud Run with Firebase Hosting to serve dynamic content and host microservices.
- [Test your web app locally, share changes with others, then deploy live]
(<https://firebase.google.com/docs/hosting/test-preview-deploy.md.txt>): A guide to testing a web app locally, sharing changes with others using preview URLs, and deploying a site to a live channel in Firebase Hosting.
- [View, search, and filter your site's web request logs with Cloud Logging]
(<https://firebase.google.com/docs/hosting/web-request-logs-and-metrics.md.txt>): A guide to using Cloud Logging to view, search, and filter web request logs for a Firebase Hosting site, including how to use log-based metrics and export logs to other Google Cloud tools.
- [Compose a campaign](<https://firebase.google.com/docs/in-app-messaging/compose-campaign.md.txt>): A guide to composing campaigns in Firebase In-App Messaging, covering styling, content, user targeting, scheduling, and conversion events.
- [Modify behavior of Firebase In-App Messaging messages](<https://firebase.google.com/docs/in-app-messaging/modify-message-behavior.md.txt>): A guide to modifying the behavior of Firebase In-App Messaging messages, including responding to user interactions, programmatic triggering, and managing message delivery.
- [Prepare for Apple's App Store data disclosure requirements]
(<https://firebase.google.com/docs/ios/app-store-data-collection.md.txt>): A guide to Apple's App Store data disclosure requirements for Firebase, detailing the data collected by each Firebase SDK for Apple platforms.
- [Options to install Firebase in your Apple app]
(<https://firebase.google.com/docs/ios/installation-methods.md.txt>): A guide to the various methods for installing Firebase in your Apple app, including Swift Package Manager, CocoaPods, Carthage, and manual integration.
- [Understand Firebase on Apple platforms](<https://firebase.google.com/docs/ios/learn-more.md.txt>): A guide to understanding Firebase on Apple platforms, covering library support, configuration, and integration with Swift, SwiftUI, and other Apple technologies.
- [Link Firebase dependencies statically or dynamically]
(<https://firebase.google.com/docs/ios/link-firebase-static-dynamic.md.txt>): A guide to static and dynamic linking for Firebase dependencies in Apple apps, explaining the differences and how to configure them using CocoaPods.
- [Add Firebase to your Apple project](<https://firebase.google.com/docs/ios/setup.md.txt>): A guide to adding Firebase to your Apple platforms app (like an iOS app), including creating a Firebase project, registering your app, and adding the Firebase SDKs.
- [Migrate to using the Swift extension APIs in the main modules]
(<https://firebase.google.com/docs/ios/swift-migration.md.txt>): A migration guide for moving from the Swift extension APIs to the main modules in the Firebase Apple platforms SDK, covering workspace and source code changes.
- [A/B test two versions of a model](<https://firebase.google.com/docs/ml-kit/android/ab-test-models.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Detect Faces with ML Kit on Android](<https://firebase.google.com/docs/ml-kit/android/detect-faces.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Detect and Track Objects with ML Kit on Android](<https://firebase.google.com/docs/ml-kit/android/detect-objects.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Identify the language of text with ML Kit on Android](<https://firebase.google.com/docs/ml-kit/android/identify-languages.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and

Firebase ML for cloud-based ML.

- [Label Images with ML Kit on Android](<https://firebase.google.com/docs/ml-kit/android/label-images.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Recognize Text in Images with ML Kit on Android](<https://firebase.google.com/docs/ml-kit/android/recognize-text.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Language Identification](<https://firebase.google.com/docs/ml-kit/identify-languages.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [A/B test two versions of a model](<https://firebase.google.com/docs/ml-kit/ios/ab-test-models.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Detect Faces with ML Kit on iOS](<https://firebase.google.com/docs/ml-kit/ios/detect-faces.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Generate Smart Replies with ML Kit on iOS](<https://firebase.google.com/docs/ml-kit/ios/generate-smart-replies.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Identify the language of text with ML Kit on iOS](<https://firebase.google.com/docs/ml-kit/ios/identify-languages.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Label Images with ML Kit on iOS](<https://firebase.google.com/docs/ml-kit/ios/label-images.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Label images with an AutoML-trained model on iOS](<https://firebase.google.com/docs/ml-kit/ios/label-images-with-automl.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Scan Barcodes with ML Kit on iOS](<https://firebase.google.com/docs/ml-kit/ios/read-barcodes.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Use a TensorFlow Lite model for inference with ML Kit on iOS](<https://firebase.google.com/docs/ml-kit/ios/use-custom-models.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Use a custom TensorFlow Lite build](<https://firebase.google.com/docs/ml-kit/ios/use-custom-tflite.md.txt>): A guide on how to use a custom TensorFlow Lite build with ML Kit on iOS.
- [Barcode Scanning](<https://firebase.google.com/docs/ml-kit/read-barcodes.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Landmark Recognition](<https://firebase.google.com/docs/ml-kit/recognize-landmarks.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Text Recognition](<https://firebase.google.com/docs/ml-kit/recognize-text.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Translation](<https://firebase.google.com/docs/ml-kit/translation.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Custom Models](<https://firebase.google.com/docs/ml-kit/use-custom-models.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Detect objects in images with an AutoML-trained model on Android]

(<https://firebase.google.com/docs/ml/android/detect-objects-with-automl.md.txt>): A developer's guide to implementing an AutoML-trained object detection model in an Android app, covering model loading, image preparation, and processing detection results.

- [Label Images with Firebase ML on Android](<https://firebase.google.com/docs/ml/android/label-images-deprecated.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Label images with an AutoML-trained model on Android](<https://firebase.google.com/docs/ml/android/label-images-with-automl.md.txt>): A developer's guide to implementing an AutoML-trained image labeling model in an Android app, covering model loading, image preparation, and processing labeling results.
- [Migrate from the legacy custom model API](<https://firebase.google.com/docs/ml/android/migrate-from-legacy-api.md.txt>): A migration guide for Android developers moving from the legacy FirebaseModelInterpreter API to the TensorFlow Lite Interpreter, including dependency updates and code modifications for input/output handling.
- [Recognize Landmarks Securely with Cloud Vision using Firebase Auth and Functions on Android](<https://firebase.google.com/docs/ml/android/recognize-landmarks.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Recognize Landmarks with Firebase ML on Android](<https://firebase.google.com/docs/ml/android/recognize-landmarks-deprecated.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Recognize Text in Images Securely with Cloud Vision using Firebase Auth and Functions on Android](<https://firebase.google.com/docs/ml/android/recognize-text.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [AutoML Vision Edge](<https://firebase.google.com/docs/ml/automl-image-labeling.md.txt>): Create custom image classification models from your own training data with AutoML Vision Edge.
- [Use a custom TensorFlow Lite model with Flutter](<https://firebase.google.com/docs/ml/flutter/use-custom-models.md.txt>): A developer's guide to using custom TensorFlow Lite models with Flutter and Firebase ML, covering model deployment, downloading to the device, and performing inference.
- [Label Images Securely with Cloud Vision using Firebase Auth and Functions on Apple platforms](<https://firebase.google.com/docs/ml/ios/label-images.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Recognize Text in Images Securely with Cloud Vision using Firebase Auth and Functions on Apple platforms](<https://firebase.google.com/docs/ml/ios/recognize-text.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Protect your Firebase ML Apple app's Cloud credentials](<https://firebase.google.com/docs/ml/ios/secure-api-key.md.txt>): A guide to protecting Firebase ML Apple app Cloud credentials by reducing the scope of existing API keys, creating new restricted API keys, and implementing quota limits for enhanced security.
- [Image Labeling](<https://firebase.google.com/docs/ml/label-images.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- (https://firebase.google.com/docs/ml/legacy-mlkit/___deprecated_by_ml_and_mlkit.md.txt)
- (https://firebase.google.com/docs/ml/legacy-mlkit/___deprecated_by_mlkit.md.txt)
- (https://firebase.google.com/docs/ml/legacy-mlkit/___deprecated_sdk.md.txt)
- [Migrate AutoML datasets to Blaze](<https://firebase.google.com/docs/ml/migrate-automl-datasets.md.txt>): A guide to migrating AutoML datasets from the Spark to the Blaze pricing plan, enabling access to advanced features like unlimited training examples by creating a new dataset from exported data.
- [Landmark Recognition](<https://firebase.google.com/docs/ml/recognize-landmarks.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Text Recognition](<https://firebase.google.com/docs/ml/recognize-text.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Train an image labeling model with AutoML Vision Edge](<https://firebase.google.com/docs/ml/train-image-labeler.md.txt>): A comprehensive guide to

training a custom image labeling model using AutoML Vision Edge, from preparing your dataset to deploying the model in your app.

- [Firebase Performance Monitoring](https://firebase.google.com/docs/perf-mon.md.txt): Gain insight into your app's performance issues.
- [Set up alerts for performance issues](https://firebase.google.com/docs/perf-mon/alerts.md.txt): A guide to setting up and configuring alerts in Firebase Performance Monitoring to receive notifications about performance issues in your app.
- [Learn about app start, app-in-foreground, and app-in-background performance data (Apple & Android apps)](https://firebase.google.com/docs/perf-mon/app-start-foreground-background-traces.md.txt): A guide to the automatic app lifecycle traces in Firebase Performance Monitoring for Apple and Android apps, including app start, app-in-foreground, and app-in-background traces.
- [Export Performance Monitoring data to BigQuery](https://firebase.google.com/docs/perf-mon/bigquery-export.md.txt): A guide to exporting Firebase Performance Monitoring data to BigQuery for in-depth analysis of your app's performance.
- [Monitoring performance data in the console](https://firebase.google.com/docs/perf-mon/console.md.txt): A guide to monitoring your app's performance data in the Firebase console, including how to track key metrics, view traces, and analyze user session data.
- [Add custom monitoring for specific app code](https://firebase.google.com/docs/perf-mon/custom-code-traces.md.txt): A guide to using custom code traces in Firebase Performance Monitoring to monitor the performance of specific code in your app, including how to add custom metrics and attributes.
- [Customize network request data aggregation](https://firebase.google.com/docs/perf-mon/custom-url-patterns.md.txt): A guide to customizing network request data aggregation in Firebase Performance Monitoring by creating custom URL patterns and defining success rate calculations.
- [Learn about page loading performance data (web apps)](https://firebase.google.com/docs/perf-mon/page-load-traces.md.txt): A guide to the page load traces automatically collected by Firebase Performance Monitoring for web apps, including the various metrics that help you understand your web page's loading performance.
- [Learn about screen rendering performance data (Apple & Android apps)](https://firebase.google.com/docs/perf-mon/screen-traces.md.txt): A guide to the screen rendering traces automatically collected by Firebase Performance Monitoring for Apple and Android apps, including metrics for slow and frozen frames to help you understand your app's rendering performance.
- [Firebase Phone Number Verification](https://firebase.google.com/docs/phone-number-verification.md.txt): Quickly and securely verify phone numbers with low user friction
- [Customize the Firebase Phone Number Verification flow on Android](https://firebase.google.com/docs/phone-number-verification/android/custom-flow.md.txt): A guide to customizing the Firebase Phone Number Verification (PNV) flow on Android.
- [Firebase Phone Number Verification Technical Carrier Onboarding Guide](https://firebase.google.com/docs/phone-number-verification/carrier_specs.md.txt): A technical guide for carriers on how to onboard to Firebase Phone Number Verification (PNV) via TS.43 phone number verifications.
- [Firebase PNV Privacy Considerations](https://firebase.google.com/docs/phone-number-verification/carrier_specs/privacy.md.txt): A guide to the privacy considerations for Firebase Phone Number Verification (PNV), including developer onboarding and user consent.
- [Firebase Phone Number Verification observability](https://firebase.google.com/docs/phone-number-verification/observability.md.txt): A guide to the observability features of Firebase Phone Number Verification (PNV), including its integration with Cloud Monitoring and Cloud Logging.
- [Firebase Phone Number Verification pricing](https://firebase.google.com/docs/phone-number-verification/pricing.md.txt): A guide to the pricing and supported carriers for Firebase Phone Number Verification (PNV).
- [Learn about using and managing API keys for Firebase](https://firebase.google.com/docs/projects/api-keys.md.txt): Developer documentation for Firebase
- [Set up and manage a Firebase project using the Management REST API](https://firebase.google.com/docs/projects/api/workflow_set-up-and-manage-project.md.txt): Developer documentation for Firebase
- [Export Firebase data into BigQuery](https://firebase.google.com/docs/projects/bigquery-export.md.txt): A guide to exporting Firebase data to BigQuery for analysis, including setup instructions, required permissions, and pricing information.

- [Set up advanced billing alerts and logic]
(<https://firebase.google.com/docs/projects/billing/advanced-billing-alerts-logic.md.txt>): Learn how to create sophisticated customized logic to control how you receive alerts for billing updates and even programmatically respond to them.
- [General best practices for setting up Firebase projects]
(<https://firebase.google.com/docs/projects/dev-workflows/general-best-practices.md.txt>): Learn about the general, high-level best practices to set up Firebase projects and registering your apps with a project so that you have a clear development workflow that uses distinct environments.
- [General security guidelines for different development workflow environments]
(<https://firebase.google.com/docs/projects/dev-workflows/general-security-guidelines.md.txt>): Learn about the most important best practices to ensure that each environment of your development workflow is secure.
- [Overview of environments](<https://firebase.google.com/docs/projects/dev-workflows/overview-environments.md.txt>): Developer documentation for Firebase
- [Firebase IAM roles](<https://firebase.google.com/docs/projects/iam/roles.md.txt>): Developer documentation for Firebase
- [Custom roles](<https://firebase.google.com/docs/projects/iam/roles-custom.md.txt>): Developer documentation for Firebase
- [Firebase predefined roles](<https://firebase.google.com/docs/projects/iam/roles-predefined.md.txt>): Developer documentation for Firebase
- [Firebase product-level predefined roles](<https://firebase.google.com/docs/projects/iam/roles-predefined-product.md.txt>): Developer documentation for Firebase
- [Understand Firebase projects](<https://firebase.google.com/docs/projects/learn-more.md.txt>): Developer documentation for Firebase
- [Get started with Terraform and Firebase]
(<https://firebase.google.com/docs/projects/terraform/get-started.md.txt>): Developer documentation for Firebase
- [Firebase Admin .NET SDK](<https://firebase.google.com/docs/reference/admin/dotnet.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.AppOptions Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/app-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.EmailIdentifier Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/email-identifier.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.ErrorInfo Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/error-info.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.FirebaseAuthException Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/firebase-auth-exception.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.GetUsersResult Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/get-users-result.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Hash.Bcrypt Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/bcrypt.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Hash.Hmac Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/hmac.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Hash.HmacSha512 Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/hmac-sha512.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile

and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.Md5 Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/md5.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.ImportUserRecordArgs Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/import-user-record-args.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.ListUsersOptions Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/list-users-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Multitenancy.ListTenantsOptions Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/multitenancy/list-tenants-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Multitenancy.Tenant Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/multitenancy/tenant.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Multitenancy.TenantAwareFirebaseAuth Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/multitenancy/tenant-aware-firebase-auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Multitenancy.TenantsPage Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/multitenancy/tenants-page.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.ProviderIdentifier Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/provider-identifier.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Providers.ListProviderConfigsOptions Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/providers/list-provider-configs-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Providers.OidcProviderConfig Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/providers/oidc-provider-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Providers.OidcProviderConfigArgs Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/providers/oidc-provider-config-args.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Providers.ProviderConfigClient.AbstractListRequest Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/providers/provider-config-client-t-/abstract-list-request.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Providers.SamlProviderConfigArgs Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/providers/saml-provider-config-args.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.UidIdentifier Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/uid->

identifier.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.UserMetadata Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/user-metadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.UserRecordArgs Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/user-record-args.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Messaging.AndroidFcmOptions Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/android-fcm-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Messaging.ApnsConfig Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/apns-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Messaging.CriticalSound Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/critical-sound.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Messaging.ErrorInfo Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/error-info.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Messaging.FcmOptions Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/fcm-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Messaging.Message Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/message.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Messaging.Notification Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/notification.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Messaging.SendResponse Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/send-response.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Messaging.WebpushFcmOptions Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/webpush-fcm-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.IUserInfo Interface Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/interface/firebase-admin/auth/i-user-info.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth Namespace]
(<https://firebase.google.com/docs/reference/admin/dotnet/namespace/firebase-admin/auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ErrorCode]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/ErrorCode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseApp]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/FirebaseApp.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseOptions.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/FirebaseOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [OutgoingHttpRequest]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/OutgoingHttpRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ThreadManager]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/ThreadManager.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AbstractFirebaseAuth.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/AbstractFirebaseAuth.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ActionCodeSettings]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ActionCodeSettings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DeleteUsersResult]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/DeleteUsersResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [EmailIdentifier]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/EmailIdentifier.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ErrorInfo]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ErrorInfo.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ExportedUserRecord]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ExportedUserRecord.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseToken]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/FirebaseToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [GetUsersResult]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/GetUsersResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [GoogleOAuthAccessToken]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/GoogleOAuthAccessToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ListProviderConfigsPage]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ListProviderConfigsPage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ListUsersPage]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ListUsersPage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [OidcProviderConfig.CreateRequest]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/OidcProviderConfig.CreateRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [OidcProviderConfig.UpdateRequest]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/OidcProviderConfig.UpdateRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

oviderConfig.UpdateRequest.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [PhoneIdentifier]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/PhoneIdentifier.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ProviderConfig.AbstractCreateRequest]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ProviderConfig.AbstractCreateRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ProviderConfig.AbstractUpdateRequest]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ProviderConfig.AbstractUpdateRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ProviderIdentifier]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ProviderIdentifier.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [SamlProviderConfig.CreateRequest]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/SamlProviderConfig.CreateRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [SamlProviderConfig.UpdateRequest]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/SamlProviderConfig.UpdateRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [SessionCookieOptions]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/SessionCookieOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [SessionCookieOptions.Builder]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/SessionCookieOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UidIdentifier]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UidIdentifier.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserImportOptions]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserImportOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserMetadata]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserProvider]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserRecord]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserRecord.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserRecord.UpdateRequest]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserRecord.UpdateRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Argon2.Argon2HashType]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Argon2.Argon2HashType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Bcrypt]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Bcrypt.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [HmacShal.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/HmacShal.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [HmacSha256]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/HmacSha256.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [HmacSha256.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/HmacSha256.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Md5]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Md5.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PbkdfShal.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/PbkdfShal.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Scrypt]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Scrypt.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Scrypt.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Scrypt.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Shal]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Shal.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Shal.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Shal.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Sha256]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Sha256.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.auth.hash]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ListTenantsPage]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/multitenancy/ListTenantsPage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Tenant]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/multitenancy/Tenant.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Tenant.CreateRequest]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/multitenancy/Tenant.CreateRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.auth.multitenancy]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/multitenancy>

enancy/package-summary.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [com.google.firebase.auth Details]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/package-descr.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.auth]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirestoreClient]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/cloud/FirestoreClient.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.cloud Details]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/cloud/package-descr.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DataSnapshot]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/DataSnapshot.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DatabaseError]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/DatabaseError.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DatabaseException]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/DatabaseException.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DatabaseReference]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/DatabaseReference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DatabaseReference.CompletionListener]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/DatabaseReference.CompletionListener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Exclude]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/Exclude.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseDatabase]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/FirebaseDatabase.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [IgnoreExtraProperties]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/IgnoreExtraProperties.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [MutableData]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/MutableData.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [OnDisconnect]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/OnDisconnect.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PropertyName]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/PropertyName.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Transaction.Result]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/Transaction.Result.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ValueEventListener]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/ValueEventListener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.database]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseInstanceId]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/iid/FirebaseInstanceId.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.iid Details]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/iid/package-descr.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.iid]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/iid/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AndroidConfig.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/AndroidConfig.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AndroidNotification.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/AndroidNotification.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AndroidNotification.Priority]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/AndroidNotification.Priority.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ApnsFcmOptions]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/ApnsFcmOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Aps]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/Aps.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ApsAlert]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/ApsAlert.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [BatchResponse]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/BatchResponse.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [CriticalSound]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/CriticalSound.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FcmOptions]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/FcmOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseMessaging]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/F>

irebaseMessaging.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseMessagingException]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/FirebaseMessagingException.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [LightSettingsColor]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/LightSettingsColor.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [MessagingErrorCode]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/MessagingErrorCode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [MulticastMessage]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/MulticastMessage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Notification]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/Notification.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [SendResponse]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/SendResponse.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [TopicManagementResponse]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/TopicManagementResponse.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [TopicManagementResponse.Error]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/TopicManagementResponse.Error.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [WebpushConfig]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/WebpushConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [WebpushConfig.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/WebpushConfig.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [WebpushFcmOptions]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/WebpushFcmOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [WebpushNotification.Action]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/WebpushNotification.Action.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [WebpushNotification.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/WebpushNotification.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.messaging Details]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/package-descr.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.messaging]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [AndroidApp]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/projectmanagement/AndroidApp.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AndroidAppMetadata]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/projectmanagement/AndroidAppMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [IosAppMetadata]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/projectmanagement/IosAppMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ShaCertificateType]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/projectmanagement/ShaCertificateType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.projectmanagement]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/projectmanagement/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Condition]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/Condition.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseRemoteConfig]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/FirebaseRemoteConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseRemoteConfigException]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/FirebaseRemoteConfigException.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [KeysAndValues]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/KeysAndValues.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ParameterGroup]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ParameterGroup.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ParameterValue.InAppDefault]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ParameterValue.InAppDefault.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ParameterValue.Type]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ParameterValue.Type.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PercentCondition]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/PercentCondition.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [RemoteConfigErrorCode]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/RemoteConfigErrorCode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ServerConfig]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ServerConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ServerTemplateImpl]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ServerTemplateImpl.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

g/ServerTemplateImpl.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [ValueSource]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remotefirebase/ValueSource.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Version]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remotefirebase/Version.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.remoteconfig]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remotefirebase/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Package Index]
(<https://firebase.google.com/docs/reference/admin/java/reference/packages.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AppPlatform | Admin Node.js SDK]
(<https://firebase.google.com/docs/reference/admin/node/enums/admin.projectmanagement.appplatform.md.txt>): Reference for AppPlatform
- [firebase-admin package](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.app-check package]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.app-check.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AppCheck class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.app-check.appcheck.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AppCheckToken interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.app-check.appchecktoken.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [VerifyAppCheckTokenOptions interface]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.app-check.verifyappchecktokenoptions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AppErrorCodes class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.app.apperrorcodes.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ServiceAccount interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.app.serviceaccount.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [app namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.app_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [app.App interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.app_n.app.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [appCheck namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.appcheck_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and

writing to Realtime Database, and so on.

- [AppOptions interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.appoptions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ActionCodeSettings interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.actioncodesettings.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AllowByDefault interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.allowbydefault.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AllowByDefaultWrap interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.allowbydefaultwrap.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AllowlistOnly interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.allowlistonly.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AuthProviderConfigFilter interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.authproviderconfigfilter.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [BaseAuth class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.baseauth.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [BaseAuthProviderConfig interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.baseauthproviderconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [BaseCreateMultiFactorInfoRequest interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.basecreatemultifactorinforequest.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [CreateMultiFactorInfoRequest interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.createmultifactorinforequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DeleteUsersResult interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.deleteusersresult.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ListProviderConfigResults interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.listproviderconfigresults.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ListTenantsResult interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.listtenantsresult.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MultiFactorCreateSettings interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.multifactorcreatesettings.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

- [MultiFactorInfo class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.multifactorinfo.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MultiFactorProviderConfig interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.multifactorproviderconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MultiFactorSettings class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.multifactorsettings.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [OIDCUpdateAuthProviderRequest interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.oidcupdateauthproviderrequest.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ProjectConfigManager class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.projectconfigmanager.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ProviderIdentifier interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.provideridentifier.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RecaptchaKey interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.recaptchakey.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RecaptchaManagedRule interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.recaptchamanagedrule.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RecaptchaTollFraudManagedRule interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.recaptchatollfraudmanagedrule.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [SAMLUpdateAuthProviderRequest interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.samlupdateauthproviderrequest.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Tenant class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.tenant.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [UpdateMultiFactorInfoRequest interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.updatemultifactorinforequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UpdatePhoneMultiFactorInfoRequest interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.updatephonemultifactorinforequest.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [UserImportRecord interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.userimportrecord.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

- [UserImportResult interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.userimportresult.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [UserMetadata class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.usermetadata.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [UserMetadataRequest interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.usermetadatarequest.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [auth namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.data-connect package](https://firebase.google.com/docs/reference/admin/node/firebase-admin.data-connect.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [GraphQLOptions interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.data-connect.graphqloptions.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ImpersonateAuthenticated interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.data-connect.imPERSONATEauthenticated.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ImpersonateUnauthenticated interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.data-connect.imPERSONATEunauthenticated.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [OperationOptions interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.data-connect.operationoptions.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirebaseDatabaseError class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.database.firebaseDATABASEerror.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.eventarc package](https://firebase.google.com/docs/reference/admin/node/firebase-admin.eventarc.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Channel class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.eventarc.channel.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ChannelOptions interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.eventarc.channeloptions.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Eventarc class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.eventarc.eventarc.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirebaseError interface](https://firebase.google.com/docs/reference/admin/node/firebase-

admin.firebaseerror.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

- [firebase-admin.firestore package]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.firestore.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AbsoluteDelivery interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.functions.absolutedelivery.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [TaskQueue class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.functions.taskqueue.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [GoogleOAuthAccessToken interface]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.googleoauthaccesstoken.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirebaseInstallationsError class]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.installations.firebaseinstallationerror.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [installations namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.installations_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.instance-id package]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.instance-id.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirebaseInstanceIdError class]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.instance-id.firebaseinstanceiderror.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [InstanceId class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.instance-id.instanceid.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [InstanceIdClientErrorCode class]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.instance-id.instanceidclienterrorcode.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [instanceId namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.instanceid_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.machine-learning package]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.machine-learning.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AutoMLTfliteModelOptions interface]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.machine-learning.automltflitemodeloptions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

reading and writing to Realtime Database, and so on.

- [ListModelOptions interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.machine-learning.listmodeloptions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Model class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.machine-learning.model.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ModelOptionsBase interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.machine-learning.modeloptionsbase.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.messaging package](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AndroidConfig interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.androidconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AndroidNotification interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.androidnotification.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ApnsConfig interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.apnsconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ApnsFcmOptions interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.apnsfcmoptions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ApnsPayload interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.apnspayload.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Aps interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.aps.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [BaseMessage interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.basemessage.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [BatchResponse interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.batchresponse.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [CriticalSound interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.criticalsound.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [DataMessagePayload interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.datamessagepayload.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FcmOptions interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.fcmoptions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens,

reading and writing to Realtime Database, and so on.

- [Messaging class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.messaging.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MessagingClientErrorCode class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.messagingclienterrorcode.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MessagingConditionResponse interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.messagingconditionresponse.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MessagingDeviceGroupResponse interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.messagingdevicegroupresponse.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MessagingDevicesResponse interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.messagingdevicesresponse.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MessagingOptions interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.messagingoptions.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MessagingPayload interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.messagingpayload.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MessagingTopicManagementResponse interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.messagingtopicmanagementresponse.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [SendResponse interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.sendresponse.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [TokenMessage interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.tokenmessage.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [messaging namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.project-management package](https://firebase.google.com/docs/reference/admin/node/firebase-admin.project-management.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirebaseProjectManagementError class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.project-management.firebaseprojectmanagementerror.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [IosAppMetadata interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.project-management.iosappmetadata.md.txt): The Admin SDK lets you interact with Firebase

from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

- [ShaCertificate class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.project-management.shacertificate.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [projectManagement namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.projectmanagement_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.remote-config package](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [CustomSignalCondition interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.customsignalcondition.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ExplicitParameterValue interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.explicitparametervalue.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FetchResponseData interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.fetchresponsedata.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [GetServerTemplateOptions interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.getservertemplateoptions.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [InitServerTemplateOptions interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.initservertemplateoptions.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [NamedCondition interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.namedcondition.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [PercentCondition interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.percentcondition.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RemoteConfigFetchResponse class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.remoteconfigfetchresponse.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RemoteConfigParameterGroup interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.remoteconfigparametergroup.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RemoteConfigTemplate interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.remoteconfigtemplate.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

- [ServerTemplate interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.srvtemplate.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Value interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.value.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [remoteConfig namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remoteconfig_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.security-rules package](https://firebase.google.com/docs/reference/admin/node/firebase-admin.security-rules.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Ruleset class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.security-rules.ruleset.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RulesetMetadata interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.security-rules.rulesetmetadata.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [SecurityRules class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.security-rules.securityrules.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [securityRules namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.securityrules_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ServiceAccount interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.serviceaccount.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Storage class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.storage.storage.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase_admin module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.auth module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.auth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.db module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.db.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.firestore module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.firestore.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.firestore_async module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.firestore_async.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.functions module]

(https://firebase.google.com/docs/reference/admin/python/firebase_admin.functions.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [[firebase_admin.instance_id](https://firebase.google.com/docs/reference/admin/python/firebase_admin.instance_id.md.txt) module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.instance_id.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase AI Logic API](<https://firebase.google.com/docs/reference/ai-logic/rest.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [GenerateContentResponse](<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/GenerateContentResponse.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.templates](<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.locations.templates.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.templates.patch](<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.locations.templates/patch.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.templates.templateGenerateContent](<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.templates/templateGenerateContent.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.templates.templatePredict](<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.templates/templatePredict.md.txt>):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

(https://firebase.google.com/docs/reference/android/com/google/firebase/FirebaseApp.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseException]
(https://firebase.google.com/docs/reference/android/com/google/firebase/FirebaseException.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseKt]
(https://firebase.google.com/docs/reference/android/com/google/firebase/FirebaseKt.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseNetworkException]
(https://firebase.google.com/docs/reference/android/com/google/firebase/FirebaseNetworkException.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseOptions]
(https://firebase.google.com/docs/reference/android/com/google/firebase/FirebaseOptions.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseOptions.Builder]
(https://firebase.google.com/docs/reference/android/com/google/firebase/FirebaseOptions.Builder.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseTooManyRequestsException]
(https://firebase.google.com/docs/reference/android/com/google/firebase/FirebaseTooManyRequestsException.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [Timestamp.Companion]
(https://firebase.google.com/docs/reference/android/com/google/firebase/Timestamp.Companion.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAI]
(https://firebase.google.com/docs/reference/android/com/google/firebase/ai/FirebaseAI.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAIKt]
(https://firebase.google.com/docs/reference/android/com/google/firebase/ai/FirebaseAIKt.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [GenerativeModel]
(https://firebase.google.com/docs/reference/android/com/google/firebase/ai/GenerativeModel.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenModel]
(https://firebase.google.com/docs/reference/android/com/google/firebase/ai/ImagenModel.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [TemplateGenerativeModel]
(https://firebase.google.com/docs/reference/android/com/google/firebase/ai/TemplateGenerativeModel.md.txt): Firebase provides Android client SDKs for over 20 products and services.
- [TemplateImagenModel]
(https://firebase.google.com/docs/reference/android/com/google/firebase/ai/TemplateImagenModel.md.txt): Firebase provides Android client SDKs for over 20 products and services.

```

- [Generable]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/annotations/Generable.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChatFutures.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/ChatFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerativeModelFutures]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/GenerativeModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenModelFutures]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/ImagenModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveModelFutures.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/LiveModelFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveSessionFutures]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/LiveSessionFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TemplateGenerativeModelFutures.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/TemplateGenerativeModelFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TemplateImagenModelFutures]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/TemplateImagenModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TemplateImagenModelFutures.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/TemplateImagenModelFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BlockReason]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/BlockReason.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CitationMetadata]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/CitationMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Content]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Content.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Content.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Content.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ContentKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ContentKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CountTokensResponse]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/CountTokensResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FinishReason]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/FinishReason.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FinishReason.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/FinishReason.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionCallingConfig.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/FunctionCallingConfig.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionDeclaration]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/FunctionDeclaration.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerateObjectResponse]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GenerateObjectResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

sponse.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [GenerationConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GenerationConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerationConfig.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GenerationConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerationConfig.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GenerationConfig.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerationConfigKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GenerationConfigKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerativeBackend]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GenerativeBackend.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GroundingAttribution]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GroundingAttribution.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GroundingChunk]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GroundingChunk.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GroundingMetadata]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GroundingMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmBlockMethod.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/HarmBlockMethod.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmBlockThreshold]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/HarmBlockThreshold.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmCategory.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/HarmCategory.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmProbability]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/HarmProbability.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmProbability.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/HarmProbability.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmSeverity]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/HarmSeverity.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmSeverity.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/HarmSeverity.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenAspectRatio]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenAspectRatio.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenBackgroundMask]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenBackgroundMask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenControlReference]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenControlReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenControlType.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenControlType.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenEditMode]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenEditMode.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenEditMode.Companion]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenEditMode.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [ImagenEditingConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenEditingConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenGenerationConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenGenerationConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenImagePlacement.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenImagePlacement.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenInlineImage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenInlineImage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenInlineImageKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenInlineImageKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenMaskReference]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenMaskReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenPersonFilterLevel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenPersonFilterLevel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenRawImage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenRawImage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenRawMask]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenRawMask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenReferenceImage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenReferenceImage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSafetyFilterLevel.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenSafetyFilterLevel.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenStyleReference]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenStyleReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSubjectReference]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenSubjectReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InlineDataPart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/InlineDataPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InvalidStateException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/InvalidStateException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [JsonSchema.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/JsonSchema.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveAudioConversationConfig.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveAudioConversationConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerationConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveGenerationConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerationConfig.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveGenerationConfig.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerContent]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveServerContent.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [LiveServerGoAway]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveServerGoAway.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerToolCall]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveServerToolCall.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveSession]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveSession.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MediaData]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/MediaData.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ModalityTokenCount]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ModalityTokenCount.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Part]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Part.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PartKt]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/PartKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PermissionMissingException]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/PermissionMissingException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PromptBlockedException]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/PromptBlockedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PublicPreviewAPI]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/PublicPreviewAPI.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ResponseModality.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ResponseModality.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ResponseStoppedException]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ResponseStoppedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SafetyRating]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/SafetyRating.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SafetySetting]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/SafetySetting.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Schema]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Schema.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServerException]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ServerException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServiceDisabledException]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ServiceDisabledException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SessionAlreadyReceivingException]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/SessionAlreadyReceivingException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThinkingConfigKt]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ThinkingConfigKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThinkingLevel]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ThinkingLevel.md>

.txt): Firebase provides Android client SDKs for over 20 products and services.

- [ThinkingLevel.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ThinkingLevel.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Tool]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Tool.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Tool.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Tool.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UnknownException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/UnknownException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UnsupportedUserLocationException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/UnsupportedUserLocationException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UrlContextMetadata]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/UrlContextMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Voice]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Voice.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Voices]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Voices.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Voices.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Voices.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [WebGroundingChunk]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/WebGroundingChunk.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.ai.type]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAnalytics]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/FirebaseAnalytics.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAnalytics.ConsentType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/FirebaseAnalytics.ConsentType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAnalytics.Event]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/FirebaseAnalytics.Event.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAnalytics.UserProperty]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/FirebaseAnalytics.UserProperty.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GoogleAnalyticsServerPreviewActivity]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/GoogleAnalyticsServerPreviewActivity.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ParametersBuilder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/ParametersBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AnalyticsKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/ktx/AnalyticsKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AppCheckProviderFactory]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/AppCheckProviderFactory.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [FirebaseAppCheck]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/FirebaseAppCheck.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppCheckKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/FirebaseAppCheckKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appcheck.debug]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/debug/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DebugAppCheckTestHelper.MaybeThrowingRunnable]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/debug/testing/DebugAppCheckTestHelper.MaybeThrowingRunnable.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppCheckKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/ktx/FirebaseAppCheckKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appcheck]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appcheck.playintegrity]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/playintegrity/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppDistributionKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/FirebaseAppDistributionKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UpdateProgress]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/UpdateProgress.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UpdateTask]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/UpdateTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appdistribution]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeInfo]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/ActionCodeInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeResult]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/ActionCodeResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeResult.ActionDataKey]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/ActionCodeResult.ActionDataKey.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeResult.Operation]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/ActionCodeResult.Operation.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeSettings.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/ActionCodeSettings.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeUrl]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/ActionCodeUrl.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AdditionalUserInfo]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/AdditionalUserInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AuthCredential]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/AuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [EmailAuthCredential]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/EmailAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [EmailAuthProvider]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/EmailAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FacebookAuthProvider]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FacebookAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FederatedAuthProvider]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FederatedAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthActionCodeException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthActionCodeException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthInvalidUserException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthInvalidUserException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthProvider]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthUserCollisionException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthUserCollisionException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthWeakPasswordException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthWeakPasswordException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GithubAuthCredential]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/GithubAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GoogleAuthCredential]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/GoogleAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MultiFactorInfo]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/MultiFactorInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MultiFactorResolver]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/MultiFactorResolver.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OAuthProvider]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/OAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OAuthProvider.CredentialBuilder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/OAuthProvider.CredentialBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneAuthCredential]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/PhoneAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneAuthOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/PhoneAuthOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneAuthOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/PhoneAuthOptions.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneMultiFactorAssertion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/PhoneMultiFactorAssertion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneMultiFactorInfo]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/PhoneMultiFactorInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ProviderQueryResult]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/ProviderQueryResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [TotpMultiFactorAssertion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/TotpMultiFactorAssertion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TotpSecret]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/TotpSecret.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UserInfo]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/UserInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UserProfileChangeRequest.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/UserProfileChangeRequest.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [IdTokenListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/internal/IdTokenListener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [InternalAuthProvider]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/internal/InternalAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.auth.internal]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/internal/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AuthKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/ktx/AuthKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CustomKeysAndValues.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/crashlytics/CustomKeysAndValues.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseCrashlyticsKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/crashlytics/FirebaseCrashlyticsKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [KeyValueBuilder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/crashlytics/ktx/KeyValueBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.crashlytics]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/crashlytics/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Removed]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ChildEvent.Removed.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DataSnapshot]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/DataSnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DatabaseReference]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/DatabaseReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DatabaseReference.CompletionListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/DatabaseReference.CompletionListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [IgnoreExtraProperties]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/IgnoreExtraProperties.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Logger]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/Logger.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OnDisconnect]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/OnDisconnect.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [Query]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/Query.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServerValue]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ServerValue.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Transaction]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/Transaction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ktx/ChildEvent.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Added]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ktx/ChildEvent.Added.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Changed]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ktx/ChildEvent.Changed.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Removed]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ktx/ChildEvent.Removed.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DatabaseKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ktx/DatabaseKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.database.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.database]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.AndroidParameters]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.AndroidParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.AndroidParameters.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.AndroidParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.GoogleAnalyticsParameters]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.GoogleAnalyticsParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.IosParameters]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.IosParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.IosParameters.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.IosParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.ItunesConnectAnalyticsParameters]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.ItunesConnectAnalyticsParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.SocialMetaTagParameters.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.SocialMetaTagParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20

products and services.

- [FirebaseDynamicLinks]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/FirebaseDynamicLinks.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseDynamicLinksKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/FirebaseDynamicLinksKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PendingDynamicLinkData]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/PendingDynamicLinkData.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ShortDynamicLink]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/ShortDynamicLink.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ShortDynamicLink.Suffix]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/ShortDynamicLink.Suffix.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseDynamicLinksKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/ktx/FirebaseDynamicLinksKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.dynamiclinks]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateField.CountAggregateField]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/AggregateField.CountAggregateField.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateField.SumAggregateField]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/AggregateField.SumAggregateField.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CollectionReference]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/CollectionReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DocumentChange.Type]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/DocumentChange.Type.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DocumentId]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/DocumentId.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DocumentReference]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/DocumentReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DocumentSnapshot]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/DocumentSnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Exclude]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Exclude.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FieldValue]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/FieldValue.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Filter]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Filter.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirestoreSettings.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/FirebaseFirestoreSettings.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirestoreKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/FirestoreKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [IgnoreExtraProperties]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/IgnoreExtraProperties.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LoadBundleTask]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/LoadBundleTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LocalCacheSettings]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/LocalCacheSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MemoryCacheSettings.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/MemoryCacheSettings.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MemoryGarbageCollectorSettings]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/MemoryGarbageCollectorSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OnProgressListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/OnProgressListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PersistentCacheSettings]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/PersistentCacheSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PersistentCacheSettings.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/PersistentCacheSettings.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Pipeline]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Pipeline.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Pipeline.ExecuteOptions.IndexMode.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Pipeline.ExecuteOptions.IndexMode.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Pipeline.Snapshot]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Pipeline.Snapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PropertyName]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/PropertyName.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Query]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Query.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServerTimestamp]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/ServerTimestamp.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SetOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/SetOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SnapshotListenOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/SnapshotListenOptions.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Source]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Source.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Transaction]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Transaction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Transaction.Function]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Transaction.Function.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TransactionOptions.Builder]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/TransactionOptions.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [WriteBatch] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/WriteBatch.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [WriteBatch.Function] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/WriteBatch.Function.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirestoreKt] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/ktx/FirestoreKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.firestore.ktx] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AbstractOptions] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/AbstractOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateFunction] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/AggregateFunction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateFunction.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/AggregateFunction.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateHints] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/AggregateHints.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateStage] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/AggregateStage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AliasedAggregate] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/AliasedAggregate.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BooleanExpression] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/BooleanExpression.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BooleanExpression.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/BooleanExpression.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CollectionGroupOptions] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/CollectionGroupOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CollectionHints] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/CollectionHints.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CollectionSource] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/CollectionSource.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CollectionSourceOptions] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/CollectionSourceOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Expression] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/Expression.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Expression.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/Expression.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Field]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/Field.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [FindNearestOptions] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/FindNearestOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FindNearestStage] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/FindNearestStage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FindNearestStage.DistanceMeasure] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/FindNearestStage.DistanceMeasure.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FindNearestStage.DistanceMeasure.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/FindNearestStage.DistanceMeasure.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InternalOptions] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/InternalOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Ordering] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/Ordering.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Ordering.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/Ordering.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RawOptions.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/RawOptions.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RawStage.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/RawStage.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SampleStage.Mode] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/SampleStage.Mode.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SampleStage.Mode.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/SampleStage.Mode.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UnnestOptions] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/UnnestOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TimestampKt] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/evaluation/TimestampKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.firestore.pipeline.evaluation] (<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/evaluation/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirestoreFunctions] (<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/FirestoreFunctions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirestoreFunctionsException] (<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/FirestoreFunctionsException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirestoreFunctionsException.Code] (<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/FirestoreFunctionsException.Code.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionsKt] (<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/FunctionsKt.md>

.txt): Firebase provides Android client SDKs for over 20 products and services.

- [HttpsCallableOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/HttpsCallableOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HttpsCallableReference]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/HttpsCallableReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StreamResponse.Result]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/StreamResponse.Result.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionsKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/ktx/FunctionsKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.functions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInstanceId]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/iid/FirebaseInstanceId.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseInstanceIdReceiver]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/iid/FirebaseInstanceIdReceiver.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [InstanceIdResult]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/iid/InstanceIdResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.iid]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/iid/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseInAppMessagingContextualTrigger]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/FirebaseInAppMessagingContextualTrigger.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingDisplay]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/FirebaseInAppMessagingDisplay.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingDisplayCallbacks.InAppMessagingErrorReason]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/FirebaseInAppMessagingDisplayCallbacks.InAppMessagingErrorReason.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingDisplay]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/display/FirebaseInAppMessagingDisplay.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InAppMessagingDisplayKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/display/InAppMessagingDisplayKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InAppMessagingKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/ktx/InAppMessagingKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Button]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/Button.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CampaignMetadata]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/CampaignMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CardMessage]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/CarDMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [ImageData] (<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/ImageData.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImageOnlyMessage] (<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/ImageOnlyMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InAppMessage] (<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/InAppMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MessageType] (<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/MessageType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ModalMessage] (<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/ModalMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.inappmessaging.model] (<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInstallations] (<https://firebase.google.com/docs/reference/android/com/google/firebase/installations/FirebaseInstallations.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InstallationsKt] (<https://firebase.google.com/docs/reference/android/com/google/firebase/installations/InstallationsKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.installations] (<https://firebase.google.com/docs/reference/android/com/google/firebase/installations/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseKt] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ktx/FirebaseKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.ktx] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseMessaging] (<https://firebase.google.com/docs/reference/android/com/google/firebase/messaging/FirebaseMessaging.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MessagingKt] (<https://firebase.google.com/docs/reference/android/com/google/firebase/messaging/MessagingKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RemoteMessage.Notification] (<https://firebase.google.com/docs/reference/android/com/google/firebase/messaging/RemoteMessage.Notification.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SendException] (<https://firebase.google.com/docs/reference/android/com/google/firebase/messaging/SendException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.messaging.ktx] (<https://firebase.google.com/docs/reference/android/com/google/firebase/messaging/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseMLException.Code] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/FirebaseMLException.Code.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseCloudModelSource] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/modeldownload/FirebaseCloudModelSource.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelManager] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/modeldownload/FirebaseModelManager.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [com.google.firebase.ml.common.modeldownload]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/modeldownload/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.common]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseCustomLocalModel.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseCustomLocalModel.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseCustomRemoteModel.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseCustomRemoteModel.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelDataType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelDataType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelDataType.DataType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelDataType.DataType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelInterpreterOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelInterpreterOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelManager]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelManager.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseCloudModelSource.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/model/FirebaseCloudModelSource.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelDownloadConditions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/model/FirebaseModelDownloadConditions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.custom.model]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/model/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [CustomModel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/modeldownloader/CustomModel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CustomModelDownloadConditions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/modeldownloader/CustomModelDownloadConditions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CustomModelDownloadConditions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/modeldownloader/CustomModelDownloadConditions.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseMlException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/modeldownloader/FirebaseMlException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseMlException.Code]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/modeldownloader/FirebaseMlException.Code.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [ModelDownloaderKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/modeldownloader/ModelDownloaderKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ModelDownloaderKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/modeldownloader/ktx/ModelDownloaderKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.ml.modeldownloader]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/modeldownloader/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseLanguageIdentificationOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/languageid/FirebaseLanguageIdentificationOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseLanguageIdentificationOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/languageid/FirebaseLanguageIdentificationOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [IdentifiedLanguage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/languageid/IdentifiedLanguage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.naturallanguage.languageid]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/languageid/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseTextMessage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/smartreply/FirebaseTextMessage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.text]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/text/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVision]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/FirebaseVision.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAutoMLRemoteModel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/automl/FirebaseAutoMLRemoteModel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.automl]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/automl/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.Address.AddressType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.Address.AddressType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.BarcodeValueType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.BarcodeValueType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.CalendarDateTime]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.CalendarDateTime.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.CalendarEvent]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.CalendarEvent.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

seVisionBarcode.CalendarEvent.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseVisionBarcode.ContactInfo]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.ContactInfo.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.DriverLicense]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.DriverLicense.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.Email.FormatType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.Email.FormatType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.barcode]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudDetectorOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/FirebaseVisionCloudDetectorOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudDetectorOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/FirebaseVisionCloudDetectorOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudLandmark]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/landmark/FirebaseVisionCloudLandmark.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.cloud]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudDocumentTextDetector]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudDocumentTextDetector.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudText]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudText.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudText.Block]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudText.Block.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudText.DetectedBreak]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudText.DetectedBreak.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudText.DetectedBreak.BreakType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudText.DetectedBreak.BreakType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudText.Page]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudText.Page.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudText.Symbol]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudText.Symbol.md.txt>): Firebase gives you the tools and infrastructure you need to

build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseVisionImageMetadata.ImageFormat]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/common/FirebaseVisionImageMetadata.ImageFormat.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionImageMetadata.Rotation]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/common/FirebaseVisionImageMetadata.Rotation.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionLatLng]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/common/FirebaseVisionLatLng.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudDocumentRecognizerOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/document/FirebaseVisionCloudDocumentRecognizerOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudDocumentRecognizerOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/document/FirebaseVisionCloudDocumentRecognizerOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionDocumentText.Paragraph]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/document/FirebaseVisionDocumentText.Paragraph.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionDocumentText.RecognizedBreak.BreakType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/document/FirebaseVisionDocumentText.RecognizedBreak.BreakType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionDocumentText.Symbol]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/document/FirebaseVisionDocumentText.Symbol.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFace]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFace.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceContour]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceContour.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceContour.ContourType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceContour.ContourType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceDetectorOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceDetectorOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceDetectorOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceDetectorOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceDetectorOptions.ClassificationType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceDetectorOptions.ClassificationType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceDetectorOptions.LandmarkType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceDetectorOptions.LandmarkType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

isionFaceDetectorOptions.LandmarkType.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseVisionFaceDetectorOptions.PerformanceMode]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceDetectorOptions.PerformanceMode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceLandmark.FaceLandmark]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceLandmark.FaceLandmark.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.face]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudImageLabelerOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionCloudImageLabelerOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionImageLabeler]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionImageLabeler.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionImageLabeler.ImageLabelerType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionImageLabeler.ImageLabelerType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionLabelDetector]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionLabelDetector.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionLabelDetectorOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionLabelDetectorOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionOnDeviceAutoMLImageLabelerOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionOnDeviceAutoMLImageLabelerOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionOnDeviceImageLabelerOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionOnDeviceImageLabelerOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionObject]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/objects/FirebaseVisionObject.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionObject.Category]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/objects/FirebaseVisionObject.Category.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionObjectDetector]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/objects/FirebaseVisionObjectDetector.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionObjectDetectorOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/objects/FirebaseVisionObjectDetectorOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile

and web apps, improve app quality, and grow your business.

- [FirebaseVisionCloudTextRecognizerOptions.CloudTextModelType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/FirebaseVisionCloudTextRecognizerOptions.CloudTextModelType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionText.Block]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/FirebaseVisionText.Block.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionText.Line]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/FirebaseVisionText.Line.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionText.TextBlock]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/FirebaseVisionText.TextBlock.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionTextDetector]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/FirebaseVisionTextDetector.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionTextRecognizer]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/FirebaseVisionTextRecognizer.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionTextRecognizer.RecognizerType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/FirebaseVisionTextRecognizer.RecognizerType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebasePerformance]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/perf/FirebasePerformance.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebasePerformance.HttpMethod]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/perf/FirebasePerformance.HttpMethod.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PerformanceKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/perf/PerformanceKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PerformanceKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/perf/ktx/PerformanceKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AddTrace]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/perf/metrics/AddTrace.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HttpMetric]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/perf/metrics/HttpMetric.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Trace]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/perf/metrics/Trace.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebasePhoneNumberVerification]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/pnv/FirebasePhoneNumberVerification.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebasePnvStatusCodes]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/pnv/FirebasePnvStatusCodes.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [VerificationSupportStatus]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/pnv/VerificationSupportStatus.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.provider]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/provider/package->

summary.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [ConfigUpdateListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/ConfigUpdateListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CustomSignals]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/CustomSignals.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/FirebaseRemoteConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfigFetchThrottledException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/FirebaseRemoteConfigFetchThrottledException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RemoteConfigKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/ktx/RemoteConfigKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.remoteconfig.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CancellableTask]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/CancellableTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ControllableTask]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/ControllableTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OnProgressListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/OnProgressListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StorageException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageException.ErrorCode]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StorageException.ErrorCode.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StorageKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageMetadata.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StorageMetadata.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageReference]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StorageReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageTask]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StorageTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageTask.ProvideError]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StorageTask.ProvideError.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StreamDownloadTask.TaskSnapshot]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StreamDownloadTask.TaskSnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TaskState]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/TaskState.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TaskState.InProgress]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/TaskState.InProgress.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/ktx/StorageKt.md>

.txt): Firebase provides Android client SDKs for over 20 products and services.

- [TaskState.Paused]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/ktx/TaskState.Paused.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.storage.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.storage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Chat]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/Chat.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseVertexAI]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/FirebaseVertexAI.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerativeModel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/LiveGenerativeModel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChatFutures]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/java/ChatFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChatFutures.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/java/ChatFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerativeModelFutures.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/java/GenerativeModelFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveModelFutures]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/java/LiveModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveModelFutures.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/java/LiveModelFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveSessionFutures]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/java/LiveSessionFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.vertexai]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BlobPart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/BlobPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BlockReason.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/BlockReason.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BlockThreshold]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/BlockThreshold.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Candidate]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/Candidate.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ContentKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ContentKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CountTokensResponse]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/CountTokensResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FileDataPart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FileDataPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

rt.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [FinishReason]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FinishReason.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseVertexAIException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FirebaseVertexAIException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseVertexAIException.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FirebaseVertexAIException.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionCallPart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FunctionCallPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionCallingConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FunctionCallingConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionCallingConfig.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FunctionCallingConfig.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionResponsePart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FunctionResponsePart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerationConfigKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/GenerationConfigKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmBlockMethod]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/HarmBlockMethod.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmBlockMethod.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/HarmBlockMethod.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmCategory]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/HarmCategory.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmProbability]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/HarmProbability.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmSeverity]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/HarmSeverity.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmSeverity.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/HarmSeverity.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagePart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagePart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenAspectRatio]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenAspectRatio.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenGenerationConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenGenerationConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenGenerationConfig.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenGenerationConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenGenerationConfigKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenGenerationConfigKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

rationConfigKt.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [ImagenGenerationResponse]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenGenerationResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenImageFormat]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenImageFormat.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenImageFormat.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenImageFormat.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenInlineImage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenInlineImage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSafetyFilterLevel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenSafetyFilterLevel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSafetyFilterLevel.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenSafetyFilterLevel.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSafetySettings]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenSafetySettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InvalidAPIKeyException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/InvalidAPIKeyException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InvalidStateException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/InvalidStateException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerationConfig.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveGenerationConfig.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerMessage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveServerMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerSetupComplete]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveServerSetupComplete.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerToolCall]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveServerToolCall.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OneParameterFunction]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/OneParameterFunction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PromptBlockedException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/PromptBlockedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PromptFeedback]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/PromptFeedback.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PublicPreviewAPI]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/PublicPreviewAPI.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [QuotaExceededException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/QuotaExceededException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RequestOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/RequestOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RequestTimeoutException]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/RequestTimeoutException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [ResponseModality]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ResponseModality.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ResponseModality.Companion]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ResponseModality.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ResponseStoppedException]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ResponseStoppedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SafetySetting]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/SafetySetting.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Schema]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/Schema.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Schema.Companion]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/Schema.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServerException]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ServerException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServiceConnectionHandshakeFailedException]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ServiceConnectionHandshakeFailedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SessionAlreadyReceivingException]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/SessionAlreadyReceivingException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StringFormat]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/StringFormat.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StringFormat.Custom]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/StringFormat.Custom.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TextPart]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/TextPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThreeParameterFunction]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ThreeParameterFunction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Tool.Companion]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/Tool.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ToolConfig.Companion]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ToolConfig.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TwoParameterFunction]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/TwoParameterFunction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UnsupportedUserLocationException]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/UnsupportedUserLocationException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Voices]
 (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/Voices.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActivityLifecycleManager]
 (<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/ActivityLifecycleManager.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

leManager.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [ActivityLifecycleManager.Callbacks]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/ActivityLifecycleManager.Callbacks.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [InitializationCallback]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/InitializationCallback.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [InitializationCallback.Empty]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/InitializationCallback.Empty.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [InitializationException]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/InitializationException.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Kit]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/Kit.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [KitInfo]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/KitInfo.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Logger]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/Logger.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [SilentLogger]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/SilentLogger.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [io.fabric.sdk.android]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AsyncTask]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/AsyncTask.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AsyncTask.Status]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/AsyncTask.Status.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Dependency]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/Dependency.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DependsOn]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/DependsOn.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Priority]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/Priority.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PriorityRunnable]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/PriorityRunnable.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [PriorityThreadPoolExecutor.PriorityThreadFactory]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/ThreadPoolExecutor.PriorityThreadFactory.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Task]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/Task.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UnmetDependencyException]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/UnmetDependencyException.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [io.fabric.sdk.android.services.concurrency]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Package index](<https://firebase.google.com/docs/reference/android/packages.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase App Distribution API](<https://firebase.google.com/docs/reference/app-distribution/rest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UploadReleaseResponse](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/UploadReleaseResponse.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UploadReleaseResult](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/UploadReleaseResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.releases.get](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.releases.list](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.groups](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.groups.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.groups.batchJoin](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.groups/batchJoin.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.groups.batchLeave](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.groups/batchLeave.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.groups.delete](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.groups/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.groups.list](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.groups/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.testers.batchAdd](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.testers/batchAdd.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

distribution/rest/v1/projects.testers.batchAdd.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.testers.list](https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.testers/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: upload.v1.projects.apps.releases](https://firebase.google.com/docs/reference/app-distribution/rest/v1/upload.v1.projects.apps.releases.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: upload.v1.projects.apps.releases.upload](https://firebase.google.com/docs/reference/app-distribution/rest/v1/upload.v1.projects.apps.releases/upload.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [EnforcementMode](https://firebase.google.com/docs/reference/appcheck/rest/v1/EnforcementMode.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: jwks](https://firebase.google.com/docs/reference/appcheck/rest/v1/jwks.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: oauthClients](https://firebase.google.com/docs/reference/appcheck/rest/v1/oauthClients.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: oauthClients.exchangeAppAttestAttestation](https://firebase.google.com/docs/reference/appcheck/rest/v1/oauthClients/exchangeAppAttestAttestation.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps](https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.appAttestConfig.batchGet](https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.appAttestConfig/batchGet.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.appAttestConfig.get](https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.appAttestConfig/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.debugTokens](https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.debugTokens.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.debugTokens.create](https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.debugTokens/create.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.debugTokens.delete](https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.debugTokens/delete.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.debugTokens.get](https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.debugTokens/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.debugTokens.list]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.debugTokens/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.debugTokens.patch]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.debugTokens/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.deviceCheckConfig.batchGet]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.deviceCheckConfig/batchGet.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.deviceCheckConfig.patch]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.deviceCheckConfig/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.playIntegrityConfig.get]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.playIntegrityConfig/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.playIntegrityConfig.patch]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.playIntegrityConfig/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [REST Resource: projects.apps.recaptchaEnterpriseConfig]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.recaptchaEnterpriseConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.recaptchaEnterpriseConfig.batchGet]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.recaptchaEnterpriseConfig/batchGet.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.recaptchaV3Config.get]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.recaptchaV3Config/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.exchangeCustomToken]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps/exchangeCustomToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.exchangeRecaptchaEnterpriseToken]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps/exchangeRecaptchaEnterpriseToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.generateAppAttestChallenge]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps/generateAppAttestChallenge.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [REST Resource: projects.services]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.services.resourcePolicies.delete]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services/resourcePolicies/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.services.resourcePolicies.patch]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services/resourcePolicies/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.services.batchUpdate]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services/batchUpdate.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web

apps, improve app quality, and grow your business.

- [Method: projects.services.get]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.patch]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AppCheckToken]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/AppCheckToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [EnforcementMode]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/EnforcementMode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: jwks]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/jwks.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: oauthClients]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/oauthClients.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: oauthClients.exchangeAppAttestAssertion]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/oauthClients/exchangeAppAttestAssertion.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: oauthClients.exchangeDebugToken]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/oauthClients/exchangeDebugToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: oauthClients.generateAppAttestChallenge]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/oauthClients/generateAppAttestChallenge.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.appAttestConfig]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.appAttestConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.appAttestConfig.patch]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.appAttestConfig/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.debugTokens]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.debugTokens.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.debugTokens.delete]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.debugTokens/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.debugTokens.get]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.debugTokens/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.debugTokens.list]

(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.debugTokens/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.deviceCheckConfig.batchGet] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.deviceCheckConfig/batchGet.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.deviceCheckConfig.get] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.deviceCheckConfig/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.deviceCheckConfig.patch] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.deviceCheckConfig/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaConfig.batchGet] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaConfig/batchGet.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaConfig.get] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaConfig/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaEnterpriseConfig.get] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaEnterpriseConfig/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaEnterpriseConfig.patch] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaEnterpriseConfig/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.recaptchaV3Config] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaV3Config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaV3Config.batchGet] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaV3Config/batchGet.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangeAppAttestAttestation] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps/exchangeAppAttestAttestation.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangeDeviceCheckToken] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps/exchangeDeviceCheckToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangePlayIntegrityToken] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps/exchangePlayIntegrityToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangeRecaptchaToken] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps/exchangeRecaptchaToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangeRecaptchaV3Token] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps/exchangeRecaptchaV3Token.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.generatePlayIntegrityChallenge] (<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps/generatePlayIntegrityChallenge.md.txt>): Firebase gives you the tools and infrastructure you need to build better

mobile and web apps, improve app quality, and grow your business.

- [REST Resource: projects.services.resourcePolicies]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.services.resourcePolicies.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.resourcePolicies.create]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.services.resourcePolicies/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.resourcePolicies.list]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.services.resourcePolicies/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.get]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.services/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.list]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.services/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.patch]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.services/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase App Hosting API](<https://firebase.google.com/docs/reference/apphosting/rest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.backends]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.builds.delete]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.builds/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.backends.domains]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.domains.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.domains.list]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.domains/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.domains.patch]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.domains/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.backends.rollouts]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.rollouts.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.backends.traffic]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.traffic.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.traffic.patch]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.traffic>

ic/patch.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.backends.delete]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.get]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.list]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.patch]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.operations.cancel]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.operations/cancel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.operations.get]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.operations/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase App Hosting API Version v1beta: Error Catalog]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/errors.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.builds.create]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.builds/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.builds.delete]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.builds/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.builds.get]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.builds/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.domains.create]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.domains/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.domains.delete]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.domains/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.domains.list]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.domains/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.rollouts.create]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.rollouts/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.backends.create]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.list]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.patch]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.operations]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.operations.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.operations.delete]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.operations/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.operations.get]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.operations/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.list]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase C++ API Reference](<https://firebase.google.com/docs/reference/cpp.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::App Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/app.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::AuthStateListener Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/auth-state-listener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::FacebookAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/facebook-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::FederatedAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/federated-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::GameCenterAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/game-center-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::IdTokenListener Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/id-token-listener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::OAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/o-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::PhoneAuthProvider::Listener Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/phone-auth-provider/listener.md.txt>): Firebase gives you the tools and infrastructure you need to build

better mobile and web apps, improve app quality, and grow your business.

- [firebase::auth::TwitterAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/twitter-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::YahooAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/yahoo-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::database::DataSnapshot Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/database/data-snapshot.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::database::Database Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/database/database.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::database::DatabaseReference Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/database/database-reference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::database::MutableData Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/database/mutable-data.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::AggregateQuery Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/aggregate-query.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::DocumentChange Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/document-change.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::DocumentSnapshot Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/document-snapshot.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::Firestore Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/firestore.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::LoadBundleTaskProgress Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/load-bundle-task-progress.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::QuerySnapshot Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/query-snapshot.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::Settings Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/settings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::Transaction Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/transaction.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::Future Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/future.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::messaging::Listener Class Reference]

(<https://firebase.google.com/docs/reference/cpp/class/firebase/messaging/listener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [[firebase::messaging::PollableListener Class Reference](#)]
- (<https://firebase.google.com/docs/reference/cpp/class/firebase/messaging/pollable-listener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::ModuleInitializer Class Reference](#)]
- (<https://firebase.google.com/docs/reference/cpp/class/firebase/module-initializer.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::remote_config::ConfigUpdateListenerRegistration Class Reference](#)]
- (<https://firebase.google.com/docs/reference/cpp/class/firebase/remote-config/config-update-listener-registration.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::storage::Listener Class Reference](#)]
- (<https://firebase.google.com/docs/reference/cpp/class/firebase/storage/listener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::storage::Metadata Class Reference](#)]
- (<https://firebase.google.com/docs/reference/cpp/class/firebase/storage/metadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::storage::Storage Class Reference](#)]
- (<https://firebase.google.com/docs/reference/cpp/class/firebase/storage/storage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::storage::StorageReference Class Reference](#)]
- (<https://firebase.google.com/docs/reference/cpp/class/firebase/storage/storage-reference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::Timestamp Class Reference](#)]
- (<https://firebase.google.com/docs/reference/cpp/class/firebase/timestamp.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::ump::ConsentInfo Class Reference](#)]
- (<https://firebase.google.com/docs/reference/cpp/class/firebase/ump/consent-info.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[Analytics Events](#)](<https://firebase.google.com/docs/reference/cpp/group/event-names.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[Analytics Parameters](#)](<https://firebase.google.com/docs/reference/cpp/group/parameter-names.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[Analytics User Properties](#)](<https://firebase.google.com/docs/reference/cpp/group/user-property-names.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase Namespace](#)]
- (<https://firebase.google.com/docs/reference/cpp/namespace/firebase.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::analytics Namespace](#)]
- (<https://firebase.google.com/docs/reference/cpp/namespace/firebase/analytics.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::database Namespace](#)]
- (<https://firebase.google.com/docs/reference/cpp/namespace/firebase/database.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::installations Namespace](#)]
- (<https://firebase.google.com/docs/reference/cpp/namespace/firebase/installations.md.txt>):

Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [firebase::messaging Namespace]
(<https://firebase.google.com/docs/reference/cpp/namespace/firebase/messaging.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::remote_config Namespace]
(<https://firebase.google.com/docs/reference/cpp/namespace/firebase/remote-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::storage Namespace]
(<https://firebase.google.com/docs/reference/cpp/namespace/firebase/storage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::ump Namespace]
(<https://firebase.google.com/docs/reference/cpp/namespace/firebase/ump.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [google_play_services Namespace]
(<https://firebase.google.com/docs/reference/cpp/namespace/google-play-services.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [std Namespace](<https://firebase.google.com/docs/reference/cpp/namespace/std.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::analytics::Parameter Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/analytics/parameter.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::AdditionalUserInfo Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/auth/additional-user-info.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::AuthResult Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/auth/auth-result.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::Auth::FetchProvidersResult Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/auth/auth/fetch-providers-result.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::FederatedOAuthProviderData Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/auth/federated-o-auth-provider-data.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::FederatedProviderData Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/auth/federated-provider-data.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::UserMetadata Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/auth/user-metadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::messaging::AndroidNotificationParams Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/messaging/android-notification-params.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::messaging::MessagingOptions Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/messaging/messaging-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::remote_config::ConfigInfo Struct Reference]

(<https://firebase.google.com/docs/reference/cpp/struct/firebase/remote-config/config-info.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [[firebase::remote_config::ConfigSettings Struct Reference](#)](<https://firebase.google.com/docs/reference/cpp/struct/firebase/remote-config/config-settings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::remote_config::ConfigUpdate Struct Reference](#)](<https://firebase.google.com/docs/reference/cpp/struct/firebase/remote-config/config-update.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[firebase::ump::ConsentDebugSettings Struct Reference](#)](<https://firebase.google.com/docs/reference/cpp/struct/firebase/ump/consent-debug-settings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[Method: projects.apps.users.deleteCrashReports](#)](<https://firebase.google.com/docs/reference/crashlytics/rest/v1alpha/projects.apps.users/deleteCrashReports.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[Enum Types](#)](<https://firebase.google.com/docs/reference/data-connect/gql/enum.md.txt>): Firebase Data Connect is a Backend-as-a-Service powered by Cloud SQL for PostgreSQL.
- [[Object Types](#)](<https://firebase.google.com/docs/reference/data-connect/gql/object.md.txt>): Firebase Data Connect is a Backend-as-a-Service powered by Cloud SQL for PostgreSQL.
- [[Query Operations](#)](<https://firebase.google.com/docs/reference/data-connect/gql/query.md.txt>): Firebase Data Connect is a Backend-as-a-Service powered by Cloud SQL for PostgreSQL.
- [[Scalar Types](#)](<https://firebase.google.com/docs/reference/data-connect/gql/scalar.md.txt>): Firebase Data Connect is a Backend-as-a-Service powered by Cloud SQL for PostgreSQL.
- [[Firebase Data Connect API](#)](<https://firebase.google.com/docs/reference/data-connect/rest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[GraphQLRequestExtensions](#)](<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/GraphQLRequestExtensions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[GraphQLResponse](#)](<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/GraphQLResponse.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[Source](#)](<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/Source.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[REST Resource: projects.locations.operations](#)](<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.operations.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[Method: projects.locations.operations.get](#)](<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.operations/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[Method: projects.locations.services.connectors.create](#)](<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.connectors/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[Method: projects.locations.services.connectors.delete](#)](<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.connectors/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [[Method: projects.locations.services.connectors.executeMutation](#)](<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.connectors/executeMutation.md.txt>): Firebase

gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.services.connectors.patch]
(<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.connectors/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.services.schemas]
(<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.schemas.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.schemas.create]
(<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.schemas/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.schemas.delete]
(<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.schemas/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.schemas.patch]
(<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.schemas/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.create](<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.executeGraphql]
(<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services/executeGraphql.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.executeGraphqlRead]
(<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services/executeGraphqlRead.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.patch](<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.get](<https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [RealtimeDatabaseAuditMetadata.Precondition.PreconditionType]
(<https://firebase.google.com/docs/reference/database/cal/rest/Shared.Types/RealtimeDatabaseAuditMetadata.Precondition.PreconditionType.md.txt>)
- [RealtimeDatabaseAuditMetadata.Protocol]
(<https://firebase.google.com/docs/reference/database/cal/rest/Shared.Types/RealtimeDatabaseAuditMetadata.Protocol.md.txt>)
- [RealtimeDatabaseAuditMetadata.QueryMetadata.Direction]
(<https://firebase.google.com/docs/reference/database/cal/rest/Shared.Types/RealtimeDatabaseAuditMetadata.QueryMetadata.Direction.md.txt>)
- [Log Query Language for Emulator Suite UI]
(<https://firebase.google.com/docs/reference/emulator-suite.md.txt>): The Firebase Local Emulator Suite is a set of advanced tools for developers looking to build and test apps locally using numerous Firebase product emulators. It provides a rich user interface to help you get running

and prototyping quickly.

- [API Reference](https://firebase.google.com/docs/reference/emulator-suite/rules-unit-testing.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [rules-unit-testing package](https://firebase.google.com/docs/reference/emulator-suite/rules-unit-testing/rules-unit-testing.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [RuleContext interface](https://firebase.google.com/docs/reference/emulator-suite/rules-unit-testing/rules-unit-testing.rulestestcontext.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [TestEnvironmentConfig interface](https://firebase.google.com/docs/reference/emulator-suite/rules-unit-testing/rules-unit-testing.testenvironmentconfig.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase Cloud Messaging API](https://firebase.google.com/docs/reference/fcm.md.txt): Firebase Cloud Messaging (FCM) is a reliable cross-platform messaging solution.
- [Firebase Cloud Messaging API](https://firebase.google.com/docs/reference/fcm/rest.md.txt): Firebase Cloud Messaging (FCM) is a reliable cross-platform messaging solution.
- [ApnsError](https://firebase.google.com/docs/reference/fcm/rest/v1/ApnsError.md.txt): Firebase Cloud Messaging (FCM) is a reliable cross-platform messaging solution.
- [FcmError](https://firebase.google.com/docs/reference/fcm/rest/v1/FcmError.md.txt): Firebase Cloud Messaging (FCM) is a reliable cross-platform messaging solution.
- [Firebase Cloud Messaging Data API](https://firebase.google.com/docs/reference/fcmdata/rest.md.txt): The Firebase Cloud Messaging Data API provides detailed information about Firebase Cloud Messaging (FCM) message sends and deliveries to Android devices.
- [Firebase Management API](https://firebase.google.com/docs/reference/firebase-management/rest.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: availableProjects](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/availableProjects.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: availableProjects.list](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/availableProjects/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: operations](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/operations.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.androidApps](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.androidApps.sha.create](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps.sha/create.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.androidApps.sha.list](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps.sha/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.androidApps.get](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.androidApps.getConfig](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps/getConfig.md.txt): Firebase gives you the tools and

infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.androidApps.list](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.androidApps.patch](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps/patch.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.availableLocations](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.availableLocations.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.availableLocations.list](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.availableLocations/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.defaultLocation](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.defaultLocation.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.iOSApps.create](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.iOSApps/create.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.iOSApps.get](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.iOSApps/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.iOSApps.getConfig](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.iOSApps/getConfig.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.iOSApps.list](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.iOSApps/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.webApps](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.webApps.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.webApps.list](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.webApps/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.webApps.remove](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.webApps/remove.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.webApps undelete](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.webApps/undelete.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.addGoogleAnalytics](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects/addGoogleAnalytics.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.get](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects/get.md.txt): Firebase gives you the tools and infrastructure

you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.getAdminSdkConfig](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects/getAdminSdkConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.getAnalyticsDetails](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects/getAnalyticsDetails.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.list](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.patch](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.removeAnalytics](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects/removeAnalytics.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.searchApps](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects/searchApps.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Cloud Functions for Firebase API Reference](<https://firebase.google.com/docs/reference/functions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [API Reference](<https://firebase.google.com/docs/reference/functions/2nd-gen/node.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [firebase-functions package](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.appDistribution.AppDistributionEvent interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.appdistribution.appdistributionevent.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.appDistribution.AppDistributionOptions interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.appdistribution.appdistributionoptions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.billing.PlanAutomatedUpdatePayload interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.billing.planautomatedupdatepayload.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.billing.PlanUpdatePayload interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.billing.planupdatepayload.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.crashlytics namespace](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.crashlytics.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.crashlytics.CrashlyticsEvent interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.crashlytics.crashlyticsevent.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events

triggered by Firebase features and HTTPS requests.

- [alerts.crashlytics.CrashlyticsOptions interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.crashlytics.crashlyticsoptions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.crashlytics.NewAnrIssuePayload interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.crashlytics.newanrissuepayload.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.crashlytics.NewNonfatalIssuePayload interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.crashlytics.newnonfatalissuepayload.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.FirebaseAlertData interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.firebasealertdata.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.performance namespace](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.performance.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.performance.PerformanceOptions interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.performance.performanceoptions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.performance.ThresholdAlertPayload interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.performance.thresholdalertpayload.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [Change class](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.change.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [CloudEvent interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.cloudevent.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [database namespace](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.database.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [database.DataSnapshot class](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.database.datasnapshot.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [database.RawRTDBCloudEventData interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.database.rawrtdbcloudeventdata.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [dataconnect namespace](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.dataconnect.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [dataconnect.DataConnectEvent interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.dataconnect.dataconnectevent.md.txt>): Cloud Functions for Firebase is a serverless

framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.

- [dataconnect.GraphqlErrorExtensions interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.dataconnect.graphqlerrorextensions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [dataconnect.MutationEventData interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.dataconnect.mutationeventdata.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [dataconnect.OperationOptions interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.dataconnect.operationoptions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [dataconnect.SourceLocation interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.dataconnect.sourcelocation.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [EventHandlerOptions interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.eventhandleroptions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [GlobalOptions interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.globaloptions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https.Request interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.request.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https.TaskRateLimits interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.taskratelimits.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [https.TaskRetryPolicy interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.taskretrypolicy.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [identity.BlockingOptions interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.identity.blockingoptions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [identity.HttpsError class](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.identity.httpserror.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [logger.LogEntry interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.logger.logentry.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params namespace](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.BooleanParam class](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.booleanparam.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.

- [params.Expression class](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.expression.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.JsonSecretParam class](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.jsonsecretparam.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.ListParam class](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.listparam.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.MultiSelectInput interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.multiselectinput.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.SecretParam class](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.secretparam.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.SelectOptions interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.selectoptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.TextInput interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.textinput.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [pubsub.Message class](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.pubsub.message.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [pubsub.PubSubOptions interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.pubsub.pubsuboptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [scheduler namespace](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.scheduler.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [scheduler.ScheduleFunction interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.scheduler.schedulefunction.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [scheduler.ScheduleOptions interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.scheduler.scheduleoptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [storage namespace](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.storage.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [storage.CustomerEncryption interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.storage.customerencryption.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [storage.StorageEvent interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.storage.storageevent.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events

triggered by Firebase features and HTTPS requests.

- [tasks.AuthData interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.tasks.authdata.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks.RetryConfig interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.tasks.retryconfig.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks.RetryPolicy interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.tasks.retrypolicy.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [tasks.TaskQueueFunction interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.tasks.taskqueuefunction.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [testLab namespace](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.testlab.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [testLab.ResultStorage interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.testlab.resultstorage.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [testLab.TestMatrixCompletedData interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.testlab.testmatrixcompleteddata.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [firebase_functions.alerts.app_distribution_fn module](https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.alerts.app_distribution_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.alerts.crashlytics_fn module](https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.alerts.crashlytics_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.core module](https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.core.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.db_fn module](https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.db_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.eventarc_fn module](https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.eventarc_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.options module](https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.options.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.params module](https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.params.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.remote_config_fn module](https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.remote_config_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [firebase_functions.tasks_fn module](https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.tasks_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [analytics namespace](https://firebase.google.com/docs/reference/functions/firebase-functions.analytics.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [analytics.AppInfo interface](https://firebase.google.com/docs/reference/functions/firebase-functions.analytics.appinfo.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [analytics.DeviceInfo interface](https://firebase.google.com/docs/reference/functions/firebase-functions.analytics.deviceinfo.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [analytics.ExportBundleInfo class](https://firebase.google.com/docs/reference/functions/firebase-functions.analytics.exportbundleinfo.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [analytics.UserDimensions class](https://firebase.google.com/docs/reference/functions/firebase-functions.analytics.userdimensions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [auth namespace](https://firebase.google.com/docs/reference/functions/firebase-functions.auth.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [auth.UserOptions interface](https://firebase.google.com/docs/reference/functions/firebase-functions.auth.useroptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [auth.UserRecordMetadata class](https://firebase.google.com/docs/reference/functions/firebase-functions.auth.userrecordmetadata.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [BlockingFunction interface](https://firebase.google.com/docs/reference/functions/firebase-functions.blockingfunction.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [Change class](https://firebase.google.com/docs/reference/functions/firebase-functions.change.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [database namespace](https://firebase.google.com/docs/reference/functions/firebase-functions.database.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [database.DataSnapshot class](https://firebase.google.com/docs/reference/functions/firebase-functions.database.datasnapshot.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [database.InstanceBuilder class](https://firebase.google.com/docs/reference/functions/firebase-functions.database.instancebuilder.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [database.RefBuilder class](https://firebase.google.com/docs/reference/functions/firebase-functions.database.refbuilder.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase

features and HTTPS requests.

- [DeploymentOptions interface](https://firebase.google.com/docs/reference/functions/firebase-functions.deploymentoptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [EventContext interface](https://firebase.google.com/docs/reference/functions/firebase-functions.eventcontext.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [EventContextAuthToken interface](https://firebase.google.com/docs/reference/functions/firebase-functions.eventcontextauthtoken.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [Firestore.DocumentBuilder class](https://firebase.google.com/docs/reference/functions/firebase-functions.firestore.documentbuilder.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [FunctionBuilder class](https://firebase.google.com/docs/reference/functions/firebase-functions.functionbuilder.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [HttpsFunction interface](https://firebase.google.com/docs/reference/functions/firebase-functions.httpsfunction.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [LegacyEvent interface](https://firebase.google.com/docs/reference/functions/firebase-functions.legacyevent.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [logger namespace](https://firebase.google.com/docs/reference/functions/firebase-functions.logger.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params namespace](https://firebase.google.com/docs/reference/functions/firebase-functions.params.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.SelectInput interface](https://firebase.google.com/docs/reference/functions/firebase-functions.params.selectinput.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.SelectOptions interface](https://firebase.google.com/docs/reference/functions/firebase-functions.params.selectoptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [pubsub namespace](https://firebase.google.com/docs/reference/functions/firebase-functions.pubsub.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [pubsub.Message class](https://firebase.google.com/docs/reference/functions/firebase-functions.pubsub.message.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [pubsub.TopicBuilder class](https://firebase.google.com/docs/reference/functions/firebase-functions.pubsub.topicbuilder.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [remoteConfig.TemplateVersion interface](https://firebase.google.com/docs/reference/functions/firebase-

functions.remoteconfig.templateversion.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.

- [Resource interface](https://firebase.google.com/docs/reference/functions/firebase-functions.resource.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [Runnable interface](https://firebase.google.com/docs/reference/functions/firebase-functions.runnable.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [Schedule interface](https://firebase.google.com/docs/reference/functions/firebase-functions.schedule.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [ScheduleRetryConfig interface](https://firebase.google.com/docs/reference/functions/firebase-functions.scheduleretryconfig.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [storage namespace](https://firebase.google.com/docs/reference/functions/firebase-functions.storage.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks namespace](https://firebase.google.com/docs/reference/functions/firebase-functions.tasks.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks.RateLimits interface](https://firebase.google.com/docs/reference/functions/firebase-functions.tasks.ratelimits.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks.RetryConfig interface](https://firebase.google.com/docs/reference/functions/firebase-functions.tasks.retryconfig.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks.TaskQueueFunction interface](https://firebase.google.com/docs/reference/functions/firebase-functions.tasks.taskqueuefunction.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks.TaskQueueOptions interface](https://firebase.google.com/docs/reference/functions/firebase-functions.tasks.taskqueueoptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [testLab.ResultStorage class](https://firebase.google.com/docs/reference/functions/firebase-functions.testlab.resultstorage.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [Overview](https://firebase.google.com/docs/reference/functions/test.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Globals](https://firebase.google.com/docs/reference/functions/test/global.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Interface: EventContextOptions](https://firebase.google.com/docs/reference/functions/test/test.EventContextOptions.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Namespace: analytics](https://firebase.google.com/docs/reference/functions/test/test.analytics.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app

quality, and grow your business.

- [Namespace: crashlytics]
(<https://firebase.google.com/docs/reference/functions/test/test.crashlytics.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Interface: DocumentSnapshotOptions]
(<https://firebase.google.com/docs/reference/functions/test/test.firestore.DocumentSnapshotOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Namespace: https]
(<https://firebase.google.com/docs/reference/functions/test/test.https.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Namespace: main](<https://firebase.google.com/docs/reference/functions/test/test.main.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Namespace: pubsub]
(<https://firebase.google.com/docs/reference/functions/test/test.pubsub.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Namespace: storage]
(<https://firebase.google.com/docs/reference/functions/test/test.storage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.sites.customDomains]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites.customDomains.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.sites.customDomains.operations]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites.customDomains.operations.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.customDomains.operations.list]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites.customDomains.operations/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.customDomains.delete]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites.customDomains/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.create]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.delete]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.get]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.list]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.patch]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: sites.channels]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.channels.md.txt>):

Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: sites.channels.releases.list]
 (<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.channels.releases/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.channels.list]
 (<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.channels/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.channels.patch]
 (<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.channels/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.releases.create]
 (<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.releases/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.releases.list]
 (<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.releases/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: sites.versions]
 (<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.versions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.versions.files.list]
 (<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.versions.files/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.versions.clone]
 (<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.versions/clone.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.versions.get]
 (<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.versions/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.versions.list]
 (<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.versions/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.versions.patch]
 (<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.versions/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseABTesting Framework Reference]
 (<https://firebase.google.com/docs/reference/ios/firebaseabtesting/api/reference/Classes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAnalytics Framework Reference]
 (<https://firebase.google.com/docs/reference/ios/firebaseanalytics/api/reference/Classes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAnalytics Framework Reference]
 (<https://firebase.google.com/docs/reference/ios/firebaseanalytics/api/reference/Classes/FIRAnalytics.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAnalytics Framework Reference]
 (<https://firebase.google.com/docs/reference/ios/firebaseanalytics/api/reference/Constants.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAnalytics Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseanalytics/api/reference/Type-Definitions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Classes/FIRAppCheck.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Classes/FIRAppCheckDebugProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Classes/FIRAppCheckToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Protocols.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Protocols/FIRAppCheckProviderFactory.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppDistribution Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseappdistribution/api/reference/Classes.md.txt>)

- [FirebaseAppDistribution Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseappdistribution/api/reference/Classes/FIRAppDistribution.md.txt>)

- [FirebaseAppDistribution Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseappdistribution/api/reference/Classes/FIRAppDistributionRelease.md.txt>)

- [FirebaseAppDistribution Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseappdistribution/api/reference/Enums/FIRAppDistributionError.md.txt>)

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRActionCodeInfo.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRActionCodeSettings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRActionCodeURL.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRAdditionalUserInfo.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRAuthCredential.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRAuthSettings.md.txt>)

gs.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRAuthTokenResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRMultiFactor.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRMultiFactorAssertion.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRMultiFactorResolver.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIROAuthCredential.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIROAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRPhoneAuthCredential.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRPhoneMultiFactorGenerator.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRPhoneMultiFactorInfo.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRTOTPSecret.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRUserMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRUserProfileChangeRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Enums.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Enums/FIRActionCodeOperation.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Enums/FIRAuthAPNSTokenType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Enums/FIRAuthErrorCode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Functions.md.txt>)

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Protocols/FIRAuthUIDelegate.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Protocols/FIRUserInfo.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecore/api/reference/Classes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecore/api/reference/Classes/FIROptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecore/api/reference/Classes/FIRTimestamp.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecore/api/reference/Enums/FIRLoggerLevel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCrashlytics Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecrashlytics/api/reference/Classes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCrashlytics Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecrashlytics/api/reference/Classes/FIRCrashlyticsReport.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCrashlytics Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecrashlytics/api/reference/Classes/FIRExceptionModel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCrashlytics Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecrashlytics/api/reference/Classes/FIRSTackFrame.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedatabase/api/reference/Classes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedatabase/api/reference/Classes/FIRDataSnapshot.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedatabase/api/reference/Classes/FIRDatabase.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedatabase/api/reference/Classes/FIRDatabaseQuery.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-database/api/reference/Classes/FIRDatabaseReference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-database/api/reference/Enums/FIRDatabaseErrorType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-database/api/reference/Type-Definitions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-dynamic-links/api/reference/Classes/FIRDynamicLinkComponentsOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-dynamic-links/api/reference/Classes/FIRDynamicLinkGoogleAnalyticsParameters.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-dynamic-links/api/reference/Classes/FIRDynamicLinkIOSParameters.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-dynamic-links/api/reference/Classes/FIRDynamicLinkSocialMetaTagParameters.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-dynamic-links/api/reference/Classes/FIRDynamicLinks.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFirestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-firestore/api/reference/Classes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFirestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-firestore/api/reference/Classes/FIRAggregateFunctionBridge.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFirestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-firestore/api/reference/Classes/FIRCollectionGroupSourceStageBridge.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFirestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-firestore/api/reference/Classes/FIRCollectionReference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFirestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-firestore/api/reference/Classes/FIRDocumentsSourceStageBridge.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFirestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-firestore/api/reference/Classes/FIRFindNearestStageBridge.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFirestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-firestore/api/reference/Classes/FIRFunctionExprBridge.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFirestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebase-firestore/api/reference/Classes/FIRGeoPoint.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefirestore/api/reference/Classes/FIRTransaction.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefirestore/api/reference/Classes/FIRUnionStageBridge.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefirestore/api/reference/Classes/FIRWhereStageBridge.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefirestore/api/reference/Enums/FIRFirestoreErrorCode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefirestore/api/reference/Enums/FIRFirestoreResource.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefirestore/api/reference/Enums/FIRListenSource.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefirestore/api/reference/Enums/FIRLoadBundleTaskState.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefirestore/api/reference/Enums/FIRServerTimestampBehavior.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefirestore/api/reference/Protocols.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firestore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefirestore/api/reference/Protocols/FIRListenerRegistration.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFunctions Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefunctions/api/reference/Classes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFunctions Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefunctions/api/reference/Classes/FIRFunctions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFunctions Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefunctions/api/reference/Classes/FIRHTTPSCallable.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFunctions Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefunctions/api/reference/Classes/FIRHTTPSCallableResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseFunctions Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasefunctions/api/reference/Enums.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

(<https://firebase.google.com/docs/reference/js/ai.startaudioconversationoptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [StringSchema class](<https://firebase.google.com/docs/reference/js/ai.stringschema.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TemplateGenerativeModel class]
(<https://firebase.google.com/docs/reference/js/ai.templategenerativemodel.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TemplateImagenModel class]
(<https://firebase.google.com/docs/reference/js/ai.templateimagenmodel.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TextPart interface](<https://firebase.google.com/docs/reference/js/ai.textpart.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [URLContext interface](<https://firebase.google.com/docs/reference/js/ai.urlcontext.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [URLContextMetadata interface]
(<https://firebase.google.com/docs/reference/js/ai.urlcontextmetadata.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [URLContextTool interface]
(<https://firebase.google.com/docs/reference/js/ai.urlcontexttool.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [URLMetadata interface](<https://firebase.google.com/docs/reference/js/ai.urlmetadata.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [UsageMetadata interface]
(<https://firebase.google.com/docs/reference/js/ai.usagemetadata.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VideoMetadata interface]

(<https://firebase.google.com/docs/reference/js/ai.videometadata.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [VoiceConfig interface](<https://firebase.google.com/docs/reference/js/ai.voiceconfig.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [WebGroundingChunk interface](<https://firebase.google.com/docs/reference/js/ai.webgroundingchunk.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [analytics package](<https://firebase.google.com/docs/reference/js/analytics.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AnalyticsSettings interface](<https://firebase.google.com/docs/reference/js/analytics.analyticssettings.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [EventParams interface](<https://firebase.google.com/docs/reference/js/analytics.eventparams.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Item interface](<https://firebase.google.com/docs/reference/js/analytics.item.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Promotion interface](<https://firebase.google.com/docs/reference/js/analytics.promotion.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SettingsOptions interface](<https://firebase.google.com/docs/reference/js/analytics.settingsoptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [app package](<https://firebase.google.com/docs/reference/js/app.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [app-check package](<https://firebase.google.com/docs/reference/js/app-check.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AppCheck interface](<https://firebase.google.com/docs/reference/js/app-check.appcheck.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AppCheckOptions interface](<https://firebase.google.com/docs/reference/js/app-check.appcheckoptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [CustomProvider class](<https://firebase.google.com/docs/reference/js/app-check.customprovider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ReCaptchaV3Provider class](<https://firebase.google.com/docs/reference/js/app-check.recaptchav3provider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirebaseApp interface](<https://firebase.google.com/docs/reference/js/app.firebaseapp.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirebaseServerApp interface](<https://firebase.google.com/docs/reference/js/app.firbaseserverapp.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ActionCodeSettings interface](<https://firebase.google.com/docs/reference/js/auth.actioncodesettings.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ApplicationVerifier interface](<https://firebase.google.com/docs/reference/js/auth.applicationverifier.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AuthError interface](<https://firebase.google.com/docs/reference/js/auth.autherror.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AuthErrorMap interface](<https://firebase.google.com/docs/reference/js/auth.autherrormap.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AuthProvider interface](<https://firebase.google.com/docs/reference/js/auth.authprovider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

(<https://firebase.google.com/docs/reference/js/auth.authprovider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [AuthSettings interface] (<https://firebase.google.com/docs/reference/js/auth.authsettings.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Dependencies interface] (<https://firebase.google.com/docs/reference/js/auth.dependencies.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [EmailAuthProvider class] (<https://firebase.google.com/docs/reference/js/auth.emailauthprovider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [EmulatorConfig interface] (<https://firebase.google.com/docs/reference/js/auth.emulatorconfig.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FacebookAuthProvider class] (<https://firebase.google.com/docs/reference/js/auth.facebookauthprovider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GoogleAuthProvider class] (<https://firebase.google.com/docs/reference/js/auth.googleauthprovider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [IdTokenResult interface] (<https://firebase.google.com/docs/reference/js/auth.idtokenresult.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [MultiFactorError interface] (<https://firebase.google.com/docs/reference/js/auth.multifactorerror.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [MultiFactorResolver interface] (<https://firebase.google.com/docs/reference/js/auth.multifactorresolver.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [MultiFactorUser interface] (<https://firebase.google.com/docs/reference/js/auth.multifactoruser.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [OAuthCredential class] (<https://firebase.google.com/docs/reference/js/auth.oauthcredential.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [OAuthCredentialOptions interface] (<https://firebase.google.com/docs/reference/js/auth.oauthcredentialoptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [OAuthProvider class] (<https://firebase.google.com/docs/reference/js/auth.oauthprovider.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PhoneAuthCredential class] (<https://firebase.google.com/docs/reference/js/auth.phoneauthcredential.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PhoneMultiFactorSignInInfoOptions interface] (<https://firebase.google.com/docs/reference/js/auth.phonemultifactorsignininfooptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PhoneSingleFactorInfoOptions interface] (<https://firebase.google.com/docs/reference/js/auth.phonesinglefactorinfooptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [RecaptchaVerifier class] (<https://firebase.google.com/docs/reference/js/auth.recaptchaverifier.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [User interface] (<https://firebase.google.com/docs/reference/js/auth.user.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [UserCredential interface] (<https://firebase.google.com/docs/reference/js/auth.usercredential.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [database package] (<https://firebase.google.com/docs/reference/js/database.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase

services.

- [DatabaseReference interface]
(<https://firebase.google.com/docs/reference/js/database.databasesreference.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ListenOptions interface]
(<https://firebase.google.com/docs/reference/js/database.listenoptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [OnDisconnect class]
(<https://firebase.google.com/docs/reference/js/database.ondisconnect.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Query interface](<https://firebase.google.com/docs/reference/js/database.query.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryConstraint class]
(<https://firebase.google.com/docs/reference/js/database.queryconstraint.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ThenableReference interface]
(<https://firebase.google.com/docs/reference/js/database.thenablereference.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TransactionOptions interface]
(<https://firebase.google.com/docs/reference/js/database.transactionoptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [firestore package](<https://firebase.google.com/docs/reference/js/firestore.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AggregateField class]
(https://firebase.google.com/docs/reference/js/firestore_.aggregatefield.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentReference class]
(https://firebase.google.com/docs/reference/js/firestore_.documentreference.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentSnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_.documentsnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ExperimentalLongPollingOptions interface]
(https://firebase.google.com/docs/reference/js/firestore_.experimentallongpollingoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Firestore class](https://firebase.google.com/docs/reference/js/firestore_.firestore.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Index interface](https://firebase.google.com/docs/reference/js/firestore_.index.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [LoadBundleTaskProgress interface]
(https://firebase.google.com/docs/reference/js/firestore_.loadbundletaskprogress.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PersistentCacheIndexManager class]
(https://firebase.google.com/docs/reference/js/firestore_.persistentcacheindexmanager.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Query class](https://firebase.google.com/docs/reference/js/firestore_.query.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryCompositeFilterConstraint class]
(https://firebase.google.com/docs/reference/js/firestore_.querycompositefilterconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryDocumentSnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_.querydocumentsnapshot.md.txt): The

Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [QueryFieldFilterConstraint class]
(https://firebase.google.com/docs/reference/js/firestore_.queryfieldfilterconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryOrderByConstraint class]
(https://firebase.google.com/docs/reference/js/firestore_.queryorderbyconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SnapshotListenOptions interface]
(https://firebase.google.com/docs/reference/js/firestore_.snapshotlistenoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Timestamp class](https://firebase.google.com/docs/reference/js/firestore_.timestamp.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Transaction class]
(https://firebase.google.com/docs/reference/js/firestore_.transaction.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TransactionOptions interface]
(https://firebase.google.com/docs/reference/js/firestore_.transactionoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Unsubscribe interface]
(https://firebase.google.com/docs/reference/js/firestore_.unsubscribe.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [WriteBatch class]
(https://firebase.google.com/docs/reference/js/firestore_.writebatch.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AggregateQuerySnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_lite.aggregatequerysnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AggregateSpec interface]
(https://firebase.google.com/docs/reference/js/firestore_lite.aggregatespec.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentReference class]
(https://firebase.google.com/docs/reference/js/firestore_lite.documentreference.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentSnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_lite.documentsnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FieldValue class]
(https://firebase.google.com/docs/reference/js/firestore_lite.fieldvalue.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Firestore class]
(https://firebase.google.com/docs/reference/js/firestore_lite.firestore.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirestoreDataConverter interface]
(https://firebase.google.com/docs/reference/js/firestore_lite.firestoredataconverter.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirestoreError class]
(https://firebase.google.com/docs/reference/js/firestore_lite.firestoreerror.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GeoPoint class]
(https://firebase.google.com/docs/reference/js/firestore_lite.geopoint.md.txt): The Firebase

JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [Query class](https://firebase.google.com/docs/reference/js/firestore_lite.query.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryConstraint class](https://firebase.google.com/docs/reference/js/firestore_lite.queryconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryEndAtConstraint class](https://firebase.google.com/docs/reference/js/firestore_lite.queryendatconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryOrderByConstraint class](https://firebase.google.com/docs/reference/js/firestore_lite.queryorderbyconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QuerySnapshot class](https://firebase.google.com/docs/reference/js/firestore_lite.queriesnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [QueryStartAtConstraint class](https://firebase.google.com/docs/reference/js/firestore_lite.querystartatconstraint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Transaction class](https://firebase.google.com/docs/reference/js/firestore_lite.transaction.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TransactionOptions interface](https://firebase.google.com/docs/reference/js/firestore_lite.transactionoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VectorValue class](https://firebase.google.com/docs/reference/js/firestore_lite.vectorvalue.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [WriteBatch class](https://firebase.google.com/docs/reference/js/firestore_lite.writebatch.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [BooleanExpression class](https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.booleanexpression.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [CollectionReference class](https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.collectionreference.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentReference class](https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.documentreference.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Expression class](https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.expression.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Field class](https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.field.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FieldPath class](https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.fieldpath.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FieldValue class]

(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.fieldvalue.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [FirestoreDataConverter interface]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.firestoredataconverter.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GeoPoint class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.geopoint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PipelineResult class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.pipelineresult.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Selectable interface]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.selectable.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Timestamp class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.timestamp.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VectorValue class]
(https://firebase.google.com/docs/reference/js/firestore_lite_pipelines.vectorvalue.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [@firebase/firestore/pipelines]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AggregateFunction class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.aggregatefunction.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AliasedExpression class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.aliasedexpression.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [BooleanExpression class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.booleanexpression.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [CollectionReference class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.collectionreference.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [DocumentSnapshot class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.documentsnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Field class](https://firebase.google.com/docs/reference/js/firestore_pipelines.field.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Firestore class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.firestore.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FirestoreDataConverter interface]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.firestoredataconverter.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FunctionExpression class]

(https://firebase.google.com/docs/reference/js/firestore_pipelines.functionexpression.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [GeoPoint class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.geopoint.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Ordering class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.ordering.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Pipeline class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.pipeline.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PipelineResult class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.pipelineresult.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Selectable interface]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.selectable.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SnapshotMetadata class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.snapshotmetadata.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [StageOptions interface]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.stageoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Timestamp class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.timestamp.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VectorValue class]
(https://firebase.google.com/docs/reference/js/firestore_pipelines.vectorvalue.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [HttpsCallable interface]
(<https://firebase.google.com/docs/reference/js/functions.httpscallable.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [HttpsCallableStreamResult interface]
(<https://firebase.google.com/docs/reference/js/functions.httpscallablestreamresult.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [messaging package](<https://firebase.google.com/docs/reference/js/messaging.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FcmOptions interface]
(https://firebase.google.com/docs/reference/js/messaging_.fcmoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GetTokenOptions interface]
(https://firebase.google.com/docs/reference/js/messaging_.gettokenoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Messaging interface]
(https://firebase.google.com/docs/reference/js/messaging_.messaging.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [NotificationPayload interface]
(https://firebase.google.com/docs/reference/js/messaging_.notificationpayload.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [[@firebase/messaging/sw](https://firebase.google.com/docs/reference/js/messaging_sw.md.txt)](https://firebase.google.com/docs/reference/js/messaging_sw.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[FcmOptions interface](https://firebase.google.com/docs/reference/js/messaging_sw.fcmoptions.md.txt)](https://firebase.google.com/docs/reference/js/messaging_sw.fcmoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[GetTokenOptions interface](https://firebase.google.com/docs/reference/js/messaging_sw.gettokenoptions.md.txt)](https://firebase.google.com/docs/reference/js/messaging_sw.gettokenoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[NotificationPayload interface](https://firebase.google.com/docs/reference/js/messaging_sw.notificationpayload.md.txt)](https://firebase.google.com/docs/reference/js/messaging_sw.notificationpayload.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[remote-config package](https://firebase.google.com/docs/reference/js/remote-config.md.txt)](https://firebase.google.com/docs/reference/js/remote-config.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[ConfigUpdate interface](https://firebase.google.com/docs/reference/js/remote-config.configupdate.md.txt)](https://firebase.google.com/docs/reference/js/remote-config.configupdate.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[CustomSignals interface](https://firebase.google.com/docs/reference/js/remote-config.customsignals.md.txt)](https://firebase.google.com/docs/reference/js/remote-config.customsignals.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[FetchResponse interface](https://firebase.google.com/docs/reference/js/remote-config.fetchresponse.md.txt)](https://firebase.google.com/docs/reference/js/remote-config.fetchresponse.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[Value interface](https://firebase.google.com/docs/reference/js/remote-config.value.md.txt)](https://firebase.google.com/docs/reference/js/remote-config.value.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[ListOptions interface](https://firebase.google.com/docs/reference/js/storage.listoptions.md.txt)](https://firebase.google.com/docs/reference/js/storage.listoptions.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[ListResult interface](https://firebase.google.com/docs/reference/js/storage.listresult.md.txt)](https://firebase.google.com/docs/reference/js/storage.listresult.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[SettableMetadata interface](https://firebase.google.com/docs/reference/js/storage.settablemetadata.md.txt)](https://firebase.google.com/docs/reference/js/storage.settablemetadata.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[StorageError class](https://firebase.google.com/docs/reference/js/storage.storageerror.md.txt)](https://firebase.google.com/docs/reference/js/storage.storageerror.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[StorageReference interface](https://firebase.google.com/docs/reference/js/storage.storagereference.md.txt)](https://firebase.google.com/docs/reference/js/storage.storagereference.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[UploadResult interface](https://firebase.google.com/docs/reference/js/storage.uploadresult.md.txt)](https://firebase.google.com/docs/reference/js/storage.uploadresult.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[UploadTask interface](https://firebase.google.com/docs/reference/js/storage.uploadtask.md.txt)](https://firebase.google.com/docs/reference/js/storage.uploadtask.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[UploadTaskSnapshot interface](https://firebase.google.com/docs/reference/js/storage.uploadtasksnapshot.md.txt)](https://firebase.google.com/docs/reference/js/storage.uploadtasksnapshot.md.txt): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [[FirebaseError | JavaScript SDK](https://firebase.google.com/docs/reference/js/v8/firebase.firebaseerror.md.txt)](https://firebase.google.com/docs/reference/js/v8/firebase.firebaseerror.md.txt): Reference for `FirebaseError`
- [[analytics | JavaScript SDK](https://firebase.google.com/docs/reference/js/v8/firebase.analytics.md.txt)](https://firebase.google.com/docs/reference/js/v8/firebase.analytics.md.txt): Reference for `analytics`
- [[Analytics | JavaScript SDK](https://firebase.google.com/docs/reference/js/v8/firebase.analytics.analytics.md.txt)](https://firebase.google.com/docs/reference/js/v8/firebase.analytics.analytics.md.txt): Reference for `Analytics`

- [ControlParams | JavaScript SDK]
(<https://firebase.google.com/docs/reference/js/v8/firebase.analytics.ControlParams.md.txt>):

- [AI interface](<https://firebase.google.com/docs/reference/js/vertexai.ai.md.txt>): The Firebase
JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [AIOptions interface]

(<https://firebase.google.com/docs/reference/js/vertexai.aioptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [Backend class](<https://firebase.google.com/docs/reference/js/vertexai.backend.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [BaseParams interface](<https://firebase.google.com/docs/reference/js/vertexai.baseparams.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [BooleanSchema class](<https://firebase.google.com/docs/reference/js/vertexai.booleanschema.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ChatSession class](<https://firebase.google.com/docs/reference/js/vertexai.chatsession.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [CitationMetadata interface](<https://firebase.google.com/docs/reference/js/vertexai.citationmetadata.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Content interface](<https://firebase.google.com/docs/reference/js/vertexai.content.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [CountTokensRequest interface](<https://firebase.google.com/docs/reference/js/vertexai.counttokensrequest.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [CountTokensResponse interface](<https://firebase.google.com/docs/reference/js/vertexai.counttokensresponse.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [CustomErrorData interface](<https://firebase.google.com/docs/reference/js/vertexai.customerrordata.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [EnhancedGenerateContentResponse interface](<https://firebase.google.com/docs/reference/js/vertexai.enhancedgeneratecontentresponse.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FunctionCall interface](<https://firebase.google.com/docs/reference/js/vertexai.functioncall.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FunctionCallingConfig interface](<https://firebase.google.com/docs/reference/js/vertexai.functioncallingconfig.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FunctionCallPart interface](<https://firebase.google.com/docs/reference/js/vertexai.functioncallpart.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [FunctionDeclarationsTool interface](<https://firebase.google.com/docs/reference/js/vertexai.functiondeclarationstool.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GenerateContentCandidate interface](<https://firebase.google.com/docs/reference/js/vertexai.generatecontentcandidate.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GenerateContentRequest interface](<https://firebase.google.com/docs/reference/js/vertexai.generatecontentrequest.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GenerateContentResponse interface](<https://firebase.google.com/docs/reference/js/vertexai.generatecontentresponse.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GenerateContentResult interface](<https://firebase.google.com/docs/reference/js/vertexai.generatecontentresult.md.txt>): The

Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [GenerateContentStreamResult interface]
(<https://firebase.google.com/docs/reference/js/vertexai.generatecontentstreamresult.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GenerativeContentBlob interface]
(<https://firebase.google.com/docs/reference/js/vertexai.generativecontentblob.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GenerativeModel class]
(<https://firebase.google.com/docs/reference/js/vertexai.generativemodel.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [GoogleAIBackend class]
(<https://firebase.google.com/docs/reference/js/vertexai.googleaibackend.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ImagenGCSImage interface]
(<https://firebase.google.com/docs/reference/js/vertexai.imagengcsimage.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ImagenModel class]
(<https://firebase.google.com/docs/reference/js/vertexai.imagenmodel.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ImagenModelParams interface]
(<https://firebase.google.com/docs/reference/js/vertexai.imagenmodelparams.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ObjectSchema class]
(<https://firebase.google.com/docs/reference/js/vertexai.objectschema.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [ObjectSchemaInterface interface]
(<https://firebase.google.com/docs/reference/js/vertexai.objectschemainterface.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [PromptFeedback interface]
(<https://firebase.google.com/docs/reference/js/vertexai.promptfeedback.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [RequestOptions interface]
(<https://firebase.google.com/docs/reference/js/vertexai.requestoptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SafetyRating interface]
(<https://firebase.google.com/docs/reference/js/vertexai.safetyrating.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SchemaInterface interface]
(<https://firebase.google.com/docs/reference/js/vertexai.schemainterface.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [SchemaParams interface]
(<https://firebase.google.com/docs/reference/js/vertexai.schemaparams.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [Segment interface](<https://firebase.google.com/docs/reference/js/vertexai.segment.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [TextPart interface](<https://firebase.google.com/docs/reference/js/vertexai.textpart.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [UsageMetadata interface]
(<https://firebase.google.com/docs/reference/js/vertexai.usagemetadata.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VertexAIBackend class]
(<https://firebase.google.com/docs/reference/js/vertexai.vertexaibackend.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VertexAIError class]
(<https://firebase.google.com/docs/reference/js/vertexai.vertexaierror.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.

- [VertexAIOptions interface]
(<https://firebase.google.com/docs/reference/js/vertexai.vertexaioptions.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- [VideoMetadata interface]
(<https://firebase.google.com/docs/reference/js/vertexai.videometadata.md.txt>): The Firebase JavaScript SDK implements the client-side libraries for applications using Firebase services.
- (<https://firebase.google.com/docs/reference/kotlin/client/firebase-analytics/packages.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Firebase]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/Firebase.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseNetworkException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/FirebaseNetworkException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseOptions.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/FirebaseOptions.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Chat](<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/Chat.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAI]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/FirebaseAI.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerativeModel]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/GenerativeModel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenModel]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/ImagenModel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TemplateGenerativeModel]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/TemplateGenerativeModel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChatFutures]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/java/ChatFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveSessionFutures]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/java/LiveSessionFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.ai]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AudioTranscriptionConfig]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/AudioTranscriptionConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BlockReason]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/BlockReason.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Candidate]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Candidate.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Citation]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Citation.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CitationMetadata]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/CitationMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Content]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Content.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Content.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Content.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ContentModality]

(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ContentModality.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [CountTokensResponse]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/CountTokensResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ExecutableCodePart]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ExecutableCodePart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAIException]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/FirebaseAIException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAutoFunctionException]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/FirebaseAutoFunctionException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionCallingConfig]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/FunctionCallingConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionResponsePart]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/FunctionResponsePart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerateContentResponse]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/GenerateContentResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerateObjectResponse]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/GenerateObjectResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerationConfig]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/GenerationConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerativeBackend]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/GenerativeBackend.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GroundingSupport]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/GroundingSupport.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmCategory]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/HarmCategory.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmProbability]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/HarmProbability.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmSeverity]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/HarmSeverity.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagePart]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagePart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenAspectRatio]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenAspectRatio.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenBackgroundMask]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenBackgroundMask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenControlType]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenControlType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenEditMode]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenEditMode.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenEditingConfig]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenEditingConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [ImagenImageFormat]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenImageFormat.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenImagePlacement]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenImagePlacement.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenInlineImage]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenInlineImage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenMaskReference]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenMaskReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenRawMask]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenRawMask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSafetyFilterLevel]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenSafetyFilterLevel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSafetySettings]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenSafetySettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSemanticMask]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenSemanticMask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenStyleReference]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenStyleReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSubjectReferenceType]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ImagenSubjectReferenceType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InlineData]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/InlineData.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InlineDataPart]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/InlineDataPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InvalidLocationException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/InvalidLocationException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveAudioConversationConfig]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/LiveAudioConversationConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerationConfig]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/LiveGenerationConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerationConfig.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/LiveGenerationConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerSetupComplete]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/LiveServerSetupComplete.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerToolCall]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/LiveServerToolCall.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerToolCallCancellation]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/LiveServerToolCallCancellation.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveSession]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/LiveSession.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [QuotaExceededException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/QuotaExceededException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

ption.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [RequestOptions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/RequestOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ResponseModality]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ResponseModality.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ResponseStoppedException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ResponseStoppedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Segment]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Segment.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SerializationException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/SerializationException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServerException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ServerException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServiceDisabledException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ServiceDisabledException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThinkingConfig.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ThinkingConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThinkingLevel]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/ThinkingLevel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Transcription]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Transcription.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UnknownException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/UnknownException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UrlContext]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/UrlContext.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UrlMetadata]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/UrlMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Voices]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ai/type/Voices.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ConsentBuilder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/ConsentBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAnalytics]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/FirebaseAnalytics.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAnalytics.ConsentStatus]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/FirebaseAnalytics.ConsentStatus.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAnalytics.Event]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/FirebaseAnalytics.Event.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GoogleAnalyticsServerPreviewActivity]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/GoogleAnalyticsServerPreviewActivity.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ConsentBuilder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/analytics/ktx/ConsentBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

der.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [AppCheckToken]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/AppCheckToken.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppCheck]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/FirebaseAppCheck.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppCheck.AppCheckListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/FirebaseAppCheck.AppCheckListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appcheck.debug]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/debug/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DebugAppCheckTestHelper.MaybeThrowingRunnable]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/debug/testing/DebugAppCheckTestHelper.MaybeThrowingRunnable.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PlayIntegrityAppCheckProviderFactory]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appcheck/playintegrity/PlayIntegrityAppCheckProviderFactory.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AppDistributionRelease]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/AppDistributionRelease.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppDistributionException.Status]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/FirebaseAppDistributionException.Status.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InterruptionLevel]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/InterruptionLevel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UpdateTask]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/UpdateTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appdistribution.ktx]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/appdistribution/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeMultiFactorInfo]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/ActionCodeMultiFactorInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeResult.Operation]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/ActionCodeResult.Operation.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeSettings]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/ActionCodeSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeSettings.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/ActionCodeSettings.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AdditionalUserInfo]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/AdditionalUserInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AuthCredential]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/AuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [EmailAuthCredential]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/EmailAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [EmailAuthProvider]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/EmailAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [FacebookAuthCredential]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FacebookAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FederatedAuthProvider]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FederatedAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuth]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuth.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuth.IdTokenListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuth.IdTokenListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthActionCodeException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthActionCodeException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthMissingActivityForRecaptchaException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthMissingActivityForRecaptchaException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthRecentLoginRequiredException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthRecentLoginRequiredException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthWeakPasswordException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseAuthWeakPasswordException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseUser]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseUser.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseUserMetadata]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/FirebaseUserMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GithubAuthCredential]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/GithubAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GithubAuthProvider]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/GithubAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GoogleAuthCredential]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/GoogleAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MultiFactor]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/MultiFactor.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OAuthCredential]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/OAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OAuthProvider.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/OAuthProvider.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OAuthProvider.CredentialBuilder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/OAuthProvider.CredentialBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneAuthCredential]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/PhoneAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneAuthOptions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/PhoneAuthOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PhoneMultiFactorAssertion]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/PhoneMultiFactorAssertion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [SignInMethodQueryResult]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/SignInMethodQueryResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TotpSecret]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/TotpSecret.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TwitterAuthCredential]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/TwitterAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TwitterAuthProvider]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/TwitterAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UserInfo]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/UserInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UserProfileChangeRequest]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/UserProfileChangeRequest.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UserProfileChangeRequest.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/auth/UserProfileChangeRequest.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseCrashlytics]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/crashlytics/FirebaseCrashlytics.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [KeyValueBuilder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/crashlytics/KeyValueBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [KeyValueBuilder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/crashlytics/ktx/KeyValueBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.crashlytics.ktx]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/crashlytics/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Added]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ChildEvent.Added.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Removed]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ChildEvent.Removed.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEventListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ChildEventListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DatabaseException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/DatabaseException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DatabaseReference]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/DatabaseReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [IgnoreExtraProperties]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/IgnoreExtraProperties.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Logger.Level]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/Logger.Level.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MutableData]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/MutableData.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThrowOnExtraProperties]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ThrowOnExtraProperties.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Transaction]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/Transaction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

xt): Firebase provides Android client SDKs for over 20 products and services.

- [Transaction.Handler]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/Transaction.Handler.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ValueEventListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ValueEventListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Added]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ktx/ChildEvent.Added.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Removed]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/ktx/ChildEvent.Removed.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.database]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/database/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AnyValue]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/AnyValue.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ConnectorConfig]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/ConnectorConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DataConnectException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/DataConnectException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DataConnectOperationFailureResponse.ErrorInfo]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/DataConnectOperationFailureResponse.ErrorInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DataConnectPathSegment]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/DataConnectPathSegment.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DataConnectPathSegment.Field]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/DataConnectPathSegment.Field.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DataConnectSettings]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/DataConnectSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ExperimentalFirebaseDataConnect]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/ExperimentalFirebaseDataConnect.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseDataConnect]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/FirebaseDataConnect.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseDataConnect.CallerSdkType]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/FirebaseDataConnect.CallerSdkType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseDataConnect.QueryRefOptionsBuilder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/FirebaseDataConnect.QueryRefOptionsBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MutationRef]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/MutationRef.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MutationResult]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/MutationResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OperationResult]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/OperationResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

lt.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [OptionalVariable.Serializer]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/OptionalVariable.Serializer.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OptionalVariable.Undefined]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/OptionalVariable.Undefined.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OptionalVariable.Value]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/OptionalVariable.Value.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [QueryRef]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/QueryRef.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [QueryResult]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/QueryResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [QuerySubscription]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/QuerySubscription.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [QuerySubscriptionResult]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/QuerySubscriptionResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GeneratedMutation]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/generated/GeneratedMutation.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GeneratedQuery]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/generated/GeneratedQuery.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.dataconnect]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [JavaTimeLocalDateSerializer]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/serializers/JavaTimeLocalDateSerializer.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LocalDateSerializer]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/serializers/LocalDateSerializer.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TimestampSerializer]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/serializers/TimestampSerializer.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UUIDSerializer]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dataconnect/serializers/UUIDSerializer.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.AndroidParameters]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.AndroidParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.AndroidParameters.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.AndroidParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.GoogleAnalyticsParameters]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.GoogleAnalyticsParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.GoogleAnalyticsParameters.Builder]

(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.GoogleAnalyticsParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [DynamicLink.IosParameters.Builder]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.IosParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.NavigationInfoParameters]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.NavigationInfoParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.NavigationInfoParameters.Builder]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.NavigationInfoParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.SocialMetaTagParameters]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/DynamicLink.SocialMetaTagParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseDynamicLinks]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/FirebaseDynamicLinks.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PendingDynamicLinkData]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/PendingDynamicLinkData.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.dynamiclinks.ktx]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.dynamiclinks]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/dynamiclinks/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateField.AverageAggregateField]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/AggregateField.AverageAggregateField.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateField.CountAggregateField]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/AggregateField.CountAggregateField.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateQuerySnapshot]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/AggregateQuerySnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CollectionReference]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/CollectionReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DocumentChange]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/DocumentChange.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DocumentChange.Type]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/DocumentChange.Type.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DocumentId]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/DocumentId.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DocumentReference]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/DocumentReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DocumentSnapshot.ServerTimestampBehavior]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/DocumentSnapshot.ServerTimestampBehavior.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Exclude]

(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/Exclude.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [Filter] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/Filter.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Firestore] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/Firestore.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirestoreException.Code] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/FirestoreException.Code.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [IgnoreExtraProperties] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/IgnoreExtraProperties.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ListenSource] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/ListenSource.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LoadBundleTaskProgress] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/LoadBundleTaskProgress.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LoadBundleTaskProgress.TaskState] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/LoadBundleTaskProgress.TaskState.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MemoryCacheSettings] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/MemoryCacheSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MemoryEagerGcSettings] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/MemoryEagerGcSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MemoryGarbageCollectorSettings] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/MemoryGarbageCollectorSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MemoryLruGcSettings.Builder] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/MemoryLruGcSettings.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MetadataChanges] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/MetadataChanges.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PersistentCacheIndexManager] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/PersistentCacheIndexManager.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PersistentCacheSettings.Builder] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/PersistentCacheSettings.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Pipeline.ExecuteOptions] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/Pipeline.ExecuteOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Query.Direction] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/Query.Direction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServerTimestamp] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/ServerTimestamp.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SetOptions] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/SetOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SnapshotListenOptions] (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/SnapshotListenOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

ptions.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [SnapshotListenOptions.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/SnapshotListenOptions.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThrowOnExtraProperties]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/ThrowOnExtraProperties.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TransactionOptions.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/TransactionOptions.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [VectorValue]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/VectorValue.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [WriteBatch.Function]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/WriteBatch.Function.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.firestore.ktx]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateFunction]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/AggregateFunction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AliasedAggregate]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/AliasedAggregate.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BooleanExpression]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/BooleanExpression.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CollectionGroupOptions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/CollectionGroupOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CollectionGroupSource]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/CollectionGroupSource.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CollectionSource]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/CollectionSource.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Expression]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/Expression.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Field]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/Field.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InternalOptions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/InternalOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Ordering.Direction]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/Ordering.Direction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RawOptions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/RawOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RawStage]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/RawStage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SampleStage.Mode]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/SampleStage.Mode.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Selectable]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/Selectable.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

able.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [Stage]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/Stage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UnnestOptions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/UnnestOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.firestore.pipeline.evaluation]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/evaluation/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.firestore.pipeline]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/firestore/pipeline/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseFunctions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/functions/FirebaseFunctions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseFunctionsException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/functions/FirebaseFunctionsException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseFunctionsException.Code]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/functions/FirebaseFunctionsException.Code.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HttpsCallableOptions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/functions/HttpsCallableOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HttpsCallableOptions.Builder]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/functions/HttpsCallableOptions.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HttpsCallableReference]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/functions/HttpsCallableReference.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StreamResponse.Message]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/functions/StreamResponse.Message.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.functions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/functions/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingClickListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/FirebaseInAppMessagingClickListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingDismissListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/FirebaseInAppMessagingDismissListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingImpressionListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/FirebaseInAppMessagingImpressionListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingDisplay]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/display/FirebaseInAppMessagingDisplay.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.inappmessaging.display.ktx]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/display/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.inappmessaging.display]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/display/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [BannerMessage]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/model/BannerMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InAppMessage]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/model/InAppMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MessageType]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/model/MessageType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ModalMessage]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/model/ModalMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Text]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/model/Text.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.inappmessaging]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/inappmessaging/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInstallations]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/installations/FirebaseInstallations.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.installations]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/installations/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.ktx]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RemoteMessage.Notification]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/messaging/RemoteMessage.Notification.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SendException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/messaging/SendException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.messaging]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/messaging/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CustomModel]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ml/modeldownloader/CustomModel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CustomModelDownloadConditions]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ml/modeldownloader/CustomModelDownloadConditions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DownloadType]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/ml/modeldownloader/DownloadType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebasePerformance]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/perf/FirebasePerformance.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HttpMetric]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/perf/metrics/HttpMetric.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Trace]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/perf/metrics/Trace.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebasePhoneNumberVerificationException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/pnv/FirebasePhoneNumberVerificationException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [VerificationSupportResult]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/pnv/VerificationSupportResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [VerificationSupportStatus]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/pnv/VerificationSupportStatus.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.pnv]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/pnv/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ConfigUpdate]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/remoteconfig/ConfigUpdate.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ConfigUpdateListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/remoteconfig/ConfigUpdateListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ConfigUpdateListenerRegistration]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/remoteconfig/ConfigUpdateListenerRegistration.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfig]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/remoteconfig/FirebaseRemoteConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfigClientException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/remoteconfig/FirebaseRemoteConfigClientException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfigException]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/remoteconfig/FirebaseRemoteConfigException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfigSettings]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/remoteconfig/FirebaseRemoteConfigSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.remoteconfig.ktx]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/remoteconfig/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CancellableTask]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/CancellableTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ControllableTask]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/ControllableTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseStorage]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/FirebaseStorage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ListResult]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/ListResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OnPausedListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/OnPausedListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OnProgressListener]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/OnProgressListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageException.ErrorCode]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/StorageException.ErrorCode.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageMetadata]
(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/StorageMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageMetadata.Builder]

(<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/StorageMetadata.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [StorageTask.ProvideError]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/StorageTask.ProvideError.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StreamDownloadTask]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/StreamDownloadTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StreamDownloadTask.TaskSnapshot]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/StreamDownloadTask.TaskSnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TaskState.InProgress]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/TaskState.InProgress.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TaskState.Paused]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/TaskState.Paused.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UploadTask]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/UploadTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UploadTask.TaskSnapshot]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/UploadTask.TaskSnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TaskState.InProgress]
- (<https://firebase.google.com/docs/reference/kotlin/com/google/firebase/storage/TaskState.InProgress.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

(<https://firebase.google.com/docs/reference/swift/firebaseaillogic/api/reference/Structs/URLContentMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAnalytics Framework Reference]
(<https://firebase.google.com/docs/reference/swift/firebaseanalytics/api/reference/Categories.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAnalytics Framework Reference]
(<https://firebase.google.com/docs/reference/swift/firebaseanalytics/api/reference/Categories/FIRAnalytics%28AppDelegate%29.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAnalytics Framework Reference]
(<https://firebase.google.com/docs/reference/swift/firebaseanalytics/api/reference/Classes/Analytics.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAnalytics Framework Reference]
(<https://firebase.google.com/docs/reference/swift/firebaseanalytics/api/reference/Type-Definitions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAnalyticsSwift Framework Reference]
(<https://firebase.google.com/docs/reference/swift/firebaseanalyticsswift/api/reference/Extensions/View.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/swift/firebaseappcheck/api/reference/Classes/AppAttestProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/swift/firebaseappcheck/api/reference/Classes/AppCheck.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/swift/firebaseappcheck/api/reference/Classes/AppCheckToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/swift/firebaseappcheck/api/reference/Classes/DeviceCheckProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/swift/firebaseappcheck/api/reference/Enums.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/swift/firebaseappcheck/api/reference/Enums/Error-Types.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseappcheck/api/reference/Protocols/AppCheckProviderFactory.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppDistribution Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseappdistribution/api/reference/Classes/AppDistribution.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppDistribution Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseappdistribution/api/reference/Classes/AppDistributionRelease.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppDistribution Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseappdistribution/api/reference/Enums/ErrorMessageTypes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/ActionCodeInfo.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/ActionCodeSettings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/ActionCodeURL.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/AdditionalUserInfo.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/Auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/AuthDataResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/AuthSettings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/AuthTokenResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/GameCenterAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/GoogleAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/MultiFactor>

.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/MultiFactorResolver.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/PhoneMultiFactorGenerator.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/TOTPSecret.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/TwitterAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/UserMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Classes/UserProfileChangeRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Constants.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Enums/ActionCodeOperation.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Protocols/FederatedAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Structs.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebaseauth/api/reference/Type-Definitions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebasecore/api/reference/Classes/FirebaseConfiguration.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebasecore/api/reference/Classes/FirebaseOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebasecore/api/reference/Classes/Timestamp.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]

(<https://firebase.google.com/docs/reference/swift/firebasecore/api/reference/Enums.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebasecore/api/reference/Functions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCrashlytics Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebasecrashlytics/api/reference/Classes/ExceptionModel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCrashlytics Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebasecrashlytics/api/reference/Classes/StackFrame.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebasedatabase/api/reference/Classes/DatabaseReference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebasedatabase/api/reference/Classes/MutableData.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebasedatabase/api/reference/Classes/TransactionResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebasedatabase/api/reference/Structs/ServerTimestamp.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabaseSwift Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebasedatabaseswift/api/reference/Extensions/DataSnapshot.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabaseSwift Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebasedatabaseswift/api/reference/Extensions/Database.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabaseSwift Framework Reference]
<https://firebase.google.com/docs/reference/swift/firebasedatabaseswift/api/reference/Extensions/DatabaseReference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.ImagenModel Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/a-i/imagen-model.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.LiveSession Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/a-i/live-session.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Analytics.FirebaseAnalytics Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/analytics/firebase-analytics.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Analytics.Parameter Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/analytics/parameter.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AppCheck.FirebaseAppCheck Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/app-check/firebase-app-check.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AppOptions Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/app-options.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.AdditionalUserInfo Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/auth/additional-user-info.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.FacebookAuthProvider Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/auth/facebook-auth-provider.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.FederatedAuthProvider Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/auth/federated-auth-provider.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.FederatedOAuthProvider Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/auth/federated-o-auth-provider.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.FederatedOAuthProviderData Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/auth/federated-o-auth-provider-data.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.FirebaseAuth Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/auth/firebase-auth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.GameCenterAuthProvider Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/auth/game-center-auth-provider.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.MicrosoftAuthProvider Class Reference](https://firebase.google.com/docs/reference/unity/class/firebase/auth/microsoft-auth-provider.md.txt): Firebase gives you the tools and infrastructure you need to build better

mobile and web apps, improve app quality, and grow your business.

- [Firebase.Auth.OAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/auth/o-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.PhoneAuthCredential Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/auth/phone-auth-credential.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.PlayGamesAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/auth/play-games-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.UserInfoInterface Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/auth/user-info-interface.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.UserProfile Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/auth/user-profile.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Database.DatabaseException Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/database/database-exception.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Database.DatabaseReference Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/database/database-reference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Database.FirebaseDatabase Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/database/firebase-database.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Database.OnDisconnect Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/database/on-disconnect.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Database.Query Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/database/query.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Database.TransactionResult Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/database/transaction-result.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.FirebaseException Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/firebase-exception.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Firestore.AggregateQuery Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/aggregate-query.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Firestore.CollectionReference Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/collection-reference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Firestore.Filter Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/filter.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Firestore.FirebaseFirestore Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/firebase-firestore.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Firestore.FirestoreDocumentIdAttribute Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/firestore-document-id-attribute.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Firestore.FirestoreEnumNameConverter Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/firestore-enum-name-converter-t-.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Firestore.FirestoreException Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/firestore-exception.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Firestore.FirestorePropertyAttribute Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/firestore-property-attribute.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Firestore.ListenerRegistration Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/listener-registration.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Firestore.LoadBundleTaskProgress Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/load-bundle-task-progress.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Firestore.Query Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/query.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Firestore.QuerySnapshot Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/query-snapshot.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Firestore.ServerTimestampAttribute Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/server-timestamp-attribute.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Firestore.Transaction Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/transaction.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Firestore.WriteBatch Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/firestore/write-batch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Functions.FirebaseFunctions Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/functions/firebase-functions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Functions.FunctionsException Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/functions/functions-exception.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.InitializationException Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/initialization-exception.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.Installations.FirebaseInstallations Class Reference]

(<https://firebase.google.com/docs/reference/unity/class/firebase/installations/firebase-installations.md.txt>): Firebase gives you the tools and infrastructure you need to build better

mobile and web apps, improve app quality, and grow your business.

- [Firebase.Messaging.FirebaseMessaging Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/messaging/firebase-messaging.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Messaging.FirebaseNotification Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/messaging/firebase-notification.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Messaging.MessagingOptions Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/messaging/messaging-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.RemoteConfig.ConfigInfo Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/remote-config/config-info.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Storage.DownloadState Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/storage/download-state.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Storage.FirebaseStorage Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/storage/firebase-storage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Storage.MetadataChange Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/storage/metadata-change.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Storage.StorageException Class Reference]
(<https://firebase.google.com/docs/reference/unity/class/firebase/storage/storage-exception.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Deprecated List]
(<https://firebase.google.com/docs/reference/unity/deprecated/deprecated.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Analytics Events](<https://firebase.google.com/docs/reference/unity/group/event-names.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Analytics Parameters](<https://firebase.google.com/docs/reference/unity/group/parameter-names.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AppCheck.IAppCheckProviderFactory Interface Reference]
(<https://firebase.google.com/docs/reference/unity/interface/firebase/app-check/i-app-check-provider-factory.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth.IUserInfo Interface Reference]
(<https://firebase.google.com/docs/reference/unity/interface/firebase/auth/i-user-info.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase Namespace]
(<https://firebase.google.com/docs/reference/unity/namespace/firebase.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Auth Namespace]
(<https://firebase.google.com/docs/reference/unity/namespace/firebase/auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Database Namespace]
(<https://firebase.google.com/docs/reference/unity/namespace/firebase/database.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app

quality, and grow your business.

- [Firebase.Extensions Namespace]
(<https://firebase.google.com/docs/reference/unity/namespace/firebase/extensions.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Firestore Namespace]
(<https://firebase.google.com/docs/reference/unity/namespace/firebase/firestore.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Functions Namespace]
(<https://firebase.google.com/docs/reference/unity/namespace/firebase/functions.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Installations Namespace]
(<https://firebase.google.com/docs/reference/unity/namespace/firebase/installations.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.RemoteConfig Namespace]
(<https://firebase.google.com/docs/reference/unity/namespace/firebase/remote-config.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.Candidate Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/candidate.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.Citation Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/citation.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.CitationMetadata Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/citation-metadata.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.CodeExecution Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/code-execution.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.CountTokensResponse Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/count-tokens-response.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.GenerateContentResponse Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/generate-content-response.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.GenerationConfig Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/generation-config.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.GoogleSearch Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/google-search.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.GroundingMetadata Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/grounding-metadata.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.GroundingSupport Struct Reference]
(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/grounding-support.md.txt>):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.ImagenGenerationResponse Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/imagen-generation-response-t-.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.ImagenImageFormat Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/imagen-image-format.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.ImagenSafetySettings Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/imagen-safety-settings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.LiveGenerationConfig Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/live-generation-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.LiveSessionResponse Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/live-session-response.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.LiveSessionToolCallCancellation Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/live-session-tool-call-cancellation.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.ModelContent Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/model-content.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.ModelContent.FileDataPart Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/model-content/file-data-part.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.ModelContent.FunctionCallPart Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/model-content/function-call-part.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.ModelContent.FunctionResponsePart Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/model-content/function-response-part.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.ModelContent.InlineDataPart Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/model-content/inline-data-part.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.RequestOptions Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/request-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.SpeechConfig Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/speech-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.ThinkingConfig Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/thinking-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.Tool Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/tool.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Firebase.AI.ToolConfig Struct Reference]

(<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/tool-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps,

improve app quality, and grow your business.

- [Firebase.AI.UrlContext Struct Reference](<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/url-context.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.UrlMetadata Struct Reference](<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/url-metadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.AI.UsageMetadata Struct Reference](<https://firebase.google.com/docs/reference/unity/struct/firebase/a-i/usage-metadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase.Firestore.Blob Struct Reference](<https://firebase.google.com/docs/reference/unity/struct/firebase/firestore/blob.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Monitor the stability of your latest app release](<https://firebase.google.com/docs/release/release-monitoring.md.txt>): A guide to monitoring the stability of your latest app release using Firebase tools like the Release Monitoring dashboard, Crashlytics alerts, and pre-release testing services.
- [Get started with Remote Config on Android](<https://firebase.google.com/docs/remote-config/android/get-started.md.txt>): A guide to getting started with Firebase Remote Config on Android.
- [Modify Remote Config programmatically](<https://firebase.google.com/docs/remote-config/automate-rc.md.txt>): A guide on how to programmatically read and modify Firebase Remote Config templates using the Admin SDK and REST API.
- [Remote Config conditional expression reference](<https://firebase.google.com/docs/remote-config/condition-reference.md.txt>): A reference guide for building conditional expressions in Firebase Remote Config, detailing the available elements and operators for creating conditions.
- [Extend Remote Config with Cloud Functions](<https://firebase.google.com/docs/remote-config/extend-with-functions.md.txt>): A guide on how to extend Firebase Remote Config with Cloud Functions by triggering functions in response to Remote Config events, such as publishing a new version or rolling back to an older one.
- [Get started with Remote Config on Flutter](<https://firebase.google.com/docs/remote-config/flutter/get-started.md.txt>): A guide to getting started with Firebase Remote Config on Flutter.
- [Understand real-time Remote Config](<https://firebase.google.com/docs/remote-config/flutter/real-time.md.txt>): A guide to understanding and using real-time Firebase Remote Config in Flutter apps to receive updated parameter values as soon as they are published.
- [Understand real-time Remote Config](<https://firebase.google.com/docs/remote-config/ios/real-time.md.txt>): A guide to understanding and using real-time Firebase Remote Config in Apple apps to receive updated parameter values as soon as they are published.
- [Firebase Remote Config loading strategies](<https://firebase.google.com/docs/remote-config/loading.md.txt>): A guide to different strategies for loading Firebase Remote Config values in your app, including fetching on load, using a loading screen, and preparing values for the next startup.
- [Remote Config Parameters and Conditions](<https://firebase.google.com/docs/remote-config/parameters.md.txt>): A guide to Firebase Remote Config parameters and conditions, explaining how to define and use them to control your app's behavior and appearance.
- [Case studies: Remote Config personalization](<https://firebase.google.com/docs/remote-config/personalization/csindex.md.txt>): Change the behavior and appearance of your app without publishing an app update, at no cost, for unlimited daily active users.
- [Get started with Remote Config personalization](<https://firebase.google.com/docs/remote-config/personalization/get-started.md.txt>): A guide to getting started with Firebase Remote Config personalization, including how to instrument your app and configure personalization in the Firebase console.
- [What can you do with Remote Config personalization?](<https://firebase.google.com/docs/remote-config/personalization/use-cases.md.txt>): A collection of use cases for Firebase Remote Config personalization, including examples of how to optimize for ad revenue, ad placement, and user engagement in your app.
- [About Remote Config rollouts](<https://firebase.google.com/docs/remote->

config/rollouts/about.md.txt): A guide to understanding key concepts of Firebase Remote Config rollouts, including group membership, use cases, and how to interpret results from Crashlytics and Analytics.

- [Get started with Remote Config rollouts](https://firebase.google.com/docs/remote-config/rollouts/get-started.md.txt): A guide to getting started with Firebase Remote Config rollouts, including how to instrument your app and configure a gradual feature release in the Firebase console.
- [Understand real-time Remote Config](https://firebase.google.com/docs/remote-config/unity/real-time.md.txt): A guide to understanding and using real-time Firebase Remote Config in Unity apps to receive updated parameter values as soon as they are published.
- [Understand real-time Remote Config](https://firebase.google.com/docs/remote-config/web/real-time.md.txt): A guide to understanding and using real-time Firebase Remote Config in web apps to receive updated parameter values as soon as they are published.
- [Firebase Security Rules](https://firebase.google.com/docs/rules.md.txt): Use our flexible, extensible Firebase Security Rules to secure your data in Cloud Firestore, Firebase Realtime Database, and Cloud Storage.
- [Basic Security Rules](https://firebase.google.com/docs/rules/basics.md.txt): A guide to basic Firebase Security Rules, covering default configurations, development rules, and production-ready rules for content-owner, public, and private access.
- [Manage and deploy Firebase Security Rules](https://firebase.google.com/docs/rules/manage-deploy.md.txt): A guide to managing and deploying Firebase Security Rules, covering the use of the Firebase CLI, Firebase console, Admin SDK, and REST API.
- [Run Documentation](https://firebase.google.com/docs/run.md.txt): Developer documentation for Firebase
- [Introduction to the Admin Cloud Storage API](https://firebase.google.com/docs/storage/admin/start.md.txt): A guide to using the Firebase Admin SDK to access your Cloud Storage buckets from privileged environments, including how to upload, download, and modify objects.
- [Create a Cloud Storage reference on Android](https://firebase.google.com/docs/storage/android/create-reference.md.txt): A guide to creating and managing references to files in Cloud Storage for your Android app, which are necessary for uploading, downloading, and managing your files.
- [Download files with Cloud Storage on Android](https://firebase.google.com/docs/storage/android/download-files.md.txt): A guide to downloading files from Cloud Storage in your Android app, with options to download in memory, to a local file, or by generating a download URL.
- [Handle errors for Cloud Storage on Android](https://firebase.google.com/docs/storage/android/handle-errors.md.txt): A guide to handling errors in Cloud Storage for your Android app, with a comprehensive list of error codes and their meanings to help you diagnose and resolve issues.
- [Get started with Cloud Storage on Android](https://firebase.google.com/docs/storage/android/start.md.txt): A guide to getting started with Cloud Storage on Android, including initial setup, SDK integration, and advanced configurations for multiple buckets and custom apps.
- [Delete files with Cloud Storage for C++](https://firebase.google.com/docs/storage/cpp/delete-files.md.txt): A guide to deleting files from Cloud Storage in your C++ app, including how to handle potential errors.
- [Use file metadata with Cloud Storage for C++](https://firebase.google.com/docs/storage/cpp/file-metadata.md.txt): A guide to getting and updating file metadata in Cloud Storage for your C++ app, including how to use custom metadata to store app-specific data.
- [Handle errors with Cloud Storage for C++](https://firebase.google.com/docs/storage/cpp/handle-errors.md.txt): A guide to handling errors in Cloud Storage for your C++ app, with a comprehensive list of error codes and their meanings to help you diagnose and resolve issues.
- [Get started with Cloud Storage for C++](https://firebase.google.com/docs/storage/cpp/start.md.txt): A guide to getting started with Cloud Storage on C++, including initial setup, accessing the `firebase::storage::Storage` class, and advanced configurations for multiple buckets and custom apps.
- [Extend Cloud Storage with Cloud Functions](https://firebase.google.com/docs/storage/extend-with-functions.md.txt): Cloud Storage for Firebase is a powerful, simple, and cost-effective object storage service built for Google scale.

- [Delete files with Cloud Storage on Flutter]
(<https://firebase.google.com/docs/storage/flutter/delete-files.md.txt>): A guide to deleting files from Cloud Storage in your Flutter app, including how to handle potential errors.
- [Download files with Cloud Storage on Flutter]
(<https://firebase.google.com/docs/storage/flutter/download-files.md.txt>): A guide to downloading files from Cloud Storage in your Flutter app, with options to download in memory, to a local file, or by generating a download URL.
- [List files with Cloud Storage on Flutter]
(<https://firebase.google.com/docs/storage/flutter/list-files.md.txt>): A guide to listing files in Cloud Storage from your Flutter app, including how to list all files in a directory and how to paginate through large result sets.
- [Get started with Cloud Storage on Flutter]
(<https://firebase.google.com/docs/storage/flutter/start.md.txt>): A guide to getting started with Cloud Storage on Flutter, including initial setup, SDK integration, and advanced configurations for multiple buckets and custom apps.
- [Integrate with Google Cloud](<https://firebase.google.com/docs/storage/gcp-integration.md.txt>): A guide to integrating Cloud Storage for Firebase with Google Cloud to access your data with Cloud services, APIs, and command-line tools.
- [Delete files with Cloud Storage on Apple platforms]
(<https://firebase.google.com/docs/storage/ios/delete-files.md.txt>): A guide to deleting files from Cloud Storage in your Apple platform app, including how to handle potential errors.
- [Handle errors for Cloud Storage on Apple platforms]
(<https://firebase.google.com/docs/storage/ios/handle-errors.md.txt>): A guide to handling errors in Cloud Storage for your Apple platform app, with a comprehensive list of error codes and their meanings to help you diagnose and resolve issues.
- [Upload files with Cloud Storage on Apple platforms]
(<https://firebase.google.com/docs/storage/ios/upload-files.md.txt>): A guide to uploading files to Cloud Storage in your Apple platform app, covering how to manage uploads, monitor progress, and handle potential errors.
- [Locations for Cloud Storage for Firebase]
(<https://firebase.google.com/docs/storage/locations.md.txt>): A guide to choosing a location for your Cloud Storage bucket to reduce latency and increase availability.
- [Manage stored files in the Firebase console](<https://firebase.google.com/docs/storage/manage-stored-files.md.txt>): A guide to managing your Cloud Storage for Firebase files in the Firebase console, including how to upload, download, delete, and organize your files.
- [Monitor Cloud Storage activity](<https://firebase.google.com/docs/storage/monitor-storage.md.txt>): A guide to monitoring your Cloud Storage for Firebase usage and security rules with the Firebase console, Google Cloud console, and Cloud Monitoring.
- [Understand Firebase Security Rules for Cloud Storage]
(<https://firebase.google.com/docs/storage/security.md.txt>): An introduction to Firebase Storage Security Rules, a powerful tool for managing access control, authorization, and data validation for your Cloud Storage files.
- [Get started with Firebase Security Rules]
(<https://firebase.google.com/docs/storage/security/get-started.md.txt>): A guide to getting started with Firebase Storage Security Rules, including understanding the language, writing basic rules, and deploying them to your project.
- [Use file metadata with Cloud Storage for Unity]
(<https://firebase.google.com/docs/storage/unity/file-metadata.md.txt>): A guide to getting and updating file metadata in Cloud Storage for your Unity app, including how to use custom metadata to store app-specific data.
- [Handle errors for Cloud Storage for Unity]
(<https://firebase.google.com/docs/storage/unity/handle-errors.md.txt>): A guide to handling errors in Cloud Storage for your Unity app, with a comprehensive list of error codes and their meanings to help you diagnose and resolve issues.
- [Get started with Cloud Storage for Unity]
(<https://firebase.google.com/docs/storage/unity/start.md.txt>): A guide to getting started with Cloud Storage on Unity, including initial setup, accessing the `FirebaseStorage` class, and advanced configurations for multiple buckets and custom apps.
- [Create a Cloud Storage reference on Web](<https://firebase.google.com/docs/storage/web/create-reference.md.txt>): A guide to creating and managing references to files in Cloud Storage for your web app, which are necessary for uploading, downloading, and managing your files.
- [Delete files with Cloud Storage on Web]([<https://firebase.google.com/docs/llms.txt>](https://firebase.google.com/docs/storage/web/delete-

</div>
<div data-bbox=)

files.md.txt): A guide to deleting files from Cloud Storage in your web app, including how to handle potential errors.

- [Download files with Cloud Storage on Web](https://firebase.google.com/docs/storage/web/download-files.md.txt): A guide to downloading files from Cloud Storage in your web app, with options to get a download URL or download data directly using the SDK.
- [List files with Cloud Storage on Web](https://firebase.google.com/docs/storage/web/list-files.md.txt): A guide to listing files in Cloud Storage from your web app, including how to list all files in a directory and how to paginate through large result sets.
- [Upload files with Cloud Storage on Web](https://firebase.google.com/docs/storage/web/upload-files.md.txt): A guide to uploading files to Cloud Storage in your web app, covering how to manage uploads, monitor progress, and handle potential errors.
- [AI assistance within Firebase Studio](https://firebase.google.com/docs/studio/ai-assistance.md.txt): An overview of the AI assistance features in Firebase Studio, available in both coding and app prototyping workspaces.
- [Build an app with the Gemini API](https://firebase.google.com/docs/studio/build-gemini-api-app.md.txt): A tutorial on how to build an app with the Gemini API in Firebase Studio, either by starting from a template or by adding the API to an existing application.
- [Create a custom template](https://firebase.google.com/docs/studio/custom-templates.md.txt): A guide to creating custom templates in Firebase Studio, including how to define the template structure, add user-configurable parameters, and test and share the template.
- [Customize your Firebase Studio workspace](https://firebase.google.com/docs/studio/customize-workspace.md.txt): A guide to customizing a Firebase Studio workspace by using a Nix configuration file to define system tools, IDE extensions, app previews, and other settings.
- [dev.nix Reference](https://firebase.google.com/docs/studio/devnix-reference.md.txt): A reference page for the dev.nix file in Firebase Studio, with details on the schema for the workspace environment configuration file.
- [Connect to a Firebase project](https://firebase.google.com/docs/studio/firebase-projects.md.txt): A guide to connecting a Firebase Studio workspace to a Firebase project, including automatic and manual connection methods, and how to change or identify the connected project.
- [Get started with the App Prototyping agent](https://firebase.google.com/docs/studio/get-started-ai.md.txt): A guide to getting started with the Firebase Studio App Prototyping agent, a tool that uses multimodal prompts to prototype, generate, test, publish, and monitor AI-forward web apps.
- [Upload your app to GitHub](https://firebase.google.com/docs/studio/github.md.txt): A guide to integrating Firebase Studio with GitHub, including instructions on how to commit changes and publish a project to a GitHub repository.
- [Integrate with Google and Firebase services](https://firebase.google.com/docs/studio/google-integrations.md.txt): A guide to integrating Google and Firebase services into a Firebase Studio workspace, with instructions on how to use the Firebase Studio panel to add various APIs and services.
- [Project IDX is now part of Firebase Studio](https://firebase.google.com/docs/studio/idx-is-firebase-studio.md.txt): An announcement that Project IDX is now part of Firebase Studio, with details on the transition for existing users and new features.
- [Create a button to import code to Firebase Studio](https://firebase.google.com/docs/studio/import-workspace.md.txt): A guide to creating an "Open in Firebase Studio" button for a website, which allows users to import code directly into a Firebase Studio workspace using the Open in Firebase Studio SDK.
- [Connect to Model Context Protocol (MCP) servers](https://firebase.google.com/docs/studio/mcp-servers.md.txt): A guide to connecting Firebase Studio to Model Context Protocol (MCP) servers, including how to add, use, and troubleshoot them.
- [Create a shortcut to a predefined workspace in Firebase Studio](https://firebase.google.com/docs/studio/open-in-firebase-studio.md.txt): A guide to creating an "Open in Firebase Studio" button, which provides a shortcut to a predefined workspace for easier development environment setup.
- [Licensed software in Firebase Studio](https://firebase.google.com/docs/studio/oss.md.txt): Information about the licensed open-source software used in Firebase Studio, with instructions on how to access the licenses directly from the product.
- [Effective prompting](https://firebase.google.com/docs/studio/prompting.md.txt): Best practices for writing effective prompts for the App Prototyping agent, with guidelines and examples for generating and debugging applications.

- [Configure Gemini in Firebase within workspaces](https://firebase.google.com/docs/studio/setup-gemini.md.txt): A guide to configuring Gemini in Firebase Studio workspaces, including how to adjust settings, customize instructions, exclude files, and use different Gemini models.
- [Share your workspace](https://firebase.google.com/docs/studio/share-your-workspace.md.txt): A guide to sharing a Firebase Studio workspace for collaboration, including instructions on how to share the workspace and a warning about the security implications.
- [Develop, publish, and monitor a full-stack web app with the App Prototyping agent](https://firebase.google.com/docs/studio/solution-build-with-ai.md.txt): A tutorial on how to develop, publish, and monitor a full-stack web app with the Firebase Studio App Prototyping agent, from generating a Next.js app with a natural-language prompt to deploying and monitoring it.
- [Firebase Studio troubleshooting & FAQ](https://firebase.google.com/docs/studio/troubleshooting.md.txt): A troubleshooting and FAQ page for Firebase Studio, with solutions to common problems and answers to frequently asked questions about general usage, Code workspaces, Gemini, and the App Prototyping agent.
- [Try Gemini in Firebase within Firebase Studio](https://firebase.google.com/docs/studio/try-gemini.md.txt): A guide to using Gemini in Firebase Studio, with instructions on how to use the chat interface, inline code assistance, and the command-line interface (CLI) for AI-assisted development.
- [Firebase Test Lab](https://firebase.google.com/docs/test-lab.md.txt): Test your app on devices hosted in a Google data center.
- [Analyze Firebase Test Lab Results](https://firebase.google.com/docs/test-lab/android/analyzing-results.md.txt): A guide to analyzing your test results in Firebase Test Lab, including how to interpret test matrices and access detailed test data.
- [Available devices in Test Lab](https://firebase.google.com/docs/test-lab/android/available-testing-devices.md.txt): A list of the available Android devices for testing your app in Firebase Test Lab.
- [Start testing with continuous integration (CI) systems](https://firebase.google.com/docs/test-lab/android/continuous.md.txt): A guide to using Firebase Test Lab with continuous integration (CI) systems like Jenkins to automate your app testing.
- [Start testing with the Firebase console](https://firebase.google.com/docs/test-lab/android/firebase-console.md.txt): A guide to running Android tests in Firebase Test Lab from the Firebase console, including how to upload your test and view the results.
- [Get started testing for Android with Firebase Test Lab](https://firebase.google.com/docs/test-lab/android/get-started.md.txt): A guide to getting started with Firebase Test Lab for Android, including an overview of key concepts and how to prepare and run your first test.
- [IAM permissions reference guide](https://firebase.google.com/docs/test-lab/android/iam-permissions-reference.md.txt): A reference guide to configuring IAM permissions and roles for Firebase Test Lab, including permissions for test execution and device streaming.
- [Robo scripts reference guide](https://firebase.google.com/docs/test-lab/android/robo-scripts-reference.md.txt): A reference guide to Robo scripts in Firebase Test Lab, including their structure, capabilities, and actions for automating UI tests.
- [Run a Robo script (Android)](https://firebase.google.com/docs/test-lab/android/run-robo-scripts.md.txt): A guide to using Robo scripts in Firebase Test Lab to automate manual QA tasks and test common user journeys in your Android app.
- [Extend Firebase Test Lab with Cloud Functions](https://firebase.google.com/docs/test-lab/extend-with-functions.md.txt): A guide to extending Firebase Test Lab with Cloud Functions to trigger custom actions based on test matrix completion events.
- [Integration Testing with Flutter](https://firebase.google.com/docs/test-lab/flutter/integration-testing-with-flutter.md.txt): A guide to running Flutter integration tests in Firebase Test Lab for both Android and iOS targets.
- [Get started with Game Loop tests for iOS](https://firebase.google.com/docs/test-lab/game-loop.md.txt): A guide to running a Game Loop test for your iOS game in Firebase Test Lab, including how to configure, package, and run your test.
- [Analyzing Test Results](https://firebase.google.com/docs/test-lab/ios/analyzing-results.md.txt): A guide to analyzing your test results in Firebase Test Lab, including how to interpret test matrices and access detailed test data.
- [Available devices in Test Lab](https://firebase.google.com/docs/test-lab/ios/available-testing-devices.md.txt): A list of the available iOS devices for testing your app in Firebase Test Lab.
- [Get started with Firebase Test Lab for iOS](https://firebase.google.com/docs/test-

lab/ios/get-started.md.txt): A guide to getting started with Firebase Test Lab for iOS, including an overview of key concepts and how to prepare and run your first test.

- [Run a Game Loop test](https://firebase.google.com/docs/test-lab/ios/run-game-loop-test.md.txt): A guide to running a Game Loop test for your iOS game in Firebase Test Lab, including how to configure, package, and run your test.
- [Run an XCTest](https://firebase.google.com/docs/test-lab/ios/run-xctest.md.txt): A guide to preparing and running an XCTest in Firebase Test Lab, including how to configure your project, build, sign, and package your test.
- [AdbMessage](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/AdbMessage.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AndroidDevice](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/AndroidDevice.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DeviceState](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/DeviceState.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: applicationDetailService](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/applicationDetailService.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: applicationDetailService.getApkDetails](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/applicationDetailService/getApkDetails.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.deviceSessions](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/projects.deviceSessions.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.deviceSessions.cancel](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/projects.deviceSessions/cancel.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.deviceSessions.create](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/projects.deviceSessions/create.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.deviceSessions.get](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/projects.deviceSessions/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.deviceSessions.patch](https://firebase.google.com/docs/test-lab/reference/testing/rest/v1/projects.deviceSessions/patch.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ANR](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/ANR.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DetectedAppSplashScreen](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/DetectedAppSplashScreen.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Duration](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/Duration.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [EncounteredNonAndroidUiWidgetScreen](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/EncounteredNonAndroidUiWidgetScreen.md.txt): Firebase

gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FailedToInstall](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/FailedToInstall.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FileReference](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/FileReference.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [LogcatCollectionError](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/LogcatCollectionError.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [NativeCrash](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/NativeCrash.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [NonSdkApiUsageViolation](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/NonSdkApiUsageViolation.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PerfSample](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/PerfSample.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PerformedGoogleLogin](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/PerformedGoogleLogin.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PerformedMonkeyActions](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/PerformedMonkeyActions.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [StackTrace](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/StackTrace.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [TestSuiteOverview](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/TestSuiteOverview.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Timestamp](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/Timestamp.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ToolOutputReference](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/ToolOutputReference.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UnspecifiedWarning](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/UnspecifiedWarning.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UnusedRoboDirective](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/UnusedRoboDirective.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [REST Resource: projects.histories.executions](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.histories.executions.clusters](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.clusters.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.clusters.get](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.clusters/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.histories.executions.steps](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.histories.executions.steps.perfMetricsSummary](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.perfMetricsSummary.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.perfMetricsSummary.create](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.perfMetricsSummary/create.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.perfSampleSeries.samples.list](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.perfSampleSeries.samples/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.perfSampleSeries.get](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.perfSampleSeries/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.testCases.list](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps.testCases/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.get](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.getPerfMetricsSummary](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps/getPerfMetricsSummary.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.steps.list](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions.steps/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.executions.patch](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories.executions/patch.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.histories.get](https://firebase.google.com/docs/test-lab/reference/toolresults/rest/v1beta3/projects.histories/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Test Lab troubleshooting & FAQ](https://firebase.google.com/docs/test-lab/troubleshooting.md.txt): A guide to troubleshooting common issues and finding answers to frequently asked questions about Firebase Test Lab.
- [Usage levels, quotas, and pricing for Test Lab](https://firebase.google.com/docs/test-lab/usage-quotas-pricing.md.txt): A guide to the usage levels, quotas, and pricing for Firebase Test Lab, including information on testing and Cloud API quotas.
- [Tutorial: Use event data to measure Google Ads conversions from your iOS app campaigns](https://firebase.google.com/docs/tutorials/ads-ios-on-device-measurement-event-data/index-event-driven.md.txt): Google's on-device conversion measurement improves the number of observable conversions from your iOS app campaigns while keeping users' personal data private.
- [Tutorial: Measure iOS Ads conversions using event data](https://firebase.google.com/docs/tutorials/ads-ios-on-device-measurement-event-data/step-2.md.txt): Developer documentation for Firebase
- [Tutorial: Use first-party data to measure Google Ads conversions from your iOS app campaigns](https://firebase.google.com/docs/tutorials/ads-ios-on-device-measurement/index-first-party.md.txt): Google's on-device conversion measurement improves the number of observable conversions from your iOS app campaigns while keeping users' personal data private.
- [Tutorial: Measure iOS Ads conversions](https://firebase.google.com/docs/tutorials/ads-ios-on-device-measurement/step-1.md.txt): Developer documentation for Firebase
- [Tutorial: Measure iOS Ads conversions](https://firebase.google.com/docs/tutorials/ads-ios-on-device-measurement/step-2.md.txt): Developer documentation for Firebase
- [Tutorial: Measure iOS Ads conversions](https://firebase.google.com/docs/tutorials/ads-ios-on-device-measurement/step-4.md.txt): Developer documentation for Firebase
- [Tutorial: Optimize AdMob ad frequency using Firebase](https://firebase.google.com/docs/tutorials/optimize-ad-frequency.md.txt): Developer documentation for Firebase
- [Tutorial: Optimize AdMob ad frequency](https://firebase.google.com/docs/tutorials/optimize-ad-frequency/step-5.md.txt): Developer documentation for Firebase
- [Tutorial: Optimize hybrid monetization using AdMob, Google Analytics, and Firebase](https://firebase.google.com/docs/tutorials/optimize-hybrid-monetization/step-1.md.txt): Developer documentation for Firebase
- [Tutorial: Optimize hybrid monetization using AdMob, Google Analytics, and Firebase](https://firebase.google.com/docs/tutorials/optimize-hybrid-monetization/step-2.md.txt): Developer documentation for Firebase
- [Tutorial: Test adoption of new AdMob ad formats using Firebase](https://firebase.google.com/docs/tutorials/test-ad-format-adoption.md.txt): Developer documentation for Firebase
- [Test adoption of new AdMob ad formats using Firebase](https://firebase.google.com/docs/tutorials/test-ad-format-adoption/solution-overview.md.txt): Developer documentation for Firebase
- [Tutorial: Test adoption of new AdMob ad formats](https://firebase.google.com/docs/tutorials/test-ad-format-adoption/step-4.md.txt): Developer documentation for Firebase
- [Tutorial: Test adoption of new AdMob ad formats](https://firebase.google.com/docs/tutorials/test-ad-format-adoption/step-5.md.txt): Developer documentation for Firebase
- [Customize a welcome back screen](https://firebase.google.com/docs/tutorials/welcome-back-screen.md.txt): Customize your app's welcome back screen for a repeat user based on their preferences or activity in your app.
- [Add Firebase to your Unity project](https://firebase.google.com/docs/unity/setup.md.txt): A guide to adding Firebase to your Unity project, including how to create a Firebase project, register your app, and add the Firebase Unity SDKs.
- [Additional Unity installation options](https://firebase.google.com/docs/unity/setup-alternative.md.txt): A guide to alternative ways to install the Firebase Unity SDK, including using the Unity Package Manager or installing individual packages.
- [Firebase JavaScript SDK best practices](https://firebase.google.com/docs/web/best-practices.md.txt): A guide to best practices for using the Firebase JavaScript SDK, including tips and troubleshooting for common issues.
- [Understand Firebase for web](https://firebase.google.com/docs/web/learn-more.md.txt): A guide to understanding Firebase for web development, covering key concepts like the modular and namespaced SDKs, different ways to add the SDKs to your app, and the Firebase config object.
- [Upgrade from the namespaced API to the modular application]

(<https://firebase.google.com/docs/web/modular-upgrade.md.txt>): A guide to upgrading from the namespaced Firebase web API to the modular API, including how to use the compat libraries to facilitate the upgrade process.

- [Using module bundlers with Firebase](<https://firebase.google.com/docs/web/module-bundling.md.txt>): A guide to using module bundlers like webpack, Rollup, and esbuild with the Firebase JavaScript SDK to optimize your app's size and performance.
- [Use Firebase in a progressive web app (PWA)](<https://firebase.google.com/docs/web/pwa.md.txt>): Firebase provides JavaScript client SDKs for web app development.
- [Firebase A/B Testing](<https://firebase.google.com/docs/ab-testing.md.txt>): Firebase A/B Testing helps you optimize your app experience by making it easy to run, analyze, and scale product and marketing experiments.
- [Inspect A/B Testing data with BigQuery](<https://firebase.google.com/docs/ab-testing/bigquery.md.txt>): A guide to inspecting and analyzing Firebase A/B Testing experiment data in BigQuery, with example queries.
- [Add the Firebase Admin SDK to your server](<https://firebase.google.com/docs/admin/setup.md.txt>): A guide to adding the Firebase Admin SDK to your server, including how to set up a Firebase project and service account and initialize the SDK.
- [Use Firebase with Google AdMob](<https://firebase.google.com/docs/admob.md.txt>): Google AdMob is an easy way to monetize mobile apps with targeted, in-app advertising.
- [Get started with AdMob in your Android project](<https://firebase.google.com/docs/admob/android/quick-start.md.txt>): A guide to getting started with Google AdMob in an Android project, including how to set up an app, add the SDK, and initialize it.
- [Migrate to the new Google Mobile Ads C++ SDK](<https://firebase.google.com/docs/admob/cpp/admob-migration.md.txt>): A guide to migrating to the new Google Mobile Ads C++ SDK, including details on API changes, namespace updates, and new features.
- [Get started with AdMob in your iOS project](<https://firebase.google.com/docs/admob/ios/quick-start.md.txt>): A guide to getting started with Google AdMob in an iOS project, including how to set up an app, add the SDK, and initialize it.
- [AI](<https://firebase.google.com/docs/ai.md.txt>): Developer documentation for Firebase
- [Firebase extension for the Gemini CLI](<https://firebase.google.com/docs/ai-assistance/gcli-extension.md.txt>): A guide to the Firebase extension for Gemini CLI, which brings the power of Gemini models directly into your terminal.
- [Gemini in Firebase](<https://firebase.google.com/docs/ai-assistance/gemini-in-firebase.md.txt>): Streamline your development process with Gemini in Firebase, an AI-powered collaborative assistant.
- [Try Gemini in the Firebase console](<https://firebase.google.com/docs/ai-assistance/gemini-in-firebase/try-gemini.md.txt>): A guide to using Gemini in Firebase (an AI assistant in the Firebase console) after setup, including how to chat, explore the features of the Gemini pane, and get AI-powered assistance.
- [AI Prompt: Add AI features](<https://firebase.google.com/docs/ai-assistance/prompt-catalog/add-ai-features.md.txt>): A guide to the 'Add AI features' AI prompt, which helps you set up Firebase AI Logic and add Gemini API-powered features to your mobile or web app.
- [AI Prompt: Set up a backend](<https://firebase.google.com/docs/ai-assistance/prompt-catalog/set-up-backend.md.txt>): A guide to the 'Set up a backend' AI prompt, which helps you provision and configure backend services like Firestore and Authentication for a web app.
- [AI Prompt: Write Firebase Security Rules](<https://firebase.google.com/docs/ai-assistance/prompt-catalog/write-security-rules.md.txt>): A guide for how to use AI assistance with a pre-written prompt to write Firebase Security Rules for Cloud Firestore and Cloud Storage.
- [Analyze audio files using the Gemini API](<https://firebase.google.com/docs/ai-logic/analyze-audio.md.txt>): A guide to analyzing audio files using the Gemini API via the Firebase AI Logic client SDKs.
- [Analyze documents (like PDFs) using the Gemini API](<https://firebase.google.com/docs/ai-logic/analyze-documents.md.txt>): A guide to analyzing documents (like PDFs) using the Gemini API via the Firebase AI Logic client SDKs.
- [Analyze image files using the Gemini API](<https://firebase.google.com/docs/ai-logic/analyze-images.md.txt>): A guide to analyzing image files using the Gemini API via the Firebase AI Logic client SDKs.

- [Implement Firebase App Check to protect APIs from unauthorized clients](https://firebase.google.com/docs/ai-logic/app-check.md.txt): A guide to implementing Firebase App Check to protect APIs (like the Gemini API) from unauthorized clients.
- [Build multi-turn conversations (chat) using the Gemini API](https://firebase.google.com/docs/ai-logic/chat.md.txt): A guide to building multi-turn conversations (chat) using the Gemini API via the Firebase AI Logic client SDKs.
- [Audit logging for Firebase AI Logic](https://firebase.google.com/docs/ai-logic/cloud-audit-logging.md.txt): A guide to using Cloud Audit Logging for Firebase AI Logic.
- [Expand the content of an image using outpainting with Imagen](https://firebase.google.com/docs/ai-logic/edit-images-imagen-expand-images.md.txt): A guide to expanding the content of an image using outpainting with Imagen via the Firebase AI Logic client SDKs.
- [Remove objects from images using Imagen](https://firebase.google.com/docs/ai-logic/edit-images-imagen-remove-objects.md.txt): A guide to removing objects from images using Imagen via the Firebase AI Logic client SDKs.
- [Customize images based on a specified subject using Imagen](https://firebase.google.com/docs/ai-logic/edit-images-imagen-subject-customization.md.txt): A guide to customizing images based on a specified subject using Imagen via the Firebase AI Logic client SDKs.
- [Function calling using the Gemini API](https://firebase.google.com/docs/ai-logic/function-calling.md.txt): A guide to using function calling with the Gemini API via the Firebase AI Logic client SDKs.
- [Generate audio using the Gemini API](https://firebase.google.com/docs/ai-logic/generate-audio.md.txt): A guide to generating audio using the Gemini API via the Firebase AI Logic client SDKs.
- [Supported input files and requirements](https://firebase.google.com/docs/ai-logic/input-file-requirements.md.txt): A guide to the supported input files and requirements for multimodal requests.
- [Get started with the Gemini Live API using Firebase AI Logic](https://firebase.google.com/docs/ai-logic/live-api.md.txt): A guide to getting started with the Gemini Live API via the Firebase AI Logic client SDKs.
- [Limits and specifications of the Live API](https://firebase.google.com/docs/ai-logic/live-api/limits-and-specs.md.txt): A reference guide to the limits and specifications of the Gemini Live API via the Firebase AI Logic client SDKs.
- [Migrate to the Firebase AI Logic SDKs from the Google AI client SDKs](https://firebase.google.com/docs/ai-logic/migrate-from-google-ai-client-sdks.md.txt): A guide to migrating from the Google AI client SDKs to the Firebase AI Logic client SDKs.
- [Migrate to the Firebase AI Logic SDKs from the GA version of Vertex AI in Firebase SDKs](https://firebase.google.com/docs/ai-logic/migrate-to-latest-sdk.md.txt): A guide to migrating from the GA versions of the Vertex AI for Firebase client SDKs to the Firebase AI Logic client SDKs.
- [Understand prompt design](https://firebase.google.com/docs/ai-logic/prompt-design.md.txt): A guide to understanding prompt design for Gemini and Imagen models.
- [Reference documentation for the Firebase AI Logic SDKs](https://firebase.google.com/docs/ai-logic/ref-docs.md.txt): An overview of available reference documentation for the Firebase AI Logic client SDKs.
- [Understand and use safety settings](https://firebase.google.com/docs/ai-logic/safety-settings.md.txt): A guide to understanding and using safety settings for Gemini and Imagen models.
- [Advanced workflows for templates](https://firebase.google.com/docs/ai-logic/server-prompt-templates/advanced-workflows.md.txt): A guide to more advanced workflows for Firebase AI Logic server prompt templates using the REST API, like specifying a template's location or providing the template as a file.
- [Get started with server prompt templates](https://firebase.google.com/docs/ai-logic/server-prompt-templates/get-started.md.txt): A guide to getting started with Firebase AI Logic server prompt templates, including how to create, test, and access them in your application's code.
- [Manage templates](https://firebase.google.com/docs/ai-logic/server-prompt-templates/manage-templates.md.txt): A guide to managing your Firebase AI Logic server prompt templates, including how to edit, lock, delete, and version your templates for better organization.
- [Overview: Firebase AI Logic solutions](https://firebase.google.com/docs/ai-logic/solutions/overview.md.txt): An overview of solutions for more advanced use cases with Firebase AI Logic.

- [Dynamically update your Firebase AI Logic app with Firebase Remote Config]
(<https://firebase.google.com/docs/ai-logic/solutions/remote-config.md.txt>): A guide to using Firebase Remote Config to dynamically configure your app when using the Firebase AI Logic client SDKs.
- [Use system instructions to steer the behavior of a model]
(<https://firebase.google.com/docs/ai-logic/system-instructions.md.txt>): A guide to using system instructions to steer the behavior of a model.
- [Thinking](<https://firebase.google.com/docs/ai-logic/thinking.md.txt>): A guide to using the thinking feature of Gemini models when using the Firebase AI Logic client SDKs.
- [URL context](<https://firebase.google.com/docs/ai-logic/url-context.md.txt>): Build AI-powered mobile and web apps and features with the Gemini API using Firebase AI Logic
- [Configure Analytics data collection and usage]
(<https://firebase.google.com/docs/analytics/configure-data-collection.md.txt>): Options for controlling the collection and use of Analytics data, including how to temporarily or permanently disable collection and how to control data collection for personalized advertising.
- [Set user properties](<https://firebase.google.com/docs/analytics/cpp/properties.md.txt>): A guide to setting user properties in Google Analytics for your C++ app to describe segments of your user base and analyze their behavior.
- [Get started with Google Analytics for C++]
(<https://firebase.google.com/docs/analytics/cpp/start.md.txt>): A guide to getting started with Google Analytics in a C++ app, including an introduction to logging events and setting user properties.
- [Debug events](<https://firebase.google.com/docs/analytics/debugview.md.txt>): A guide to using DebugView to see raw event data logged by your app on development devices in near real-time for validation and troubleshooting of your Analytics implementation.
- [Log events](<https://firebase.google.com/docs/analytics/events.md.txt>): A developer's guide to logging events in your app with Firebase Analytics, covering recommended and custom events, default parameters, and how to view event data.
- [Get started with Google Analytics](<https://firebase.google.com/docs/analytics/get-started.md.txt>): A quickstart guide to adding Firebase Analytics to your app, covering prerequisites, adding the SDK, and how to start logging events.
- [Measure ad revenue](<https://firebase.google.com/docs/analytics/measure-ad-revenue.md.txt>): Measure your revenue sources to help you understand the lifetime value of your users and grow your app business.
- [Log events](<https://firebase.google.com/docs/analytics/unity/events.md.txt>): A guide to logging Google Analytics events in your Unity app to understand user actions, system events, and errors, with or without custom data.
- [Set user properties](<https://firebase.google.com/docs/analytics/unity/properties.md.txt>): A guide to setting user properties in Google Analytics for your Unity app to describe segments of your user base and analyze their behavior.
- [Get started with Google Analytics for Unity]
(<https://firebase.google.com/docs/analytics/unity/start.md.txt>): A guide to getting started with Google Analytics in a Unity app, including an introduction to logging events and setting user properties.
- [Set user properties](<https://firebase.google.com/docs/analytics/user-properties.md.txt>): A guide to setting user properties in Firebase Analytics to describe segments of your user base, which can then be used to define audiences for your app.
- [Use Analytics in a WebView](<https://firebase.google.com/docs/analytics/webview.md.txt>): A guide to using Firebase Analytics in a WebView, covering the implementation of a JavaScript handler, a native interface, and how to manually log in-app purchase events.
- [Dependencies of Firebase Android SDKs on Google Play services]
(<https://firebase.google.com/docs/android/android-play-services.md.txt>): A comprehensive list of Firebase Android SDKs and their dependencies on Google Play services, categorized by whether Play services are required, recommended, or not required.
- [Integrate Firebase with your Play Games services project]
(<https://firebase.google.com/docs/android/integrate-play-games.md.txt>): A guide to integrating Firebase with a Google Play Games Services project to log game events and use other Firebase products.
- [Understand Firebase for Android](<https://firebase.google.com/docs/android/learn-more.md.txt>): A guide to understanding key concepts and tools for Firebase on Android, including the Android Studio Firebase Assistant, Google services plugin, and Firebase BoM.
- [Prepare for Google Play's data disclosure requirements]

(<https://firebase.google.com/docs/android/play-data-disclosure.md.txt>): A guide to help developers complete Google Play's data disclosure requirements for apps that use Firebase Android SDKs, specifically in regards to data collection.

- [Add Firebase to your Android project](<https://firebase.google.com/docs/android/setup.md.txt>): A guide to adding Firebase to an Android project, including how to create a Firebase project, register an app, and add the necessary SDKs.
- [Troubleshooting & FAQ for Android and Firebase](<https://firebase.google.com/docs/android/troubleshooting-faq.md.txt>): A collection of troubleshooting tips and frequently asked questions for common issues encountered when using Firebase on Android.
- [Get started using App Check with a custom provider on Android](<https://firebase.google.com/docs/app-check/android/custom-provider.md.txt>): A guide on how to get started using App Check with a custom provider on Android.
- [Protect custom backend resources with App Check on Android](<https://firebase.google.com/docs/app-check/android/custom-resource.md.txt>): A guide on how to protect custom backend resources with App Check on Android.
- [Use App Check with the debug provider on Android](<https://firebase.google.com/docs/app-check/android/debug-provider.md.txt>): A guide to using App Check with the debug provider on Android for development and testing environments.
- [SafetyNet turndown](<https://firebase.google.com/docs/app-check/android/safetynet-provider.md.txt>): Information about the turndown of the SafetyNet provider for App Check.
- [Enable App Check enforcement for Cloud Functions](<https://firebase.google.com/docs/app-check/cloud-functions.md.txt>): A guide to enabling App Check enforcement for Cloud Functions to protect your backend.
- [Use App Check with the debug provider with C++](<https://firebase.google.com/docs/app-check/cpp/debug-provider.md.txt>): A guide to using App Check with the debug provider in C++ for development and testing environments.
- [Get started using App Check with App Attest on Apple platforms](<https://firebase.google.com/docs/app-check/ios/app-attest-provider.md.txt>): A guide on how to get started using App Check with the App Attest provider on Apple platforms.
- [Protect custom backend resources with App Check on Apple platforms](<https://firebase.google.com/docs/app-check/ios/custom-resource.md.txt>): A guide on how to protect custom backend resources with App Check on Apple platforms.
- [Monitor App Check request metrics for Cloud Functions](<https://firebase.google.com/docs/app-check/monitor-functions-metrics.md.txt>): A guide to monitoring App Check request metrics for Cloud Functions to understand how enforcement will affect your users.
- [Firebase App Distribution](<https://firebase.google.com/docs/app-distribution.md.txt>): Firebase App Distribution makes distributing your apps to trusted testers painless. By getting your apps onto testers' devices quickly, you can get feedback early and often. And if you use Crashlytics in your apps, you'll automatically get stability metrics for all your builds, so you know when you're ready to ship.
- [Add and remove testers in App Distribution](<https://firebase.google.com/docs/app-distribution/add-remove-testers.md.txt>): A guide to adding and removing testers in App Distribution from the Firebase console, with the API, and from within tester groups.
- [Automated Tester (Android)](<https://firebase.google.com/docs/app-distribution/android-automated-tester.md.txt>): A guide to using the Automated Tester feature in Firebase App Distribution to automatically test your Android app and identify issues.
- [Distribute Android apps to testers using the Firebase CLI](<https://firebase.google.com/docs/app-distribution/android/distribute-cli.md.txt>): A guide to distributing your Android app to testers from the command line by using the Firebase CLI to upload and share your builds.
- [Distribute Android apps to testers using fastlane](<https://firebase.google.com/docs/app-distribution/android/distribute-fastlane.md.txt>): A guide to distributing your Android app to testers by using fastlane to automate the process of building and releasing your app.
- [Best practices for distributing Android apps to QA testers using CI/CD](<https://firebase.google.com/docs/app-distribution/best-practices-distributing-android-apps-to-qa-testers-with-ci-cd.md.txt>): Make your Android pre-release testing workflows sustainable and repeatable in a CI/CD environment.
- [Best practices for distributing Apple apps to QA testers using CI/CD and fastlane](<https://firebase.google.com/docs/app-distribution/best-practices-distributing-apple-apps-to-qa-testers-with-ci-cd-fastlane.md.txt>): Make your Apple platform pre-release testing workflows sustainable and repeatable in a CI/CD environment.

- [Import testers from CSV files](https://firebase.google.com/docs/app-distribution/import-testers-csv-files.md.txt): A guide to importing testers from CSV files in Firebase App Distribution to grant release access to a large number of testers.
- [Distribute iOS apps to testers using the Firebase CLI](https://firebase.google.com/docs/app-distribution/ios/distribute-cli.md.txt): A guide to distributing iOS apps to testers using the Firebase CLI, including how to upload your app and manage releases from the command line.
- [Distribute iOS apps to testers using fastlane](https://firebase.google.com/docs/app-distribution/ios/distribute-fastlane.md.txt): A guide to distributing iOS apps to testers using fastlane, including how to set up fastlane, authenticate with Firebase, and configure your release process.
- [Register additional iOS devices](https://firebase.google.com/docs/app-distribution/register-additional-devices.md.txt): A guide to registering additional iOS devices for ad hoc distribution with Firebase App Distribution, including how to export UDIDs and update your provisioning profile.
- [Notify testers about new builds](https://firebase.google.com/docs/app-distribution/set-up-alerts.md.txt): A guide to using the Firebase App Distribution SDK to display in-app alerts to your testers when new builds of your app are available to install.
- [App Distribution troubleshooting & FAQ](https://firebase.google.com/docs/app-distribution/troubleshooting.md.txt): A guide to troubleshooting common issues and finding answers to frequently asked questions about Firebase App Distribution.
- [Alternative ways to deploy to App Hosting](https://firebase.google.com/docs/app-hosting/alt-deploy.md.txt): A guide to alternative ways to deploy to Firebase App Hosting, including deploying from source with the Firebase CLI, using Terraform, and deploying from Firebase Studio.
- [Audit logging for Firebase App Hosting](https://firebase.google.com/docs/app-hosting/cloud-audit-logging.md.txt): A guide to understanding and using Cloud Audit Logs for Firebase App Hosting to answer questions about who did what, where, and when.
- [Configure and manage App Hosting backends](https://firebase.google.com/docs/app-hosting/configure.md.txt): A guide to configuring and managing Firebase App Hosting backends, including how to use the apphosting.yaml file to set environment variables, configure Cloud Run services, and manage secrets.
- [Understand App Hosting costs](https://firebase.google.com/docs/app-hosting/costs.md.txt): A guide to understanding the costs associated with Firebase App Hosting, including no-cost limits, how to calculate costs, and billing examples.
- [Connect a custom domain](https://firebase.google.com/docs/app-hosting/custom-domain.md.txt): A guide to connecting a custom domain to your Firebase App Hosting backend, including how to migrate an existing domain or connect a new one.
- [Locally test your app deployment](https://firebase.google.com/docs/app-hosting/emulate.md.txt): A guide to using the Firebase App Hosting emulator to locally test your app deployment, including how to configure the emulator and manage emulation.
- [Frameworks and tooling for App Hosting](https://firebase.google.com/docs/app-hosting/frameworks-tooling.md.txt): A guide to the frameworks and tooling supported by Firebase App Hosting, including pre-configured and community-supported frameworks, framework adapters, runtimes, and package managers.
- [Get started with App Hosting](https://firebase.google.com/docs/app-hosting/get-started.md.txt): A guide to getting started with Firebase App Hosting, including how to create a backend, connect to a GitHub repository, and trigger a rollout.
- [View logs and metrics](https://firebase.google.com/docs/app-hosting/logging.md.txt): A guide to viewing logs and metrics for your Firebase App Hosting backend, including how to view usage in the console, write logs to Cloud Logging, and view server errors.
- [Optimize image loading on Next.js](https://firebase.google.com/docs/app-hosting/optimize-image-loading.md.txt): Optimize image loading for web apps hosted on moonrise-replace822f09ee17264b6aa4a763bc44872c28moonrise-replace.
- [App Hosting and other Google solutions](https://firebase.google.com/docs/app-hosting/product-comparison.md.txt): A comparison of Firebase App Hosting with other Google serverless products like Cloud Run, Cloud Functions, and Firebase Hosting.
- [Manage rollouts and releases](https://firebase.google.com/docs/app-hosting/rollouts.md.txt): A guide to managing rollouts and releases in Firebase App Hosting, including how to view rollouts, manually trigger a rollout, and restore a previous rollout.
- [Create Custom Tokens](https://firebase.google.com/docs/auth/admin/create-custom-tokens.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.

- [Control Access with Custom Claims and Security Rules]
(<https://firebase.google.com/docs/auth/admin/custom-claims.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Admin Authentication API Errors](<https://firebase.google.com/docs/auth/admin/errors.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Verify ID Tokens](<https://firebase.google.com/docs/auth/admin/verify-id-tokens.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Link Multiple Auth Providers to an Account on Android]
(<https://firebase.google.com/docs/auth/android/account-linking.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase Anonymously on Android]
(<https://firebase.google.com/docs/auth/android/anonymous-auth.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate with Firebase Using Email Link in Android]
(<https://firebase.google.com/docs/auth/android/email-link-auth.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Migrate email link sign in away from Firebase Dynamic Links (Android)]
(<https://firebase.google.com/docs/auth/android/email-link-migration.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Easily add sign-in to your Android app with FirebaseUI]
(<https://firebase.google.com/docs/auth/android/firebaseui.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Google on Android](<https://firebase.google.com/docs/auth/android/google-signin.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Microsoft on Android]
(<https://firebase.google.com/docs/auth/android/microsoft-oauth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Add multi-factor authentication to your Android app]
(<https://firebase.google.com/docs/auth/android/multi-factor.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Passing State in Email Actions](<https://firebase.google.com/docs/auth/android/passing-state-in-email-actions.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate with Firebase on Android using a Phone Number]
(<https://firebase.google.com/docs/auth/android/phone-auth.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Get Started with Firebase Authentication on Android]
(<https://firebase.google.com/docs/auth/android/start.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Add TOTP multi-factor authentication to your Android app]
(<https://firebase.google.com/docs/auth/android/totp-mfa.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Twitter on Android](<https://firebase.google.com/docs/auth/android/twitter-login.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Yahoo on Android](<https://firebase.google.com/docs/auth/android/yahoo-oauth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Case Studies: Firebase Authentication](<https://firebase.google.com/docs/auth/case-studies.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Link Multiple Auth Providers to an Account using C++](<https://firebase.google.com/docs/auth/cpp/account-linking.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate with Firebase Anonymously Using C++](<https://firebase.google.com/docs/auth/cpp/anonymous-auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using GitHub and C++](<https://firebase.google.com/docs/auth/cpp/github-auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase using Password-Based Accounts using C++](<https://firebase.google.com/docs/auth/cpp/password-auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase using a Phone Number and C++](<https://firebase.google.com/docs/auth/cpp/phone-auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Google Play Games Services with C++](<https://firebase.google.com/docs/auth/cpp/play-games.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Get Started with Firebase Authentication in C++](<https://firebase.google.com/docs/auth/cpp/start.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Twitter and C++](<https://firebase.google.com/docs/auth/cpp/twitter-login.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Yahoo and C++](<https://firebase.google.com/docs/auth/cpp/yahoo-oauth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Create custom email action handlers](<https://firebase.google.com/docs/auth/custom-email-handler.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Extend Firebase Authentication with blocking functions](<https://firebase.google.com/docs/auth/extend-with-blocking-functions.md.txt>): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate with Firebase Anonymously](<https://firebase.google.com/docs/auth/flutter/anonymous-auth.md.txt>): Developer documentation for Firebase
- [Authenticate with Firebase Using Email Links](<https://firebase.google.com/docs/auth/flutter/email-link-auth.md.txt>): Developer documentation for Firebase
- [Federated identity & social sign-in](<https://firebase.google.com/docs/auth/flutter/federated-auth.md.txt>): Developer documentation for Firebase
- [Passing State in Email Actions](<https://firebase.google.com/docs/auth/flutter/passing-state-in-email-actions.md.txt>): Developer documentation for Firebase
- [Authenticate with Firebase using Password-Based Accounts on Flutter](<https://firebase.google.com/docs/auth/flutter/password-auth.md.txt>): Developer documentation for Firebase
- [Phone Authentication](<https://firebase.google.com/docs/auth/flutter/phone-auth.md.txt>): Developer documentation for Firebase
- [Get Started with Firebase Authentication on Flutter](<https://firebase.google.com/docs/auth/flutter/start.md.txt>): Developer documentation for Firebase

- [Authenticate Using Apple](https://firebase.google.com/docs/auth/ios/apple.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase on Apple Platforms Using a Custom Authentication System](https://firebase.google.com/docs/auth/ios/custom-auth.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Handle Firebase Apple Platforms Auth Errors](https://firebase.google.com/docs/auth/ios/errors.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Facebook Login on Apple Platforms](https://firebase.google.com/docs/auth/ios/facebook-login.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Game Center](https://firebase.google.com/docs/auth/ios/game-center.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Google Sign-In on Apple Platforms](https://firebase.google.com/docs/auth/ios/google-signin.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Manage Users in Firebase](https://firebase.google.com/docs/auth/ios/manage-users.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Add multi-factor authentication to your iOS app](https://firebase.google.com/docs/auth/ios/multi-factor.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using OpenID Connect on Apple platforms](https://firebase.google.com/docs/auth/ios/openid-connect.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Passing State in Email Actions](https://firebase.google.com/docs/auth/ios/passing-state-in-email-actions.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase using Password-Based Accounts on Apple Platforms](https://firebase.google.com/docs/auth/ios/password-auth.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Enabling cross-app authentication with shared Apple Keychain](https://firebase.google.com/docs/auth/ios/single-sign-on.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Add TOTP multi-factor authentication to your iOS app](https://firebase.google.com/docs/auth/ios/totp-mfa.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Twitter on Apple Platforms](https://firebase.google.com/docs/auth/ios/twitter-login.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Yahoo on Apple Platforms](https://firebase.google.com/docs/auth/ios/yahoo-oauth.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Apple and Unity](https://firebase.google.com/docs/auth/unity/apple.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase using a custom authentication system and Unity](https://firebase.google.com/docs/auth/unity/custom-auth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow

your business.

- [Authenticate Using GitHub and Unity](https://firebase.google.com/docs/auth/unity/github-auth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase using Password-Based Accounts using Unity](https://firebase.google.com/docs/auth/unity/password-auth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase using a Phone Number with Unity](https://firebase.google.com/docs/auth/unity/phone-auth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate in Unity Using Google Play Games Services](https://firebase.google.com/docs/auth/unity/play-games.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Get Started with Firebase Authentication in Unity](https://firebase.google.com/docs/auth/unity/start.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Twitter and Unity](https://firebase.google.com/docs/auth/unity/twitter-login.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using Yahoo and Unity](https://firebase.google.com/docs/auth/unity/yahoo-oauth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase Anonymously Using JavaScript](https://firebase.google.com/docs/auth/web/anonymous-auth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authentication State Persistence](https://firebase.google.com/docs/auth/web/auth-state-persistence.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using OAuth Providers with Cordova](https://firebase.google.com/docs/auth/web/cordova.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate with Firebase Using Email Link in JavaScript](https://firebase.google.com/docs/auth/web/email-link-auth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Authenticate Using GitHub with JavaScript](https://firebase.google.com/docs/auth/web/github-auth.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Google with JavaScript](https://firebase.google.com/docs/auth/web/google-signin.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Best practices for using signInWithRedirect on browsers that block third-party storage access](https://firebase.google.com/docs/auth/web/redirect-best-practices.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Session management with service workers](https://firebase.google.com/docs/auth/web/service-worker-sessions.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Add TOTP multi-factor authentication to your web app](https://firebase.google.com/docs/auth/web/totp-mfa.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Authenticate Using Yahoo with JavaScript](https://firebase.google.com/docs/auth/web/yahoo-oauth.md.txt): Firebase Authentication lets you add an end-to-end identity solution to your app for easy user authentication, sign-in, and onboarding in just a few lines of code.
- [Where do I start with Firebase Authentication?](https://firebase.google.com/docs/auth/where-

- to-start.md.txt): Choose the appropriate authentication option for your app based on your use case, experience, and app's architecture.
- [Build Documentation](https://firebase.google.com/docs/build.md.txt): Developer documentation for Firebase
 - [auth:import and auth:export](https://firebase.google.com/docs/cli/auth.md.txt): Developer documentation for Firebase
 - [Firebase Realtime Database operation types](https://firebase.google.com/docs/cli/database-profile.md.txt): Developer documentation for Firebase
 - [Deploy targets](https://firebase.google.com/docs/cli/targets.md.txt): Developer documentation for Firebase
 - [Firebase Cloud Messaging](https://firebase.google.com/docs/cloud-messaging.md.txt): Firebase Cloud Messaging (FCM) is a cross-platform messaging solution that lets you reliably send messages.
 - [Get AI insights for messaging campaigns with Gemini in Firebase](https://firebase.google.com/docs/cloud-messaging/ai-insights.md.txt): Get AI insights for your messaging campaigns with Gemini in Firebase.
 - [FCM Codelabs](https://firebase.google.com/docs/cloud-messaging/codelab.md.txt): Learn how to use Firebase Cloud Messaging with these guided codelabs.
 - [Non-collapsible and collapsible messages](https://firebase.google.com/docs/cloud-messaging/customize-messages/collapsible-message-types.md.txt): A guide to the differences between collapsible and non-collapsible messages, including common use cases and how to implement them.
 - [Get started with Live Activity](https://firebase.google.com/docs/cloud-messaging/customize-messages/live-activity.md.txt): A guide to remotely starting, updating, and ending Live Activity notifications on iOS devices by using the Firebase Cloud Messaging HTTP v1 API.
 - [Set the lifespan of a message](https://firebase.google.com/docs/cloud-messaging/customize-messages/setting-message-lifespan.md.txt): A guide to setting the maximum lifespan of a message to control how long FCM stores and attempts to deliver it to your users.
 - [FCM Error Codes](https://firebase.google.com/docs/cloud-messaging/error-codes.md.txt): Understand and troubleshoot common FCM error codes for the HTTP v1 API and the Admin SDK.
 - [Best practices for FCM registration token management](https://firebase.google.com/docs/cloud-messaging/manage-tokens.md.txt): Learn best practices for managing FCM registration tokens to ensure efficient message targeting and valid delivery reporting.
 - [Manage Topic Subscriptions](https://firebase.google.com/docs/cloud-messaging/manage-topic-subscriptions.md.txt): Learn how to manage topic subscriptions from both the server and the client.
 - [Receive messages using Firebase Cloud Messaging](https://firebase.google.com/docs/cloud-messaging/receive-messages.md.txt): Learn how to receive and handle messages in your client apps for different platforms.
 - [Send Messages to Topics](https://firebase.google.com/docs/cloud-messaging/send-topic-messages.md.txt): Learn how to send messages to topics and topic conditions using the Admin SDK or the HTTP v1 API.
 - [Send a Message using FCM HTTP v1 API](https://firebase.google.com/docs/cloud-messaging/send/v1-api.md.txt): A guide on how to send messages using the HTTP v1 API. This page covers how to send messages to specific devices.
 - [Your server environment and FCM](https://firebase.google.com/docs/cloud-messaging/server-environment.md.txt): Learn about the server environment for Firebase Cloud Messaging and the options for interacting with FCM servers.
 - [FCM Throttling and Quotas](https://firebase.google.com/docs/cloud-messaging/throttling-and-quotas.md.txt): Understand the throttling and quotas in place for Firebase Cloud Messaging to ensure a scalable and reliable service.
 - [Firebase Cloud Messaging troubleshooting & FAQ](https://firebase.google.com/docs/cloud-messaging/troubleshooting.md.txt): Find answers to frequently asked questions and troubleshooting tips for Firebase Cloud Messaging.
 - [Understand Firebase for C++](https://firebase.google.com/docs/cpp/learn-more.md.txt): A guide to understanding the Firebase C++ SDK, with details on library support by platform, configuration files, and links to open-source resources.
 - [AI assistance for Crashlytics via MCP](https://firebase.google.com/docs/crashlytics/ai-assistance-mcp.md.txt): A guide to using AI assistance for Firebase Crashlytics via the Model Context Protocol (MCP), including setup, guided workflows, and free-form conversational debugging.
 - [Alerting options for Crashlytics]

(<https://firebase.google.com/docs/crashlytics/alerts.md.txt>): An overview about the available alerting options for Firebase Crashlytics, with links to details about each option.

- [Set up advanced alerting to custom notification channels](<https://firebase.google.com/docs/crashlytics/alerts-advanced.md.txt>): A guide about setting up advanced, custom Crashlytics alerting to any third-party service of your choice.
- [Set up basic alerting integrations with Slack, Jira, and PagerDuty](<https://firebase.google.com/docs/crashlytics/alerts-basic-integrations.md.txt>): A guide about setting up basic Crashlytics alerting to third-party services of Slack, Jira, and PagerDuty.
- [Configure and receive Crashlytics alerts by email or in-console](<https://firebase.google.com/docs/crashlytics/alerts-default.md.txt>): An overview about configuring and receiving Firebase Crashlytics alerts (like velocity alerts) by email or in-console.
- [Get started with Crashlytics for Android](<https://firebase.google.com/docs/crashlytics/android/get-started.md.txt>): An Android-specific guide to getting started with Firebase Crashlytics, including how to add the SDK, configure your project, and force a test crash to see your first report.
- [Get started with Crashlytics for Android NDK](<https://firebase.google.com/docs/crashlytics/android/get-started-ndk.md.txt>): An NDK-specific guide to getting started with Firebase Crashlytics, including how to add the SDK, configure your project, and force a test crash to see your first report.
- [Test your Crashlytics implementation (Android)](<https://firebase.google.com/docs/crashlytics/android/test-implementation.md.txt>): Troubleshooting for the Firebase Crashlytics implementation in your Android app, which includes forcing a test crash and enabling debug logging to verify that reports are being sent.
- [Export Crashlytics data to BigQuery](<https://firebase.google.com/docs/crashlytics/bigquery-export.md.txt>): A guide to exporting Firebase Crashlytics data to BigQuery for advanced analysis.
- [Filter logs and create log-based metrics](<https://firebase.google.com/docs/crashlytics/cloud-logging-filtering-and-log-based-metrics.md.txt>): A collection of example queries and the dataset schema for exported Crashlytics data in BigQuery.
- [Log schema for exported data in Cloud Logging](<https://firebase.google.com/docs/crashlytics/cloud-logging-schema.md.txt>): A reference page for the log schema of exported Crashlytics and Firebase sessions data in Cloud Logging.
- [What can you do with your data stored in Cloud Logging?](<https://firebase.google.com/docs/crashlytics/cloud-logging-what-can-you-do.md.txt>): A collection of example queries and the dataset schema for exported Crashlytics data in BigQuery.
- [Understand crash-free metrics](<https://firebase.google.com/docs/crashlytics/crash-free-metrics.md.txt>): A guide to understanding crash-free metrics in Firebase Crashlytics, including the definitions of crash-free users and sessions, how they are calculated, and the SDK versions required.
- [Customize your Crashlytics crash reports](<https://firebase.google.com/docs/crashlytics/customize-crash-reports.md.txt>): An overview of options to customize Firebase Crashlytics crash reports, including adding custom keys, log messages, and user identifiers, and reporting non-fatal exceptions.
- [Options for using exported Crashlytics data with Google Cloud services](<https://firebase.google.com/docs/crashlytics/export-data-to-cloud.md.txt>): An overview of options and benefits of exporting Firebase Crashlytics data into Google Cloud services, like BigQuery.
- [Get started with Crashlytics for Flutter](<https://firebase.google.com/docs/crashlytics/flutter/get-started.md.txt>): A Flutter-specific guide to getting started with Firebase Crashlytics, including how to add the SDK, configure your project, and force a test crash to see your first report.
- [Test your Crashlytics implementation (Flutter)](<https://firebase.google.com/docs/crashlytics/flutter/test-implementation.md.txt>): Troubleshooting for the Firebase Crashlytics implementation in your Flutter app, which includes forcing a test crash and enabling debug logging to verify that reports are being sent.
- [Integrate Crashlytics with Google Play](<https://firebase.google.com/docs/crashlytics/integrate-with-google-play.md.txt>): A guide to integrating Firebase Crashlytics with Google Play to filter crash reports by Play track and gain a richer view of your app's health.
- [Customize crash reports for Apple platforms](<https://firebase.google.com/docs/crashlytics/ios/customize-crash-reports.md.txt>): An Apple

platforms-specific guide for how to customize Firebase Crashlytics crash reports, including adding custom keys, log messages, and user identifiers, and reporting non-fatal exceptions.

- [Get started with Crashlytics for Apple platforms] (<https://firebase.google.com/docs/crashlytics/ios/get-started.md.txt>): An Apple platforms-specific guide to getting started with Firebase Crashlytics, including how to add the SDK, configure your project, and force a test crash to see your first report.
- [Crashlytics troubleshooting and FAQ] (<https://firebase.google.com/docs/crashlytics/troubleshooting.md.txt>): A troubleshooting guide and FAQ for Firebase Crashlytics, covering common issues, integrations, platform support, and regressed issues.
- [Get readable crash reports in the Crashlytics dashboard (Unity)] (<https://firebase.google.com/docs/crashlytics/unity/get-deobfuscated-reports.md.txt>): Troubleshooting for the Firebase Crashlytics implementation in your Unity project, specifically about getting readable, deobfuscated crash reports in the Crashlytics dashboard.
- [Test your Crashlytics implementation (Unity)] (<https://firebase.google.com/docs/crashlytics/unity/test-implementation.md.txt>): Troubleshooting for the Firebase Crashlytics implementation in your Unity project, which includes forcing a test crash and enabling debug logging to verify that reports are being sent.
- [Use the Admin SDK with Data Connect] (<https://firebase.google.com/docs/data-connect/admin-sdk.md.txt>): A guide to using the Firebase Admin SDK with Firebase Data Connect for privileged operations, including designing and running administrative queries and mutations, and performing bulk data operations.
- [Use generated Android SDKs] (<https://firebase.google.com/docs/data-connect/android-sdk.md.txt>): A guide to generating an Android SDK and using the generated SDK for Firebase Data Connect, covering the client development workflow, implementing queries and mutations, and using the emulator.
- [Firebase CLI command reference for Data Connect] (<https://firebase.google.com/docs/data-connect/cli-reference.md.txt>): A command reference for the Firebase CLI for Firebase Data Connect, covering commands for managing and configuring services, including project creation, emulator setup, and SDK generation.
- [Data Connect configuration file reference] (<https://firebase.google.com/docs/data-connect/configuration-reference.md.txt>): A configuration and security reference for Firebase Data Connect, detailing settings in `firebase.json`, `dataconnect.yaml`, and `connector.yaml`, as well as required IAM roles.
- [Seed data and perform bulk data operations] (<https://firebase.google.com/docs/data-connect/data-seeding-bulk-operations.md.txt>): A guide to performing bulk data operations in Firebase Data Connect, including data seeding for local prototyping and using the Admin SDK or SQL for production environments.
- [IAM configuration for Data Connect projects] (<https://firebase.google.com/docs/data-connect/iam-configuration.md.txt>): Firebase's first relational database solution for app developers to build mobile and web applications using a fully managed PostgreSQL database powered by Cloud SQL.
- [Use generated iOS SDKs] (<https://firebase.google.com/docs/data-connect/ios-sdk.md.txt>): A guide to generating an iOS SDK and using the generated SDK for Firebase Data Connect, covering the client development workflow, implementing queries and mutations, and using the emulator.
- [Implement Data Connect mutations] (<https://firebase.google.com/docs/data-connect/mutations-guide.md.txt>): A guide to implementing mutations in Firebase Data Connect, covering basic CRUD operations, multi-step transactions, and advanced features like key scalars and server values.
- [Implement Data Connect queries] (<https://firebase.google.com/docs/data-connect/queries-guide.md.txt>): A guide to implementing queries in Firebase Data Connect, covering features like generated fields and key scalars, and detailing how to write basic, relational, and aggregation queries.
- [Get started with Firebase Data Connect using React] (<https://firebase.google.com/docs/data-connect/quickstart/react.md.txt>): Firebase's first relational database solution for app developers to build mobile and web applications using a fully managed PostgreSQL database powered by Cloud SQL.
- [Design Data Connect schemas] (<https://firebase.google.com/docs/data-connect/schemas-guide.md.txt>): A guide to designing GraphQL schemas for Firebase Data Connect, covering how to define types, relationships, and use directives to map to a PostgreSQL database, with examples.
- [Perform vector similarity search with Vertex AI] (<https://firebase.google.com/docs/data-connect/solutions-vector-similarity-search.md.txt>): A guide to performing vector similarity search in Firebase Data Connect using Google Vertex AI, covering vector embeddings and their

application in semantic search.

- [Use generated web SDKs](https://firebase.google.com/docs/data-connect/web-sdk.md.txt): A guide to generating web SDKs and using the generated SDKs for Firebase Data Connect with JavaScript, React, and Angular, covering the client development workflow, implementing queries and mutations, and using the emulator.
- [Firebase Realtime Database](https://firebase.google.com/docs/database.md.txt): Store and sync data with our NoSQL cloud database. Data is synced across all clients in realtime, and remains available when your app goes offline.
- [Saving Data](https://firebase.google.com/docs/database/admin/save-data.md.txt): A guide to saving data to the Firebase Realtime Database using the Admin SDK, covering set, update, and push operations, as well as how to handle transactional data.
- [Structure Your Database](https://firebase.google.com/docs/database/admin/structure-data.md.txt): A guide to structuring your data in the Firebase Realtime Database, with best practices for avoiding nested data and flattening your data structures for optimal performance.
- [Work with Lists of Data on Android](https://firebase.google.com/docs/database/android/lists-of-data.md.txt): A guide to working with lists of data in the Firebase Realtime Database for your Android app, including how to append, sort, and filter data, and how to listen for changes to the list.
- [Enabling Offline Capabilities on Android](https://firebase.google.com/docs/database/android/offline-capabilities.md.txt): A guide to enabling and using offline capabilities in the Firebase Realtime Database for your Android app, ensuring your app works correctly even without a network connection.
- [Read and Write Data on Android](https://firebase.google.com/docs/database/android/read-and-write.md.txt): A guide to reading and writing data in the Firebase Realtime Database for your Android app, including how to listen for changes, update or delete data, and perform transactions.
- [Saving Data with Firebase Realtime Database for C++](https://firebase.google.com/docs/database/cpp/save-data.md.txt): A guide to saving data to the Firebase Realtime Database using the C++ SDK, covering SetValue, PushChild, and UpdateChildren operations, as well as how to handle transactional data.
- [Get Started with Firebase Realtime Database for C++](https://firebase.google.com/docs/database/cpp/start.md.txt): A guide to getting started with the Firebase Realtime Database on C++, including creating a database, initializing the firebase::App, and accessing the database class.
- [Extend Realtime Database with Cloud Functions](https://firebase.google.com/docs/database/extend-with-functions.md.txt): A guide to extending Firebase Realtime Database with Cloud Functions to automate tasks and add server-side logic in response to database events.
- [Enabling Offline Capabilities](https://firebase.google.com/docs/database/flutter/offline-capabilities.md.txt): A guide to enabling and using offline capabilities in the Firebase Realtime Database for your Flutter app, ensuring your app works correctly and can manage user presence even without a network connection.
- [Read and Write Data](https://firebase.google.com/docs/database/flutter/read-and-write.md.txt): A guide to reading and writing data in the Firebase Realtime Database for your Flutter app, including how to listen for changes, update or delete data, and perform transactions.
- [Structure Your Database](https://firebase.google.com/docs/database/flutter/structure-data.md.txt): A guide to structuring your data in the Firebase Realtime Database, with best practices for avoiding nested data and flattening your data structures for optimal performance.
- [Work with Lists of Data on Apple platforms](https://firebase.google.com/docs/database/ios/lists-of-data.md.txt): A guide to working with lists of data in the Firebase Realtime Database for your Apple platform app, including how to append, sort, and filter data, and how to listen for changes to the list.
- [Read and Write Data on Apple platforms](https://firebase.google.com/docs/database/ios/read-and-write.md.txt): A guide to reading and writing data in the Firebase Realtime Database for your Apple platform app, including how to listen for changes, update or delete data, and perform transactions.
- [Installation & Setup on Apple platforms](https://firebase.google.com/docs/database/ios/start.md.txt): A guide to getting started with the Firebase Realtime Database on Apple platforms, including creating a database, adding the SDK, configuring security rules, and setting up the database in your app.
- [Structure Your Database](https://firebase.google.com/docs/database/ios/structure-

data.md.txt): A guide to structuring your data in the Firebase Realtime Database, with best practices for avoiding nested data and flattening your data structures for optimal performance.

- [Locations for Realtime Database](https://firebase.google.com/docs/database/locations.md.txt): A guide to the available locations for Firebase Realtime Database instances and the corresponding database URL formats for each region.
- [View and edit Realtime Database data in the Firebase console](https://firebase.google.com/docs/database/manage-data-console.md.txt): A guide to viewing and managing your Firebase Realtime Database data in the Firebase console, including how to import and export your data as JSON.
- [Saving Data](https://firebase.google.com/docs/database/rest/save-data.md.txt): A guide to saving data to the Firebase Realtime Database using the REST API, covering PUT, PATCH, POST, and DELETE requests, as well as conditional requests for atomic updates.
- [Choose a Database: Cloud Firestore or Realtime Database](https://firebase.google.com/docs/database/rtdb-vs-firestore.md.txt): A guide to help you choose between Cloud Firestore and Realtime Database, with a detailed comparison of their features and capabilities.
- [Understand Firebase Realtime Database Security Rules](https://firebase.google.com/docs/database/security.md.txt): An introduction to Firebase Realtime Database Security Rules, a powerful tool for managing access control, authorization, data validation, and indexing for your database.
- [Get started with Firebase Security Rules](https://firebase.google.com/docs/database/security/get-started.md.txt): A guide to getting started with Firebase Realtime Database Security Rules, including understanding the language, writing basic rules, and deploying them to your project.
- [Index Your Data](https://firebase.google.com/docs/database/security/indexing-data.md.txt): A guide to improving query performance in the Firebase Realtime Database by defining data indexes with the `.indexOn` rule in your security rules.
- [Retrieving Data](https://firebase.google.com/docs/database/unity/retrieve-data.md.txt): A guide to retrieving data from the Firebase Realtime Database using the Unity SDK, covering how to read data once, listen for real-time updates, and sort and filter your data.
- [Understand Realtime Database billing](https://firebase.google.com/docs/database/usage/billing.md.txt): A guide to understanding and optimizing your Firebase Realtime Database billing, with tips for estimating usage and reducing storage and bandwidth costs.
- [Realtime Database Limits](https://firebase.google.com/docs/database/usage/limits.md.txt): A comprehensive list of the limits and restrictions for the Firebase Realtime Database, covering data storage, simultaneous connections, and read and write operations.
- [Monitor Database Performance](https://firebase.google.com/docs/database/usage/monitor-performance.md.txt): A guide to monitoring the performance of your Firebase Realtime Database, with an overview of available tools and key metrics for identifying and troubleshooting performance issues.
- [Monitor Database Usage](https://firebase.google.com/docs/database/usage/monitor-usage.md.txt): A guide to monitoring your Firebase Realtime Database usage, with an overview of available tools and key metrics for tracking resource consumption and billing.
- [Profile Your Database](https://firebase.google.com/docs/database/usage/profile.md.txt): A guide to using the Firebase Realtime Database profiler tool to measure performance, with instructions on how to build a profile and interpret the results for speed, bandwidth, and unindexed queries.
- [Scale with Multiple Databases](https://firebase.google.com/docs/database/usage/sharding.md.txt): A guide to scaling your Firebase Realtime Database by sharding data across multiple database instances, including when and how to shard your data for optimal performance and scalability.
- [Enabling Offline Capabilities in JavaScript](https://firebase.google.com/docs/database/web/offline-capabilities.md.txt): A guide to enabling and using offline capabilities in the Firebase Realtime Database for your web app, ensuring your app works correctly even without a network connection.
- [Read and Write Data on the Web](https://firebase.google.com/docs/database/web/read-and-write.md.txt): A guide to reading and writing data in the Firebase Realtime Database for your web app, including how to listen for changes, update or delete data, and perform transactions.
- [Installation & Setup in JavaScript](https://firebase.google.com/docs/database/web/start.md.txt): A guide to getting started with the Firebase Realtime Database on the web, including creating a database, configuring security

- rules, and adding the Firebase SDK to your app.
- [Structure Your Database](https://firebase.google.com/docs/database/web/structure-data.md.txt): A guide to structuring your data in the Firebase Realtime Database, with best practices for avoiding nested data and flattening your data structures for optimal performance.
 - [Allow specific URL patterns](https://firebase.google.com/docs/dynamic-links/allow-specific-url-patterns.md.txt): A guide on how to allow specific URL patterns for your Dynamic Links to prevent unauthorized use of your API key.
 - [Create Dynamic Links](https://firebase.google.com/docs/dynamic-links/create-links.md.txt): A guide to the four ways you can create Firebase Dynamic Links: with the Firebase console, the Builder API, the REST API, or manually.
 - [Set up a custom domain for Dynamic Links](https://firebase.google.com/docs/dynamic-links/custom-domains.md.txt): A guide on how to set up a custom domain for your Firebase Dynamic Links to have greater control over your branding.
 - [Debugging Dynamic Links](https://firebase.google.com/docs/dynamic-links/debug.md.txt): A guide to debugging your Firebase Dynamic Links with the preview page flowchart, the iOS self-diagnostic tool, and a list of common errors.
 - [Receive Firebase Dynamic Links in a Flutter app](https://firebase.google.com/docs/dynamic-links/flutter/receive.md.txt): A guide to receiving and handling Firebase Dynamic Links in your Flutter app, including platform-specific setup and deep link handling.
 - [Create Dynamic Links on iOS](https://firebase.google.com/docs/dynamic-links/ios/create.md.txt): A guide on how to create Firebase Dynamic Links in your iOS app.
 - [Generate link previews with social metadata](https://firebase.google.com/docs/dynamic-links/link-previews.md.txt): A guide to generating rich link previews for your Firebase Dynamic Links by adding social metadata to them when you create them.
 - [Operating System Integrations](https://firebase.google.com/docs/dynamic-links/operating-system-integrations.md.txt): A guide to how Firebase Dynamic Links integrate with iOS and Android, with flowcharts to illustrate the platform-specific behavior.
 - [Create Dynamic Links with the REST API](https://firebase.google.com/docs/dynamic-links/rest.md.txt): A guide to creating short Firebase Dynamic Links by using the REST API to shorten a long Dynamic Link or to create a link from parameters.
 - [Receive Dynamic Links with Unity](https://firebase.google.com/docs/dynamic-links/unity/receive.md.txt): A guide on how to receive Firebase Dynamic Links in your Unity app.
 - [Connect your app to the Cloud Firestore Emulator](https://firebase.google.com/docs/emulator-suite/connect_firestore.md.txt): A guide to the Cloud Firestore Emulator, covering connecting your app, managing data, testing Security Rules, and understanding its differences from production.
 - [Install, configure and integrate Local Emulator Suite](https://firebase.google.com/docs/emulator-suite/install_and_configure.md.txt): A guide to installing and configuring the Firebase Emulator Suite, covering setup, integration with CI systems, and SDK availability.
 - [Test web apps locally with the Firebase App Hosting Emulator](https://firebase.google.com/docs/emulator-suite/use_app_hosting.md.txt): A guide to the Firebase App Hosting Emulator, covering local testing of web apps, configuration, and integration with the Firebase Emulator Suite.
 - [Prototype and test web apps with the Firebase Hosting Emulator](https://firebase.google.com/docs/emulator-suite/use_hosting.md.txt): A guide to the Firebase Hosting Emulator, covering local prototyping and testing of web apps, and integration with continuous integration workflows.
 - [Firebase Extensions](https://firebase.google.com/docs/extensions.md.txt): Designed to increase productivity, Firebase Extensions provide extended functionality to your apps without the need to research, write, or debug code on your own.
 - [Install a Firebase Extension](https://firebase.google.com/docs/extensions/install_extensions.md.txt): A guide on how to install a Firebase Extension using the Firebase console, the Firebase CLI, or an autogenerated SDK.
 - [Manage installed Firebase Extensions](https://firebase.google.com/docs/extensions/manage-installed-extensions.md.txt): A guide on how to manage installed Firebase Extensions, including monitoring, updating, reconfiguring, and uninstalling them.
 - [Manage project configurations with the Extensions manifest](https://firebase.google.com/docs/extensions/manifest.md.txt): A guide on how to manage project configurations with the Extensions manifest, including creating, testing, and deploying extension configurations.
 - [Set up appropriate access for an extension]

(<https://firebase.google.com/docs/extensions/publishers/access.md.txt>): A guide for extension publishers on how to set up appropriate access for an extension by assigning IAM roles to its service account.

- [Write Cloud Functions for an extension] (<https://firebase.google.com/docs/extensions/publishers/functions.md.txt>): A guide for extension publishers on how to write Cloud Functions for an extension, including supported triggers and special considerations.
- [Get started building an extension] (<https://firebase.google.com/docs/extensions/publishers/get-started.md.txt>): A step-by-step guide to building your first Firebase Extension, from setting up your environment to publishing on Extensions Hub.
- [Register as an extensions publisher] (<https://firebase.google.com/docs/extensions/publishers/register.md.txt>): A guide for extension publishers on how to register as a publisher to share extensions with the world.
- [Publish your extension] (<https://firebase.google.com/docs/extensions/publishers/upload-and-publish.md.txt>): A guide for extension publishers on how to upload and publish an extension to the Firebase Extensions Hub.
- [Create user documentation for your extension] (<https://firebase.google.com/docs/extensions/publishers/user-documentation.md.txt>): A guide for extension publishers on how to create user documentation for an extension, including the PREINSTALL, POSTINSTALL, and CHANGELOG files.
- [Add user hooks to an extension] (<https://firebase.google.com/docs/extensions/publishers/user-hooks.md.txt>): A guide for extension publishers on how to add user hooks to an extension using Eventarc events or synchronous hooks.
- [Reference for extension.yaml] (<https://firebase.google.com/docs/extensions/reference/extension-yaml.md.txt>): A reference guide to the `extension.yaml` file, which contains an extension's metadata, declares its resources, and defines user-configured parameters.
- [Cloud Firestore] (<https://firebase.google.com/docs/firestore.md.txt>): Use our flexible, scalable NoSQL cloud database, built on Google Cloud infrastructure, to store and sync data for client- and server-side development.
- [Best practices for Cloud Firestore] (<https://firebase.google.com/docs/firestore/best-practices.md.txt>): A guide to best practices for Cloud Firestore, including security rules and data modeling.
- [Cloud Firestore data bundles] (<https://firebase.google.com/docs/firestore/bundles.md.txt>): A guide to using Cloud Firestore data bundles to optimize query costs at scale.
- [Web samples for Firebase] (<https://firebase.google.com/docs/firestore/client/samples-web.md.txt>): A collection of web code samples for Cloud Firestore.
- [Native mode support in Firestore Standard and Enterprise editions] (<https://firebase.google.com/docs/firestore/compare-editions-for-native-mode.md.txt>): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Cloud Firestore Data model] (<https://firebase.google.com/docs/firestore/data-model.md.txt>): A guide to the Cloud Firestore data model, including documents, collections, and subcollections.
- [Disaster recovery planning] (<https://firebase.google.com/docs/firestore/disaster-recovery.md.txt>): A guide to disaster recovery planning for Cloud Firestore to ensure business continuity.
- [Add data to Cloud Firestore] (<https://firebase.google.com/docs/firestore/enterprise/add-data-core.md.txt>): A guide to adding data to Cloud Firestore, including how to set, add, and update documents.
- [Monitor databases with Cloud Monitoring] (<https://firebase.google.com/docs/firestore/enterprise/audit-logging-mongodb.md.txt>): A guide to using Cloud Audit Logs with Cloud Firestore to monitor database activity.
- [Back up and restore data] (<https://firebase.google.com/docs/firestore/enterprise/backups-mongodb.md.txt>): A guide to backing up and restoring Cloud Firestore data in the Enterprise edition.
- [Behavior differences] (<https://firebase.google.com/docs/firestore/enterprise/behavior-differences.md.txt>): A guide to the behavior differences between Cloud Firestore with MongoDB compatibility and MongoDB.
- [Best practices for bulk data loading] (<https://firebase.google.com/docs/firestore/enterprise/bulk-data-loading.md.txt>): A guide to best practices for bulk data loading in Cloud Firestore.

- [Bulk delete data](https://firebase.google.com/docs/firestore/enterprise/bulk-delete.md.txt): A guide to performing bulk delete operations in Cloud Firestore.
- [Customer-managed encryption keys (CMEK)](https://firebase.google.com/docs/firestore/enterprise/cmek.md.txt): A guide to using customer-managed encryption keys (CMEK) with Cloud Firestore Enterprise edition.
- [Configure Private Google Access in Firestore with MongoDB compatibility](https://firebase.google.com/docs/firestore/enterprise/configure-private-google-access.md.txt): Configure moonrise-replace4da24481166e4c41988658c35b4fad92moonrise-replace for moonrise-replace0e9b24062e55496781753b43e2a0e2famoonrise-replace, including network requirements, DNS, routing, and firewall configurations.
- [Disaster recovery planning](https://firebase.google.com/docs/firestore/enterprise/disaster-recovery.md.txt): A guide to disaster recovery planning for Cloud Firestore in the Enterprise edition.
- [Access data offline](https://firebase.google.com/docs/firestore/enterprise/enable-offline.md.txt): A guide to enabling offline data access in Cloud Firestore for web and mobile apps.
- [Import and export data](https://firebase.google.com/docs/firestore/enterprise/export-import.md.txt): A guide to importing and exporting data in Cloud Firestore, including how to move data between different databases and formats.
- [Import and export data](https://firebase.google.com/docs/firestore/enterprise/export-import-mongodb.md.txt): A guide to importing and exporting data in Cloud Firestore, including how to move data between different databases and formats.
- [Extend Firebase with Cloud Functions (2nd gen)](https://firebase.google.com/docs/firestore/enterprise/extend-with-functions-2nd-gen-mongodb.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Get data using Core operations](https://firebase.google.com/docs/firestore/enterprise/get-data-core.md.txt): A guide to getting data from Cloud Firestore, including how to read documents and collections.
- [Index overview](https://firebase.google.com/docs/firestore/enterprise/index-overview-native.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Manage Indexes](https://firebase.google.com/docs/firestore/enterprise/indexing-native.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Optimize query performance](https://firebase.google.com/docs/firestore/enterprise/optimize-query-performance.md.txt): A guide to optimizing query performance in Cloud Firestore, including how to use Query Explain to analyze query plans.
- [Overview of Firestore Enterprise edition modes](https://firebase.google.com/docs/firestore/enterprise/overview-enterprise-edition-modes.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Pricing](https://firebase.google.com/docs/firestore/enterprise/pricing.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Pricing examples](https://firebase.google.com/docs/firestore/enterprise/pricing-examples-mongodb.md.txt): A guide to understanding Cloud Firestore costs in the Enterprise edition with detailed pricing examples.
- [Perform simple and compound queries in Cloud Firestore](https://firebase.google.com/docs/firestore/enterprise/query-data-core.md.txt): A guide to performing simple and compound queries in Cloud Firestore.
- [Analyze query execution with Query Explain](https://firebase.google.com/docs/firestore/enterprise/query-explain.md.txt): A guide to using Query Explain to analyze query execution in Cloud Firestore.
- [Analyze query execution with Query Explain](https://firebase.google.com/docs/firestore/enterprise/query-explain-mongodb.md.txt): A guide to using Query Explain to analyze query execution in Cloud Firestore.
- [Query execution reference](https://firebase.google.com/docs/firestore/enterprise/query-explain-reference-mongodb.md.txt): A reference guide to the output of Query Explain in Cloud Firestore, including details on query plans and execution statistics.
- [Analyze query performance statistics](https://firebase.google.com/docs/firestore/enterprise/query-insights.md.txt): A guide to using

Query Insights to analyze query performance statistics in Cloud Firestore.

- [Analyze query performance statistics]
(<https://firebase.google.com/docs/firestore/enterprise/query-insights-mongodb.md.txt>): A guide to using Query Insights to analyze query performance statistics in Cloud Firestore.
- [Native mode: Quotas and Limits](<https://firebase.google.com/docs/firestore/enterprise/quotas-native-mode.md.txt>): A guide to Cloud Firestore quotas and limits for the Enterprise edition.
- [Resolve latency issues](<https://firebase.google.com/docs/firestore/enterprise/resolve-latency.md.txt>): A guide to resolving latency issues in Cloud Firestore for the Enterprise edition.
- [Perform an in-place restore](<https://firebase.google.com/docs/firestore/enterprise/restore-in-place.md.txt>): A guide to performing an in-place restore of your Cloud Firestore data from a backup in the Enterprise edition..
- [Get started with Cloud Firestore Security Rules]
(<https://firebase.google.com/docs/firestore/enterprise/security/get-started.md.txt>): A guide to getting started with Cloud Firestore Security Rules.
- [Identity and Access Management (IAM)]
(<https://firebase.google.com/docs/firestore/enterprise/security/iam.md.txt>): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Writing conditions for Cloud Firestore Security Rules]
(<https://firebase.google.com/docs/firestore/enterprise/security/rules-conditions.md.txt>): A guide to writing conditions for Cloud Firestore Security Rules.
- [Control access to specific fields]
(<https://firebase.google.com/docs/firestore/enterprise/security/rules-fields.md.txt>): A guide to controlling access to specific fields in your Cloud Firestore documents using security rules.
- [Securely query data](<https://firebase.google.com/docs/firestore/enterprise/security/rules-query.md.txt>): A guide to securely querying data in Cloud Firestore using security rules.
- [Structuring Cloud Firestore Security Rules]
(<https://firebase.google.com/docs/firestore/enterprise/security/rules-structure.md.txt>): A guide to structuring Cloud Firestore Security Rules.
- [Server-side encryption](<https://firebase.google.com/docs/firestore/enterprise/server-side-encryption-mongodb.md.txt>): A guide to server-side encryption in Cloud Firestore.
- [Storage size](<https://firebase.google.com/docs/firestore/enterprise/storage-size.md.txt>): A guide to understanding how storage size is calculated in Cloud Firestore for the Enterprise edition.
- [Supported data types](<https://firebase.google.com/docs/firestore/enterprise/supported-data-types-native.md.txt>): A reference of supported data types in Cloud Firestore.
- [Supported features: 7.0](<https://firebase.google.com/docs/firestore/enterprise/supported-features-70.md.txt>): A reference of supported MongoDB 7.0 features for Cloud Firestore with MongoDB compatibility.
- [Manage data retention with TTL policies]
(<https://firebase.google.com/docs/firestore/enterprise/ttl.md.txt>): A guide to managing data retention in Cloud Firestore using time to live (TTL) policies to automatically delete expired data.
- [Understand reads and writes at scale]
(<https://firebase.google.com/docs/firestore/enterprise/understand-reads-writes-scale.md.txt>): A guide to understanding how reads and writes work at scale in Cloud Firestore, and how to design your database for performance.
- [Use customer-managed encryption keys (CMEK)]
(<https://firebase.google.com/docs/firestore/enterprise/use-cmek.md.txt>): A guide to using customer-managed encryption keys (CMEK) with Cloud Firestore in the Enterprise edition.
- [Work with point-in-time recovery (PITR)]
(<https://firebase.google.com/docs/firestore/enterprise/use-pitr.md.txt>): A guide to using point-in-time recovery (PITR) in Cloud Firestore for Enterprise edition to protect your data from accidental deletion or writes.
- [Work with point-in-time recovery (PITR)]
(<https://firebase.google.com/docs/firestore/enterprise/use-pitr-mongodb.md.txt>): A guide to using point-in-time recovery (PITR) in Cloud Firestore for Enterprise edition to protect your data from accidental deletion or writes.
- [Overview of Key Visualizer](<https://firebase.google.com/docs/firestore/key-visualizer/key-visualizer.md.txt>): A guide to using Key Visualizer
- [Get started with Key Visualizer]([<https://firebase.google.com/docs/lms.txt>](https://firebase.google.com/docs/firestore/key-

</div>
<div data-bbox=)

visualizer/keyvis-getting-started.md.txt): A guide to using Key Visualizer

- [Supported data types](https://firebase.google.com/docs/firestore/manage-data/data-types.md.txt): A reference of supported data types in Cloud Firestore.
- [Access data offline](https://firebase.google.com/docs/firestore/manage-data/enable-offline.md.txt): A guide to enabling offline data access in Cloud Firestore for web and mobile apps.
- [Move data between projects](https://firebase.google.com/docs/firestore/manage-data/move-data.md.txt): A guide to moving data between Cloud Firestore projects.
- [Transactions and batched writes](https://firebase.google.com/docs/firestore/manage-data/transactions.md.txt): A guide to using transactions and batched writes in Cloud Firestore to perform atomic operations on your data.
- [Analyze query execution with Query Explain](https://firebase.google.com/docs/firestore/pipelines/enterprise-query-explain.md.txt):
Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Query execution reference](https://firebase.google.com/docs/firestore/pipelines/enterprise-query-explain-reference.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Analyze query performance statistics](https://firebase.google.com/docs/firestore/pipelines/enterprise-query-insights.md.txt):
Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Aggregate functions](https://firebase.google.com/docs/firestore/pipelines/functions/aggregate-functions.md.txt):
Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Array functions](https://firebase.google.com/docs/firestore/pipelines/functions/array-functions.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Debugging functions](https://firebase.google.com/docs/firestore/pipelines/functions/debugging-functions.md.txt):
Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Map functions](https://firebase.google.com/docs/firestore/pipelines/functions/map-functions.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Type functions](https://firebase.google.com/docs/firestore/pipelines/functions/type-functions.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Get data with Firestore Pipeline operations](https://firebase.google.com/docs/firestore/pipelines/get-started-with-pipelines.md.txt): A guide to getting started with Cloud Firestore Pipelines.
- [Cloud Firestore Enterprise edition Native mode with Pipeline operations locations](https://firebase.google.com/docs/firestore/pipelines/locations.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Documents](https://firebase.google.com/docs/firestore/pipelines/stages/input/documents.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Aggregate](https://firebase.google.com/docs/firestore/pipelines/stages/transformation/aggregate.md.txt):
Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Distinct](https://firebase.google.com/docs/firestore/pipelines/stages/transformation/distinct.md.txt):
Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Find nearest](https://firebase.google.com/docs/firestore/pipelines/stages/transformation/find-nearest.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..

- [Limit]
(<https://firebase.google.com/docs/firestore/pipelines/stages/transformation/limit.md.txt>): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Replace with]
(<https://firebase.google.com/docs/firestore/pipelines/stages/transformation/replace-with.md.txt>): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Sample]
(<https://firebase.google.com/docs/firestore/pipelines/stages/transformation/sample.md.txt>): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Select]
(<https://firebase.google.com/docs/firestore/pipelines/stages/transformation/select.md.txt>): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Union]
(<https://firebase.google.com/docs/firestore/pipelines/stages/transformation/union.md.txt>): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Unnest]
(<https://firebase.google.com/docs/firestore/pipelines/stages/transformation/unnest.md.txt>): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Where]
(<https://firebase.google.com/docs/firestore/pipelines/stages/transformation/where.md.txt>): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Point-in-time recovery (PITR) overview]
(<https://firebase.google.com/docs/firestore/pitr.md.txt>): A guide to using point-in-time recovery (PITR) in Cloud Firestore to protect your data from accidental deletion or writes.
- [Point-in-time recovery (PITR) overview](<https://firebase.google.com/docs/firestore/pitr-mongodb.md.txt>): A guide to using point-in-time recovery (PITR) in Cloud Firestore to protect your data from accidental deletion or writes.
- [Understand Cloud Firestore billing]
(<https://firebase.google.com/docs/firestore/pricing.md.txt>): A guide to understanding Cloud Firestore billing, including how usage is calculated for operations, storage, and network bandwidth.
- [Get data with Cloud Firestore](<https://firebase.google.com/docs/firestore/query-data/get-data.md.txt>): A guide to getting data from Cloud Firestore, including how to read documents and collections.
- [Get realtime updates with Cloud Firestore](<https://firebase.google.com/docs/firestore/query-data/listen.md.txt>): A guide to getting real-time updates from Cloud Firestore using snapshot listeners.
- [Order and limit data with Cloud Firestore](<https://firebase.google.com/docs/firestore/query-data/order-limit-data.md.txt>): A guide to ordering and limiting data in Cloud Firestore queries.
- [Perform simple and compound queries in Cloud Firestore]
(<https://firebase.google.com/docs/firestore/query-data/queries.md.txt>): A guide to performing simple and compound queries in Cloud Firestore.
- [Paginate data with query cursors](<https://firebase.google.com/docs/firestore/query-data/query-cursors.md.txt>): A guide to paginating data in Cloud Firestore with query cursors.
- [Understand query performance using Query Explain]
(<https://firebase.google.com/docs/firestore/query-explain.md.txt>): A guide to using Query Explain to understand Cloud Firestore query performance and optimize your queries.
- [Get started with Firestore Standard edition using server client libraries]
(<https://firebase.google.com/docs/firestore/quickstart-server.md.txt>): A guide to getting started with Cloud Firestore using server client libraries, including how to create a database, add data, and read data.
- [Usage and limits](<https://firebase.google.com/docs/firestore/quotas.md.txt>): A guide to Cloud Firestore usage and limits, including how to monitor your usage and manage spending.
- [Query Explain report reference](<https://firebase.google.com/docs/firestore/reference/query-explain-report-reference.md.txt>): Firestore is a flexible, scalable database for mobile, web,

and server development from Firebase and Google Cloud..

- [Cloud Firestore API](https://firebase.google.com/docs/firestore/reference/rest.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [BulkDeleteDocumentsMetadata]
 (https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/BulkDeleteDocumentsMetadata.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ChangeType]
 (https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/ChangeType.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [CloneDatabaseMetadata]
 (https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/CloneDatabaseMetadata.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DeleteDatabaseMetadata]
 (https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/DeleteDatabaseMetadata.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Density]
 (https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/Density.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ImportDocumentsMetadata]
 (https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/ImportDocumentsMetadata.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [IndexOperationMetadata]
 (https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/IndexOperationMetadata.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [LocationMetadata]
 (https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/LocationMetadata.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [OperationState]
 (https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/OperationState.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UpdateDatabaseMetadata]
 (https://firebase.google.com/docs/firestore/reference/rest/Shared.Types/UpdateDatabaseMetadata.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ArrayValue](https://firebase.google.com/docs/firestore/reference/rest/v1/ArrayValue.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DocumentMask]
 (https://firebase.google.com/docs/firestore/reference/rest/v1/DocumentMask.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FieldReference]
 (https://firebase.google.com/docs/firestore/reference/rest/v1/FieldReference.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ListDocumentsResponse]
 (https://firebase.google.com/docs/firestore/reference/rest/v1/ListDocumentsResponse.md.txt):
 Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [StructuredQuery]
 (https://firebase.google.com/docs/firestore/reference/rest/v1/StructuredQuery.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app

quality, and grow your business.

- [TransactionOptions]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/TransactionOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Write](<https://firebase.google.com/docs/firestore/reference/rest/v1/Write.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [WriteResult]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/WriteResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.backupSchedules.create]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.backupSchedules/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.backupSchedules.get]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.backupSchedules/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.backupSchedules.patch]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.backupSchedules/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.fields.patch]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.collectionGroups.fields/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.indexes.delete]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.collectionGroups.indexes/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.indexes.get]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.collectionGroups.indexes/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.batchWrite]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/batchWrite.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.beginTransaction]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/beginTransaction.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.commit]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/commit.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.get]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.listCollectionIds]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/listCollectionIds.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.listDocuments]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/listDocuments.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.partitionQuery]
(<https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/partitionQuery.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

tionQuery.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.databases.documents.rollback]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/rollback.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.runQuery]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.documents/runQuery.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.databases.operations]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.operations.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.operations.cancel]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.operations/cancel.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.operations.delete]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.operations/delete.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.operations.list]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.operations/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.userCreds.get]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.userCreds/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.userCreds.resetPassword]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases.userCreds/resetPassword.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.bulkDeleteDocuments]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases/bulkDeleteDocuments.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.delete]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases/delete.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.get]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.databases/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.locations.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.backups]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.locations.backups.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backups.delete]
(https://firebase.google.com/docs/firestore/reference/rest/v1/projects.locations.backups/delete.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ArrayValue]
(https://firebase.google.com/docs/firestore/reference/rest/v1beta1/ArrayValue.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Cursor](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/Cursor.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps,
improve app quality, and grow your business.
- [ExplainMetrics](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/ExplainMetrics.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps,
improve app quality, and grow your business.
- [ExplainOptions](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/ExplainOptions.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps,
improve app quality, and grow your business.
- [ExportDocumentsMetadata](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/ExportDocumentsMetadata.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web
apps, improve app quality, and grow your business.
- [IndexOperationMetadata](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/IndexOperationMetadata.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps,
improve app quality, and grow your business.
- [Operation](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/Operation.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app
quality, and grow your business.
- [OperationState](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/OperationState.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps,
improve app quality, and grow your business.
- [Status](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/Status.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps,
improve app quality, and grow your business.
- [Value](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/Value.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps,
improve app quality, and grow your business.
- [Write](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/Write.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps,
improve app quality, and grow your business.
- [REST Resource: projects.databases.documents](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web
apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.batchGet](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/batchGet.md.txt):
Firebase gives you the tools and infrastructure you need to build better
mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.batchWrite](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/batchWrite.md.txt):
Firebase gives you the tools and infrastructure you need to build better
mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.commit](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/commit.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile
and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.createDocument](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/createDocument.md.txt):
Firebase gives you the tools and infrastructure you need to build better
mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.executePipeline](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/executePipeline.md.txt):
Firebase gives you the tools and infrastructure you need to build
better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.get](https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/

get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.databases.documents.listCollectionIds]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/listCollectionIds.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.listDocuments]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/listDocuments.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.partitionQuery]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/partitionQuery.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.rollback]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/rollback.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.documents.runQuery]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.documents/runQuery.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.indexes.delete]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.indexes/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.indexes.get]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.indexes/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.indexes.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta1/projects.databases.indexes/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.fields.get]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases.collectionGroups.fields/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.indexes.create]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases.collectionGroups.indexes/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.indexes.get]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases.collectionGroups.indexes/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.collectionGroups.indexes.list]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases.collectionGroups.indexes/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.databases.importDocuments]
(<https://firebase.google.com/docs/firestore/reference/rest/v1beta2/projects.databases/importDocuments.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Package google.firestore.admin.v1]
(<https://firebase.google.com/docs/firestore/reference/rpc/google.firestore.admin.v1.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Package google.firestore.admin.v1beta2]
(<https://firebase.google.com/docs/firestore/reference/rpc/google.firestore.admin.v1beta2.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Package google.rpc](https://firebase.google.com/docs/firestore/reference/rpc/google.rpc.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Get started with Cloud Firestore Security Rules](https://firebase.google.com/docs/firestore/security/get-started.md.txt): A guide to getting started with Cloud Firestore Security Rules.
- [Fix insecure rules](https://firebase.google.com/docs/firestore/security/insecure-rules.md.txt): A guide to identifying and fixing insecure Cloud Firestore Security Rules.
- [Test your Cloud Firestore Security Rules](https://firebase.google.com/docs/firestore/security/test-rules-emulator.md.txt): A guide to testing your Cloud Firestore Security Rules using the Firebase Emulator Suite.
- [Write-time aggregations](https://firebase.google.com/docs/firestore/solutions/aggregation.md.txt): A guide to performing write-time aggregations in Cloud Firestore using transactions and Cloud Functions.
- [Implement an AI-driven chatbot](https://firebase.google.com/docs/firestore/solutions/ai-chatbot.md.txt): A guide to implementing an AI-driven chatbot using Cloud Firestore and Firebase Extensions.
- [Integrate with BigQuery](https://firebase.google.com/docs/firestore/solutions/bigquery.md.txt): A guide to integrating Cloud Firestore with BigQuery using Firebase Extensions.
- [Distributed counters](https://firebase.google.com/docs/firestore/solutions/counters.md.txt): A guide to implementing distributed counters in Cloud Firestore.
- [Enrich handling of text](https://firebase.google.com/docs/firestore/solutions/enriched-text.md.txt): A guide to enriching text content in Cloud Firestore using Firebase Extensions.
- [Get started with generative AI](https://firebase.google.com/docs/firestore/solutions/generative-ai-index.md.txt): A guide to getting started with generative AI in Cloud Firestore.
- [Build presence in Cloud Firestore](https://firebase.google.com/docs/firestore/solutions/presence.md.txt): A guide to building a presence system in Cloud Firestore.
- [Schedule data exports](https://firebase.google.com/docs/firestore/solutions/schedule-export.md.txt): A guide to scheduling data exports from Cloud Firestore.
- [Full-text search](https://firebase.google.com/docs/firestore/solutions/search.md.txt): Firestore is a flexible, scalable database for mobile, web, and server development from Firebase and Google Cloud..
- [Serve bundled Firestore content from a CDN](https://firebase.google.com/docs/firestore/solutions/serve-bundles.md.txt): A guide to serving bundled Cloud Firestore content from a CDN.
- [Map Cloud Firestore data with Swift Codable](https://firebase.google.com/docs/firestore/solutions/swift-codable-data-mapping.md.txt): A guide to mapping Cloud Firestore data with Swift Codable.
- [Understand reads and writes at scale](https://firebase.google.com/docs/firestore/understand-reads-writes-scale.md.txt): A guide to understanding how reads and writes work at scale in Cloud Firestore, and how to design your database for performance.
- [Work with point-in-time recovery (PITR)](https://firebase.google.com/docs/firestore/use-pitr.md.txt): A guide to using point-in-time recovery (PITR) in Firestore to protect your data from accidental deletion or writes.
- [Welcome to Firebase for Flutter!](https://firebase.google.com/docs/flutter.md.txt): Developer documentation for Firebase
- [Add Firebase to your Flutter app](https://firebase.google.com/docs/flutter/setup.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Configure your environment (1st gen)](https://firebase.google.com/docs/functions/1st-gen/config-env-1st.md.txt): This guide is for 1st gen Cloud Functions only, and describes how to configure functions with parameterized configuration or environment variables.
- [Realtime Database triggers (1st gen)](https://firebase.google.com/docs/functions/1st-gen/database-events-1st.md.txt): This guide is for 1st gen Cloud Functions only, and describes how to handle events in the Firebase Realtime Database to run operations with administrative privileges.
- [Cloud Firestore triggers (1st gen)](https://firebase.google.com/docs/functions/1st-gen/firestore-events-1st.md.txt): This guide is for 1st gen Cloud Functions only, and describes

how to handle events in Cloud Firestore to perform tasks without updating client code.

- [Cloud Storage triggers (1st gen)](<https://firebase.google.com/docs/functions/1st-gen/gcp-storage-events-1st.md.txt>): This guide is for 1st gen Cloud Functions only, and describes how to trigger a function in response to the uploading, updating, or deleting of files and folders in Cloud Storage.
- [Get started: write, test, and deploy your first functions (1st gen)](<https://firebase.google.com/docs/functions/1st-gen/get-started-1st.md.txt>): This guide is for 1st gen Cloud Functions only, and describes how to get started with functions by creating, testing, and deploying your first functions.
- [Remote Config triggers (1st gen)](<https://firebase.google.com/docs/functions/1st-gen/rc-events-1st.md.txt>): This guide is for 1st gen Cloud Functions only, and describes how to trigger a function in response to Firebase Remote Config events, including the publication of a new config version or a rollback.
- [Report errors (1st gen)](<https://firebase.google.com/docs/functions/1st-gen/reporting-errors-1st.md.txt>): This guide is for 1st gen Cloud Functions only, and describes how to report errors from a function to Cloud Logging and Error Reporting for more fine-grained error reporting.
- [Enqueue functions with Cloud Tasks (1st gen)](<https://firebase.google.com/docs/functions/1st-gen/task-functions-1st.md.txt>): This guide is for 1st gen Cloud Functions only, and describes how to enqueue functions with Cloud Tasks to help your app run time-consuming, resource-intensive, or bandwidth-limited tasks asynchronously.
- [Test Lab triggers (1st gen)](<https://firebase.google.com/docs/functions/1st-gen/test-lab-events-1st.md.txt>): This guide is for 1st gen Cloud Functions only, and describes how to trigger a function when a test matrix completes to handle test states and outcomes.
- [Write and view logs (1st gen)](<https://firebase.google.com/docs/functions/1st-gen/writing-and-viewing-logs-1st.md.txt>): This guide is for 1st gen Cloud Functions only, and describes how to write and view logs for functions using the logger SDK, custom Google Cloud Logging, or the console object standard.
- [Call functions from your app](<https://firebase.google.com/docs/functions/callable.md.txt>): A guide to calling functions directly from your Firebase app, covering how to write, deploy, and call HTTP Callable functions.
- [Configure your environment](<https://firebase.google.com/docs/functions/config-env.md.txt>): A guide to configuring your Cloud Functions environment, covering parameterized configuration, environment variables, and Secret Manager.
- [Create and handle custom event triggers](<https://firebase.google.com/docs/functions/custom-events.md.txt>): A guide to creating and handling custom event triggers in Cloud Functions by publishing events to Eventarc channels and subscribing to them.
- [Cloud Storage triggers](<https://firebase.google.com/docs/functions/gcp-storage-events.md.txt>): A guide to triggering Cloud Functions in response to Cloud Storage events, including file uploads, updates, and deletions.
- [Run functions locally](<https://firebase.google.com/docs/functions/local-emulator.md.txt>): A guide to running and testing your functions locally using the Firebase CLI, covering installation, environment setup, and service interaction.
- [Manage functions](<https://firebase.google.com/docs/functions/manage-functions.md.txt>): A guide to managing your Cloud Functions deployments, covering how to deploy, delete, modify, and set runtime options for functions.
- [Organize multiple functions](<https://firebase.google.com/docs/functions/organize-functions.md.txt>): A guide to organizing functions for better navigation and maintenance, covering management in codebases, multiple files, and groups.
- [Pub/Sub triggers](<https://firebase.google.com/docs/functions/pubsub-events.md.txt>): A guide to triggering functions in response to Pub/Sub events, explaining how to handle new messages and access the message payload.
- [Quotas and limits](<https://firebase.google.com/docs/functions/quotas.md.txt>): An overview of the quotas and limits for Cloud Functions, detailing the usage-based limits for invocations, compute time, and internet traffic.
- [Report errors](<https://firebase.google.com/docs/functions/reporting-errors.md.txt>): A guide to reporting errors from Cloud Functions to Cloud Error Reporting, covering both automatic and manual methods.
- [Retry asynchronous functions](<https://firebase.google.com/docs/functions/retries.md.txt>): A guide to configuring asynchronous functions to retry on failure by enabling and disabling retries for background functions.
- [Enqueue functions with Cloud Tasks](<https://firebase.google.com/docs/functions/task-functions.md.txt>): A guide to enqueueing functions with Cloud Tasks for asynchronous execution of

resource-intensive tasks, covering creation, testing, and deployment.

- [Sync, async, and promises](https://firebase.google.com/docs/functions/terminate-functions.md.txt): A guide to properly managing the lifecycle of your functions, explaining how to terminate synchronous, asynchronous, and HTTP functions.
- [Firebase Test Lab triggers](https://firebase.google.com/docs/functions/test-lab-events.md.txt): A guide to triggering Cloud Functions in response to Firebase Test Lab events, explaining how to handle test matrix completion and access client details.
- [Unit testing of Cloud Functions](https://firebase.google.com/docs/functions/unit-testing.md.txt): A guide to writing unit tests for functions using the Firebase Functions Test SDK for both background and HTTP functions.
- [Cloud Functions version comparison](https://firebase.google.com/docs/functions/version-comparison.md.txt): A comparison of the two versions of Cloud Functions, highlighting the new features in the 2nd gen.
- [Cloud Functions for Firebase (video series)](https://firebase.google.com/docs/functions/video-series.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [Write and view logs](https://firebase.google.com/docs/functions/writing-and-viewing-logs.md.txt): A guide to writing and viewing logs for Cloud Functions, covering the logger SDK, the Firebase console, and Cloud Logging.
- [Deploy to your site using the Hosting REST API](https://firebase.google.com/docs/hosting/api-deploy.md.txt): A guide to using the Firebase Hosting REST API for programmatic and customizable deployments, including how to create and upload new versions of a site.
- [Connect a custom domain](https://firebase.google.com/docs/hosting/custom-domain.md.txt): A guide to connecting a custom domain to a Firebase Hosting site, including how to configure DNS records and provision an SSL certificate.
- [Integrate Angular](https://firebase.google.com/docs/hosting/frameworks/angular.md.txt): A guide to integrating and deploying Angular applications to Firebase using experimental CLI functionality; for most Angular users, Firebase App Hosting is recommended.
- [Configure Hosting behavior](https://firebase.google.com/docs/hosting/full-config.md.txt): A comprehensive guide to configuring customized Firebase Hosting behavior, including specifying files to deploy, setting up redirects and rewrites, and managing headers.
- [Serve dynamic content and host microservices with Cloud Functions](https://firebase.google.com/docs/hosting/functions.md.txt): A guide to pairing Firebase Hosting with Cloud Functions to serve dynamic content and host microservices, including how to create, test, and deploy HTTPS functions.
- [Deploy to live & preview channels via GitHub pull requests](https://firebase.google.com/docs/hosting/github-integration.md.txt): A guide to integrating Firebase Hosting with GitHub Actions to automate deployments to live and preview channels using pull requests.
- [Manage live & preview channels, releases, and versions for your site](https://firebase.google.com/docs/hosting/manage-hosting-resources.md.txt): A guide to managing channels, releases, and versions for a Firebase Hosting site, including how to roll back to previous versions and clone versions between channels.
- [Share project resources across multiple sites](https://firebase.google.com/docs/hosting/multisites.md.txt): A guide to setting up and managing multiple Firebase Hosting sites in a single Firebase project, allowing for shared resources across related sites and apps.
- [Load Firebase SDKs from reserved URLs](https://firebase.google.com/docs/hosting/reserved-urls.md.txt): A guide to loading Firebase SDKs from reserved URLs in Firebase Hosting, including how to add scripts and use the available SDKs.
- [Learn about usage levels, quotas, and pricing for Hosting](https://firebase.google.com/docs/hosting/usage-quotas-pricing.md.txt): An overview of the usage levels, quotas, and pricing for Firebase Hosting, including details on storage and data transfer.
- [What can you do with Firebase Hosting?](https://firebase.google.com/docs/hosting/use-cases.md.txt): An overview of the various use cases for Firebase Hosting, including hosting single-page web apps, building microservices, and setting up production workflows.
- [Firebase In-App Messaging](https://firebase.google.com/docs/in-app-messaging.md.txt): Engage active app users with contextual messages.
- [Customize your Firebase In-App Messaging messages](https://firebase.google.com/docs/in-app-messaging/customize-messages.md.txt): A guide to customizing Firebase In-App Messaging messages,

- including adding actions and modifying the look and feel for your app.
- [What can you do with Firebase In-App Messaging?](<https://firebase.google.com/docs/in-app-messaging/explore-use-cases.md.txt>): A guide to exploring use cases for Firebase In-App Messaging, including UI customization, user targeting, contextual scheduling, and performance tracking.
 - [Get started with Firebase In-App Messaging](<https://firebase.google.com/docs/in-app-messaging/get-started.md.txt>): A quickstart guide to Firebase In-App Messaging, covering how to add the SDK to your project and send a test message.
 - [Supporting iOS 14](<https://firebase.google.com/docs/ios/supporting-ios-14.md.txt>): A guide to supporting iOS 14's App Tracking Transparency framework with Firebase, detailing its impact on Firebase products and how to request user permission.
 - [Troubleshooting & FAQ for Apple platforms and Firebase](<https://firebase.google.com/docs/ios/troubleshooting-faq.md.txt>): A guide to troubleshooting and frequently asked questions for Firebase on Apple platforms, covering common issues with Xcode, Keychain, and URL schemes.
 - [Migrate to the latest Firebase SDK for Swift (v4.0.0)](<https://firebase.google.com/docs/ios/v4-naming-migration-guide.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
 - [Supported platforms, frameworks, libraries, and tools](<https://firebase.google.com/docs/libraries.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
 - [Firebase Machine Learning](<https://firebase.google.com/docs/ml.md.txt>): Use machine learning in your apps to solve real-world problems.
 - [ML Kit for Firebase](<https://firebase.google.com/docs/ml-kit.md.txt>): Use machine learning in your apps to solve real-world problems.
 - [Generate Smart Replies with ML Kit on Android](<https://firebase.google.com/docs/ml-kit/android/generate-smart-replies.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
 - [Label images with an AutoML-trained model on Android](<https://firebase.google.com/docs/ml-kit/android/label-images-with-automl.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
 - [Scan Barcodes with ML Kit on Android](<https://firebase.google.com/docs/ml-kit/android/read-barcodes.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
 - [Recognize Landmarks with ML Kit on Android](<https://firebase.google.com/docs/ml-kit/android/recognize-landmarks.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
 - [Translate text with ML Kit on Android](<https://firebase.google.com/docs/ml-kit/android/translate-text.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
 - [Use a TensorFlow Lite model for inference with ML Kit on Android](<https://firebase.google.com/docs/ml-kit/android/use-custom-models.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
 - [Use a custom TensorFlow Lite build](<https://firebase.google.com/docs/ml-kit/android/use-custom-tflite.md.txt>): A guide on how to use a custom TensorFlow Lite build with ML Kit on Android.
 - [Face Detection](<https://firebase.google.com/docs/ml-kit/detect-faces.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
 - [Smart Reply](<https://firebase.google.com/docs/ml-kit/generate-smart-replies.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
 - [Detect and Track Objects with ML Kit on iOS](<https://firebase.google.com/docs/ml-kit/ios/detect-objects.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app

developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.

- [Recognize Landmarks with ML Kit on iOS](<https://firebase.google.com/docs/ml-kit/ios/recognize-landmarks.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Recognize Text in Images with ML Kit on iOS](<https://firebase.google.com/docs/ml-kit/ios/recognize-text.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Translate text with ML Kit on iOS](<https://firebase.google.com/docs/ml-kit/ios/translate-text.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Image Labeling](<https://firebase.google.com/docs/ml-kit/label-images.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [Object Detection and Tracking](<https://firebase.google.com/docs/ml-kit/object-detection.md.txt>): ML Kit for Firebase provided ready-to-use ML solutions for app developers. New apps should use the standalone ML Kit library for on-device ML and Firebase ML for cloud-based ML.
- [A/B test two versions of a model](<https://firebase.google.com/docs/ml/android/ab-test-models.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Label Images Securely with Cloud Vision using Firebase Auth and Functions on Android](<https://firebase.google.com/docs/ml/android/label-images.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Recognize Text in Images with Firebase ML on Android](<https://firebase.google.com/docs/ml/android/recognize-text-deprecated.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Protect your Firebase ML Android app's Cloud credentials](<https://firebase.google.com/docs/ml/android/secure-api-key.md.txt>): A guide to protecting Firebase ML Android app Cloud credentials by registering production apps, restricting API key scope, and creating debug-only API keys for secure development.
- [Use a custom TensorFlow Lite model on Android](<https://firebase.google.com/docs/ml/android/use-custom-models.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [ML codelabs](<https://firebase.google.com/docs/ml/codelabs.md.txt>): An index of Firebase ML codelabs, offering hands-on learning experiences for deploying TensorFlow Lite models, analyzing performance, A/B testing, and implementing features like digit classification, sentiment analysis, and content recommendation.
- [A/B test two versions of a model](<https://firebase.google.com/docs/ml/ios/ab-test-models.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Detect objects in images with an AutoML-trained model on Apple platforms](<https://firebase.google.com/docs/ml/ios/detect-objects-with-automl.md.txt>): A developer's guide to implementing an AutoML-trained object detection model in an Apple app, covering model loading, image preparation, and processing detection results.
- [Label Images with Firebase ML on Apple platforms](<https://firebase.google.com/docs/ml/ios/label-images-deprecated.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Label images with an AutoML-trained model on Apple platforms](<https://firebase.google.com/docs/ml/ios/label-images-with-automl.md.txt>): A developer's guide to implementing an AutoML-trained image labeling model in an Apple app, covering model loading, image preparation, and processing labeling results.
- [Migrate from the legacy custom model API](<https://firebase.google.com/docs/ml/ios/migrate-from-legacy-api.md.txt>): A migration guide for iOS developers moving from the legacy Firebase ML Kit Model Interpreter API to the TensorFlow Lite Interpreter, including dependency updates and

code modifications for input/output handling.

- [Recognize Landmarks Securely with Cloud Vision using Firebase Auth and Functions on Apple platforms](<https://firebase.google.com/docs/ml/ios/recognize-landmarks.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Recognize Landmarks with Firebase ML on iOS](<https://firebase.google.com/docs/ml/ios/recognize-landmarks-deprecated.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Recognize Text in Images with Firebase ML on iOS](<https://firebase.google.com/docs/ml/ios/recognize-text-deprecated.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Use a custom TensorFlow Lite model on Apple platforms](<https://firebase.google.com/docs/ml/ios/use-custom-models.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- (https://firebase.google.com/docs/ml/legacy-mlkit/___deprecated_by_ml.md.txt)
- (https://firebase.google.com/docs/ml/legacy-mlkit/___deprecated_tflite.md.txt)
- [Deploy and manage custom models](<https://firebase.google.com/docs/ml/manage-hosted-models.md.txt>): A guide to deploying and managing custom machine learning models using Firebase ML, covering both the Firebase console and the Firebase Admin Python and Node.js SDKs for various deployment and management tasks.
- [Train an object detection model with AutoML Vision Edge](<https://firebase.google.com/docs/ml/train-object-detector.md.txt>): A comprehensive guide to training a custom object detection model using AutoML Vision Edge, from preparing your dataset to deploying the model in your app.
- [Custom Models](<https://firebase.google.com/docs/ml/use-custom-models.md.txt>): Firebase ML lets you add powerful machine learning features to your app with ready-to-use APIs and support for custom model deployment.
- [Filter data using attributes](<https://firebase.google.com/docs/perf-mon/attributes.md.txt>): A guide to filtering performance data in Firebase Performance Monitoring using default and custom attributes to analyze your app's performance in different scenarios.
- [Add custom monitoring for specific network requests (Apple & Android apps)](<https://firebase.google.com/docs/perf-mon/custom-network-traces.md.txt>): A guide to manually instrumenting custom network request traces in Firebase Performance Monitoring for Apple and Android apps to monitor specific network requests.
- [Disable Firebase Performance Monitoring](<https://firebase.google.com/docs/perf-mon/disable-sdk.md.txt>): A guide to disabling Firebase Performance Monitoring in your app, either temporarily during the build process or at runtime for specific users or scenarios.
- [Get started with Performance Monitoring for Flutter](<https://firebase.google.com/docs/perf-mon/flutter/get-started.md.txt>): A guide to getting started with Firebase Performance Monitoring for Flutter to gain insight into your app's performance characteristics.
- [Get started with Performance Monitoring for Android](<https://firebase.google.com/docs/perf-mon/get-started-android.md.txt>): A guide to getting started with Firebase Performance Monitoring for Android, including how to add the SDK and Gradle plugin to your app and view performance data in the Firebase console.
- [Get started with Performance Monitoring for Apple platforms](<https://firebase.google.com/docs/perf-mon/get-started-ios.md.txt>): A guide to getting started with Firebase Performance Monitoring for Apple platforms, including how to add the SDK to your app and view performance data in the Firebase console.
- [Get started with Performance Monitoring for web](<https://firebase.google.com/docs/perf-mon/get-started-web.md.txt>): A guide to getting started with Firebase Performance Monitoring for web apps, including how to add and initialize the SDK, and view performance data in the Firebase console.
- [Learn about HTTP/S network request performance data (any app)](<https://firebase.google.com/docs/perf-mon/network-traces.md.txt>): A guide to the automatic HTTP/S network request traces in Firebase Performance Monitoring, including the metrics collected to help you understand your app's network performance.
- [Performance Monitoring troubleshooting and FAQ](<https://firebase.google.com/docs/perf-mon/troubleshooting.md.txt>): A guide to troubleshooting common issues and finding answers to frequently asked questions about Firebase Performance Monitoring.

- [Get started with Firebase Phone Number Verification on Android]
(<https://firebase.google.com/docs/phone-number-verification/android/get-started.md.txt>): A guide to getting started with Firebase Phone Number Verification (PNV) on Android.
- [Authenticate with Firebase on Android using Firebase Phone Number Verification]
(<https://firebase.google.com/docs/phone-number-verification/android/sign-in.md.txt>): A guide to authenticating with Firebase on Android using Firebase Phone Number Verification (PNV).
- (https://firebase.google.com/docs/phone-number-verification/carrier_specs/llms.txt.md.txt)
- [Avoid surprise bills](<https://firebase.google.com/docs/projects/billing/avoid-surprise-bills.md.txt>): Review these best practices to help you understand your costs and how to avoid surprise bills during development and for your production apps.
- [Firebase pricing plans](<https://firebase.google.com/docs/projects/billing/firebase-pricing-plans.md.txt>): Developer documentation for Firebase
- [Export Firebase data into Cloud Logging](<https://firebase.google.com/docs/projects/cloud-logging-export.md.txt>): A guide to exporting Firebase data to Cloud Logging for advanced analysis, including setup instructions and pricing information.
- [Manage project access with Firebase IAM]
(<https://firebase.google.com/docs/projects/iam/overview.md.txt>): Developer documentation for Firebase
- [Firebase IAM permissions](<https://firebase.google.com/docs/projects/iam/permissions.md.txt>): Developer documentation for Firebase
- [Owner, Editor, and Viewer roles](<https://firebase.google.com/docs/projects/iam/roles-basic.md.txt>): Developer documentation for Firebase
- [Firebase-level predefined roles](<https://firebase.google.com/docs/projects/iam/roles-predefined-all-products.md.txt>): Developer documentation for Firebase
- [Firebase product-category predefined roles]
(<https://firebase.google.com/docs/projects/iam/roles-predefined-category.md.txt>): Developer documentation for Firebase
- [Learn about locations for products and resources in your project]
(<https://firebase.google.com/docs/projects/locations.md.txt>): Developer documentation for Firebase
- [Manage Firebase installations](<https://firebase.google.com/docs/projects/manage-installations.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Configure multiple projects](<https://firebase.google.com/docs/projects/multiprojects.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Get started using Firebase with an existing Google Cloud project]
(<https://firebase.google.com/docs/projects/use-firebase-with-existing-cloud-project.md.txt>): Developer documentation for Firebase
- [Firebase API Reference](<https://firebase.google.com/docs/reference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Admin SDK Reference](<https://firebase.google.com/docs/reference/admin.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirebaseAdmin.Auth.AbstractFirebaseAuth Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/abstract-firebase-auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.ActionCodeSettings Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/action-code-settings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.DeleteUsersResult Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/delete-users-result.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.ExportedUserRecord Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/exported-user-record.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.ExportedUserRecords Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/exported-user-records.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.FirebaseAuth Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/firebase-auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.FirebaseToken Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/firebase-token.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.HmacMd5 Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/hmac-md5.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.HmacSha1 Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/hmac-sha1.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.HmacSha256 Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/hmac-sha256.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.PbkdfSha1 Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/pbkdf-sha1.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.Pbkdf2Sha256 Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/pbkdf2-sha256.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.RepeatableHash Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/repeatable-hash.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.Scrypt Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/scrypt.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.Sha1 Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/sha1.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.Sha256 Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/sha256.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.Sha512 Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/sha512.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash.StandardScrypt Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/hash/standard-scrypt.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Multitenancy.TenantArgs Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/multitenancy/tenant-args.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Multitenancy.TenantManager Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/multitenancy/tenant-manager.md.txt>): Firebase gives you the tools and infrastructure

you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.PhoneIdentifier Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/phone-identifier.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Providers.AuthProviderConfig Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/providers/auth-provider-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Providers.AuthProviderConfigArgs Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/providers/auth-provider-config-args-t-.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Providers.AuthProviderConfigs Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/providers/auth-provider-configs-t-.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Providers.SamlProviderConfig Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/providers/saml-provider-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.SessionCookieOptions Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/session-cookie-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.UserIdentifier Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/user-identifier.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.UserImportHash Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/user-import-hash.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.UserImportOptions Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/user-import-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.UserImportResult Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/user-import-result.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.UserProvider Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/user-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.UserRecord Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/auth/user-record.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.FirebaseApp Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/firebase-app.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.FirebaseException Class Reference]
(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/firebase-exception.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Messaging.Action Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/action.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.AndroidConfig Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/android-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.AndroidNotification Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/android-notification.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.ApnsFcmOptions Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/apns-fcm-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.Aps Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/aps.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.ApsAlert Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/aps-alert.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.BatchResponse Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/batch-response.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.FirebaseMessaging Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/firebase-messaging.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.FirebaseMessagingException Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/firebase-messaging-exception.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.LightSettings Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/light-settings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.MulticastMessage Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/multicast-message.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.TopicManagementResponse Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/topic-management-response.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.WebpushConfig Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/webpush-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Messaging.WebpushNotification Class Reference]

(<https://firebase.google.com/docs/reference/admin/dotnet/class/firebase-admin/messaging/webpush-notification.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Migrate to .NET Admin SDK v2]

(<https://firebase.google.com/docs/reference/admin/dotnet/migrate-dotnet-v2.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin Namespace]

(<https://firebase.google.com/docs/reference/admin/dotnet/namespace/firebase-admin.md.txt>):

Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAdmin.Auth.Hash Namespace]
(<https://firebase.google.com/docs/reference/admin/dotnet/namespace/firebase-admin/auth/hash.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Multitenancy Namespace]
(<https://firebase.google.com/docs/reference/admin/dotnet/namespace/firebase-admin/auth/multitenancy.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Auth.Providers Namespace]
(<https://firebase.google.com/docs/reference/admin/dotnet/namespace/firebase-admin/auth/providers.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAdmin.Messaging Namespace]
(<https://firebase.google.com/docs/reference/admin/dotnet/namespace/firebase-admin/messaging.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Admin SDK error handling](<https://firebase.google.com/docs/reference/admin/error-handling.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseException]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/FirebaseException.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseOptions]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/FirebaseOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [IncomingHttpResponse]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/IncomingHttpResponse.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AbstractFirebaseAuth]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/AbstractFirebaseAuth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ActionCodeSettings.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ActionCodeSettings.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AuthErrorCode]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/AuthErrorCode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAuth]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/FirebaseAuth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAuthException]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/FirebaseAuthException.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ImportUserRecord]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ImportUserRecord.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ImportUserRecord.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ImportUserRecord.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [OidcProviderConfig]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/OidcProviderConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [ProviderConfig]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/ProviderConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [SamlProviderConfig]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/SamlProviderConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserIdentifier]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserIdentifier.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserImportHash]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserImportHash.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserImportOptions.Builder]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserImportOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserImportResult]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserImportResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserInfo]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserInfo.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserProvider.Builder]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserProvider.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [UserRecord.CreateRequest]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/UserRecord.CreateRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Argon2]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Argon2.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Argon2.Argon2Version]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Argon2.Argon2Version.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Argon2.Builder]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Argon2.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [HmacMd5]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/HmacMd5.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [HmacMd5.Builder]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/HmacMd5.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [HmacSha1]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/HmacSha1.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile

and web apps, improve app quality, and grow your business.

- [HmacSha512]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/HmacSha512.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [HmacSha512.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/HmacSha512.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Md5.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Md5.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Pbkdf2Sha256]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Pbkdf2Sha256.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Pbkdf2Sha256.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Pbkdf2Sha256.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PbkdfShal]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/PbkdfShal.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Sha256.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Sha256.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Sha512]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Sha512.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Sha512.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/Sha512.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [StandardScript]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/StandardScript.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [StandardScript.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/StandardScript.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.auth.hash Details]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/hash/package-descr.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Tenant.UpdateRequest]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/multitenancy/Tenant.UpdateRequest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [TenantAwareFirebaseAuth]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/multitenancy/TenantAwareFirebaseAuth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [TenantManager]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/multitenancy/TenantManager.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.auth.multitenancy Details]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/auth/multitenancy/package-descr.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [StorageClient]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/cloud/StorageClient.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.cloud]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/cloud/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ChildEventListener]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/ChildEventListener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [GenericTypeIndicator]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/GenericTypeIndicator.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Query]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/Query.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ServerValue]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/ServerValue.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ThrowOnExtraProperties]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/ThrowOnExtraProperties.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Transaction]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/Transaction.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Transaction.Handler]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/Transaction.Handler.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.database Details]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/database/package-descr.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseInstanceIdException]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/iid/FirebaseInstanceIdException.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AndroidConfig]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/AndroidConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AndroidConfig.Priority]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/AndroidConfig.Priority.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AndroidFcmOptions]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/AndroidFcmOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AndroidFcmOptions.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/AndroidFcmOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to

build better mobile and web apps, improve app quality, and grow your business.

- [AndroidNotification]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/AndroidNotification.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AndroidNotification.Proxy]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/AndroidNotification.Proxy.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AndroidNotification.Visibility]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/AndroidNotification.Visibility.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ApnsConfig]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/ApnsConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ApnsConfig.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/ApnsConfig.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ApnsFcmOptions.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/ApnsFcmOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Aps.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/Aps.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ApsAlert.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/ApsAlert.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [CriticalSound.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/CriticalSound.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FcmOptions.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/FcmOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [LightSettings]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/LightSettings.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [LightSettings.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/LightSettings.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Message]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/Message.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Message.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/Message.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [MulticastMessage.Builder]
(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/MulticastMessage.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Notification.Builder]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/Notification.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [WebpushFcmOptions.Builder]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/WebpushFcmOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [WebpushNotification]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/WebpushNotification.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [WebpushNotification.Direction]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/messaging/WebpushNotification.Direction.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase Details]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/package-descr.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseProjectManagement]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/projectmanagement/FirebaseProjectManagement.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseProjectManagementException]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/projectmanagement/FirebaseProjectManagementException.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [IosApp]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/projectmanagement/IosApp.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ShaCertificate]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/projectmanagement/ShaCertificate.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.projectmanagement Details]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/projectmanagement/package-descr.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [KeysAndValues.Builder]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/KeysAndValues.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ListVersionsOptions]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ListVersionsOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ListVersionsOptions.Builder]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ListVersionsOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ListVersionsPage]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ListVersionsPage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Parameter]
- (<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/Parameter.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

g/Parameter.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [ParameterValue]

([https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ParameterValue.md.txt](https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remotefirebase.com/google/firebase/remoteconfig/ParameterValue.md.txt)): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ParameterValue.Explicit]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ParameterValue.Explicit.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PercentConditionOperator]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/PercentConditionOperator.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ServerTemplate]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ServerTemplate.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ServerTemplate.Builder]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ServerTemplate.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ServerTemplateImpl.Builder]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/ServerTemplateImpl.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [TagColor]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/TagColor.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Template]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/Template.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [User]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/User.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.remoteconfig Details]

(<https://firebase.google.com/docs/reference/admin/java/reference/com/google/firebase/remoteconfig/package-descr.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [API Reference](<https://firebase.google.com/docs/reference/admin/node.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.app package](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.app.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AppCheckTokenOptions interface]

(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.app-check.appchecktokenoptions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [DecodedAppCheckToken interface]

(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.app-check.decodedappchecktoken.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [VerifyAppCheckTokenResponse interface]

(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.app-check.verifyappchecktokenresponse.md.txt>): The Admin SDK lets you interact with Firebase from

your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

- [App interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.app.app.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AppOptions interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.app.appoptions.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Credential interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.app.credential.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirebaseAppError class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.app.firebaseapperror.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirebaseArrayIndexError interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.app.firebasearrayindexerror.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirebaseError interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.app.firebaseerror.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [GoogleOAuthAccessToken interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.app.googleoauthaccesstoken.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.auth package](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AllowlistOnlyWrap interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.allowlistonlywrap.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Auth class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.auth.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AuthClientErrorCode class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.authclienterrorcode.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AuthProviderConfig interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.authproviderconfig.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [BaseUpdateMultiFactorInfoRequest interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.baseupdatemultifactorinforequest.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [CreatePhoneMultiFactorInfoRequest interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.createphonemultifactorinforequest.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [CreateRequest interface](https://firebase.google.com/docs/reference/admin/node/firebase-

admin.auth.createrequest.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

- [CustomStrengthOptionsConfig interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.customstrengthoptionsconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [DecodedIdToken interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.decodedidtoken.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [EmailIdentifier interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.emailidentifier.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [EmailPrivacyConfig interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.emailprivacyconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [EmailSignInProviderConfig interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.emailsigninproviderconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirebaseAuthError class] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.firebaseautherror.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [GetUsersResult interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.getusersresult.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ListUsersResult interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.listusersresult.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MobileLinksConfig interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.mobilelinksconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MultiFactorConfig interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.multifactorconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MultiFactorUpdateSettings interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.multifactorupdatesettings.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [OAuthResponseType interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.oauthresponsetype.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [OIDCAuthProviderConfig interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.oidcauthproviderconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [PasswordPolicyConfig interface] (<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.passwordpolicyconfig.md.txt>): The Admin SDK lets you interact with Firebase from your

server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

- [PhoneIdentifier interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.phoneidentifier.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [PhoneMultiFactorInfo class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.phonemultifactorinfo.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RecaptchaConfig interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.recaptchaconfig.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [SAMLAuthProviderConfig interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.samlauthproviderconfig.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [SessionCookieOptions interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.sessioncookieoptions.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [TenantAwareAuth class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.tenantawareauth.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [TenantManager class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.tenantmanager.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [TotpMultiFactorProviderConfig interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.totpmultifactorproviderconfig.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [UidIdentifier interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.uididentifier.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [UpdateProjectConfigRequest interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.updateprojectconfigrequest.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [UpdateRequest interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.updaterequest.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [UpdateTenantRequest interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.updatetenantrequest.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [UserImportOptions interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.userimportoptions.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [UserInfo class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.userinfo.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and

writing to Realtime Database, and so on.

- [AuthProvider interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.userprovider.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AuthProviderRequest interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.auth.userproviderrequest.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [credential namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.credential_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ConnectorConfig interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.data-connect.connectorconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [DataConnect class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.data-connect.dataconnect.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ExecuteGraphqlResponse interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.data-connect.executegraphqlresponse.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ExecuteOperationResponse interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.data-connect.executeoperationresponse.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.database package](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.database.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Database interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.database.database.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [database namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.database_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [CloudEvent interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.eventarc.cloudevent.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.extensions package](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.extensions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Extensions class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.extensions.extensions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Runtime class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.extensions.runtime.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

- [FirebaseArrayIndexError interface]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.firestore.firestoreerror.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirestoreSettings interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.firestore.firestoresettings.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firestore namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.firestore_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.functions package]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.functions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [DelayDelivery interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.functions.delaydelivery.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Functions class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.functions.functions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [TaskOptionsExperimental interface]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.functions.taskoptionsexperimental.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.installations package]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.installations.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Installations class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.installations.installations.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [InstallationsClientErrorCode class]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.installations.installationsclienterrorcode.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [GcsTfliteModelOptions interface]
(<https://firebase.google.com/docs/reference/admin/node/firebase-admin.machine-learning.gcsflitemodeloptions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ListModelsResult interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.machine-learning.listmodelsresult.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MachineLearning class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.machine-learning.machinelearning.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

- [TFLiteModel interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.machine-learning.tflitemodel.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [machineLearning namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.machinelearning_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AndroidFcmOptions interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.androidfcmoptions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ApsAlert interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.apsalert.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ConditionMessage interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.conditionmessage.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [FirebaseMessagingError class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.firebaseessagingerror.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [LightSettings interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.lightsettings.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MessagingTopicResponse interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.messagingtopicresponse.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MulticastMessage interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.multicastmessage.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Notification interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.notification.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [NotificationMessagePayload interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.notificationmessagepayload.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [TopicMessage interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.topicmessage.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [WebpushFcmOptions interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.webpushfcmoptions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [WebpushNotification interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.messaging.webpushnotification.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AndroidApp class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.project-management.androidapp.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

reading and writing to Realtime Database, and so on.

- [AndroidAppMetadata interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.project-management.androidappmetadata.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AppMetadata interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.project-management.appmetadata.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [IosApp class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.project-management.iosapp.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [AndCondition interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.andcondition.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [InAppDefaultValue interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.inappdefaultvalue.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ListVersionsOptions interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.listversionoptions.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ListVersionsResult interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.listversionsresult.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [MicroPercentRange interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.micropercentrange.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [OneOfCondition interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.oneofcondition.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [OrCondition interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.orcondition.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RemoteConfig class](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.remoteconfig.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RemoteConfigCondition interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.remoteconfigcondition.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RemoteConfigParameter interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.remoteconfigparameter.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RemoteConfigUser interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.remoteconfiguser.md.txt>): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [ServerConfig interface](<https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.serverconfig.md.txt>): The Admin SDK lets you interact with Firebase from

your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.

- [ServerTemplateData interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.srvrtemplatedata.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Version interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.remote-config.version.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RulesetMetadataList class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.security-rules.rulesetmetadatalist.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [RulesFile interface](https://firebase.google.com/docs/reference/admin/node/firebase-admin.security-rules.rulesfile.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [firebase-admin.storage package](https://firebase.google.com/docs/reference/admin/node/firebase-admin.storage.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Storage_2 class](https://firebase.google.com/docs/reference/admin/node/firebase-admin.storage.storage_2.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [storage namespace](https://firebase.google.com/docs/reference/admin/node/firebase-admin.storage_n.md.txt): The Admin SDK lets you interact with Firebase from your server environment to perform actions like generating and verifying Firebase auth tokens, reading and writing to Realtime Database, and so on.
- [Firebase Admin Python SDK](https://firebase.google.com/docs/reference/admin/python.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.app_check module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.app_check.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.credentials module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.credentials.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.exceptions module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.exceptions.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.messaging module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.messaging.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.ml module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.ml.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.project_management module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.project_management.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.remote_config module](https://firebase.google.com/docs/reference/admin/python/firebase_admin.remote_config.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [firebase_admin.storage module]
(https://firebase.google.com/docs/reference/admin/python/firebase_admin.storage.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_admin.tenant_mgt module]
(https://firebase.google.com/docs/reference/admin/python/firebase_admin.tenant_mgt.md.txt):
Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.templates.create](<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.locations.templates/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.templates.delete](<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.locations.templates/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.templates.get](<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.locations.templates/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.templates.list](<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.locations.templates/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.templates.modifyLock]
(<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.locations.templates/modifyLock.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.templates.templateGenerateContent]
(<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.locations.templates/templateGenerateContent.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.templates.templatePredict]
(<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.locations.templates/templatePredict.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.templates.templateStreamGenerateContent]
(<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.locations.templates/templateStreamGenerateContent.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.templates](<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.templates.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.templates.templateStreamGenerateContent]
(<https://firebase.google.com/docs/reference/ai-logic/rest/v1beta/projects.templates/templateStreamGenerateContent.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [AppMeasurement]
- (<https://firebase.google.com/docs/reference/android/com/google/android/gms/measurement/AppMeasurement.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.android.gms.measurement]
- (<https://firebase.google.com/docs/reference/android/com/google/android/gms/measurement/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/Firebase.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Timestamp]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/Timestamp.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Chat](<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/Chat.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAI.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/FirebaseAI.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerativeModel]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/LiveGenerativeModel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Guide]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/annotations/Guide.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.ai.annotations]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/annotations/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChatFutures]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/ChatFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerativeModelFutures.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/GenerativeModelFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenModelFutures.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/ImagenModelFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveModelFutures]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/LiveModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveSessionFutures.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/LiveSessionFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TemplateGenerativeModelFutures]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/TemplateGenerativeModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.ai.java]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/java/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [com.google.firebase.ai]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [APINotConfiguredException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/APINotConfiguredException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AudioRecordInitializationFailedException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/AudioRecordInitializationFailedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AudioTranscriptionConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/AudioTranscriptionConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BlockReason.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/BlockReason.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Candidate]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Candidate.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Citation]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Citation.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CodeExecutionResultPart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/CodeExecutionResultPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ContentBlockedException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ContentBlockedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ContentModality]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ContentModality.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ContentModality.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ContentModality.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Dimensions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Dimensions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ExecutableCodePart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ExecutableCodePart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FileDataPart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/FileDataPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAIException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/FirebaseAIException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAutoFunctionException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/FirebaseAutoFunctionException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionCallPart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/FunctionCallPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionCallingConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/FunctionCallingConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionResponsePart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/FunctionResponsePart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionResponsePart.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/FunctionResponsePart.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerateContentResponse]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GenerateContentResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [GenerativeBackend.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GenerativeBackend.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GoogleSearch]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GoogleSearch.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GroundingSupport]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/GroundingSupport.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmBlockMethod]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/HarmBlockMethod.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmBlockThreshold.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/HarmBlockThreshold.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmCategory]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/HarmCategory.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagePart]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagePart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenAspectRatio.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenAspectRatio.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenControlType]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenControlType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenForegroundMask]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenForegroundMask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenGenerationConfig.Builder]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenGenerationConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenGenerationConfig.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenGenerationConfig.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenGenerationConfigKt]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenGenerationConfigKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenGenerationResponse]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenGenerationResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenImageFormat]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenImageFormat.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenImageFormat.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenImageFormat.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenImagePlacement]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenImagePlacement.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenMaskReference.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenMaskReference.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenPersonFilterLevel.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenPersonFilterLevel.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSafetyFilterLevel]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenSafetyFilterLevel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [ImagenSafetySettings] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenSafetySettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSemanticMask] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenSemanticMask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSubjectReferenceType] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenSubjectReferenceType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenSubjectReferenceType.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ImagenSubjectReferenceType.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InlineData] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/InlineData.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InvalidAPIKeyException] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/InvalidAPIKeyException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InvalidLocationException] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/InvalidLocationException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [JsonSchema] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/JsonSchema.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveAudioConversationConfig] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveAudioConversationConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveAudioConversationConfig.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveAudioConversationConfig.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveAudioConversationConfigKt] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveAudioConversationConfigKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerationConfig.Builder] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveGenerationConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerationConfigKt] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveGenerationConfigKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerMessage] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveServerMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerSetupComplete] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveServerSetupComplete.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerToolCallCancellation] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/LiveServerToolCallCancellation.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PromptFeedback] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/PromptFeedback.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [QuotaExceededException] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/QuotaExceededException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RequestOptions] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/RequestOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RequestTimeoutException]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/RequestTimeoutException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [ResponseModality] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ResponseModality.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Schema.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Schema.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SearchEntryPoint] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/SearchEntryPoint.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Segment] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Segment.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServiceConnectionHandshakeFailedException] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ServiceConnectionHandshakeFailedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SpeechConfig] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/SpeechConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StringFormat] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/StringFormat.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StringFormat.Custom] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/StringFormat.Custom.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TextPart] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/TextPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThinkingConfig] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ThinkingConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThinkingConfig.Builder] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ThinkingConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ToolConfig] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/ToolConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Transcription] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/Transcription.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UrlContext] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/UrlContext.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UrlMetadata] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/UrlMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UrlRetrievalStatus] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/UrlRetrievalStatus.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UrlRetrievalStatus.Companion] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/UrlRetrievalStatus.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UsageMetadata] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ai/type/UsageMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AnalyticsKt] (<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/AnalyticsKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ConsentBuilder] (<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/ConsentBuilder>

.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [FirebaseAnalytics.ConsentStatus]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/FirebaseAnalytics.ConsentStatus.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAnalytics.Param]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/FirebaseAnalytics.Param.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ConsentBuilder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/ktx/ConsentBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ParametersBuilder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/ktx/ParametersBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.analytics.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.analytics]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/analytics/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AppCheckProvider]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/AppCheckProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AppCheckToken]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/AppCheckToken.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppCheck.AppCheckListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/FirebaseAppCheck.AppCheckListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DebugAppCheckProviderFactory]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/debug/DebugAppCheckProviderFactory.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DebugAppCheckTestHelper]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/debug/testing/DebugAppCheckTestHelper.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appcheck.debug.testing]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/debug/testing/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appcheck.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PlayIntegrityAppCheckProviderFactory]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appcheck/playintegrity/PlayIntegrityAppCheckProviderFactory.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AppDistributionRelease]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/AppDistributionRelease.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BinaryType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/BinaryType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppDistribution]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/FirebaseAppDistribution.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppDistributionException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/FirebaseAppDistributionException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [FirebaseAppDistributionException.Status]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/FirebaseAppDistributionException.Status.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InterruptedException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/InterruptedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OnProgressListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/OnProgressListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UpdateStatus]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/UpdateStatus.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAppDistributionKtx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/ktx/FirebaseAppDistributionKtx.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.appdistribution.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/appdistribution/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeEmailInfo]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/ActionCodeEmailInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeMultiFactorInfo]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/ActionCodeMultiFactorInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ActionCodeSettings]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/ActionCodeSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AuthKtx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/AuthKtx.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AuthResult]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/AuthResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FacebookAuthCredential]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FacebookAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuth]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuth.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuth.AuthStateListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuth.AuthStateListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuth.IdTokenListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuth.IdTokenListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthEmailException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthEmailException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthInvalidCredentialsException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthInvalidCredentialsException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthMissingActivityForRecaptchaException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthMissingActivityForRecaptchaException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseAuthMultiFactorException]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthMultiFactorException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthRecentLoginRequiredException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[FirebaseAuthSettings](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[FirebaseAuthWebException](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseAuthWebException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[FirebaseUser](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseUser.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[FirebaseUserMetadata](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/FirebaseUserMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[GetTokenResult](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/GetTokenResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[GithubAuthProvider](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/GithubAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[GoogleAuthProvider](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/GoogleAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[MultiFactor](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/MultiFactor.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[MultiFactorAssertion](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/MultiFactorAssertion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[MultiFactorSession](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/MultiFactorSession.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[OAuthCredential](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/OAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[OAuthProvider.Builder](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/OAuthProvider.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[PhoneAuthProvider](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/PhoneAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[PhoneAuthProvider.ForceResendingToken](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/PhoneAuthProvider.ForceResendingToken.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[PhoneAuthProvider.OnVerificationStateChangedCallbacks](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/PhoneAuthProvider.OnVerificationStateChangedCallbacks.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[PhoneMultiFactorGenerator](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/PhoneMultiFactorGenerator.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[PlayGamesAuthCredential](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/PlayGamesAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [[PlayGamesAuthProvider](#)]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/PlayGamesAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [SignInMethodQueryResult]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/SignInMethodQueryResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TotpMultiFactorGenerator]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/TotpMultiFactorGenerator.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TotpMultiFactorInfo]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/TotpMultiFactorInfo.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TwitterAuthCredential]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/TwitterAuthCredential.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TwitterAuthProvider]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/TwitterAuthProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UserProfileChangeRequest]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/UserProfileChangeRequest.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.auth]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/auth/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CustomKeysAndValues]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/crashlytics/CustomKeysAndValues.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseCrashlytics]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/crashlytics/FirebaseCrashlytics.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [KeyValueBuilder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/crashlytics/KeyValueBuilder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseCrashlyticsKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/crashlytics/ktx/FirebaseCrashlyticsKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.crashlytics.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/crashlytics/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ChildEvent.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Added]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ChildEvent.Added.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Changed]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ChildEvent.Changed.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Moved]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ChildEvent.Moved.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEventListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ChildEventListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DatabaseError]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/DatabaseError.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DatabaseException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/DatabaseException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DatabaseKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/DatabaseKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Exclude]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/Exclude.md.txt>)

: Firebase provides Android client SDKs for over 20 products and services.

- [FirebaseDatabase]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/FirebaseDatabase.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenericTypeIndicator]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/GenericTypeIndicator.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Logger.Level]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/Logger.Level.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MutableData]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/MutableData.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PropertyName]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/PropertyName.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThrowOnExtraProperties]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ThrowOnExtraProperties.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Transaction.Handler]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/Transaction.Handler.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Transaction.Result]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/Transaction.Result.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ValueEventListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ValueEventListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ChildEvent.Moved]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/database/ktx/ChildEvent.Moved.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.GoogleAnalyticsParameters.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.GoogleAnalyticsParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.ItunesConnectAnalyticsParameters.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.ItunesConnectAnalyticsParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.NavigationInfoParameters]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.NavigationInfoParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.NavigationInfoParameters.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.NavigationInfoParameters.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DynamicLink.SocialMetaTagParameters]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/DynamicLink.SocialMetaTagParameters.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ShortDynamicLink.Warning]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/ShortDynamicLink.Warning.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.dynamiclinks.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/dynamiclinks/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateField]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/AggregateField.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateField.AverageAggregateField]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/AggregateField>

.AverageAggregateField.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [AggregateQuery]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/AggregateQuery.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateQuerySnapshot]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/AggregateQuerySnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateSource]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/AggregateSource.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Blob]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Blob.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DocumentChange]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/DocumentChange.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DocumentSnapshot.ServerTimestampBehavior]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/DocumentSnapshot.ServerTimestampBehavior.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [EventListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/EventListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FieldPath]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/FieldPath.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Firestore]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Firestore.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirestoreException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/FirestoreException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirestoreException.Code]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/FirestoreException.Code.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirestoreSettings]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/FirestoreSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GeoPoint]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/GeoPoint.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ListenSource]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/ListenSource.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ListenerRegistration]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/ListenerRegistration.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LoadBundleTaskProgress]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/LoadBundleTaskProgress.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LoadBundleTaskProgress.TaskState]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/LoadBundleTaskProgress.TaskState.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MemoryCacheSettings]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/MemoryCacheSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MemoryEagerGcSettings]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/MemoryEagerGcSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [MemoryEagerGcSettings.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/MemoryEagerGcSettings.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MemoryLruGcSettings]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/MemoryLruGcSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MemoryLruGcSettings.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/MemoryLruGcSettings.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MetadataChanges]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/MetadataChanges.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PersistentCacheIndexManager]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/PersistentCacheIndexManager.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Pipeline.ExecuteOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Pipeline.ExecuteOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Pipeline.ExecuteOptions.IndexMode]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Pipeline.ExecuteOptions.IndexMode.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PipelineResult]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/PipelineResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PipelineSource]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/PipelineSource.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Query.Direction]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/Query.Direction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [QueryDocumentSnapshot]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/QueryDocumentSnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [QuerySnapshot]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/QuerySnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SnapshotListenOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/SnapshotListenOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SnapshotMetadata]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/SnapshotMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ThrowOnExtraProperties]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/ThrowOnExtraProperties.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TransactionOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/TransactionOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [VectorValue]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/VectorValue.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.firestore]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/AggregateOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AggregateStage.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/AggregateStage.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and

services.

- [AliasedExpression]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/AliasedExpression.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CollectionGroupSource]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/CollectionGroupSource.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Field.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/Field.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FindNearestStage.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/FindNearestStage.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionExpression]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/FunctionExpression.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InternalOptions.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/InternalOptions.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Ordering.Direction]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/Ordering.Direction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RawOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/RawOptions.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RawStage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/RawStage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SampleStage.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/SampleStage.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Selectable]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/Selectable.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Stage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/Stage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UnnestStage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/UnnestStage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.firestore.pipeline]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/firestore/pipeline/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseFunctions.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/FirebaseFunctions.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseFunctionsException.Code.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/FirebaseFunctionsException.Code.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HttpsCallableOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/HttpsCallableOptions.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HttpsCallableResult]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/HttpsCallableResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StreamResponse]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/StreamResponse>

.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [StreamResponse.Message]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/StreamResponse.Message.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.functions.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/functions/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInstanceIdService]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/iid/FirebaseInstanceIdService.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseInAppMessaging]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/FirebaseInAppMessaging.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingClickListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/FirebaseInAppMessagingClickListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingDismissListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/FirebaseInAppMessagingDismissListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingDisplayCallbacks]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/FirebaseInAppMessagingDisplayCallbacks.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingDisplayCallbacks.InAppMessagingDismissType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/FirebaseInAppMessagingDisplayCallbacks.InAppMessagingDismissType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingDisplayErrorListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/FirebaseInAppMessagingDisplayErrorListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInAppMessagingImpressionListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/FirebaseInAppMessagingImpressionListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InAppMessagingKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/InAppMessagingKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InAppMessagingDisplayKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/display/ktx/InAppMessagingDisplayKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.inappmessaging.display.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/display/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.inappmessaging.display]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/display/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.inappmessaging.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Action]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/Action.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BannerMessage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/BannerMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Text]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/model/Text.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [com.google.firebase.inappmessaging]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/inappmessaging/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [InstallationsKt]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/installations/ktx/InstallationsKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [com.google.firebase.installations.ktx]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/installations/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [Firebase]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ktx/Firebase.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [FirebaseMessagingService]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/messaging/FirebaseMessagingService.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [RemoteMessage]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/messaging/RemoteMessage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [RemoteMessage.Builder]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/messaging/RemoteMessage.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [RemoteMessage.MessagePriority]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/messaging/RemoteMessage.MessagePriority.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [MessagingKt]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/messaging/ktx/MessagingKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [com.google.firebase.messaging]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/messaging/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [FirebaseMLException]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/FirebaseMLException.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCloudModelSource.Builder]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/modeldownload/FirebaseCloudModelSource.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseLocalModel]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/modeldownload/FirebaseLocalModel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseLocalModel.Builder]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/modeldownload/FirebaseLocalModel.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseLocalModelSource]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/modeldownload/FirebaseLocalModelSource.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseLocalModelSource.Builder]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/modeldownload/FirebaseLocalModelSource.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseModelDownloadConditions]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/modeldownload/FirebaseModelDownloadConditions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseModelDownloadConditions.Builder]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/modeldownload/FirebaseModelDownloadConditions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseRemoteModel] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/common/modeldownload/FirebaseRemoteModel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseCustomLocalModel] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseCustomLocalModel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelInputOutputOptions] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelInputOutputOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelInputOutputOptions.Builder] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelInputOutputOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelInputs] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelInputs.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelInputs.Builder] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelInputs.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelInterpreter] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelInterpreter.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelInterpreterOptions] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelInterpreterOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelOptions] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelOptions.Builder] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelOutputs] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/FirebaseModelOutputs.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseCloudModelSource] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/model/FirebaseCloudModelSource.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseLocalModelSource] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/model/FirebaseLocalModelSource.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseLocalModelSource.Builder] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/model/FirebaseLocalModelSource.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseModelDownloadConditions.Builder] (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/model/FirebaseModelDownloadConditions.Builder.md.txt>): Firebase gives you the tools and infrastructure you

need to build better mobile and web apps, improve app quality, and grow your business.

- [com.google.firebase.ml.custom]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/custom/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DownloadType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/modeldownloader/DownloadType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseModelDownloader]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/modeldownloader/FirebaseModelDownloader.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.ml.modeldownloader.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/modeldownloader/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseNaturalLanguage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/FirebaseNaturalLanguage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseLanguageIdentification]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/languageid/FirebaseLanguageIdentification.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.naturallanguage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseSmartReply]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/smartreply/FirebaseSmartReply.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [SmartReplySuggestion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/smartreply/SmartReplySuggestion.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [SmartReplySuggestionResult]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/smartreply/SmartReplySuggestionResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [SmartReplySuggestionResult.Status]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/smartreply/SmartReplySuggestionResult.Status.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.naturallanguage.smartreply]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/smartreply/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseTranslateLanguage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/translate/FirebaseTranslateLanguage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseTranslateLanguage.TranslateLanguage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/translate/FirebaseTranslateLanguage.TranslateLanguage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseTranslateRemoteModel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/translate/FirebaseTranslateRemoteModel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseTranslateRemoteModel.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/translate/FirebaseTranslateRemoteModel.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

late/FirebaseTranslateRemoteModel.Builder.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseTranslator]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/translate/FirebaseTranslator.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseTranslatorOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/translate/FirebaseTranslatorOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseTranslatorOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/translate/FirebaseTranslatorOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.naturallanguage.translate]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/naturallanguage/translate/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseSmartReply]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/text/FirebaseSmartReply.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAutoMLLocalModel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/automl/FirebaseAutoMLLocalModel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAutoMLLocalModel.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/automl/FirebaseAutoMLLocalModel.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseAutoMLRemoteModel.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/automl/FirebaseAutoMLRemoteModel.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.Address]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.Address.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.BarcodeFormat]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.BarcodeFormat.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.Email]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.Email.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.GeoPoint]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.GeoPoint.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.PersonName]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.PersonName.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.Phone]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.Phone.md.txt>): Firebase gives you the tools and infrastructure you need to build

better mobile and web apps, improve app quality, and grow your business.

- [FirebaseVisionBarcode.Phone.FormatType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.Phone.FormatType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.Sms]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.Sms.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.UrlBookmark]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.UrlBookmark.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.WiFi]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.WiFi.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcode.WiFi.EncryptionType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcode.WiFi.EncryptionType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcodeDetector]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcodeDetector.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcodeDetectorOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcodeDetectorOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionBarcodeDetectorOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/barcode/FirebaseVisionBarcodeDetectorOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudDetectorOptions.ModelType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/FirebaseVisionCloudDetectorOptions.ModelType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudLabel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/label/FirebaseVisionCloudLabel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudLabelDetector]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/label/FirebaseVisionCloudLabelDetector.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.cloud.label]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/label/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudLandmarkDetector]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/landmark/FirebaseVisionCloudLandmarkDetector.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.cloud.landmark]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/landmark/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudText.DetectedLanguage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudText.DetectedLanguage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudText.Paragraph]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudText.Paragraph.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseVisionCloudText.TextProperty]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudText.TextProperty.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudText.Word]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudText.Word.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudTextDetector]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/FirebaseVisionCloudTextDetector.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.cloud.text]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/cloud/text/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionImage]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/common/FirebaseVisionImage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionImageMetadata]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/common/FirebaseVisionImageMetadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionImageMetadata.Builder]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/common/FirebaseVisionImageMetadata.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionPoint]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/common/FirebaseVisionPoint.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.common]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/common/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionDocumentText]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/document/FirebaseVisionDocumentText.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionDocumentText.Block]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/document/FirebaseVisionDocumentText.Block.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionDocumentText.RecognizedBreak]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/document/FirebaseVisionDocumentText.RecognizedBreak.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionDocumentText.Word]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/document/FirebaseVisionDocumentText.Word.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionDocumentTextRecognizer]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/document/FirebaseVisionDocumentTextRecognizer.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.document]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/document/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better

mobile and web apps, improve app quality, and grow your business.

- [FirebaseVisionFaceDetector]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceDetector.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceDetectorOptions.ClassificationMode]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceDetectorOptions.ClassificationMode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceDetectorOptions.ContourMode]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceDetectorOptions.ContourMode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceDetectorOptions.LandmarkMode]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceDetectorOptions.LandmarkMode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceDetectorOptions.ModeType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceDetectorOptions.ModeType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceLandmark]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceLandmark.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionFaceLandmark.LandmarkType]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/face/FirebaseVisionFaceLandmark.LandmarkType.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudImageLabelerOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionCloudImageLabelerOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionImageLabel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionImageLabel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionLabel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionLabel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionLabelDetectorOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionLabelDetectorOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionOnDeviceAutoMLImageLabelerOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionOnDeviceAutoMLImageLabelerOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionOnDeviceImageLabelerOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/FirebaseVisionOnDeviceImageLabelerOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.label]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/label/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionObjectDetectorOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/objects/Fireba>

seVisionObjectDetectorOptions.Builder.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseVisionObjectDetectorOptions.DetectorMode]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/objects/FirebaseVisionObjectDetectorOptions.DetectorMode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.objects]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/objects/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudTextRecognizerOptions]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/FirebaseVisionCloudTextRecognizerOptions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionCloudTextRecognizerOptions.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/FirebaseVisionCloudTextRecognizerOptions.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionText]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/FirebaseVisionText.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [FirebaseVisionText.Element]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/FirebaseVisionText.Element.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [RecognizedLanguage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/RecognizedLanguage.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase.ml.vision.text]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/ml/vision/text/package-summary.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [com.google.firebase]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.perf.ktx]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/perf/ktx/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.perf.metrics]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/perf/metrics/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.perf]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/perf/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebasePhoneNumberVerificationException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/pnv/FirebasePhoneNumberVerificationException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [VerificationSupportResult]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/pnv/VerificationSupportResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [VerifiedPhoneNumberTokenResult]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/pnv/VerifiedPhoneNumberTokenResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.pnv]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/pnv/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseInitProvider]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/provider/FirebaseInitProvider.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

vider.md.txt): Firebase provides Android client SDKs for over 20 products and services.

- [ConfigUpdate]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/ConfigUpdate.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ConfigUpdateListenerRegistration]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/ConfigUpdateListenerRegistration.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CustomSignals.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/CustomSignals.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfigClientException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/FirebaseRemoteConfigClientException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfigException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/FirebaseRemoteConfigException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfigException.Code]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/FirebaseRemoteConfigException.Code.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfigServerException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/FirebaseRemoteConfigServerException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfigSettings]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/FirebaseRemoteConfigSettings.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfigSettings.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/FirebaseRemoteConfigSettings.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseRemoteConfigValue]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/FirebaseRemoteConfigValue.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [RemoteConfigKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/RemoteConfigKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.remoteconfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/remoteconfig/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FileDownloadTask]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/FileDownloadTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FileDownloadTask.TaskSnapshot]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/FileDownloadTask.TaskSnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseStorage]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/FirebaseStorage.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ListResult]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/ListResult.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [OnPausedListener]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/OnPausedListener.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StorageMetadata]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StorageMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [StorageTask.SnapshotBase]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StorageTask.SnapshotBase.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StreamDownloadTask]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StreamDownloadTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [StreamDownloadTask.StreamProcessor]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/StreamDownloadTask.StreamProcessor.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TaskState.Paused]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/TaskState.Paused.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UploadTask]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/UploadTask.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UploadTask.TaskSnapshot]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/UploadTask.TaskSnapshot.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TaskState]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/ktx/TaskState.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [TaskState.InProgress]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/storage/ktx/TaskState.InProgress.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseVertexAI.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/FirebaseVertexAI.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FirebaseVertexAIKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/FirebaseVertexAIKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerativeModel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/GenerativeModel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerativeModel.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/GenerativeModel.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenModel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/ImagenModel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerativeModelFutures]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/java/GenerativeModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenModelFutures]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/java/ImagenModelFutures.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenModelFutures.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/java/ImagenModelFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveSessionFutures.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/java/LiveSessionFutures.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.vertexai.java]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/java/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [AudioRecordInitializationFailedException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/AudioRecordInitializationFailedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [BlockReason]

(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/BlockReason.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [Citation]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/Citation.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [CitationMetadata]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/CitationMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Content]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/Content.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Content.Builder]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/Content.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ContentBlockedException]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ContentBlockedException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ContentModality]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ContentModality.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ContentModality.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ContentModality.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FinishReason.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FinishReason.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FourParameterFunction]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FourParameterFunction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionCallingConfig.Mode]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FunctionCallingConfig.Mode.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionDeclaration]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FunctionDeclaration.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionDeclarationsKt]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FunctionDeclarationsKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionParameter]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FunctionParameter.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionType]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FunctionType.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [FunctionType.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/FunctionType.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerateContentResponse]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/GenerateContentResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerationConfig]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/GenerationConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerationConfig.Builder]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/GenerationConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [GenerationConfig.Companion]
- (<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/GenerationConfig.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [HarmBlockThreshold]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/HarmBlockThreshold.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmBlockThreshold.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/HarmBlockThreshold.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmCategory.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/HarmCategory.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [HarmProbability.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/HarmProbability.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenAspectRatio.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenAspectRatio.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenPersonFilterLevel]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenPersonFilterLevel.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ImagenPersonFilterLevel.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ImagenPersonFilterLevel.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InlineDataPart]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/InlineDataPart.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [InvalidLocationException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/InvalidLocationException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveContentResponse]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveContentResponse.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveContentResponse.Status]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveContentResponse.Status.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveContentResponse.Status.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveContentResponse.Status.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerationConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveGenerationConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveGenerationConfig.Builder]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveGenerationConfig.Builder.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerContent]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveServerContent.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveServerToolCallCancellation]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveServerToolCallCancellation.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [LiveSession]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/LiveSession.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [MediaData]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/MediaData.md.txt>): Firebase provides Android client SDKs for over 20 products and services.

- [ModalityTokenCount]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ModalityTokenCount.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [NoParameterFunction]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/NoParameterFunction.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Part]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/Part.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [PartKt]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/PartKt.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SafetyRating]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/SafetyRating.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SerializationException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/SerializationException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ServiceDisabledException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ServiceDisabledException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [SpeechConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/SpeechConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Tool]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/Tool.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [ToolConfig]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/ToolConfig.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UnknownException]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/UnknownException.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [UsageMetadata]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/UsageMetadata.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [Voices.Companion]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/Voices.Companion.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [com.google.firebase.vertexai.type]
(<https://firebase.google.com/docs/reference/android/com/google/firebase/vertexai/type/package-summary.md.txt>): Firebase provides Android client SDKs for over 20 products and services.
- [DefaultLogger]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/DefaultLogger.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Fabric]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/Fabric.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Fabric.Builder]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/Fabric.Builder.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [KitGroup]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/KitGroup.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [DelegateProvider]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/DelegateProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [DependencyPriorityBlockingQueue]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/DependencyPriorityBlockingQueue.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PriorityAsyncTask]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/PriorityAsyncTask.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PriorityCallable]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/PriorityCallable.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PriorityFutureTask]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/PriorityFutureTask.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PriorityProvider]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/PriorityProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PriorityTask]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/PriorityTask.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [PriorityThreadPoolExecutor]
(<https://firebase.google.com/docs/reference/android/io/fabric/sdk/android/fabric/services/concurrency/PriorityThreadPoolExecutor.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.releases](<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.releases.feedbackReports]
(<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases.feedbackReports.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.releases.feedbackReports.delete]
(<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases.feedbackReports/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.releases.feedbackReports.get]
(<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases.feedbackReports/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.releases.feedbackReports.list]
(<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases.feedbackReports/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.releases.operations]
(<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases.operations.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.releases.operations.get]
(<https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases.operations/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.releases.batchDelete](https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases/batchDelete.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.releases.distribute](https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases/distribute.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.releases.patch](https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps.releases/patch.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.getAabInfo](https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.apps/getAabInfo.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.groups.create](https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.groups/create.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.groups.get](https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.groups/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.groups.patch](https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.groups/patch.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.testers](https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.testers.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.testers.patch](https://firebase.google.com/docs/reference/app-distribution/rest/v1/projects.testers/patch.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase App Check API](https://firebase.google.com/docs/reference/appcheck/rest.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [AppCheckToken]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/AppCheckToken.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ExchangeAppAttestAttestationResponse]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/ExchangeAppAttestAttestationResponse.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [GenerateAppAttestChallengeResponse]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/GenerateAppAttestChallengeResponse.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: jwks.get]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/jwks/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: oauthClients.exchangeAppAttestAssertion]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/oauthClients/exchangeAppAttestAssertion.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: oauthClients.generateAppAttestChallenge]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/oauthClients/generateAppAttestChallenge.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [REST Resource: projects.apps.appAttestConfig]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.appAttestConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.appAttestConfig.patch]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.appAttestConfig/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.deviceCheckConfig]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.deviceCheckConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.deviceCheckConfig.get]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.deviceCheckConfig/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.playIntegrityConfig]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.playIntegrityConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.playIntegrityConfig.batchGet]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.playIntegrityConfig/batchGet.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaEnterpriseConfig.get]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.recaptchaEnterpriseConfig/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaEnterpriseConfig.patch]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.recaptchaEnterpriseConfig/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.recaptchaV3Config]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.recaptchaV3Config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaV3Config.batchGet]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.recaptchaV3Config/batchGet.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaV3Config.patch]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps.recaptchaV3Config/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangeAppAttestAssertion]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps/exchangeAppAttestAssertion.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangeAppAttestAttestation]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps/exchangeAppAttestAttestation.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangeDebugToken]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps/exchangeDebugToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangeDeviceCheckToken]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps/exchangeDeviceCheckToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangePlayIntegrityToken]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps/exchangePlayIntegrityToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

Token.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.exchangeRecaptchaV3Token]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps/exchangeRecaptchaV3Token.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.generatePlayIntegrityChallenge]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.apps/generatePlayIntegrityChallenge.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.services.resourcePolicies]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services.resourcePolicies.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.resourcePolicies.batchUpdate]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services.resourcePolicies/batchUpdate.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.resourcePolicies.create]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services.resourcePolicies/create.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.resourcePolicies.get]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services.resourcePolicies/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.resourcePolicies.list]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services.resourcePolicies/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.list]
(https://firebase.google.com/docs/reference/appcheck/rest/v1/projects.services/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ExchangeAppAttestAttestationResponse]
(https://firebase.google.com/docs/reference/appcheck/rest/v1beta/ExchangeAppAttestAttestationResponse.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [GenerateAppAttestChallengeResponse]
(https://firebase.google.com/docs/reference/appcheck/rest/v1beta/GenerateAppAttestChallengeResponse.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: jwks.get]
(https://firebase.google.com/docs/reference/appcheck/rest/v1beta/jwks/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: oauthClients.exchangeAppAttestAttestation]
(https://firebase.google.com/docs/reference/appcheck/rest/v1beta/oauthClients/exchangeAppAttestAttestation.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps]
(https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.appAttestConfig.batchGet]
(https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.appAttestConfig/batchGet.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.appAttestConfig.get]
(https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.appAttestConfig/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.debugTokens.create]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.debugTokens/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.debugTokens.patch]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.debugTokens/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.deviceCheckConfig]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.deviceCheckConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.playIntegrityConfig]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.playIntegrityConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.playIntegrityConfig.batchGet]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.playIntegrityConfig/batchGet.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.playIntegrityConfig.get]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.playIntegrityConfig/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.playIntegrityConfig.patch]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.playIntegrityConfig/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.recaptchaConfig]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaConfig.patch]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaConfig/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.recaptchaEnterpriseConfig]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaEnterpriseConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaEnterpriseConfig.batchGet]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaEnterpriseConfig/batchGet.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaV3Config.get]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaV3Config/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.recaptchaV3Config.patch]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps.recaptchaV3Config/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangeAppAttestAssertion]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps/exchangeAppAttestAssertion.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangeCustomToken]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps/exchangeCustomToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.exchangeDebugToken]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps/exchangeDebugToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

n.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.apps.exchangeRecaptchaEnterpriseToken]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps/exchangeRecaptchaEnterpriseToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.apps.generateAppAttestChallenge]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.apps/generateAppAttestChallenge.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.resourcePolicies.batchUpdate]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.services.resourcePolicies/batchUpdate.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.resourcePolicies.delete]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.services.resourcePolicies/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.resourcePolicies.get]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.services.resourcePolicies/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.resourcePolicies.patch]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.services.resourcePolicies/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.services.batchUpdate]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects.services/batchUpdate.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.verifyAppCheckToken]
(<https://firebase.google.com/docs/reference/appcheck/rest/v1beta/projects/verifyAppCheckToken.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Status](<https://firebase.google.com/docs/reference/apphosting/rest/v1/Status.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase App Hosting API Version v1: Error Catalog]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/errors.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.backends.builds]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.builds.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.builds.create]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.builds/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.builds.get]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.builds/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.builds.list]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.builds/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.domains.create]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.domains/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.domains.delete]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.domains/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.backends.domains.get]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.domains/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.backends.rollouts.create]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.rollouts/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.backends.rollouts.get]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.rollouts/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.backends.rollouts.list]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.rollouts/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.backends.traffic.get]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends.traffic/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.backends.create]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.backends/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [REST Resource: projects.locations.operations]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.operations.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.operations.delete]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.operations/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.operations.list]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations.operations/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.get]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.list]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1/projects.locations/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Status](<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/Status.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [REST Resource: projects.locations.backends]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [REST Resource: projects.locations.backends.builds]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.builds.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.backends.builds.list]

(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.builds/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [REST Resource: projects.locations.backends.domains]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.domains.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.domains.get]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.domains/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.domains.patch]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.domains/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.backends.rollouts]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.rollouts.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.rollouts.get]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.rollouts/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.rollouts.list]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.rollouts/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.backends.traffic]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.traffic.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.traffic.get]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.traffic/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.traffic.patch]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends.traffic/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.delete]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.backends.get]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.backends/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.operations.cancel]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.operations/cancel.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.operations.list]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations.operations/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.get]
(<https://firebase.google.com/docs/reference/apphosting/rest/v1beta/projects.locations/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::app_check::AppAttestProviderFactory Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/app-check/app-attest-provider-factory.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::app_check::AppCheck Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/app-check/app-check.md.txt>):

Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [firebase::app_check::AppCheckListener Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/app-check/app-check-listener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::app_check::AppCheckProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/app-check/app-check-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::app_check::AppCheckProviderFactory Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/app-check/app-check-provider-factory.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::app_check::DebugAppCheckProviderFactory Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/app-check/debug-app-check-provider-factory.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::app_check::DeviceCheckProviderFactory Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/app-check/device-check-provider-factory.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::app_check::PlayIntegrityProviderFactory Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/app-check/play-integrity-provider-factory.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::AppOptions Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/app-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::Auth Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::Credential Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/credential.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::EmailAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/email-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::FederatedOAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/federated-o-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::GitHubAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/git-hub-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::GoogleAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/google-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::MicrosoftAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/microsoft-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::PhoneAuthCredential Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/phone-auth-credential.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [firebase::auth::PhoneAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/phone-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::PhoneAuthProvider::ForceResendingToken Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/phone-auth-provider/force-resending-token.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::PlayGamesAuthProvider Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/play-games-auth-provider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::User Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/user.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::UserInfoInterface Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/auth/user-info-interface.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::database::ChildListener Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/database/child-listener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::database::DisconnectionHandler Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/database/disconnection-handler.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::database::Query Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/database/query.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::database::ValueListener Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/database/value-listener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::AggregateQuerySnapshot Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/aggregate-query-snapshot.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::DocumentReference Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/document-reference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::FieldPath Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/field-path.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::FieldValue Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/field-value.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::Filter Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/filter.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::GeoPoint Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/geo-point.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::ListenerRegistration Class Reference]
([<https://firebase.google.com/docs/lms.txt>](https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/listener-

</div>
<div data-bbox=)

registration.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [firebase::firestore::Query Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/query.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::SetOptions Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/set-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::SnapshotMetadata Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/snapshot-metadata.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::TransactionOptions Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/transaction-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::WriteBatch Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/firestore/write-batch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::functions::Functions Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/functions/functions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::functions::HttpsCallableReference Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/functions/https-callable-reference.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::functions::HttpsCallableResult Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/functions/https-callable-result.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::FutureBase Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/future-base.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::FutureHandle Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/future-handle.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::installations::Installations Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/installations/installations.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::remote_config::RemoteConfig Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/remote-config/remote-config.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::storage::Controller Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/storage/controller.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::Variant Class Reference]
(<https://firebase.google.com/docs/reference/cpp/class/firebase/variant.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::app_check Namespace]
(<https://firebase.google.com/docs/reference/cpp/namespace/firebase/app-check.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [firebase::auth Namespace]
(<https://firebase.google.com/docs/reference/cpp/namespace/firebase/auth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore Namespace]
(<https://firebase.google.com/docs/reference/cpp/namespace/firebase/firestore.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::functions Namespace]
(<https://firebase.google.com/docs/reference/cpp/namespace/firebase/functions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::firestore::EventListener Class Reference]
(<https://firebase.google.com/docs/reference/cpp/other/singletonfirebase/firestore/event-listener.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::app_check::AppCheckToken Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/app-check/app-check-token.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::PhoneAuthOptions Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/auth/phone-auth-options.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::auth::User::UserProfile Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/auth/user/user-profile.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::messaging::Message Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/messaging/message.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::messaging::Notification Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/messaging/notification.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::remote_config::ConfigKeyValue Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/remote-config/config-key-value.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::remote_config::ConfigKeyValueVariant Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/remote-config/config-key-value-variant.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::remote_config::ValueInfo Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/remote-config/value-info.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase::ump::ConsentRequestParameters Struct Reference]
(<https://firebase.google.com/docs/reference/cpp/struct/firebase/ump/consent-request-parameters.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [std::hash Struct Reference](<https://firebase.google.com/docs/reference/cpp/struct/std/hash-firebase/firestore/field-path-.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase Crashlytics API]
(<https://firebase.google.com/docs/reference/crashlytics/rest.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.apps.users]
(<https://firebase.google.com/docs/reference/crashlytics/rest/v1alpha/projects.apps.users.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps,

improve app quality, and grow your business.

- [Directives](https://firebase.google.com/docs/reference/data-connect/gql/directive.md.txt): Firebase Data Connect is a Backend-as-a-Service powered by Cloud SQL for PostgreSQL.
- [Inputs Object Types](https://firebase.google.com/docs/reference/data-connect/gql/input_object.md.txt): Firebase Data Connect is a Backend-as-a-Service powered by Cloud SQL for PostgreSQL.
- [Mutation Operations](https://firebase.google.com/docs/reference/data-connect/gql/mutation.md.txt): Firebase Data Connect is a Backend-as-a-Service powered by Cloud SQL for PostgreSQL.
- [GraphQLError](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/GraphQLError.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.operations.cancel](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.operations/cancel.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.operations.delete](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.operations/delete.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.operations.list](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.operations/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.services](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.locations.services.connectors](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.connectors.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.connectors.executeQuery](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.connectors/executeQuery.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.connectors.get](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.connectors/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.connectors.list](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.connectors/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.schemas.list](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services.schemas/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.delete](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services/delete.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.locations.services.get](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.services.list](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations.services/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.locations.list](https://firebase.google.com/docs/reference/data-connect/rest/v1beta/projects.locations/list.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [REST Resource: projects.androidApps.deliveryData](https://firebase.google.com/docs/reference/fcmdata/rest/v1beta1/projects.androidApps.deliveryData.md.txt): The Firebase Cloud Messaging Data API provides detailed information about Firebase Cloud Messaging (FCM) message sends and deliveries to Android devices.
- [Method: projects.androidApps.deliveryData.list](https://firebase.google.com/docs/reference/fcmdata/rest/v1beta1/projects.androidApps.deliveryData/list.md.txt): The Firebase Cloud Messaging Data API provides detailed information about Firebase Cloud Messaging (FCM) message sends and deliveries to Android devices.
- [State](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/State.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: operations.get](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/operations/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.androidApps.sha](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps.sha.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.androidApps.sha.delete](https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps.sha/delete.md.txt): Firebase gives you the tools

and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.androidApps.create](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.androidApps.remove](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps/remove.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.androidApps.undelete](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.androidApps/undelete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.defaultLocation.finalize](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.defaultLocation/finalize.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.iosApps](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.iosApps.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.iosApps.patch](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.iosApps/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.iosApps.remove](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.iosApps/remove.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.iosApps.undelete](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.iosApps/undelete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.webApps.create](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.webApps/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.webApps.get](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.webApps/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.webApps.getConfig](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.webApps/getConfig.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.webApps.patch](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects.webApps/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.addFirebase](<https://firebase.google.com/docs/reference/firebase-management/rest/v1beta1/projects/addFirebase.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Cloud Firestore Index Definition Reference](<https://firebase.google.com/docs/reference/firestore/indexes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [alerts namespace](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS

requests.

- [alerts.AlertEvent interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.alertevent.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.appDistribution namespace](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.appdistribution.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.appDistribution.InAppFeedbackPayload interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.appdistribution.inappfeedbackpayload.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.appDistribution.NewTesterDevicePayload interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.appdistribution.newtesterdevicepayload.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.billing namespace](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.billing.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.billing.BillingEvent interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.billing.billingevent.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.crashlytics.Issue interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.crashlytics.issue.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.crashlytics.NewFatalIssuePayload interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.crashlytics.newfatalissuepayload.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.crashlytics.RegressionAlertPayload interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.crashlytics.regressionalertpayload.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.crashlytics.StabilityDigestPayload interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.crashlytics.stabilitydigestpayload.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.crashlytics.TrendingIssueDetails interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.crashlytics.trendingissuedetails.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.crashlytics.VelocityAlertPayload interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.crashlytics.velocityalertpayload.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [alerts.FirebaseAlertOptions interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.firebasealertoptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.

- [alerts.performance.PerformanceEvent interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.alerts.performance.performanceevent.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [CloudFunction interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.cloudfunction.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [database.DatabaseEvent interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.database.databaseevent.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [database.RawRTDBCloudEvent interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.database.rawrtdbcloudevent.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [database.ReferenceOptions interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.database.referenceoptions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [dataconnect.RawDataConnectEvent interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.dataconnect.rawdataconnectevent.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [dataconnect.RawMutation interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.dataconnect.rawmutation.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [eventarc namespace](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.eventarc.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [eventarc.EventarcTriggerOptions interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.eventarc.eventarctriggeroptions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [firestore namespace](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.firestore.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [firestore.Change class](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.firestore.change.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [firestore.DocumentOptions interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.firestore.documentoptions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [firestore.FirestoreAuthEvent interface]
(<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.firestore.firestoreauthevent.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [firestore.FirestoreEvent interface](<https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.firestore.firestoreevent.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events

triggered by Firebase features and HTTPS requests.

- [https.CallableFunction interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.callablefunction.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https.CallableOptions interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.callableoptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https.CallableRequest interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.callablerequest.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https.CallableResponse interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.callableresponse.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https.HttpsError class](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.httpserror.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https.HttpsOptions interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.httpsoptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https.TaskQueueFunction interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.taskqueuefunction.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [https.TaskQueueOptions interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.taskqueueoptions.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [https.TaskRequest interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.https.taskrequest.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [identity namespace](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.identity.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [identity.AuthBlockingEvent interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.identity.authblockingevent.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [identity.AuthUserRecord interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.identity.authuserrecord.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.IntParam class](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.intparam.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.Param class](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.param.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.SelectInput interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.selectinput.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.

- [params.StringParam class](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.params.stringparam.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [pubsub namespace](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.pubsub.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [pubsub.MessagePublishedData interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.pubsub.messagepublisheddata.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [remoteConfig namespace](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.remoteconfig.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [remoteConfig.ConfigUpdateData interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.remoteconfig.configupdatedata.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [remoteConfig.ConfigUser interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.remoteconfig.configuser.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [scheduler.ScheduledEvent interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.scheduler.scheduledevent.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [storage.StorageObjectData interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.storage.storageobjectdata.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [storage.StorageOptions interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.storage.storageoptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks namespace](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.tasks.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks.RateLimits interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.tasks.ratelimits.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks.Request interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.tasks.request.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks.TaskQueueOptions interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.tasks.taskqueueoptions.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [testLab.ClientInfo interface](https://firebase.google.com/docs/reference/functions/2nd-gen/node/firebase-functions.testlab.clientinfo.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [Firebase Python SDK for Cloud Functions](https://firebase.google.com/docs/reference/functions/2nd-gen/python.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality,

and grow your business.

- [firebase_functions.alerts.billing_fn module]
(https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.alerts.billing_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.alerts.performance_fn module]
(https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.alerts.performance_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.alerts_fn module]
(https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.alerts_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.firestore_fn module]
(https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.firestore_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.https_fn module](https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.https_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.identity_fn module]
(https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.identity_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.logger module](https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.logger.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.pubsub_fn module]
(https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.pubsub_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.scheduler_fn module]
(https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.scheduler_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.storage_fn module]
(https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.storage_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase_functions.test_lab_fn module]
(https://firebase.google.com/docs/reference/functions/2nd-gen/python/firebase_functions.test_lab_fn.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [firebase-functions package](<https://firebase.google.com/docs/reference/functions/firebase-functions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [analytics.AnalyticsEvent class]
(<https://firebase.google.com/docs/reference/functions/firebase-functions.analytics.analyticsevent.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [analytics.AnalyticsEventBuilder class]
(<https://firebase.google.com/docs/reference/functions/firebase-functions.analytics.analyticseventbuilder.md.txt>): Cloud Functions for Firebase is a serverless

framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.

- [analytics.GeoInfo interface](https://firebase.google.com/docs/reference/functions/firebase-functions.analytics.geoinfo.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [analytics.UserPropertyValue class](https://firebase.google.com/docs/reference/functions/firebase-functions.analytics.userpropertyvalue.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [auth.HttpsError class](https://firebase.google.com/docs/reference/functions/firebase-functions.auth.httperror.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [auth.UserBuilder class](https://firebase.google.com/docs/reference/functions/firebase-functions.auth.userbuilder.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [CloudFunction interface](https://firebase.google.com/docs/reference/functions/firebase-functions.cloudfunction.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [FailurePolicy interface](https://firebase.google.com/docs/reference/functions/firebase-functions.failurepolicy.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [firestore namespace](https://firebase.google.com/docs/reference/functions/firebase-functions.firestore.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [firestore.DatabaseBuilder class](https://firebase.google.com/docs/reference/functions/firebase-functions.firestore.databasebuilder.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [firestore.NamespaceBuilder class](https://firebase.google.com/docs/reference/functions/firebase-functions.firestore.namespacebuilder.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https namespace](https://firebase.google.com/docs/reference/functions/firebase-functions.https.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https.CallableContext interface](https://firebase.google.com/docs/reference/functions/firebase-functions.https.callablecontext.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https.HttpsError class](https://firebase.google.com/docs/reference/functions/firebase-functions.https.httperror.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [https.Request interface](https://firebase.google.com/docs/reference/functions/firebase-functions.https.request.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [logger.LogEntry interface](https://firebase.google.com/docs/reference/functions/firebase-functions.logger.logentry.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.

- [params.Expression class](<https://firebase.google.com/docs/reference/functions/firebase-functions.params.expression.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.MultiSelectInput interface](<https://firebase.google.com/docs/reference/functions/firebase-functions.params.multiselectinput.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [params.TextInput interface](<https://firebase.google.com/docs/reference/functions/firebase-functions.params.textinput.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [pubsub.ScheduleBuilder class](<https://firebase.google.com/docs/reference/functions/firebase-functions.pubsub.schedulebuilder.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [remoteConfig namespace](<https://firebase.google.com/docs/reference/functions/firebase-functions.remoteconfig.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [remoteConfig.RemoteConfigUser interface](<https://firebase.google.com/docs/reference/functions/firebase-functions.remoteconfig.remoteconfiguser.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [remoteConfig.UpdateBuilder class](<https://firebase.google.com/docs/reference/functions/firebase-functions.remoteconfig.updatebuilder.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [RuntimeOptions interface](<https://firebase.google.com/docs/reference/functions/firebase-functions.runtimeoptions.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [storage.BucketBuilder class](<https://firebase.google.com/docs/reference/functions/firebase-functions.storage.bucketbuilder.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [storage.ObjectBuilder class](<https://firebase.google.com/docs/reference/functions/firebase-functions.storage.objectbuilder.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [storage.ObjectMetadata interface](<https://firebase.google.com/docs/reference/functions/firebase-functions.storage.objectmetadata.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks.TaskContext interface](<https://firebase.google.com/docs/reference/functions/firebase-functions.tasks.taskcontext.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [tasks.TaskQueueBuilder class](<https://firebase.google.com/docs/reference/functions/firebase-functions.tasks.taskqueuebuilder.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [testLab namespace](<https://firebase.google.com/docs/reference/functions/firebase-functions.testlab.md.txt>): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [testLab.ClientInfo class](<https://firebase.google.com/docs/reference/functions/firebase-functions.testlab.clientinfo.md.txt>): Cloud Functions for Firebase is a serverless framework

that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.

- [testLab.TestMatrix class](https://firebase.google.com/docs/reference/functions/firebase-functions.testlab.testmatrix.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [testLab.TestMatrixBuilder class](https://firebase.google.com/docs/reference/functions/firebase-functions.testlab.testmatrixbuilder.md.txt): Cloud Functions for Firebase is a serverless framework that lets you automatically run backend code in response to events triggered by Firebase features and HTTPS requests.
- [Interface: DocumentBuilder](https://firebase.google.com/docs/reference/functions/test/functions.firestore.DocumentBuilder.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Index All](https://firebase.google.com/docs/reference/functions/test/index-all.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Namespace: test](https://firebase.google.com/docs/reference/functions/test/test.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Namespace: auth](https://firebase.google.com/docs/reference/functions/test/test.auth.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Namespace: database](https://firebase.google.com/docs/reference/functions/test/test.database.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Namespace: firestore](https://firebase.google.com/docs/reference/functions/test/test.firestore.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Firebase Hosting API](https://firebase.google.com/docs/reference/hosting/rest.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ActingUser](https://firebase.google.com/docs/reference/hosting/rest/v1beta1/ActingUser.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [ListReleasesResponse](https://firebase.google.com/docs/reference/hosting/rest/v1beta1/ListReleasesResponse.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Status](https://firebase.google.com/docs/reference/hosting/rest/v1beta1/Status.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.operations](https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.operations.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.operations.get](https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.operations/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: projects.sites](https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.customDomains.operations.get](https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites.customDomains.operations/get.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: projects.sites.customDomains.create]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites.customDomains/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.customDomains.get]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites.customDomains/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.customDomains.list]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites.customDomains/list.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.customDomains.patch]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites.customDomains/patch.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: projects.sites.customDomains.delete]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/projects.sites.customDomains/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: sites.channels.releases]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.channels.releases.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.channels.releases.create]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.channels.releases/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.channels.releases.get]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.channels.releases/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.channels.create]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.channels/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.channels.delete]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.channels/delete.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.channels.get]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.channels/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: sites.releases]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.releases.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.releases.get]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.releases/get.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [REST Resource: sites.versions.files]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.versions.files.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.versions.create]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.versions/create.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
- [Method: sites.versions.delete]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.versions/delete.md.txt>):

Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [Method: sites.versions.populateFiles]
(<https://firebase.google.com/docs/reference/hosting/rest/v1beta1/sites.versions/populateFiles.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseABTesting Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseabtesting/api/reference/Classes/FIRExperimentController.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseABTesting Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseabtesting/api/reference/Classes/FIRLifecycleEvents.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseABTesting Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseabtesting/api/reference/Constants.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseABTesting Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseabtesting/api/reference/Enums.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Classes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Classes/FIRAppAttestProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Classes/FIRDeviceCheckProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Constants.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Enums.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Enums/FIRAppCheckErrorCode.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppCheck Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseappcheck/api/reference/Protocols/FIRAppCheckProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppDistribution Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseappdistribution/api/reference/Constants.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAppDistribution Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseappdistribution/api/reference/Enums.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRAuth.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRAuthDataRe>

sult.md.txt): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIREmailAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRFacebookAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRGameCenterAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRGitHubAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRGoogleAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRMultiFactorInfo.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRPhoneAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRTOTPMultiFactorGenerator.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRTwitterAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Classes/FIRUser.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Constants.md.txt>)

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Protocols.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Protocols/FIRFederatedAuthProvider.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseAuth Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebaseauth/api/reference/Type-Definitions.md.txt>)

- [FirebaseCore Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebasecore/api/reference/Classes/FIRApp.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]
(<https://firebase.google.com/docs/reference/ios/firebasecore/api/reference/Classes/FIRConfiguration.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and

web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecore/api/reference/Enums.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecore/api/reference/Functions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCore Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecore/api/reference/Type-Definitions.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseCrashlytics Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasecrashlytics/api/reference/Classes/FIRCrashlytics.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedatabase/api/reference/Classes/FIRMutableData.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedatabase/api/reference/Classes/FIRServerValue.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedatabase/api/reference/Classes/FIRTransactionResult.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDatabase Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedatabase/api/reference/Enums.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedynamiclinks/api/reference/Classes.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedynamiclinks/api/reference/Classes/FIRDynamicLink.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedynamiclinks/api/reference/Classes/FIRDynamicLinkAndroidParameters.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedynamiclinks/api/reference/Classes/FIRDynamicLinkComponents.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedynamiclinks/api/reference/Classes/FIRDynamicLinkItunesConnectAnalyticsParameters.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedynamiclinks/api/reference/Classes/FIRDynamicLinkNavigationInfoParameters.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedynamiclinks/api/reference/Classes/FIRDynamicLinkOtherPlatformParameters.md.txt>): Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.

- [FirebaseDynamicLinks Framework Reference]
<https://firebase.google.com/docs/reference/ios/firebasedynamiclinks/api/reference/Enums.md.txt>
 : Firebase gives you the tools and infrastructure you need to build better mobile and web apps, improve app quality, and grow your business.
